INTRODUCTORY NOTE

1. Scope of the Returns.—The annual Seaborne Trade Returns are published in two volumes. Volume I contains the abstract and detailed tables of imports and exports, and Volume II the abstract and detailed tables of trade and shipping with each country, and at each port, together with the tables relating to the trade of Aden, and of the French and the Portuguese Possessions in India.

2. Nature of the Trade recorded.—The trade dealt with in these Accounts is the trade registered at British Indian ports between these ports and foreign countries for the year ending the 31st March. The trade of British Indian ports with one another and with Indian ports not British is separately registered, and shown in the volume of Statistics of the Coasting Trade. The foreign trade of ports in Native States is not recorded. Owing to the absence of large harbours suitable for ocean-going steamers and to the prohibition of direct transshipment at British ports, the total amount of this trade is small. The trade registered at British Indian ports can hardly be said to be that of the British Indian portion of the dependency only, that is, of the portion directly under British administration; it is rather the trade of the whole of India and Burma, including the Native States. The trade of the French and the Portuguese Possessions in India is recorded in Volume II.

3. Explanation of Imports and Exports.—The tables relating to imports refer to goods landed, whether they are intended for home consumption, bonding, or re-exportation. Goods landed and afterwards re-exported are therefore included under "imports," even although imported on a through bill of lading, unless they are removed under bond from the importing to the exporting ships at the same or another port (when they are omitted from the general tables of imports and re-exports) because the accounts exclude transshipment trade at ports. Indian ports, it may be noted, are not transshipment centres for foreign countries to any considerable extent, and the trade returns accordingly take no account of transshipments. There is no "improvement" trade, such as is recognised in the statistics of some Continental countries. Imports from and exports to foreign countries by parcel post are included in the returns, but with certain exceptions the contents of foreign registered letters received and despatched are not included. Imports and exports of gold and silver, coin and bullion,* are recorded separately and are not included in the figures of merchandise. Imports and exports of Government stores are also separately recorded.

4. Countries to which Imports and Exports are credited.—Throughout the tables in this volume *Imports* are classified as received from the countries whence they were *consigned* to British India, not, as in the corresponding volumes for 1910-11 and earlier years, as received from the countries whence they were shipped direct to India.

The substitution of countries of consignment for countries of shipment affects the imports from countries which have no seaboard† (separately distinguished in the tables of this volume). The recorded imports from such countries as Belgium, Holland, Germany, and Austria-Hungary are largely affected by this change. These countries were formerly credited in the returns with the exports from countries which did not possess a seaboard, such as Switzerland, or which did not always export their goods from their own ports but from those of a neighbouring country.

The countries whence goods are consigned are not in all cases the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to India. In such a case the second country would be the country of consignment, to which the goods would be credited in these tables.

*The tables of treasure have been temporarily discontinued.

† The following is a list of such countries :—Switzerland, Turkistan, Abyssinia, Afghanistan and the Transvaal

Exports are credited in the tables to the country of *final destination*, i.e., the country to which they are consigned, whether that country possesses a seaboard or not, not as before to the country containing the port of discharge as declared by the exporter in the shipping bills, whether carried there direct or after transshipment. As in the case of imports, this classification differs from that adopted in the corresponding volumes for 1910-11 and earlier years, the countries affected being (1) those without a seaboard, which previously did not appear in the tables, and (2) those countries through which goods consigned to countries without a seaboard were shipped.

In all tables of Volume I and Volume II where trade is shown according to countries, the countries included in the British Empire have been grouped separately from foreign countries, excepting in tables Nos. 4 to 7, 10, and 13 of Volume II, where geographical arrangement within the Continent is followed.

The imports credited to Germany and Austria-Hungary in 1915-16 and 1916-17 represent cargoes of prize vessels.

5. Method of ascertaining Quantities and Values of imports and exports.—

The statements of both quantities and values are based on the declarations of importers in Bills of Entry and of exporters in Shipping Bills as subsequently checked by the Customs officials. The quantity of goods imported and exported is recorded so far as it is possible to do so by weight, but in certain cases, number, gallon, or yard is the denomination employed. When weight is the prescribed denomination, different units (tons, cwts, lbs, and oz) are specified according to the nature of various articles and the trade practice. The weight recorded is the net weight of the goods, excluding the weight of the covers or receptacles in which the goods are packed. According to the provisions of the Indian Sea Customs Act, the values of goods imported or exported are based on wholesale market prices, and represent—

- (a) the wholesale cash price, less trade discount, for which goods of the like kind and quality are sold, or are capable of being sold, at the time and place of importation or exportation, as the case may be, without any abatement or deduction whatever, except (in the case of goods imported) of the amount of the duties payable on the importation thereof; or
- (b) where such price is not ascertainable, the cost at which goods of the like kind and quality could be delivered at such place without any abatement or deduction, except as aforesaid.

6. Tables.—All tables given in this volume cover the five years 1912-13 to 1916-17.

The **Abstract Tables** (Summary of Imports, Exports, and Re-exports, pages 3 to 11) show the total value of the imports and exports of the principal articles, classified in groups under the four main heads, namely,

- I. Food, drink, and tobacco
- II. Raw materials and articles mainly unmanufactured
- III. Articles wholly or mainly manufactured
- IV. Miscellaneous and unclassified.

Imports from and exports to British Possessions are distinguished from imports from and exports to foreign countries, and exports are divided, as in all the tables of the annual statement, into "Exports of Indian merchandise" and "Re-exports of Foreign merchandise." The term "Indian merchandise" comprises all goods which are the growth, produce, or manufacture of India. Indian merchandise is distinguished from British or Foreign merchandise in the declaration of shippers made in the shipping bills from which trade statistics are compiled. Appendix B to this volume, showing the classification of these tables, indicates the articles which are included in each group.

The **Abstract Tables** (pages 1, 2, and 12 to 56) show first (tables 1 and 2) the total value of imports and exports as a whole, secondly (tables 7 to 9) the grand total value of imports, exports, and re-exports from and to each principal country, and thirdly (tables 10 to 12) the total imports, exports, and re-exports of each of the articles. The articles are arranged in alphabetical order, provision being made for grouping together within the alphabetical order such articles as are related industrially or commercially. Certain articles are recorded by value only, but in most cases the quantities are also given.

General Tables.—Table 13 shows imports of articles, both dutiable and free, with the countries of consignment and the shares of the maritime provinces. The arrangement of the articles follows the arrangement in the abstract tables 10 to 12. Tables 14 and 15 show in the same order the exports to the principal and other countries of articles of Indian merchandise and of foreign merchandise, respectively. The trade in each article with each country is recorded separately in these tables when its value is £100 or more. If the value of the trade with any country in any particular article is less than £100 it is generally grouped under one of the heads—"Other British Possessions" or "Other Foreign Countries."

Tables 16, 17 and 18 show the imports, exports, and re-exports of Government stores. The accounts of goods exported do not include goods bought by Government and shipped on Government or chartered vessels.

The values throughout these tables are in *pounds sterling* (£1 = Rs. 15) instead of rupees as in the issues prior to that for 1911-12. The change of notation was introduced in the Supplement to the Annual Statement and has been definitively adopted in the Annual Statement itself, beginning with the issue for 1911-12.

Imports of dutiable baggage are included in the trade statistics but not those of free baggage. Imports of ship's stores on which duty is paid and exports on which drawback is claimed are also registered.

Imports by parcel post of goods, whether dutiable or not, are not classified according to their nature, but are separately recorded at the end of the tables and are entered by value only. Exports by parcel post are treated in the same way as imports by parcel post.

Unenumerated goods are divided into "Unmanufactured" and "Manufactured" (Classes II and III), and are placed in the tables of imports and exports after all other goods recorded. They are entered by value only.

A complete list of all the countries, the trade with which is separately recorded, is shown in Appendix C, while an index to the articles specified in the tables of Imports, Exports, and Re-exports, is given at the end of the volume.

7. Charts.—Charts are annexed to illustrate the shares of principal articles in the import and export trade, and also the variation in the total trade of each of the main classes into which imports and exports are divided.
