Prefatory Note	1
Charts illustrating—	
(1) Total uncultivable area, net area sown, culturable waste other than fallow, and current fallows	} Facing page 1
(2) Total area under food crops, total area under non-food crops, and total area of crops irrigated	

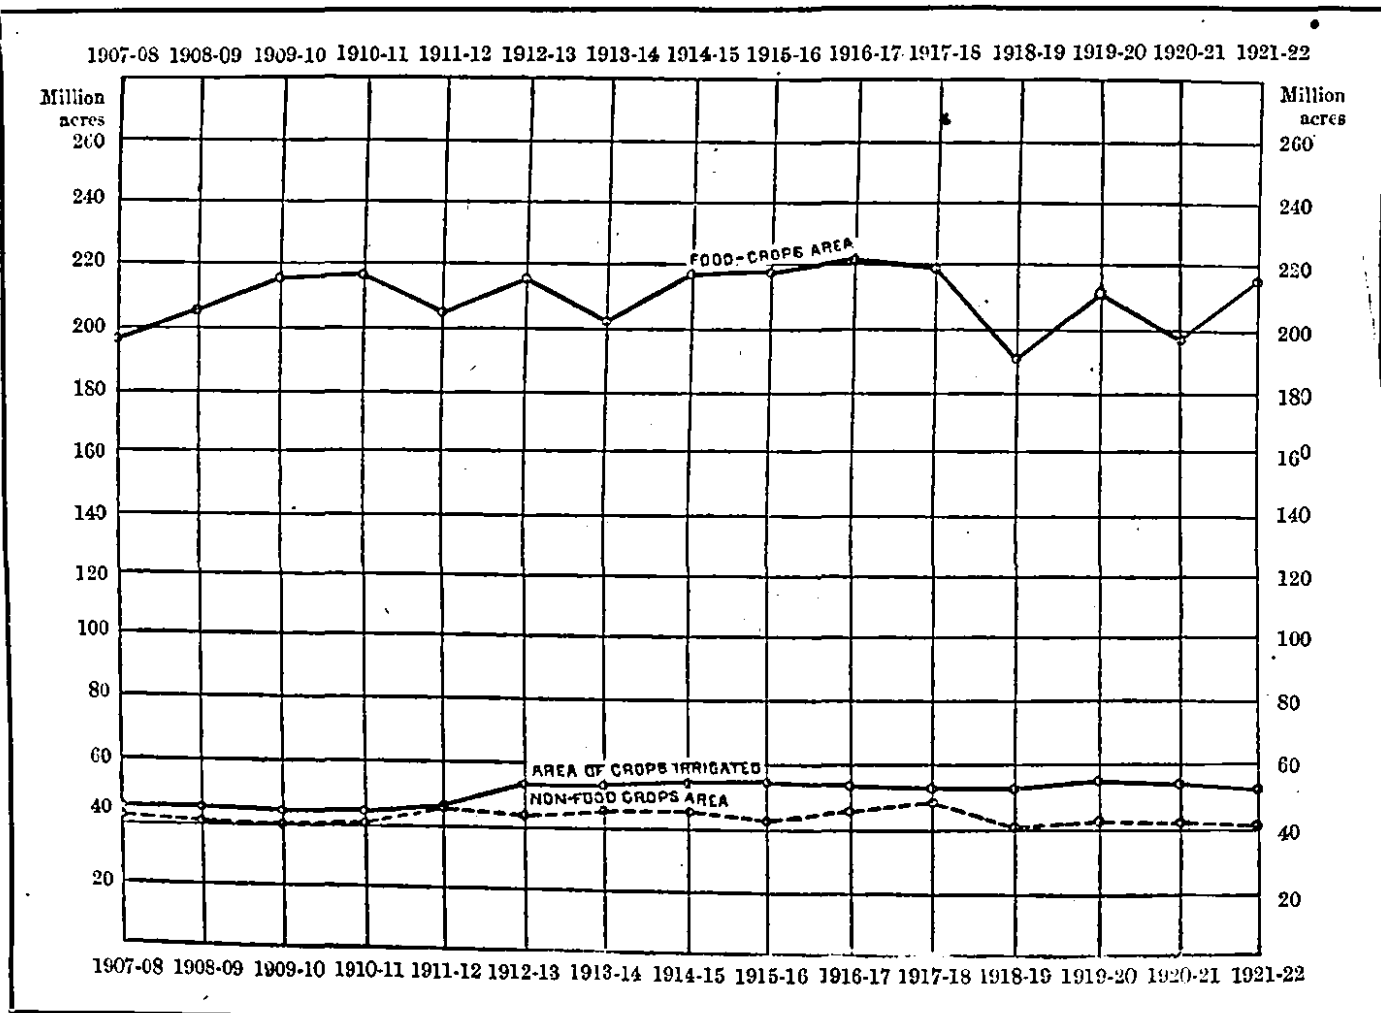

TABLES—

No.		
1.	General summary, 1902-03 to 1921-22	2-3
2.	Area cultivated and uncultivated in 1921-22 in each province	4
3.	Area under irrigation in 1921-22 in each province	5
4.	Area under different crops cultivated in 1921-22 in each province	6-7

1. Total uncultivable area, net area sown, culturable waste other than fallow, and current fallows.

2. Total area under food crops, total area under non-food crops, and total area of crops irrigated.

PREFATORY NOTE

The main idea in issuing these summary tables is to make available at an early date, in an abstract form, the provisional figures of the Agricultural Statistics of British India for the agricultural year 1921-22, which would not otherwise, be published until Volume I of the Agricultural Statistics of India is issued later in the year.

The total area of British Provinces (excluding Indian States) to which these tables relate is 667 million acres according to professional survey, or 664 million acres according to village papers. Of the latter area, 239 million acres represent uncultivable area comprising forests (86 million acres) and other area not available for cultivation (153 million acres), 151 million acres represent culturable waste other than fallow, and 51 million acres the area left fallow during the year. The remainder, 223 million acres, was the net area actually sown during the year. If areas sown more than once be taken as separate areas for each crop, the total area sown in the year 1921-22 comes to 257 million acres, which is 18 million acres or 8 per cent more than that of 1920-21, the increase occurring mainly in the Punjab, the United Provinces, and Bombay.

The total area irrigated amounted to 48 million acres, which is less than that in the previous year by one million acres. The canals irrigated 23 million acres, wells 12 million acres, tanks 7 million acres, and other sources 6 million acres. Including the area sown more than once with irrigation, the gross area of irrigated crops comes to 51 million acres, of which rice occupied 18 million, wheat 10 million, barley 3 million, jowar and bajra 3 million, and other cereals and pulses 7 million acres. Sugarcane and cotton occupied about $1\frac{1}{2}$ million acres each. Non-food crops other than cotton occupied 5 million acres.

The total area sown may be classified under the two main heads food crops (216 million acres) and non-food crops (41 million acres). There was an increase in the area under all food crops except ragi and sugar. The noticeable increases were under gram (+6 million acres) mainly in the Punjab and the United Provinces, bajra (+4 million acres) in Bombay and the Punjab mainly, wheat and jowar (+2 million acres each), rice (+ $1\frac{1}{2}$ million acres), and barley (+1 million acres). The total area under non-food crops declined by one million acres. The decrease occurred mainly in the area under cotton ($-2\frac{1}{2}$ million acres) mainly in Bombay and the Punjab, and jute (-1 million acres); while there was an increase in the case of rape and mustard (+1 million acres), and linseed and fodder crops (+ $\frac{1}{2}$ million acres each).

Summary Tables of the Agricultural Statistics of British India

No. 1—GENERAL SUMMARY, 1902-03 TO 1921-22

Classification of area
