Agricultural Statistics of India

1925-26

VOLUME II—INDIAN STATES

Introductory Note

This volume deals with statistics for Indian States as far as reported. ^{General} As in the previous issues, summary tables have been inserted to show the total figures relating to area, the classification of area, and the area under crops for each State or group of States, and the totals for all the reporting States. The total number of cattle as far as reported in each of the years 1906-07 to 1925-26 has also been included in the general summary table (No. 1). These statistics are defective for comparative purposes, as additions have been made in the number of reporting States from time to time. Two charts and an index for easy reference have, as usual, been added to the volume.

It should be noted that, for the reasons explained in subsequent paragraphs, the agricultural statistics of Indian States are incomplete. They are also of far less accuracy than those of British Provinces published in Volume I. As these States comprise one-third of the total area of India, the importance of the statistics relating to them can scarcely be over-estimated.

The total area of Indian States is 462 million acres (722,000 square miles), with a population of 72 millions according to the Census of 1921. These States are divided, for purposes of agricultural statistics, into two main classes, namely, (1) States within the jurisdiction of Local Governments and Administrations, and (2) States having direct political relations with the Government of India.

(1) *States within the jurisdiction of Local Governments and Administrations.*—The total area of these States is 92,465,000 acres, with a population of 16 millions. They are divided into the following main groups:—

	Area Thousand acres	Population Thousands
Bombay States	18,561	3,868
Punjab States	9,287	408
Bihar and Orissa States	18,335	3,960
Central Provinces States	19,961	2,067
North-West Frontier Province States (including Tribal areas)	16,434	2,825
United Provinces States	4,848	1,135
Bengal States	3,478	897
Assam States	8,061	384
Total	92,465	15,544

The total area of all these States (with the exception of the Tribal areas in the North-West Frontier Province) is included in the areas of the respective British Provinces stated in column 2 of Table I of Volume I (British India), but is shown separately in column 3 of that table in order to arrive at the net area of British territory (in column 5) dealt with in that volume. But the agricultural statistics dealt with in this volume relate only to the following twenty-eight States in the Bombay Presidency, the Punjab, and the United Provinces, for which alone information is available:—

	Area Thousand acres	Population Thousands
<i>Bombay States—</i>

The total area of all the sixty-six reporting States named above amounts to 257,569,000* acres with a population of 48 millions. These States, therefore, contain 56 per cent of the total area, and 67 per cent of the total population, of the Indian States.

The earliest years from which the statements of agricultural statistics have been received from these sixty-six reporting States are noted below :—

From the total area of all the sixty-six reporting States (257,569,000 acres*), deduction must be made of 123,257,000 acres, comprising chiefly unsurveyed areas and lands held on jagir, muafi, and other privileged tenures, for which statistics are not available. The net area actually covered by these statistics is, therefore, only 134,312,000 acres by professional survey,† or 134,363,000 acres according to village papers.†

* The difference between this figure and the total area as shown in column 2, Table I on page 14 is due to the inclusion here of complete area figures for Barwani and Simla Hill States.

† For explanation of the terms " professional survey " and " village papers ", see footnotes to Table I (page 8) of this volume and the Note prefixed to Volume I.

Table II,
Classification of area

	Thousand acres	Per cent
Forests	17,322	12.9
Not available for cultivation	23,265	17.3
Culturable waste other than fallow	16,305	12.2
Current fallows	13,475	10.0
Net area sown	63,988	47.6
Total	134,355*	100

This area is classified, for purposes of agricultural statistics, under the heads shown in the margin. Forests occupy 17,322,000 acres, or 12.9 per cent of the total, while the area not available for cultivation, that is, land absolutely barren, or unculturable, or covered by buildings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 23,265,000 acres or 17.3 per cent. The balance, 93,768,000 acres or 69.8 per cent, represents the area available for cultivation. Of this area, 16,305,000 acres, or 12.2 per cent of the total area, represent culturable waste, *i.e.*, land available for cultivation but not taken up, and 13,475,000 acres, or 10 per cent, fallow in the year under report. The net area actually sown in the year was thus 63,988,000 acres (47.6 per cent of the total area). This net area sown, however, excludes areas sown more than once in the year. If areas sown more than once (as noted below) are taken as separate area for each crop, the gross area sown in the year of report amounts to 66,765,000 acres.

Table III,
Area under irrigation

The total area irrigated in the reporting States during 1925-26 was 8,161,000 acres, as against 8,916,000 acres (revised) in the preceding year. Of this, 2,303,000 acres were irrigated from Government canals, 1,007,000 acres from private canals, 1,397,000 acres from tanks, 2,001,000 acres from wells, and the remaining 1,453,000 acres from other sources of irrigation. These figures, however, do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. If areas sown more than once are counted as separate area for each crop, the gross area of irrigated crops amounts to 8,882,000 acres, of which 7,458,000 acres were under food crops.

Table IV,
Area under crops

	Thousand acres	Per cent of total
Food-grains	45,837	69.3
Condiments and spices	388	.6
Sugar	188	.3
Fruits and vegetables	589	.9
Miscellaneous food crops	1,649	2.5
Total food crops	48,651	73.6
Oilseeds	5,239	7.9
Fibres	7,578	11.5
Dyes and tanning materials	18	...
Drugs and narcotics	444	.7
Fodder crops	2,902	4.4
Miscellaneous non-food crops	1,282	1.9
Total non-food crops	17,463	26.4

The gross area cultivated with crops in the reporting States was, as stated above, 67 million acres in 1925-26. The different classes of crops and the area occupied by each, so far as details are available,† are stated in the margin. Of the total area sown, food crops occupied about 48,651,000 acres or 73.6 per cent and non-food crops about 17,463,000 acres or 26.4 per cent. Of the food crops, food-grains (cereals and pulses) occupied as much as 45,837,000 acres, or 69.3 per cent of the total area sown, and other food crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food crops together) covered some 2,814,000 acres, or only 4.3 per cent of the total. Of the non-food crops, oilseeds occupied 5,239,000 acres or 7.9 per cent of the total area sown, fibres such as cotton, hemp, etc., 7,578,000 acres or 11.5 per cent, and fodder crops 2,902,000 acres or 4.4 per cent. The other non-food crops, namely, dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.) and miscellaneous non-food crops together covered about 1,744,000 acres or 2.6 per cent of the total.

The total extent of land on which more than one crop was raised during the year was 2,778,000 acres.

Table V,
Live-stock

Table V is returned by fifty-one States, namely, Hyderabad, Mysore, Baroda, Gwalior, Kashmir, Pudukkottai, Banganapalle, Sandur, Cochin, Travancore, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Sitamau, Jaora, Nagod, Bikaner, Marwar, Jaipur, Kishangarh, Alwar, Bharatpur, Jhalawar,

* See footnotes (d) and (f) on page 15 of the Tables.

† Vide footnote (d) on page 2.

Tonk, Kotah, Bundi, Dholpur, Jaisalmer, Jath, Phaltan, Aundh, Sachin, Bhavnagar, Dharampur, Benares, Rampur, Tehri-Garhwal, Jhabua, Jobat, Sailana, Ali-Rajpur, Piploda, Dewas (Junior), Maihar, Chhatarpur, Dhar, Rutlam, Panna and Kapurthala. According to the latest statistics, the total number of live-stock of the bovine class (bulls, bullocks, cows, buffaloes and young stock, *i.e.*, calves and buffalo calves) is 33,276,000, of the bovine class (sheep and goats) 21,563,000, and of horses and ponies, mules, donkeys, and camels 929,000. The numbers of ploughs and carts are 4,348,000 and 1,299,000 respectively.

Table VI (Land Revenue) is prepared by thirty-two States, namely, ^{Table VI,} Hyderabad, Mysore, Gwalior, Kashmir, Pudukkottai, Banganapalle, Sandur, ^{Land Revenue} Cochin, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Nagod, Bikaner, Marwar, Jaipur, Alwar, Bharatpur, Jhalawar, Tonk, Kotah, Bundi, Dholpur, Jath, Phaltan, Aundh, Sachin, Dharampur, Benares, Rampur and Tehri-Garhwal.

Appendix A explains the vernacular terms used in this volume. Appendix B contains some explanatory notes which are essential for the correct understanding of the different tables. The charts illustrate (1) the classification of the total area showing the proportion of cultivated and uncultivated lands, and (2) the total area sown in 1925-26 with shares of food and non-food crops.

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in Southern India. In States where there has been no professional survey, the figures are based on the best available information.

Column 3.—In this column is deducted the entire area for which the statistics required for Tables II and IV are not forthcoming in whole or in part. This area comprises chiefly estates held on privileged tenures, which have not yet been surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (4 and 5) and dealt with in Tables II and IV is correspondingly increased.

Columns 4 and 5.—Column 4 is a check on the accuracy of column 5. In the latter, "village papers" mean "the papers prepared by the village accountants." In States where no village papers exist, or where the source of information is the same for both the survey and the village papers, the figures in column 4 are necessarily repeated in column 5. The area in village papers may differ somewhat from that given by the Survey Department, (a) because, while the survey area is calculated in block, the area by village papers represents the added total of field and village areas, and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads is not always uniform in the two sets of returns.

(a) See notes in Appendix B (Table I).

(b) The difference of 854,639 acres between this figure and the sum of those in the preceding columns is due to the overlapping of areas in columns 3, 4, 5 and 6 with column 2 in Mahbubnagar and Warangal districts and includes 1,729,920 acres in Atrafi Balda districts for which details are not available.

(c) The difference of 472,700 acres between the figure and the sum of those in the preceding columns is due to the overlapping of areas in columns 3, 4, 5 and 6 with column 2 in Warangal district and includes 1,729,920 acres in Atrafi Balda district for which details are not available.

(d) The figure includes 8,359 acres for which details are not available.

Note—In this table are entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by higher authorities.

Entry 2 (a)—Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population of short crops, or for other special reasons.

Entry 3—This column should be sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated on the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste.

Entry 4—Where land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those by the raiyats to the zamindars. The actual realizable demand on account of the year should be entered, after excluding arrears for past years. This column should include all the heads classed as "Land Revenue" in the Civil Accounts.

Entry 5—The population in entry 5 is that of the last general census.

* Excludes non-government area of the State generally.

APPENDIX B—continued

Table II.

Column 2 states the areas of State and district forests and of plantations.

Mysore
(Page 15)

Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 4 states unoccupied assessed waste.

Column 5.—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture, but the exact area of all such lands cannot be ascertained, although it cannot be large.

Statistics of *Jagir* and unsurveyed villages are not included.

Bikaner
(Page 17)

Column 2 includes hills only.

Bharatpur
(Page 17)

Column 4 includes areas out of cultivation or which have not been cultivated for the last four years or upwards, but excludes State grass preserves (*Rundhs*).

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is three years.

Table III.

Statistics of *Jagir* and unsurveyed villages are not included.

Bikaner
(Pages 26—27)

Column 2 includes area irrigated from the Barota Bund constructed by the State Public Works Department.

Bharatpur
(Page 26)

Table IV.

The areas under mixed crops are distinguished and entered under the respective crops of which they are composed.

Gwalior
(Pages 26—27)

Statistics of *Jagir* villages are not included.

Bikaner
(Pages 28—29)

Table V.

Until 1898-99 statistics were collected every year by the *shanbog* and *patel* of each village by enquiry or inspection. Since that year a census has been taken every five years as nearly as possible simultaneously throughout the State. The last census was taken in 1925. Live-stock in municipalities are included.

APPENDIX B—concluded

Table VI.

Mysore
(Pages 70, 74)

Column 3 (b) states the area actually sown (column 6 of Table II).

Column 4 states the total realisable land revenue, including miscellaneous land revenue.

Column 7 states the total raiyatwari demand, plus the quit-rent due on minor inams in Government villages.

Gwalior
(Pages 70, 74)

Column 1 states the net area by survey (column 4 of Table I).

Column 2 (a).—No information.

Column 3 (a) includes area not fully assessed which cannot be separated from area fully assessed.

Column 4 states "Land Revenue" as defined in the Civil Accounts, and includes cesses which cannot be separated from the land revenue.

Column 7 states only ordinary land revenue with cesses.

Columns 8 and 9 represent the incidence of land revenue on areas both fully and partially assessed.

Column 10 includes population of area not fully assessed which cannot be separated from that of fully assessed area.

Marwar
(Page 71)

Column 3 (b) states not only the area actually under crops, but also fallow lands as revenue rates are assessed on the total cultivated area, including fallows. Hence the area stated in this column exceeds the total area in Table IV.

Columns 4 and 5 relate only to khalsa area, as statistics for these columns are not available for the whole area of the State.

Bharatpur
(Pages 78, 76)

The State area leased to cultivators for a fixed term is returned as *raiayatwari*. The area leased out on condition of proprietary rights being given to lessees if they reclaimed land within a fixed term is returned as *zamindari-temporarily settled*; and the rest of the area (*i.e.*, the area remaining after deduction of the raiyatwari and the temporarily-settled zamindari areas from the total area) is entered as *zamindari-permanently settled*.

Column 2 includes muafi, chauth, and istamrar areas.

Column 5.—The population stated is that of the last census.

Column 10 shows the total population in cases where separate figures for areas fully and not fully assessed are not available.

Tonk
(Page 72)

Column 1 states the net area by survey (column 4 of Table I).

Kotah
(Page 72)

Column 1 states the area by village papers (column 5 of Table I).

Column 5 includes population of the muafi and jagir villages excluded from column 2.
