AGRICULTURAL STATISTICS

OF

INDIA

FOR THE YEARS

1905-06 TO 1909-10

VOLUME I—BRITISH INDIA

Prefatory Note

In 1866 a set of tables, proposed by a specially appointed Statistical Committee, was prescribed by the Government of India for general adoption as appendices to the annual reports on general administration.

In 1884, at the instance of the Secretary of State for India, some of these forms, relating to agriculture, land, and tenures were re-considered and modified after examination and discussion by a conference of officers of the Agricultural Departments. The modified tables, eight in number, were compiled for the first time for 1884-85, and published under the title of 'Returns of Agricultural Statistics of British India.' These tables were prepared and published annually until 1887-88, when a re-arrangement was made of the headings of four statements dealing with area, irrigation, crops, and agricultural stock, though no modification was made in substance.

In 1891, the tables were again revised and, to some extent, re-cast. The revised series of 1891 has, with a few unimportant alterations, been maintained to the present time, with the exception that two tables (wholesale prices and varieties of tenure) have been discontinued, other arrangements having been made to secure a record of prices.

The following schedule compares the three series of 1866, 1884, and 1891 :—

1866	1884	1891
IA. 1.—Area cultivated and uncultivated.	A.—Area cultivated and uncultivated.	A.—Total acreage, classification of areas (including irrigation), area under crops, and stock.
	Irrigation.	
IIID. 1.—Crops cultivated.	B.—Crops cultivated.	B.—Prices of produce. (Discontinued from 1894-95.)
IIID. 2.—Agricultural stock.	IIID. 2.—Agricultural stock.	
IIIE. 1.—Prices of produce.	IIIE. 1.—Prices of produce.	C.—Incidence of the land revenue on area and population.
IE. 2.—Surveyed and assessed area.	C.—Surveyed and assessed area.	
IE. 3.—Varieties of tenure held direct from Government.	IE. 3.—Varieties of tenure held direct from Government.	D.—Varieties of tenure held direct from Government. (Discontinued from 1901-02.) (Discontinued)
IE. 4.—Varieties of tenure not held direct from Government.	(Discontinued)	
IE. 5.—Register of transfers.	IE. 5.—Register of transfers.	E.—Register of transfers of landed property. (Discontinued)
IIID. 3.—Rates of rent and produce.	(Discontinued)	

The tables of the series of 1891 as published in this volume consist of six separate tables numbered, 1 (area), 2 (classification of area), 3 (area under crops), 4 (live-stock, etc.), 5 (land revenue), and 6 (transfers of land). Each table gives the figures for each province for five years, with a total for British India, and is followed by subsidiary statements numbered 1-A, 1-B, 1-C, etc., giving similar figures for each district in each province. Besides these there is an Appendix consisting of two statements of a special nature, which deal with A—average yield per acre of principal crops, and B—changes in district, divisional, and provincial boundaries. Statement B is explanatory of the variations in the areas shown in table No. 1.

The general scope of the figures given in these tables may be explained as follows:—

The total area of India is 1,138,075,482 acres, or 1,778,243 square miles, with a population of 315 millions. This may be divided as follows:—

	Acres.	Population.
(1) British Provinces (including Native States under the control of Local Governments) .	753,728,835	268,420,769
(2) Native States under the control of the Government of India	317,421,207	44,711,510
(3) Certain Native States (i.e., Shan States) in Burma not included under (1)	37,065,600(a)	1,358,498
(4) British Baluchistan (including administered areas)	29,859,840	488,016

The area of British Baluchistan is excluded entirely from the Agricultural Statistics of India. The area of British Provinces only is dealt with in this volume—tables 1—6 and Appendix B. In Appendix A figures relating to the State of Mysore are included. Volume II deals only with Native States.

The total area of the British Provinces dealt with in this volume—753,728,835 acres, or 1,177,700 square miles—includes 129,412,749 acres, with a population of over 26 millions, belonging to Feudatory and Tributary States which are under the political control of Local Governments. These include, in Burma, the Mông Mit State, the Hsawngsup State, the Singkaling State, and the Chindwin States; in Eastern Bengal and Assam, the Khási and Jaintiá Hill States, Manipur, and Hill Tippera; in Bengal, Cooch Bihar, and the Tributary States of Orissa and Oota Nagpur; in the United Provinces, Rampur and Tehri; in the Panjab, the Phulkian States, Bahawalpur, the Delhi, and the Jallandhar Division States, and the Simla Hill States; in the North-West Frontier Province, the Phulera and the Upper Tanawal States; in Sind, the Khairpur State; in Bombay, the Gujarat States (excluding Baroda), the Konkan States, the Satara Jagirs, and the Southern Maratha States; in the Central Provinces, the Obhattigarh States; in Madras, the States of Travancore, Cochin, Pudukkottai, Banganapalle, and Sandur. Of these States Agricultural Statistics are prepared for most of the States in the Panjab, and all the States in Madras; but they are dealt with in Volume II along with the States under the control of the Government of India. Thus by deducting 129,412,749 acres belonging to Feudatory and Tributary States from the total area of 753,728,835 acres included in British Provinces, a balance of 624,316,086 acres is left, as shown in table No. 1, which represents the area of British territory for which Agricultural Statistics are forthcoming. These statistics are, however, prepared in a number of provinces or parts of provinces from

(a) As stated in the Census Report of 1901.

village papers; and the area given in the village papers of the United Provinces, the Central Provinces, Madras, the Panjab, and the North-West Frontier Province differs to some extent from the area ascertained by professional survey. The actual area, therefore, for which statistics are prepared is 621,728,751 acres, or 971,451 square miles.

About two-thirds of this area is available for cultivation; 81,189,511 acres are under forests; and land absolutely barren or unculturable or covered by buildings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 157,625,834 acres. The balance 382,913,406 acres represents the area available for cultivation, of which 222,911,930 acres were actually cropped during the year. The remainder is divided between current fallows (45,336,274 acres) and land available for cultivation but not cultivated and not classed as current fallows (114,665,202 acres).

Table No. 3 shows the number of acres cultivated with each kind of crop in each year. In the case of land from which more than one crop is taken, the area actually cultivated with each crop is shown under each crop-heading, but the total number of acres from which more than one crop was taken in the year is also recorded. Thus, in 1909-10, the total area cultivated with different crops was 253,921,247 acres. But 31,009,317 acres were cropped more than once. The net area cropped according to the available statistics is therefore only 222,911,930 acres.

The proportion which this area bears to the whole area of India may be seen from the following summary:—

	Acres.
Total area of India	1,138,075,482
<i>Deduct.</i> —Area not dealt with in this Volume—	
1. British Baluchistan	29,859,840
2. Shan States	37,065,600
3. Native States under the Government of India (partly dealt with in Volume II)	317,421,207
Balance dealt with in this Volume, (table I and Appendix B)	753,728,835
<i>Deduct.</i> —Tributary and Feudatory States under Local Governments (partly dealt with in Volume II)	129,412,749
Balance (British territory) for which Agricultural Statistics are prepared	624,316,086
Corresponding area in village papers	621,728,751
<i>Deduct.</i> —Area not available for cultivation—	
1. Forests	81,189,511
2. Others	157,625,834
Balance available for cultivation—	
1. Uncultivated	114,665,202
2. Fallow	45,336,274
3. Actually-cropped	222,911,930

The notes prefixed to each table explain the changes which have been made since 1866 in the tables now published. The general instructions for compilation are given in the General Notes, and local peculiarities or methods of compilation are mentioned in the Provincial Notes.

Such statistics as have been supplied for the permanently-settled tracts of Bengal and Eastern Bengal have been included in the tables since 1892-93, but, with the exception of the North Bihar and Orissa districts in Bengal and Chittagong and Backerganj in Eastern Bengal, which have recently been

surveyed, they are not based upon accurate surveys or village papers, and must therefore for the most part be regarded as estimates.

The Native States from which agricultural statistics are received are Mysore, from 1886-87 ; Jaipur, from 1892-93 ; Gwallor, from 1896-97 ; Bikaner, Marwar and Tonk, from 1898-99 ; Alwar, Bharatpur, Kishangarh, Jhalawar and Kotah, from 1900-01 ; Indore, Rajgarh, Narsingarh, Nagod, Patiala, Nabha and Bahawalpur from 1907-08 ; Jhind, Faridkot, Kalsia, Pataudi, Loharu, Dujana, Sirmur, Kapurthala, Malerkotla, Simla Hill States, Bhopal, Barwani, Travancore, Cochin, Sundur, Banganapalle, and Puddukottai from 1908-09. The statistics relating to all these States, which in some cases are very imperfect, are separately printed as Volume II.

Certain statements are prepared for the Agricultural (or the Revenue) year which ends on different dates in different provinces :

Year ending 31st March	in Bengal, Eastern Bengal and Assam, Coorg, and Manpur ;
" " 31st May	in the Central Provinces and Berar ;
" " 30th June	in Madras, the United Provinces, Burma, and Ajmer-Merwara ;
" " 31st July	in Bombay ;
" " 30th September	in the Panjab and the North-West Frontier Province.

The crop statistics, however, in every province refer to the year closing with the harvesting of the *rabi* or spring crop.

A glossary is attached to this note giving the meaning of vernacular words used in the explanatory notes which are prefixed to the tables in this volume.

Vernacular terms used in the Explanatory Notes.

- Bané** (Coorg).—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.
- Bhagdari**.—See *Naradari*.
- Gorait** (United Provinces).—Village watchman.
- Indám** (Madras).—Whole *indám* villages are entire villages held on such tenure; *minor indáms* are portions of villages, generally a number of fields held on *indám* tenure.
- Istamrári** (Panjab, Ajmer-Merwara).—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.
- Isáfat** (Bombay).—A form of service tenure.
- Isára** (Berar).—Land leased under the waste-land rules on stipulated terms.
- Jagír** (Berar).—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.
- (Ajmer-Merwara).—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Bombay).—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.
- (Coorg).—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.
- Jamma** (Coorg).—A tenure under which lands are held on half the ordinary assessment, on condition that the holders should perform certain services to Government, if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.
- Jodi** (Madras).—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, *minus* the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.
- Khálsa** (Bombay).—Government occupancy or raiyatwari tenure.
- (Central Provinces).—Areas settled on *malguzari* or *thekadari* tenure, in contradistinction to *zamindari*.
- (Berar, Ajmer-Merwara).—Land paying full revenue to Government.
- Khatedar** (Berar).—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.
- Khiraj** (Assam).—Land assessed to full revenue.
- Khoti** (Bombay).—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.
- Kwin** (Burma).—An area averaging about one square mile selected as a survey unit on account of some natural features of administrative boundaries.
- Lakhiraj** (Assam).—Revenue-free land.
- Mahalkari** (Bombay).—A revenue and police officer in charge of a sub-division of a taluk.
- Malguzari** (Central Provinces).—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.
- Malikmahbuza** (Central Provinces).—A person owning one or more plots of land separately assessed to revenue in a village, who is not a *malguzar*, inferior proprietor, or a member of the proprietary body of that village.
- Mamlatdar** (Bombay).—The chief revenue and police officer (native) in charge of a taluk.
- Mehwasi** (Bombay).—A proprietary tenure assessable to revenue at a lump sum.
- Milankhasra** (Bombay and Central Provinces).—An abstract record in which the village area is classified.
- Mittas, Palayams** (Madras).—Certain classes of permanently-settled estates differing in their origin from *zamindaris*. *Mittas* were artificial estates created under Madras Regulation XXV of 1802, while *palayams* are the estates of *poligars* or old chieftains. Most of the latter have been granted title-deeds of permanent settlement under the Regulation mentioned, but a few have not been settled, though in practice their revenue is treated as fixed.
- Muafi** (Manpur).—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to *jagirs*.
- Munsarim** (Berar).—A head native revenue officer.

- Narvadari, Bhagdari* (Bombay).—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump, and in the latter distributed by rates over fields.
- Nazul* (United Provinces).—Property escheated or lapsed to the State.
- Nisikhiraj* (Assam).—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.
- Palampat* (Berar).—Land held on payment of a quit-rent, but not necessarily hereditary.
- Parpattigar* (Coorg).—A revenue officer in charge of a sub-division of a taluk.
- Patel* (Coorg).—Village headman appointed by Government.
- Peakkash* (Madras).—The fixed land revenue payable to Government on all permanently-settled estates.
- Poramboke* (Madras).—Lands reserved for public or village communal purposes.
- Pot inams* (Bombay).—Lands sub-alienated in alienated villages.
- Pot kharab* (Berar).—The unculturable area included in a survey number.
- Shanbog* (Coorg).—A village accountant appointed by Government.
- Shrotriem* (Madras).—Village held on grant (originally to Brahmins), wholly or partially revenue-free.
- Talukdari* (Bombay).—A form of proprietary right in force in the northern districts of Bombay.
- Thathameda* (Upper Burma).—Household tax.
- Thekadar* (Central Provinces).—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.
- Thugy* (Burma).—A village headman.
- Udhan-jamabandi* (Bombay).—A proprietary tenure subject to fixed assessment.
- Umbli* (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.
- Zamindar* (Central Provinces).—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.

Summary of the Agricultural Statistics of British India

SUMMARY OF THE AGRICULTURAL

Area in acres :	1900-01	1901-02	1902-03	1903-04	1904-05
1. By professional survey (a)	548,788,661	552,920,151	554,052,949	554,234,736	555,974,330
2. Under forest	66,305,506	66,363,530	67,562,698	67,402,322	68,560,296
3. Not available for cultivation	138,488,965	137,963,527	136,767,571	138,107,665	136,206,779
4. Culturable waste	104,727,080	107,525,236	108,062,430	104,202,472	104,600,518

(a) Excluding areas for which no returns are available

TABLE No. 1.—AREA

In this table is entered the total area of each district, the areas for which statistics are and are not available being separately entered.

The corresponding tables of the earlier series are I A—1 of 1866, A of 1884, and A—1 of 1891. The headings differ as set out below :—

1866 I A—1	1884 A	1891 A—1
Total area in square miles	Area according to Survey Department in acres.	Area according to professional survey in acres.
	Deduct— (a) Feudatory and Tributary States. (b) Area for which returns are otherwise not available.	Deduct— (a) Feudatory and Tributary States. (b) Area for which no returns exist.
	Net area dealt with in this return.	Net area by professional survey. Corresponding area in village papers.

GENERAL NOTES.

Column 2 (pages 13—15).—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The provincial areas in this column exclude Native States in direct political relations with the Government of India, but include Feudatory or Tributary States politically controlled by Local Governments, with the exception of the Shan States in Burma.

Column 3.—In this column is entered the area of any Feudatory or Tributary States included in column 2.

Column 4.—In this column is deducted the entire area (exclusive of Native States) for which the statistics required for tables Nos. 2 and 3 are not forthcoming in whole or in part. This area comprises chiefly estates held in permanent settlement or on privileged tenure, which have not been cadastrally surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, or other arrangements are made for the preparation of statistics (see "provincial notes" below), the area in this column is reduced, and that entered in the next columns (5 and 6) and dealt with in tables Nos. 2 and 3 correspondingly increased.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" means "the papers prepared by the village accountants." They do not in several provinces relate to the whole area included in column 5; for instance, the village returns often do not include the forest areas. In such cases, column 6 must be taken to be the total area for which statistics are available, corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts which are calculated from village papers are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns.

In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of table No. 2.

PROVINCIAL NOTES.

*Upper and Lower
Burma.*

Column 2 (pages 16—19).—Where there has been no professional survey of the district estimates framed in the best manner possible are accepted, subject to revision from time to time as surveys extend. Approximate figures for the Chin Hills and for the Kachin Hills (in the Bhamo, Myitkyina and Katha Districts) have been included from 1906-07 and for the Pakokku Hill Tracts from 1907-08. Of the total area (59,011,990 acres) entered in columns 5 and 6 for 1909-10 for Upper Burma, 15,216,914 are based on actual survey and 43,795,076 on estimates; and of the total area (54,988,272 acres) for Lower Burma, 17,853,333 are based on actual survey and 37,134,939 on estimates.

Assam.

Columns 4 to 6 (pages 20 and 21).—Previous to 1906-07 column 4 stated all the hill districts, all permanently settled and *lakhiraj* estates, and areas not cadastrally surveyed in Cachar and Sylhet, except—(1) reserved forest areas, and areas under tea; (2) estimated cultivated areas in the permanently settled estates in Sylhet and Goalpara and certain cultivated areas in the Khasi and Jaintia Hills; and (3) the plains portion of the Garo Hills district.

From 1906-07 returns based mainly on estimates have been prepared for the unsurveyed areas in Cachar, the permanently settled and *lakhiraj* estates in Goalpara, and the hill tracts of the Garo Hills district; from 1907-08 such returns have been prepared for the Naga and the Lushai Hills and for the remaining unsurveyed tracts of Sylhet; and from 1908-09 for the remaining area of the Khasi and Jaintia Hills district. These areas have therefore been excluded from column 4 and included in columns 5 and 6.

The statistics shown under Eastern Bengal deal with the 15 districts transferred from *Eastern Bengal*, Bengal and combined with the old province of Assam to form the new province of Eastern Bengal and Assam. The figures for the Assam districts have been kept separate from those of the Eastern Bengal districts.

The area cadastrally surveyed is limited to 5,580,572 acres, which is only about 19 per cent of the whole area of Eastern Bengal (exclusive of Native States).

Columns 2 and 3 (pages 22-23).—Hill Tippera has been entered under a separate head as a Feudatory State.

Column 4.—Prior to 1907-08 the whole area of the Chittagong Hill Tracts district used to be shown in this column; but in that year, the forest area of the district and an estimate of the cultivated area were excluded from this column and included in columns 5 and 6; and from 1908-09 estimates for the whole area of the district have been prepared and shown in the proper columns.

The area cadastrally surveyed is limited to 37,968,257 acres, which is about 46 per cent *Bengal* of the area of the province (exclusive of Native States).

Columns 2 and 3 (pages 24-27).—Sikkim, Cooch Bihar, and the Tributary States in Orissa and Chota Nagpur, are classed under a separate head as Feudatory States; but from 1906-07 Sikkim has been excluded, the political charge of this state having in that year been taken over from the Government of Bengal by the Government of India.

Column 2 (pages 29-32) includes from 1907-08 the area of the Siwalik Range in the *United Dehra Dun* district, which was formerly excluded. *Provinces.*

Column 4.—Included until 1906-07, the area of hill tracts which possess no agency for collecting statistics. It also included the area of the family domains of the Maharaja of Benares situated in the Benares and Mirzapur districts, and some portions of Jhansi and Ballia. From that year returns based mainly on estimates have been prepared for all these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

Of the total area (53,358,689 acres) entered in column 6 for 1909-10 for the Province of Agra, 45,711,089 are based on actual returns and 7,647,600 on estimates.

Column 2 (page 33) states the area as given in the settlement records.

Column 4.—Up to 1907-08 this column included areas of certain khalsa-muafi, jagir, and istimrar villages for which no returns were available. From 1908-09 details for all these areas have been ascertained, and they have therefore been excluded from this column and included in columns 5 and 6. *Djmer-Merwara.*

Column 2 (page 14).—There is no record of area according to professional survey. The *Manpur* area stated is that of the whole pargana including jagir and inam villages as given in the settlement records.

Column 4 (pages 34-36).—Prior to 1906-07 the figures in this column represented, except *Panjab* in Simla and Kangra, the area in river beds not accounted for in the revenue papers: in Simla and Kangra the figures referred to high mountainous tracts. From 1906-07 all these areas have been excluded from column 4 and included in column 5.

Column 6.—Up to 1905-06 this column excluded the area in river beds not accounted for in the revenue papers, and high mountainous tracts. In 1906-07 such areas were included except in the districts of Gurgaon, Simla, Kangra, and Gujrat; but from 1907-08 figures, based more or less on estimates for all these areas, have been included.

Column 3 (page 33) represents the area of the Phulera and the Upper Tanawal States in *N.-W. Frontier* the Hazara district, which was formerly shown in column 4 as area for which no returns exist.

Column 2 (pages 37-39) states the area as returned by the provincial revenue survey *Bombay and* and settlement department, supplemented in the case of Native States by the returns of the *Sind* topographical survey. The revenue survey being incomplete in Sind, the exact area of that province is not known: the column states the area of surveyed tracts *plus* the estimated area of unsurveyed tracts.

Column 4.—Up to 1906-07 this column included areas of all unsurveyed villages for which no returns were available. From 1907-08 estimates have been prepared for all these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

Column 6.—The figures of column 5 are repeated because the areas in village papers are derived from the revenue survey records.

Of the total area (48,620,860 acres) entered in columns 5 and 6 for 1909-10 for Bombay, 41,413,552 are based on actual returns and 4,207,308 on estimates; and of the total area (30,078,862 acres) entered for Sind, 29,948,454 are based on actual returns and 124,908 on estimates.

Central Provinces.

Column 4 (pages 40 and 41) included up to 1905-06 the unsurveyed areas of zamindari* estates and waste land grants for which no returns were available. From 1906-07 returns based on estimates have been prepared for these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

Column 6.—The area for which accurate statistics are available is steadily increasing and until the survey is complete and resettlement finished, there will always be changes which render comparison difficult.

Berar.

Column 2 (page 42) states the area as ascertained by the local survey and settlement department.

Madras.

Column 2 (pages 43—45) states the area as ascertained by the provincial survey department supplemented, for tracts which have not come under the operations of that department, by areas calculated from the returns of the topographical survey.

Column 4.—Up to 1906-07 this column included chiefly areas of zamindaris or large proprietary estates permanently settled, which have not been cadastrally surveyed and possess no adequate agency for the collection of statistics, except some of the estates under the Court of Wards and private European managers which furnished returns. It also included certain raiyatwari and whole inam villages for which no returns were forthcoming. From 1907-08, however, estimates have been prepared for all these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

Columns 5 and 6.—Up to 1906-07 these columns excluded the major portion of the zamindari estates and certain raiyatwari and whole inam villages for which statistics were not available, but from 1907-08 estimates for these estates have been prepared and included. It should, however, be borne in mind that these estimates are not comparable for accuracy with the figures which are collected by adequate agency employed for the purpose. Of the total area (89,015,611 acres) entered in column 6 for 1909-10, 66,219,857 are based on actual returns and 22,795,754 on estimates.

* In the Central Provinces the zamindars are chiefs of minor importance (or their successors) who, while holding large and compact estates on privileged tenure, have been restricted to the rank of ordinary subjects.

* See explanation given in the Explanatory Notes (page 12)

(a) Constituted in 1909-10 out of Madura and Tinnevelly

(b) Constituted in 1906-07 out of Malabar

(c) Travancore and Cochin

(d) Excludes a gross area of 3,194,931 acres in North Arcot, South Arcot, Salem, and Madura, for which details for succeeding Tables are not available

TABLE No. 2—CLASSIFICATION OF AREA

The first part of this table deals with the classification of the area entered in column 6 of table No. 1, and gives the proportions (columns 2 and 3) withdrawn from cultivation by inclusion under forests or for some other reason, (column 4) cultivable land available but not yet taken up, (column 5) land occupied but not under crop during the year of report, (column 6) the net area under crop, that is, after deduction of the area cropped more than once in the year. The second part (columns 8 to 13) gives the area irrigated from various sources, and (columns 14 to 18) the distribution of the irrigated area under specified crops.

The headings altered since 1866 are noted below :

1866 IA—1	1884 A	1891 A—2
Cultivated	{ Actually cropped	Net area cropped.
	{ Current fallows	Current fallows.
Culturable	Available for cultivation	Culturable waste other than fallow.
Unculturable	Not available for cultivation	Not available for cultivation.
Unappropriated waste	(Omitted)	(Omitted).
Communications	(Omitted)	(Omitted).

GENERAL NOTES

Column 2 (pages 50 and 52).—“Forests” means “any land classed or administered as forest under any legal enactment dealing with forests.” Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped), an explanation being given in a note.

The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, explained in the “Provincial Notes” below, the chief amongst which are these: (1) because the forest administration reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, and (3) because, on the other hand, certain village lands worked and returned by the Forest Department are not treated as forests in the returns of agricultural statistics and are therefore excluded from this column.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the cropped area. From 1901-02 areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

Columns 8 to 13 (pages 50—53) state the area actually irrigated during the year, areas cropped more than once being counted once only.

Columns 14 to 18 (pages 51 and 53) state the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop.

The excess in some cases of the total area of crops irrigated (column 18) over the total area irrigated (column 13) is thus due to the inclusion in column 18 of the area irrigated at both harvests.

The variations in the areas shown in different years under the same item in the same district do not necessarily represent an actual increase or decrease on the area in question. In many cases a revised classification or the correction of a faulty estimate is responsible for the change.

PROVINCIAL NOTES

Upper and Lower Burma

For tracts outside the surveyed area the figures are based on estimates framed in the best manner possible.

Column 2 (pages 54—60).—The area entered in this column is that given in the forest administration report, and includes reserved forests and fuel reserves. From 1906-07 estimates of the forest areas in certain hill tracts have also been included.

Column 3.—In settled tracts the unculturable area is taken from settlement registers, but in unsettled tracts it is obtained from the best source available.

Column 4 includes land thrown out of cultivation and abandoned. Groves, not classed in the cropped area, and bamboos, when not grown in forest areas, are also included in this column.

Column 5 includes only such land left uncultivated as is actually in possession of cultivators. In Lower Burma such lands are assessed at privileged rates, but in Upper Burma no assessment is levied on land left uncultivated.

Column 6.—Of the total net cropped area (5,193,090 acres) entered in this column for 1909-10 for Upper Burma, 4,179,097 are based on actual returns and 1,018,993 on estimates; and of the 8,659,755 acres entered for Lower Burma, 8,188,520 are based on actual returns and 471,235 on estimates.

Columns 14 to 18 include only crops actually irrigated; for instance, where an un-irrigated crop of sesamum is taken off land which is afterwards irrigated and planted with paddy, the area grown with sesamum is not included in this column.

Column 2 (page 62).—“Forests” formerly included protected and reserved forests. *Assam* Since 1893-94 reserved forests only have been entered; but from 1909-10 the areas of forest villages have been excluded from this column and entered under the appropriate heads of this table.

Column 5 includes generally all lands which are thrown out of cultivation or not cultivated, but remain in the occupation of leaseholders. Estimated figures for the Naga and the Lushai Hills have been included from 1907-08.

Columns 8 to 18.—No figures are available of areas irrigated except for Kamrup, Darrang, Sibsagar, and the Lushai Hills.

Column 2 (pages 64—66).—The figures represent Government forests only, but from *Eastern Bengal* 1909-10 the areas of forest villages have been excluded.

Columns 3 and 4 include private forests and unclassified State forests.

Columns 8 to 18.—No reliable figures of areas irrigated are available except for certain cadastrally surveyed tracts in Rajshahi and Rangpur.

Column 2 (pages 68—74).—Up to 1905-06 the figures represented Government forests *Bengal* only. From 1906-07 estimates of other forest areas, furnished by district officers, have also been included.

Columns 3 and 4 included private forests and unclassified State forests up to 1905-06.

Columns 8 to 18.—Since 1898-99 the areas and crops irrigated from Government canals are stated; estimates of areas irrigated from all sources have been given from the year 1908-09.

From 1906-07 estimates have been prepared and included for Almora, Garhwal, the hill *United* portion of Naini Tal and of pargana Kera Mangraur in Mirzapur, for which complete figures *Provinces* were not available before.

Column 2 (pages 76—84) includes forest areas administered by the district officers of some districts. Hence the figures do not agree with those in the forest administration report which exclude these areas. From 1907-08 this column also includes the Siwalik Range in the Dehra Dun district which was formerly excluded.

Column 5.—The maximum period for which land left untilled is reckoned as fallow is three years.

Column 6.—Of the total net cropped area (27,232,481 acres) entered in this column for 1909-10 for the Province of Agra, 26,622,881 are based on actual returns and 609,600 on estimates.

Columns 8 to 13.—Government canals include private canals except in Naini Tal, for which district separate figures for private canals have been obtained since 1895-96. From 1903-04, however, the areas irrigated from certain private canals in Budaun and Basti and from 1907-08 such areas in Gorakhpur, which were formerly included under “other sources”, have been shown under the proper head “private canals.” There are very few private canals in the *United Provinces*.

Of the total area irrigated in the Province of Agra in 1909-10 (7,631,659 acres), 7,592,159 acres are based on actual returns and 39,500 on estimates.

Column 2 (page 86).—The forest area relates to khalsa, jagir, and minor istamrar *Ajmer-Merwara* villages, but excludes village lands managed by the Forest Department which do not technically constitute Government forests.

Column 2 (page 50).—The forest area relates to Government forests including those in *Manpur* jagir lands.

Column 6 includes the area cropped in khalsa (Government) as well as in jagir villages.

Column 2 (pages 88—94) includes all lands specially allotted to forest growth under *Panjab* the control of Government or any Local Board or Municipality.

Column 3.—From 1907-08 this column includes 23,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, 3,896,960 acres of mountain tracts in Kangra, and 24,998 acres of the “Pabbi” forest area in Gujrat. These areas are not accounted for in the village papers, and the figures are based more or less on estimates.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually. Previous to 1901-02 this column also included the lands on which the crops wholly failed, as well as a fraction of those on which they partially failed proportionate to the degree of the deficiency.

Column 6.—Previous to 1901-02 the figures in this column represented the area on which the crops harvested would have been grown in a year of normal productiveness. That is to say, each of the returns of the actual areas from which crops were taken was multiplied by a fraction representing the relation of the crop harvested to a normal crop, and the difference between this product and the actual area was added to the fallow area. From 1901-02, however, the area sown has been reported without reference to the area harvested or the condition of the crops.

Columns 8 to 18 state the gross area irrigated, that is, land irrigated in both seasons is counted twice. As regards columns 8 to 13, prior to 1906-07, areas which bore two crops under irrigation in a single harvest were also counted twice; but from 1906-07 such areas are only counted once. As regards columns 14 to 18, prior to 1906-07, the figures were those of harvested areas reduced to a standard of normal productiveness (see note to column 6 above); but from that year areas actually sown have been entered.

N.-W. Frontier

Column 2 (page 96) includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality, and protected village waste in Hazara administered by the district officer and other waste lands in Peshawar.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Dera Ismail Khan classification is amended according to area of each class of soil actually cultivated each year.

Columns 8 to 18 (pages 96—97) state the gross area irrigated, that is, land irrigated in both seasons is counted twice. As regards columns 8 to 13, prior to 1907-08, areas which bore two crops under irrigation in a single season were also counted twice, but from that year such areas are only counted once. As regards columns 14 to 18, prior to 1906-07, the figures shown in them were those of harvested areas, that is, excluding areas on which the crops failed, but from that year areas actually sown have been entered.

Sind

Column 2 (page 98).—The figures do not agree with those in the forest administration report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision survey, which the revenue records do.

Column 6.—Of the total net cropped area (3,815,364 acres) entered in this column for 1909-10, 3,814,402 acres are based on actual returns and 962 acres on estimates.

Bombay

From 1907-08 estimates have been prepared and included for all unsurveyed villages for which no figures were available before.

Column 2 (pages 100—102) includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the forest settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions.

Column 3 includes all land recorded at the survey and settlement as unculturable, though at times a very small quantity of this land is cultivated.

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Column 6.—Of the total net cropped area (25,353,065 acres) entered in this column for 1909-10, 24,227,809 acres are based on actual returns, and 1,125,256 on estimates.

Columns 8 to 13.—The figures given for private canals, tanks, wells, and other sources are rough estimates.

Column 16.—By "miscellaneous food crops" are understood the crops entered in table No. 8, as sugar, orchards and garden produce, and miscellaneous food crops.

Central Provinces

Column 2 (pages 104—106) shows the areas administered by the Forest Department; but the figures differ from those in the forest administration report because the actual area of the forests is not known owing to incomplete survey, also because excisions made have not yet been taken note of in the forest registers, and because in many cases raiyatwari villages settled, thekadari villages surveyed, clearance lease villages earned in proprietary rights, and

villages purchased under the waste-land sale rules, have not as yet been finally disforested and struck off the forest registers. In the case of the Chanda, Drug, Raipur, and Bilaspur districts, this column also includes from 1906-07 all areas in the zamindars' estates which fall outside the surveyed villages of those estates. These areas are almost wholly under forest and include only a negligible proportion of sparse and shifting cultivation.

Column 3 states areas covered with water, hill, or rock, and land occupied by buildings and roads.

Column 4 states (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

Column 5.—Land which has been fallow for not more than three years is reckoned as current fallow.

Column 2 (page 108) includes the forest area administered by the Forest Department, but *Berar* excludes a large area of cultivated land in the Melghat taluk in Ellichpur shown as forest in the forest report.

Column 3 includes village sites, tanks, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4 includes land available for cultivation but not given out.

Column 5 includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.

Column 2 (pages 110—112) includes from 1895-96 the area cultivated within forests, and *Madra* excludes the area of forests in the Native State of Sandur, in Bellary, not included in the village papers. As this is included in the forest administration report, it accounts partly for the disagreement of its figures with those in this table.

Column 5 includes all occupied waste, that is to say, waste portions of land for which revenue is paid.

Column 6.—Of the total net cropped area for 1909-10 (32,217,294 acres) stated in this column, 26,327,259 are based on actual returns, and 5,890,035 on estimates.

Column 10.—The term "tanks" refers to a particular kind of dammed reservoirs.

Column 13.—Of the total area irrigated in 1909-10 (9,218,566 acres), 6,857,251 acres are based on actual returns, and 2,361,315 on estimates.

Columns 14 to 18 (crops irrigated) were discontinued in 1898-99, but re-instated in 1907-08.

Column 2 (page 52) includes reserved and protected forests only. The management of *Coorg* the latter having been transferred to the revenue authorities, the figures shown in the forest administration report represent the area of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different.

Column 3 includes unculturable Government waste and unculturable *banés*.

Column 4 states the estimated area of culturable Government waste.

Column 5 shows (1) the estimated area of culturable *banés*, and (2) the difference between the net area cropped and the gross area of the actual holdings (exclusive of *banés*). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained.

Columns 8 to 13.—Figures for land partly irrigated from springs and mountain streams are not available.

CLASSIFICATION OF AREA 50

(ALL PROVINCES)

No. 2

CLASSIFICATION of the AREA (in acres) of each PROVINCE in BRITISH INDIA

PROVINCE	Forests	Not available for cultivation	Culturable waste other than fallow	Current fallows	Net area cropped	Total	Area	
							Government canals	Private canals

* See explanation given in the Explanatory Notes (page 46)

(a) Statistics of the area of crops irrigated were not collected, so the figures shown in column 13 are repeated in this column in order to make the totals for British India complete as far as possible

(b) Includes 14,435 acres for which details are not available

CLASSIFICATION OF AR
(UPPER BURMA)

No. 2—A

CLASSIFICATION of the AREA (in acres) of each DISTRICT in UPPER BURMA

NOTE.—Figures for the areas of crops irrigated were not collected until 1907-08

* See explanation given in the Explanatory Notes (page 49)

(a) Includes 14,435 acres, for which details are not available

TABLE No. 3—AREA UNDER CROPS

This table states the gross cultivated area under each crop, irrespective of irrigation and double-cropping, the area under the latter being included in the statement, but subtracted in column 41. The area is that stated in column 6 of table No. 2.

The headings which have been modified since 1866 are—

1866 III. D—1	1884 B	1891 A—S
Other food-grains	Other food-grains, including pulses	Barley Cholam or jawar Cambu or bajra Ragi or marua Maize Gram Other food-grains, including pulses
Oilseeds	Oilseeds	Linseed Til or jinjili Others
Sugar	Sugarcane	Sugarcane Others
Fibres	Cotton Jute Others	Cotton Jute Others
Vegetables	(Omitted)	(Omitted)
Opium	Cinchona	Opium Cinchona

The following items were added in 1891 :—

Condiments and spices	Other drugs and narcotics
Other dyes	Fodder crops
Indian hemp	Orchards and garden produce

Since 1899-1900 "rape and mustard" have been separated from the head "Other oilseeds."

GENERAL NOTES

In 1896 the Government of India decided that in this table should be entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown should be omitted. Previous to this decision there was no uniformity of practice as explained in the earlier issues.

In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by the provincial authorities.

Columns 10, 15, 19, 22, 27, 34, 38, and 39 (pages 116—123).—The selection of crops for inclusion in these columns is left to the provincial authorities.

Columns 29 and 30 (pages 120 and 122).—The areas stated under "Coffee" and "Tea" differ in certain cases, especially in Madras, from those given in the special reports on tea and coffee production published separately. The principal reason is that the special reports are prepared from returns received from managers and owners of estates; and these returns, especially in Southern India, are inaccurate and defective. Minor discrepancies in the case of tea are also due to the fact that the figures in this table deal with the agricultural year; while those in the special report deal with the calendar year.

The variations in the areas shown in different years under the same crop in the same district do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

PROVINCIAL NOTES

Upper and Lower Burma

The table states the actual area sown, including the area on which crops have been destroyed, but excluding fallow. Land on which more than one crop has been grown is entered as a separate crop area.

For tracts outside the surveyed area the figures are based on estimates framed in the best manner possible.

Assam

In Cachar accurate statistics of the area under crops other than tea is available only for the cadastrally surveyed tracts, in Sylhet only for the Jaintia Parganas and Partabgarh, and in Goalpara only for the temporarily settled tracts. Estimates have, however, been prepared and included for the permanently settled tracts in Sylhet and Goalpara from 1898-99 and for the unsurveyed areas in Cachar from 1906-07. Until 1895-96 the figures for the five upper districts of the Assam valley related only to tracts cadastrally surveyed, and to *khiraj* lands and tea estates not cadastrally surveyed. Since that year the whole cropped area in these

districts has been stated, with the exception of a small area cultivated by tribes paying house or poll-tax in Lakhimpur, Sibsagar, and Kamrup. In the Garo Hills district the areas under different crops are available for the plains tracts only. Estimated figures for the Lushai Hills have been included from 1908-09. Detailed statistics of the areas under different crops are not available for the Naga Hills.

Column 37 (page 143).—The area under orchards and garden produce includes village sites.

As no statistics are at present prepared by village or circle officers, the figures entered in this table are merely estimates, except those for Chittagong and Backerganj, in which the estimates are based on the figures collected during the cadastral survey. *Eastern Bengal*

No statistics are at present prepared by village or circle officers, except in the Sambalpur district. The figures for all other districts entered in this table are therefore merely estimates, except those for Sâran, Champâran, Muzaffarpur, Darbhanga, Bhagalpur, Purnea, Puri, Cuttack (exclusive of small permanently settled areas), Balasore, Angul, the Santhal Parganas, and Ranchi, in which the estimates are based on the figures collected during the cadastral survey. *Bengal*

The area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crop by the village accountant. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jawar and arhar, bajra and arhar, and cotton and arhar, for which separate headings are provided in the crop statements, were included up to 1893-94 with "other food-grains including pulses." Since 1894-95 they have been distributed in accordance with prescribed formulae and entered under the crops of which they are composed. *United Provinces*

There is no agency for the collection of statistics in Almora, Garhwal, and the hill tracts of Naini Tal and Mirzapur; but from 1906-07 estimates have been framed for Garhwal and the hill tracts of Mirzapur.

Columns 3, 4, 9, and 11 (pages 168—190).—The whole of the area of the land planted with food-grains (wheat, barley, gram, etc.) mixed with oilseeds is shown under food-grains in this table. The area shown under food-grains which was really planted with oilseeds (as a mixed crop) is roughly estimated to have been 3,766,000 acres in the whole of the United Provinces of Agra and Oudh in 1909-10.

Columns 12, 13, 14, and 16 (pages 169—191).—The figures shown in these columns represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop. Besides these, the oilseeds are thinly sown in combination with wheat, barley, gram, and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1909-10 (for the whole of the United Provinces of Agra and Oudh) to 597,000 acres of linseed, 900,000 acres of sesamum, and 2,269,000 acres of rapeseed.

The areas stated are actual areas sown or placed under crop in Government and jagir villages. *Manpur*

Prior to 1906-07, the figures in columns 2 to 39 did not represent the actual acreage, but the area of each harvest reduced to a conventional standard of normal productiveness. That is to say, each of the returns of the actual areas from which crops were taken was multiplied by a fraction representing the relation of the crop harvested to a normal crop. The figures in column 40 represented the area sown without reference to the area harvested and the condition of the crops; and they, therefore, differed from the totals of columns 2 to 39. This difference was 6,383,136 acres in 1905-06. *Panjab*

From 1906-07 the areas actually sown have been shown in all the columns.

As in the Panjab, the areas under each crop for the years prior to 1906-07 are not actual areas, and similarly the total in column 40 exceeds the sum of the details in columns 2 to 39. This excess was 410,722 acres in 1905-06. *N.-W. Frontier*

From 1906-07 the areas actually sown have been shown in all the columns.

From 1907-08 estimates have been framed and included for all unsurveyed villages which no figures were available before. *Bombay and Sind*

Column 37 (pages 237 and 239) includes groves situated within the home farm of the landlord or the holding of a plot proprietor or tenant. *Central Provinces*

Column 36 (pages 251—253) states the areas sown with grass and crops solely for fodder. Lands left waste for grazing and on which grass grows spontaneously are not included in this column. *Madras*

Column 32 (page 122).—The cultivation of cinchona has to all intents been entirely abandoned in Coorg. *Coorg*

TABLE No. 4—LIVE-STOCK, PLOUGHS, AND CARTS

This table deals with agricultural stock. The headings of the form now in use differ from those of 1866 and 1884 in the following respects:

1866	1884	1891
III D—2	III D—2	A—4
Cows and bullocks	Cows and bullocks	{ Bulls and bullocks Cows
.....	Buffaloes	{ Male buffaloes Cow buffaloes
.....	Young stock (calves and buffalo calves)
Horses } Ponies }	Horses and ponies	Horses and ponies
Donkeys	Mules and donkeys	Mules and donkeys
Sheep and goats	Sheep and goats	{ Sheep Goats Camels
.....

In most provinces mules have been separately enumerated since 1899-1900.

GENERAL NOTES

In some provinces the figures include, and in others exclude, animals in towns, cities, and cantonments. The Government of India decided in 1896 that live-stock in cities and cantonments should be included wherever it is possible to secure their enumeration, and that oxen and buffaloes not old enough for work or to produce young should be treated as "young stock."

The figures generally are greatly lacking in accuracy, but improvements have been effected in most of the provinces in recent years, as explained in the "Provincial Notes" below.

PROVINCIAL NOTES

Upper and Lower Burma The figures of live-stock in Upper and Lower Burma were collected until 1897-98 by thugyis or headmen when preparing the capitation tax or *thathameda* (household tax) rolls, or when required for the statement. Cattle were not counted on any particular day.

From 1898 to 1907 annual statements of cattle and agricultural implements were prepared in Lower Burma, during the field season, by circle thugyis and revenue surveyors.

Since then annual returns of agricultural stock are prepared by village headmen, revenue surveyors and *taikihugyis*, the enumeration taking place about the 20th February in each year.

The figures include all animals in towns and also those employed in each district by Government departments, such as transport, military, police, and by municipalities.

Assam The statistics are based on a cattle census taken every five years. The census is, however, not taken simultaneously in the different districts.

In the Assam Valley districts (excluding the permanently-settled tracts of Goalpara) and in Sylhet (Jaintia parganas only) the last census was taken in 1910. In Cachar it was taken in 1907, and in the Garo Hills (plains portion only) in 1909.

No statistics are available for the permanently settled tracts in Goalpara, for tracts other than Jaintia parganas in Sylhet, and for the hill tracts.

Eastern Bengal Statistics of live-stock are available only for tracts in which a cadastral survey has been made or a record of rights prepared. The figures, however, were not collected each year, but for each tract when the tract was under survey. In the present table figures have been given only for the two districts of Backerganj and Chittagong, of which the whole area has been cadastrally surveyed. The survey of Chittagong was made in the years 1888-1898 and that of Backerganj during the period 1901-1905.

Bengal Statistics of live-stock are collected only in tracts where surveys are being made or a record of rights prepared. The figures, however, are not collected each year, but for each tract when the tract is under survey. From 1908-09 complete estimates of the number of live-stock in each district have been made and included in the table.

United Provinces Until 1897-98 the figures of live-stock were obtained by an annual census made by the patwari when he made his round for the record of the spring crops. A rough record of the detail for each tenant was made by the patwari and tested from time to time by the kanungo. The resultant totals were preserved in the patwari papers. The table is now prepared quinquennially on a census in each district taken every five years. The last census was taken in 1908-09 in all the districts, except Almora and Garhwal, under the supervision of the superior kanungoes and such members of the district and tahsil staff as could be spared. For Almora and Garhwal the figures collected in the previous census of 1898-99 were retained. The figures obtained by the quinquennial census are believed to be more accurate than the earlier figures.

The table is prepared quinquennially, and the figures were last collected in 1908-09.

Ajmer-Merwara

An annual census is taken on the 15th March.

Manpur

Until 1897-93 the table was based on figures furnished by patwaris who made an enumeration of the cattle in a village every fourth year, when a detailed jamabandi was prepared. The enumeration was not made on a particular day, but whenever the patwari found time for it, between April and August. The result was that in a fourth of the province an enumeration was made every year, and the fresh figures for that fourth part were incorporated in the annual statement by subtracting from the preceding year's figures the old statistics and adding the new figures. This system has been replaced by a census for the whole province to be taken every fifth year in the first week of February. The last census was taken in 1909-10.

Punjab

Until 1896-97 stock in cantonments was excluded except in Lahore. Since that year cattle in cantonments and municipalities have been included; and since 1897-98 all cattle belonging to Government have been included.

A census for the whole province is taken every fifth year in the first week of February. The last census was taken in 1909. All cattle belonging to Government were included.

N.-W. Frontier

Until 1901-02 the figures were collected annually by village officers at a house-to-house enquiry in June. In that year it was decided that they should be collected once in five years. The last quinquennial census was taken in 1909-10.

Bombay

All animals belonging to a family are entered against the name of the head of the family even though the animals are temporarily absent from the village. Animals belonging to other villages are excluded, and those belonging to a roving grazier who has no permanent residence are noted, but are not included in the village resources. The figures are regularly tested by circle inspectors (kanungoes).

Stock statistics for the City of Bombay were collected for the first time in 1909-10.

The figures were collected for the first time in 1899-1900; and, as in Bombay, it was decided in 1901-02 that they should be collected once in five years. The last quinquennial census was taken in 1909-10.

Sind

The figures are collected annually, between the 1st January and the 15th March, by the patwaris for each village of the areas in their charge. The total figure is recorded in the tabsil by the kanungo in a village register. The patwari takes into account all animals, including those temporarily sent elsewhere (e.g., for grazing), which belong to residents of the village, and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Stock in cities, large towns, and cantonments has been included from 1896-97 and that in forest villages from 1907-08.

Central Provinces

A census is made annually by the village officers.

All cattle belonging to one owner are entered against his name, even though the animals are temporarily absent from the village. When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other villages, but temporarily in the village for grazing, are not entered in the statement for that village.

Berar

Previous to 1884 a census was taken every five years. From that year until 1898-99 a census of cattle in Government (rayatwari) villages was taken annually, but it was then decided to revert to the former practice and take a census every five years. The last quinquennial census was taken in 1909-10. In inam villages, however, there is no suitable agency for the work, and Collectors obtain information for these villages as best they can: it is not known to what extent any census is made in them. Previous to 1903-10, no information was available regarding live-stock in permanently settled (zamiadari) estates and in towns and cantonments which did not form part of any revenue village; but from that year estimates for all these tracts have been prepared and included.

Madras

The table is prepared quinquennially on a census taken every five years.

The last census was taken in March 1910 by the circle shanbogs, and the particulars entered in a register maintained under Rule 73 of the Rules framed under the Coorg Land and Revenue Regulation, 1899.

Coorg

Animals in municipal towns are included.

Figures are given only for the two districts of which the whole area has been cadastrally surveyed, and the information was collected gradually during survey operations extending over several years. These two districts have a population of 3,645,000, being 15 per cent of the provincial total, and contain 14 per cent of the cropped area of Eastern Bengal. See explanation given in the Explanatory Notes (page 256)

See explanation given in the Explanatory Notes (page 257)

(a) Constituted in 1909-10 out of Madura and Tinnevely

(b) Includes males also

(c) Constituted in 1906-07 out of Malabar

TABLE No. 5—LAND REVENUE

This table is intended to indicate the relation between area, population, and land revenue, or, in other words, to exhibit the mean burden of the State assessment on the land assessed to it and on the community at large. It was prescribed in 1884, and revised in 1893. Similar information previous to 1884 is contained in Tables I D, I E—2, and I E—6, appended to the General Administration Reports.

The two main classes of tenure, (1) raiyatwari and (2) zamindari and village communities, specified in 1884, were not exhaustive, and the provincial administrations were allowed to make additions in accordance with local requirements. The table now states all tenures under one or other of the three heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

The present form differs from that prescribed in 1884 in the following respects :—

1884	1893
I.—(1) Raiyatwari (2) Zamindari and village communities	{ (1) Raiyatwari (2) Zamindari and village communities (temporarily settled) (3) Zamindari (permanently settled)
II.—Deduct area not fully assessed, including estates assessed at privileged rates.	{ Deduct { (a) Area not fully assessed (b) Area for which the returns required for this table are not available
III.—Balance of area fully assessed.	{ Balance, that is, fully assessed area for which returns are available (a) Total. (b) Cultivated

GENERAL NOTES

In July 1893 the following rules were prescribed for filling in this table :—

Entry 1 in general table No. 5 (pages 286—291), column 2 in provincial tables Nos. 5 (A to O) (pages 298—324).

The varieties of tenure entered should be included, as far as possible, under one or other of the following heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

Entry 2 (a) in general table (pages 286—291), column 5 (a) in provincial tables (pages 298—324)

Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population head 10 (column 11). In Madras, Bombay, and Berar all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) should be classed for the purposes of this column as "area not fully assessed." Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

Entry 3 in general table (pages 286—291), column 4 in provincial tables (pages 298—324).

This column should be subdivided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste, and should be either equal to or less than the net cropped area as shown in column 6 of table No. 2.

Entry 4 in general table (pages 286—291), column 5 in provincial tables (pages 298—324)

Where the land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those due by raiyats to the zamindars. The actual realisable demand for the year should be entered, after excluding arrears for past years. Sums remitted on account of unoccupied lands, short crops, etc., should be excluded. In 1904 it was decided by the Government of India that this column should include all the heads classed as "Land Revenue" in the Civil Accounts.

Entry 7 in general table (pages 292—297), column 8 in provincial tables (pages 299—325)

As in entry 4 (column 5), but only ordinary land revenue on fully assessed areas is to be entered.

Entry 8 in general table (pages 292—297), column 9 in provincial tables (pages 299—325)
To be entry 7 (column 8), divided by entry 3 (a) [column 4 (a)].

Entry 9 in general table (pages 292—297), column 10 in provincial tables (pages 299—325).
To be entry 7 (column 8), divided by entry 3 (b) [column 4 (b)].

Areas under forest are included in entry 1 (column 2), under the prevailing tenure of the province.

The population in entry 5 (column 6) is that of the last general census.

PROVINCIAL NOTES

Upper Burma

For tracts outside the surveyed area the figures are mostly based on estimates framed in the best manner possible.

Columns 1 and 3 (a) (page 298).—No areas are now classed as zamindari, as no system of communal assessment prevails. Column 3 (a) shows grants under Appendices I and II of the Rules under the Upper Burma Land and Revenue Regulation. Before 1902-03 such grants were classed as zamindari (temporarily settled).

Column 3 (b) includes non-State lands in districts where no land revenue rates are yet imposed and where the *thathamada* rates have not yet been adjusted.

Column 4 (a) contains figures of State and non-State lands assessed to land revenue, including current fallows which are not assessed to land revenue. This column also includes the areas of waste land grants of which the rates have been fixed in perpetuity.

Column 5 states ordinary land revenue, *thathamada*, water rate, rents of fisheries, and items under "Miscellaneous Land Revenue," appearing in the Civil Accounts.

Column 8 (page 299) states the ordinary land revenue, as defined in the Civil Accounts, on areas fully assessed.

Column 11.—The population of villages and *kwiu* is considered as belonging to fully or not fully assessed area accordingly as the greater portion of the village or *kwiu* lands are or are not fully assessed.

Lower Burma

For tracts outside the surveyed area the figures are mostly based on estimates framed in the best manner possible.

Column 1 (page 300).—No areas are now classed as zamindari, as no system of communal assessment prevails. Before 1893-94, however, all grants made under the waste land rules were classed as zamindari (temporarily settled); and since that year until 1902-03 grants under the waste land rules of Arakan (1839-41), and Pegu (1865), were classed as zamindari (temporarily settled), while grants under Lord Canning's rules (1863) were classed as zamindari (permanently settled).

Column 3 (a) includes special grants which are not yet fully assessed.

Column 3 (b) includes old grants exempt from the payment of revenue under special terms.

Column 4 (a) states the areas of occupied lands, cultivated or left fallow; it also includes the areas of waste land grants of which the rates have been fixed in perpetuity.

Column 4 (b) excludes current fallows.

Column 5 shows ordinary land revenue, rents of fisheries, and the items under "Miscellaneous Land Revenue," appearing in the Civil Accounts.

Column 8 (page 301) states the ordinary land revenue, as defined in the Civil Accounts, on areas fully assessed; revenue on fallow areas which are treated as fully assessed is also included.

Assam

Column 1 (page 302).—*Raiyatwari* includes all unsettled Government waste and forest lands and areas in which house-tax or poll-tax is levied; it also includes certain temporarily settled estates in Sylhet which were formerly (before 1902-03) included under Zamindari (temporarily settled). *Zamindari (temporarily settled)* includes fee-simple grants, wholly or partially revenue-free tenures, and grants under progressive assessment.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Column 10 (page 303).—Since 1893-94 the incidence has been calculated on the cultivated portion of the fully assessed area. Information has not been available for the cultivated portion of the fully assessed area in Sylhet from 1903-04, in Kamrup from 1905-06 and in Nowgong from 1906-07.

Eastern Bengal

The table is prepared quinquennially, and the figures were last collected in 1907-08.

Column 1 (page 304).—Since 1896-97 the following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

Column 4 (b) includes in certain cases fully assessed current fallows.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

The table is prepared quinquennially, and the figures were last collected in 1906-07. *Bengal*

Column 1 (pages 306—308).—Since 1896-97 the following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

The table is prepared quinquennially, and the figures were last collected in 1906-07. *United*

Columns 3 (a) and 3 (b) (pages 310—312) exclude small revenue-free plots, for which details are not forthcoming. *Provinces*

Column 4 (b) states the net cropped area of the year corresponding with that in column 42 of table No. 3 (area under crops) but limited to the fully assessed area for which returns are available of column 4 (a).

Column 5 states—(1) "ordinary revenue," comprising (a) fixed collections, (b) fluctuating collections (including collections from estates under direct management), (c) surplus collections and (d) collections from Government estates; (2) sale-proceeds of Government estates; (3) sale-proceeds of waste lands and redemption of land tax, comprising (a) capitalised value of abatement of land revenue, etc., and (b) other receipts; (4) "miscellaneous," comprising (a) malikana revenue, (b) fines and forfeitures of revenue courts, (c) recoveries in India of law charges in England on account of appeals from India, (d) rent of railway class C lands and rents of buildings situated on such lands, (e) recoveries on account of law charges in civil suits, (f) recoveries of cost of erecting boundary pillars, (g) contribution on account of establishment for attached estates, (h) miscellaneous receipts, (i) mutation fee, (j) mutation fines, (k) sale of waste paper, (l) land revenue on resumed gorait jagirs in Basti, (m) receipts from quarries and minor mineral products in forests and land not under the management of the forest department, (n) recoveries of building advance to patwaris, (o) water mill rent, (p) voluntary contributions for the maintenance of special patwari circles, and (q) patwari miscellaneous receipts (including receipts for sale of waste patwari records).

Column 6.—The total population of the provinces excludes the population of the family domains of the Maharaja of Benares in the Benares and Mirzapur districts, except that of the Gangapur taluka in Benares.

Column 11 (pages 311—313) includes population of revenue-free lands when the area of such lands is less than an entire village. The inclusion does not materially affect the incidence entered in column 12.

No figures have been entered in columns 8 to 12 opposite "Lucknow, permanently settled," as no portion of the permanently settled area has been fully assessed to land revenue.

Columns 13 and 14.—The figures are taken from the latest census report.

The table is prepared quinquennially, and the figures were last collected in 1906-07. *Ajmer-Merwara*

Column 1 (page 313).—Since 1893-94 the khalsa area has been classed as "zamindari and village communities (temporarily settled)" and the jagir and istamrari areas as "zamindari (permanently settled)."

Column 4 includes in the case of the khalsa villages the assessed cultivated area, including assessed fallows.

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

Column 10 (page 313).—The cultivated area is, in the case of "zamindari (temporarily settled)," the cropped portion of the fully assessed area.

Column 11 excludes population of jagir villages.

Entry 5 (page 289) includes since 1893-94 the population of jagir villages which was *Manpur* previously omitted.

Columns 3 (a) and 3 (b) (page 314) include villages receiving frontier remissions, tracts *Panjab*, which are entirely unassessed (such as the Kulu mountains), and istamrari tenures.

Column 5 includes assigned revenue. As regards the heads of land revenue included in this column until 1903-04, the practice was not uniform, different districts having included different items. From that year the column includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Column 10 (page 315).—The cultivated area taken for calculating the incidence is, since 1893-94, exclusive of current fallows.

*N.-W.
Frontier*

Columns 3 (a) and 3 (b) (page 316) include villages receiving frontier remissions and istamrari tenures.

Column 4 (b) includes fully assessed current fallows which bore any crop in the preceding year.

Column 5 shows all the items falling under the head "Land Revenue" in the Civil Accounts, including assigned revenue.

Sind

Column 3 (a) (page 316) includes fallows and fully assessed unoccupied area.

Column 4 excludes fallows and fully assessed unoccupied area [see note to column 3 (a)]. Fallows are assessed once in five years.

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

Column 10 (page 317).—The incidence is calculated from the cultivated area (excluding fallows) and the assessment on that area.

Bombay

Column 1 (page 318).—Lands held under special tenures, such as talukdari, meh-wasi, udhad-jambandi, narvadari, and bhagdari in Gujarat, and khoti and izafat in the Konkan, are classed as "zamindari and village communities (temporarily settled)."

Column 3 (a) includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and also the fully assessed unoccupied area since 1893-94.

Column 3 (b) includes land not available for cultivation or unassessed.

Column 4 includes land under temporary cultivation; also pôt inâms paying full assessment.

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

Column 10 (page 319).—The incidence is calculated from the occupied area, which, in the Presidency proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

Column 11 includes population of pôt inâms and the like scattered areas which cannot be distinguished from the population of the fully assessed area.

Column 12.—The incidence is based on the figures given in column 11 and those in column 8, plus the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment.

*Central
Provinces*

Column 1 (page 320).—Zamindari (temporarily settled) includes malguzari and thekadari.

Column 2 states the area by village papers (column 6 of table No. 1).

Column 3 (a).—Zamindari estates properly so-called (that is, excluding malguzari) are classed as not fully assessed.

Column 4 (b) excludes fallows since 1894-95.

Column 5.—The figures represent different items of land revenue for different districts, no uniform practice having been followed throughout the province.

Column 10 (page 321).—The cultivated area referred to in this column is the fully assessed portion of the net cropped area.

Berar.

Column 3 (a) (page 322).—This column states jagir, izâra, and palampat villages, all unassessed land, forest areas, village sites, roads, rivers, etc.

Column 4 (a).—Pôt kharâb lands are excluded from this column, which includes only occupied lands available for cultivation.

Column 4 (b) states the cultivated area in khalsa villages only.

Column 5.—The figures include the revenue derived from jagir, palampat, and izâra villages. As regards the items of land revenue included, the practice has not been uniform, different districts having entered different items.

Column 8 (page 323) shows assessment on occupied lands only, as stated in column 4 (a).

Column 10.—The incidence since 1896-97 has been calculated on the area entered in column 4 (b), that is, the cultivated area in khalsa villages only.

Column 11 excludes population of jagir and izâra villages.

Madras

The table is prepared quinquennially. The figures were last collected in 1908-09.

Column 3 (a) (page 324).—In the case of raiyatwari tracts this column states the area of unoccupied assessed lands, of all unassessed poramboke, of minor inám lands in Government villages held rent-free or subject to quit-rent, and of forest lands, excluding portions of the first mentioned two classes occupied under "miscellaneous;" and in the case of zamindari tracts the areas of hills, porambokes, and minor ináms are entered. The entire area of whole inám villages is deducted in this column.

Column 3 (b).—Raiyatwari; includes the area of certain Agency tracts in Ganjam, Vizagapatam, and Godavari, and also the difference between the area by professional survey and the area according to village papers.

Column 4 (a).—Raiyatwari; states the total occupied area as stated in village papers.

Column 4 (b).—For certain districts areas actually cultivated and for certain others estimates or actuals supplemented by estimates are shown in this column.

Column 5 stated until 1903-04 only "ordinary revenue," but from 1903-04 it includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Column 8 (page 325).—From 1903-04 this column shows only the "ordinary revenue," as defined in the Civil Accounts, on areas fully assessed.

Column 10.—The cultivated area is, in the case of raiyatwari and zamindari lands, the net cropped area out of the area given in column 4(a).

Column 11 states the entire population of raiyatwari and zamindari villages, respectively.

The table is prepared quinquennially, and the figures were last collected in 1907-08.

Entry 2 (page 291) includes bané and cardamom lands.

Entry 4 shows ordinary revenue, sale-proceeds of waste lands, and miscellaneous land revenue.

Coorg

TABLE No. 6—TRANSFERS OF LAND

This table is intended to exhibit the number of voluntary and compulsory transfers of ownership of land or tenant-right, and the area so transferred. Voluntary transfers mean transfers made by actual contract or gift, transfers by inheritance not being taken into account; compulsory transfers mean transfers effected through the medium of a court, civil or revenue. Transfers of land under the Land Acquisition Act are outside the scope of the table.

The table now in use was prescribed in 1891; it differs from the tables formerly in use in the following respects:—

1866 I E—5 <i>Nature of tenure</i>	1884 I E—5 <i>Nature of tenure</i>	1891 E <i>Nature of tenure</i>				
Great zamindaris, complete.	Proprietors	Revenue-paying.				
Shares in such zamindaris, complete.			Revenue-free.			
Large zamindaris.				Revenue-paying.		
Shares in such zamindaris.					Wholly or partially revenue-free.	
Small zamindariaries.						Tenants who have statutory (No alteration) (or otherwise recognised) powers of transfer.
Shares in such zamindaris.						
Villages owned by cultivating communities.						
Shares in villages owned by cultivating communities.						
Holdings of proprietary cultivators.						
Intermediate holdings of a transferable character.						
Holdings of raiyats at fixed rates.	(No alteration)					
Holdings of raiyats with right of occupancy.						
Revenue-free tenures.						
<i>Number of transfers recorded</i>	<i>Number of transfers</i>	(No alteration)				
(a) By voluntary sale or gift.	(a) By private contract or gift.					
(b) By compulsory sale.	(b) By order of court.					
(c) By inheritance.	(Omitted)					
<i>Average area in acres of each holding transferred</i>	<i>Total area transferred</i>	(No alteration)				
(a) By voluntary sale.	(a) By private contract or gift.					
(b) By compulsory sale.	(b) By order of court.					
(c) By inheritance.	(Omitted)					

GENERAL NOTES

It is optional with local Governments to enter or omit transfers of lands held by tenants.

In August 1896 the following rules were prescribed:—

- (1) Changes of entry due to succession, partitions, or simple mortgages, are not really transfers, and should be excluded from the table, as also should redemptions of mortgage;
- (2) All temporary transfers such as leases should also be excluded, but mortgage with possession should be treated as a transfer and entered in the table;
- (3) All transfers made by order of a court should also be included in the table;
- (4) The word "court" in the entry "by order of court" should be held to include a revenue court.

Instructions were issued in 1891 to the authorities of the Panjab and the Central Provinces to the effect that the entries under "by order of court" should state not merely the transfers occasioned by debt, but all forms of transfer effected through the medium of a court.

PROVINCIAL NOTES

Upper Burma

Transfers of property in land are not as yet registered in Upper Burma; the information is collected by revenue officers. The statement includes cases in which land has been permanently transferred by gift, sale, or other transaction, for valuable consideration. The term "court" includes a revenue office as well as a civil court.

Assam

Since 1896-97 transfers by order of a revenue court have been included; and transfers by inheritance and non-permanent transfers, such as leases or usufructuary mortgages, which were formerly included in the table have been excluded.

Columns 12 to 21 (page 337) exclude the areas transferred in the Sylhet and Goalpara districts, the information not being available.

The table is not prepared, the information not being available.

Eastern Bengal

The table has been prepared since 1908-09. It is however still incomplete as the Bengal transfers shown under the head "By order of court" relate to transfers under orders of revenue officers only. Figures for transfers under orders of civil courts are not yet available.

Transfers by inheritance or non-permanent transfers, such as leases or usufructuary mortgages for short periods, are excluded, but mortgages with possession are included, as also all transfers made under order of a court. *United Provinces*

Transfers of *malikana* rights, that is, rights to receive a portion of the profits of an estate, not amounting to proprietary rights, which were formerly included in the table, have been excluded since 1905-06.

Statistics of transfers of tenant-right are not given. Transfers by gift have been included since 1896-97.

The figures exclude all changes due to successions, partitions, simple mortgages, redemptions of mortgages, and temporary transfers, such as leases; but mortgages with possession are included. The column "by order of court" includes transfers occasioned by debt incurred by judgment-debtors, as also all other transfers effected by order of courts, civil and revenue. *Ajmer-Merwara*

Transfers of property in land are not permitted in Manpur, except by sale and that only under special conditions. *Manpur*

From 1895-96 the table includes only transfers by mortgage and sale.

Punjab

Transfers by mortgage and sale only are included.

N.-W. Frontier

The table has been prepared since 1901-02.

Bombay and Sind

Transfers of tenant-right have been included since 1892-93. The figures against "proprietors" are filled up from returns compiled on the basis of mutation proceedings. Those against "tenants" are based on statements furnished by patwaris in which all transfers are entered, including transfers by mortgage with possession as well as transfers by sale but excluding transfers by inheritance. The statement does not include leases or mortgages without possession. *Central Provinces*

The information is obtained from the Registration Department.

Benar

The table includes all transfers effected by sale of fields under decree of a court (including a revenue court) either in execution of the decree or for recovery of arrears of land revenue. Private sales or recognised divisions of fields necessitating a change in the name of the registered occupant are entered under "by private contract or gift," as also are mortgages with possession. Transfers due to succession, by inheritance, simple mortgages, and leases are omitted.

Only permanent transfers, as by sale or gift, are included, when the parties concerned apply for and obtain transfers of revenue registry. These are entered under "private contract or gift." Cases in which lands are sold for arrears of revenue due to Government are also included if the lands are purchased by private parties, but excluded if the lands are purchased by Government. *Madras*

Transfers of tenant-right are not entered, the information not being available.

The entry under the head "revenue-paying" includes raiyatwari holdings paying full assessment, and permanently-settled estates paying *peshkash*; and the entry under the head "wholly or partially revenue-free" relates to minor ináms and whole inám villages.

The statement includes all legal transfers of property (a) by voluntary action of the owners and (b) by virtue of decrees of civil and orders of revenue courts. *Coorg*

Transfers ordered by courts in cases of disputed succession, and those occasioned by debt incurred by the judgment-debtors, are included under the heading "by order of court." This heading also includes transfers ordered by civil courts from registered holders to decree-holders, of lands sold by civil courts in satisfaction of decrees, and of holdings sold by the revenue authorities for arrears of revenue.

APPENDIX

APPENDIX A—AVERAGE YIELD OF CROPS.

This statement shows the average yield in lbs. per acre of the principal cultivated crops, revised with reference to the results of experiments made up to the year 1906-07.

GENERAL NOTES.

At the instance of the Secretary of State for India a provisional return of the yield of the principal crops cultivated in India was first compiled in 1892, from various statistical publications, such as, agricultural and settlement reports, crop forecasts, gazetteers, replies to the enquiries of the Famine Commission, etc., and to provide for the periodical revision of the estimates a system of experimental crop cuttings was prescribed by the Government of India, the results of which were to be reported in quinquennial returns.

The instructions for the preparation of these returns are that the estimate given should be that of the average outturn on average soil in a year of average character as deduced from a consideration of the information obtained on experiments made during the years under review: so that when multiplied by the average area cropped, it may give as near an approximation as possible to the outturn of the crop in an average year. The Agricultural Department of each Province has at its disposal a provisional estimate of the average yield of land of average quality (under the two major heads of irrigated and unirrigated land) for the several crops in each district. The object of the experiments annually made is to test the accuracy of these estimates, and to enable the head of the Agricultural Department in each province to revise his provincial estimates when necessary. Should it happen that the period has been one of exceptionally poor harvests which are reflected in the crop experiments received by the Agricultural Department from the districts, this would not necessarily involve the reduction of the standard estimates for the district or for the province, unless there were other reasons for thinking that, as estimates of yield in average years, they had been pitched too high.

The experiments made during the quinquennium 1901-02 to 1906-07 were more numerous and are believed to be more accurate than in any of the preceding periods. In all but two provinces they have justified considerable modification of the provincial averages previously accepted as correct, the general trend of the changes being in the upward direction. In the case of Bengal and Bombay, the old provincial averages have been repeated without alteration, as the results of the experiments made in the quinquennium under review have not been held to justify any revision. As regards Bengal, however, the district figures have been revised in many instances.

Though the figures of provincial average outturns are believed to approximate to the outturn on average soil in a year of average character, yet the variations between the results of experiments on the same crop in different provinces are so divergent, that some of the returns must still be regarded as problematic.

PROVINCIAL NOTES.

The experiments made from 1902 to 1907 have been more numerous than those in the *Burma* preceding quinquennial period and give evidence of increasing care and judgment, but the results in Upper Burma are still susceptible of improvement. The experiments have, as before, been usually conducted by Township Officers and occasionally by Deputy Commissioners and Sub-Divisional Officers. In order to show the main product only the following deductions, as in the last quinquennium, have been made from the gross outturn of the crops, namely, for rice 83 per cent, for jawar 30 per cent and for cotton 70 per cent. The estimate of average outturn of husked rice in Lower Burma has decreased from 1,200 to 1,176 lbs. and in Upper Burma from 1,060 to 1,028 lbs., and the yield of wheat and jawar has also been reduced slightly. The average outturn of gram, til and cotton on the other hand has been raised. The variations in outturn are explained to be due mainly to a new method of procedure in calculating the averages. Figures for peas are shown for the first time, as the cultivation of this crop in the province is said to be extending.

In the previous quinquennium, before the constitution of the new province, figures for *Eastern Bengal and Assam* Assam were shown separately. In the present returns figures for Assam and the districts transferred from Bengal have been combined to give the average of the new province. Detailed figures for each district are not available except for winter rice, rape and mustard, sugarcane, and cotton. In the case of cotton a deduction varying between 40 and 50 per cent has been made as indicating the proportion of lint to seed cotton.

During the quinquennium there has been some improvement in the number and *Bengal* quality of the experiments made, but the results are still far from satisfactory. In many cases representative crops have not been selected and sometimes the area cut has been less than one-tenth of an acre. The experiments are too few and the results too discrepant to justify any general conclusions as to the average yields of the various crops, or afford grounds for

modifying the provisional estimates previously adopted by the Agricultural Department, which are in part a reproduction of the estimates of 1892. In tabulating the returns these unrevised provisional estimates continue to appear in the statement of provincial averages, but in the detailed table the average outturn based upon the experiments conducted during the quinquennial period are shown for each district, irrigated and unirrigated crops being classified separately.

United Provinces

The experiments made during the quinquennium have not necessitated any considerable changes in the provincial averages. Such alterations as have been made are, with the exception of barley, in the upward direction, showing that outturns had been underestimated previously. The yield of maize has increased from 950 to 1,050 lbs., of sugarcane from 2,500 to 2,600 lbs., and of cotton from 150 to 160 lbs. The other changes are unimportant.

Ajmer-Merwara

During the quinquennium, 162 crop-cutting experiments (70 in Ajmer and 92 in Merwara) were carried out. The average yield of jawar has been raised, and of maize, cotton and barley lowered, the most important change being the reduction of the yield of maize unirrigated from 1,428 to 960 lbs. A deduction of 70 per cent has been made to obtain the yield of cleaned cotton.

Punjab

Experiments in districts under settlement and in the canal colonies have usually been made on much more extensive areas than one-fortieth of an acre adopted in ordinary districts, and the returns in consequence show fewer abnormal results. Though the accuracy of the experiments is not yet as great as desirable, there has been a steady improvement in the last few years. In the case of most crops the average yield has been raised. The most important changes are as follows:—Average outturn of irrigated rice increased from 1,126 to 1,183 lbs., of irrigated wheat from 935 to 994 lbs., and of irrigated and unirrigated barley from 903 to 1,053 lbs. and from 520 to 652 lbs. respectively. The average outturn of irrigated sugarcane has decreased from 1,727 to 1,607 lbs., and of unirrigated from 1,390 to 1,283 lbs.

N.-W. Frontier

The estimates of average outturn are believed to approximate much more closely to accuracy than previous figures, as they are based in all districts, except Peshawar, on the estimates framed by Settlement officers. The average outturn of rice has been raised from 843 to 1,202 lbs., of bajra from 402 to 497 lbs., of maize from 1,159 to 1,342 lbs., and of sugarcane from 1,813 to 2,673 lbs. The outturn of wheat has decreased from 669 to 618 lbs. and of jawar (unirrigated) from 602 to 326 lbs.

Sind

In all districts figures taken from previous returns have been repeated for the majority of crops. Of the experiments selected as giving results typical of an average crop during the present quinquennium four were on wheat, three on jawar and bajra, and one each on sugarcane, rapeseed, and barley. As a result of these experiments, the provincial average outturn of wheat has been raised from 1,066 to 1,229 lbs., of barley from 965 to 1,076 lbs., and of bajra from 763 to 776 lbs. The very high yield of jawar given in the previous return, 1,798 lbs., has been reduced to 1,238 lbs. The average outturn of sugarcane also has decreased from 4,315 to 4,233 lbs., and of rapeseed from 653 to 590 lbs.

Bombay

The estimates of 1897 were prepared with great care and the experiments made in the last two quinquennial periods have not justified any general revision. No change, therefore, has been made in the provincial averages previously reported, though there are indications that the average outturn of wheat and ragi has been pitched a little too low and that of sugarcane somewhat too high.

Central Provinces and Berar

In the previous quinquennium separate figures were given for the Central Provinces and for Berar, but the provincial averages are now compiled for the first time from the combined figures. The bulk of the experiments have been carried out by Settlement officers; but such experiments as have been made by District officers show greater care in selection of crops for experiment and fewer gross errors than in the previous quinquennium, though it is stated there is still room for improvement. The tendency has been on the whole to lower average outturn of different crops. The relatively small yield in comparison with the average yield of other provinces is due to the fact that most of the crops are not irrigated.

Madras

The experiments accepted as unobjectionable during the quinquennium were 3,348 in number against 2,619 in the previous quinquennium. The average assessment of the plots of land selected for experiment is in excess of the average assessment of the whole province, and the average yield of the several crops exceeds the standard figures based upon settlement estimates for all sorts and kinds of soil, which, however, are believed to be

below the mark. The average yield of the majority of crops is higher than the average of the previous quinquennium, especially in the case of sugarcane, the outturn of which has been increased from 5,127 to 6,089 lbs. Figures for rice, bajra, and ragi (irrigated and unirrigated) are also higher, and the only decreases are jawar and jinjili (unirrigated). The yield has been reported of paddy instead of husked rice, and a deduction of 38 per cent has been made to obtain the yield of rice (husked).

The only experiments made have been on rice. The average outturn has been raised *Coorg* from 1,446 to 1,507 lbs., which is very high in comparison with the reported yield of other provinces, but is accounted for by favourable climatic conditions, the average rainfall being 123 inches.

[From experiments since made the average outturn comes to 1,280 lbs.]

Experience gained in the conduct of experiments is believed to have improved the results *Mysore* considerably. The somewhat unfavourable conditions of two years in the quinquennium are counterbalanced by the favourable conditions of the two preceding years, and the average of the whole period may therefore be taken as fairly correct. The average yield of sugarcane has been reduced from 3,399 to 3,279 lbs., of til (sesamum) from 231 to 215 lbs., and of ragi from 578 to 562 lbs. The average outturn of cleaned cotton has been increased from 52 to 89 lbs., and of horse gram from 212 to 229 lbs.
