

Map showing the departure of sown area and that of rainfall in 1937-38.

NOTE.—Owing to lack of comparable data due to the creation of the new province of Orissa, the position as shown in the upper map in respect of Madras is somewhat defective. For the actual figures of rainfall, reference may be made to the publications issued by the Meteorological Department.

Agricultural Statistics of India

1937-38

VOLUME I—BRITISH INDIA

Introductory Note

THIS annual volume is the fifty-fourth of the series started in 1886 with statistics for 1884-85. As in the previous issue, figures for twenty years are shown in Summary table No. 1, for five years in the provincial tables and for two years in the district tables. This volume, it may be noted, deals with the agricultural statistics of British Provinces, while Volume II deals with those of Indian States* as far as they are reported. Owing to her political separation from India, Burma is excluded† from the scope of this volume.

The statistics are compiled from annual returns furnished by the Governments of Assam, Bengal, Bombay, the Central Provinces and the United Provinces; the Commissioners, Ajmer-Merwara and Coorg, the Directors of Agriculture, Bihar and Sind,‡ the Deputy Commissioner, Delhi, the Director of Industries and Commerce, Madras, the Revenue and Divisional Commissioner, North-West Frontier Province, the Director of Development, Orissa‡ and the Director of Land Records, Punjab.

The statistics are given in seven separate tables, namely, I—Area; II—Classification of area; III—Area under irrigation; IV—Area under crops; V—Live-stock, ploughs, and carts; VI—Land Revenue assessment; and VII—Harvest prices. The totals of the figures given in these tables are shown in a series of summary tables, to which a table on world crops is added. In addition to these, there are three appendices, namely, Appendix A, dealing with the average yield per acre of principal crops; Appendix B, giving the meaning of vernacular terms used in the volume; and Appendix C, containing an alphabetical list of crops cultivated in India and their classification in Table IV.

The year to which the returns relate ends on 30th June, this being the generally recognised agricultural year, except in Assam where the year ends on 31st March and in the Central Provinces and Berar where it ends on 31st May. It should, however, be borne in mind that statistics relating to areas irrigated (Table III) and areas under crops and specification of crops (Table IV) generally include both the *kharif* (autumn) and the *rabi* (spring) crops, and therefore actually relate to the year ended with the harvesting of the *rabi* or spring crops.

* In Appendix A (Volume I), however, figures relating to the Mysore State are shown separately.

† In Appendix A, however, figures relating to average yield of principal crops of Burma also are shown.

‡ Newly constituted from April, 1936.

Total area and population of India

The total area of India (excluding Burma) is 1,572,000* square miles, or 1,005,819,000 acres with a population of 338 millions according to the census of 1931. This may be divided as follows :—

	Aores	Population
(1) British Provinces (including Indian States within the political jurisdiction of the Government of Assam)	519,685,000	257,098,000
(2) Indian States having direct political relations with the Crown Representative	436,892,000	78,441,000
(3) Certain specially administered territories in the North-West Frontier Province (Tribal areas, etc.) not included under (1)	14,536,000	2,102,000
(4) British Baluchistan (including administered areas)	34,706,000	464,000
Total	1,005,819,000	338,105,000

No returns of agricultural statistics are prepared either for item (3) certain specially administered territories in the North-West Frontier Province, or for item (4) British Baluchistan.

Table I
Total area

The total area of the British Provinces (item 1 above) shown in this volume—519,685,000 acres or 812,000 square miles—includes 7,891,000 acres, with a population of 626 thousands, belonging to Indian States, which are within the political jurisdiction of the Government of Assam, *viz.*, Manipur and the Khasi and Jaintia Hill States.

Deducting 7,891,000 acres belonging to Indian States in Assam from the total area of 519,685,000 acres included in British Provinces, the remainder, 511,794,000 acres, is shown in Table I, and this represents the area of British territory according to professional survey. The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the southern provinces. The agricultural statistics are, however, prepared in a number of provinces or parts of provinces from "village papers", *i.e.*, papers prepared by the village accountants for the purpose of assessment and collection of land revenue. The area given in the village papers of the United Provinces, the Central Provinces, Madras, the Punjab, the North-West Frontier Province and Orissa differs to some extent from the area ascertained by professional survey. The causes of this difference are: (a) while the surveyed area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (b) the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and rail-roads is not uniform in the two sets of returns. Substituting the area by village papers for the area by survey in respect of provinces and tracts where the two sets of returns differ, the actual area of British territory for which statistics are given in this volume is 511,302,000 acres, as against 511,794,000 acres according to professional survey.

Table II
Classification of area

	Aores (1,000)	Per cent	shown in the margin. Of the total area, 68,001,000 acres, or 13 per cent, are occupied by forests; and the area not available for cultivation, <i>i.e.</i> , land absolutely barren or unculturable or covered by buildings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 92,402,000 acres, or 18 per cent. The balance, 350,899,000 acres, or 69 per cent, represents the area available for cultivation. Of this, 91,969,000
Forests	68,001	13.3	shown in the margin. Of the total area, 68,001,000 acres, or 13 per cent, are occupied by forests; and the area not available for cultivation, <i>i.e.</i> , land absolutely barren or unculturable or covered by buildings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 92,402,000 acres, or 18 per cent. The balance, 350,899,000 acres, or 69 per cent, represents the area available for cultivation. Of this, 91,969,000
Not available for cultivation	92,402	18.1	
Culturable waste other than fallow	91,969	18.0	
Current fallows	45,437	8.9	
Net area sown	213,493	41.7	
Total	511,302	100	

* The difference between this area and that shown in the Census report of 1931 is due to the adoption of revised areas from the annual returns of Agricultural Statistics where available.

acres, or 18 per cent of the total area, represent culturable waste other than fallow, i.e., land available for cultivation but not taken up or abandoned, and 45,437,000 acres, or 9 per cent, land kept fallow in the year of report. The net area actually sown with crops during 1937-38 was therefore 213,493,000 ^{Net area sown}

	Proportion of sown to total area	Population per 100 acres of sown area
Bombay	59 per cent	59
Delhi	58 "	298
United Provinces	53 "	134
Bengal	50 "	198
Punjab	45 "	86
Bihar	44 "	168
Madras	40 "	136

Orissa	31 "	125
North-West Frontier Province	25 "	117
Ajmer-Merwara	19 "	166
Assam	18 "	137
Sind	17 "	76
Coorg	14 "	113
British India	42 "	119

acres, or 42 per cent of the total area, as against 213,719,000 acres in the preceding year. If, however, areas sown more than once during the year are taken as separate areas for each crop, the gross area sown in the year of report amounts to 246,863,000 acres, as against 248,192,000 acres in the preceding year. The proportion of the net sown to total area and the number of population per 100 acres of sown area in each

province are stated in the margin. The proportion of sown to total area in the year under review was highest in Bombay and lowest in Coorg and the population per unit of sown area was the largest in Delhi and smallest in Bombay.

The term "forests" in the returns of Agricultural Statistics means ^{Forests} "any land classed or administered as forest under any legal enactment dealing with forests". Any cultivated area existing within such forests may, however, be excluded from that head and entered in the column "net area sown". The forest areas returned in the Agricultural Statistics do not agree in most cases with those stated in the Reports on the Administration of the Forest Department for various reasons,* the chief amongst which are (1) the forest administration reports and the returns of agricultural statistics relate in many cases to different periods, (2) the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics include, in addition, forest areas administered by district officers, local boards, municipalities, etc., and (3) certain village and other lands not covered by forests but worked by the Forest Department and returned as forest lands by that Department, are not treated as forests in the returns of agricultural statistics but are included under the proper heads of cultivated or uncultivated lands as the case may be. Of the total forest area (68,001,000 acres in 1937-38), 23 per cent lies in the Central Provinces and Berar, 19 per cent in Madras, 14 per cent in the United Provinces, 12 per cent in Bombay and 10 per cent in Bihar and the remaining 22 per cent in the other provinces.

Most of the barren and unculturable lands lies naturally in the hilly ^{Area not available for cultivation} tracts of southern India and in the dry and desert regions of north-western India. Madras contains 16 per cent of the total area under the head "not available for cultivation" (92,402,000 acres in 1937-38), Sind 15 per cent, the Punjab 14 per cent, the United Provinces 11 per cent, Bengal 10 per cent, Bihar and Orissa 7 per cent each, Bombay 6 per cent, Central Provinces and Berar and Assam 5 per cent each and the remaining provinces 4 per cent.

The head "culturable waste other than fallow" shows lands available for ^{Culturable waste other than fallow} cultivation but not taken up or abandoned. It includes areas such as groves not classed in the area sown and also areas under bamboos and thatching grass when not forming parts of forest areas.* Of the total culturable waste land (91,969,000 acres in 1937-38), 21 per cent was in Assam, 15 per cent each in the Punjab and the Central Provinces and Berar, 12 per cent in Madras, 11 per cent in the United Provinces, 6 per cent each in Sind and Bengal and the remaining 14 per cent in the other provinces.

* For detailed information in respect of provinces, see notes at the foot of Table II, Nos. 22 to 34 (pp. 35-58).

Current fallows The maximum period for which land left uncultivated is reckoned as fallow varies according to local laws and customs in the different provinces, from two years in the Punjab and the North-West Frontier Province to ten years in Bombay. After this period the land, if still left uncultivated, is treated as abandoned and included under the head "culturable waste". Owing to this diversity of practice, the classification of area as "culturable waste" and "current fallows" is of doubtful statistical accuracy; a plot of land, for instance, left uncultivated for, say, six years, would be treated as fallow in Bombay, but as culturable waste in the Punjab. The total area returned as "current fallow" in 1937-38 was 45,437,000 acres, as against 44,836,000 acres in the preceding year.

Table III
Irrigation

The total area irrigated in 1937-38 was 52,833,000 acres, as against 50,158,000 acres in the preceding year. Of this area, 24,653,000 acres were irrigated from Government canals, 3,611,000 acres from private canals, 12,569,000 acres from wells, 6,251,000 acres from tanks, and 5,749,000 acres from other sources of irrigation. In India irrigation is ordinarily resorted to on an extensive scale in tracts where the rainfall is most precarious. In Assam, eastern Bengal, and the Malabar Coast (including the Konkan), where the rainfall

	Proportion of irrigated to total sown area
Sind	86 per cent
Punjab	69 "
North-West Frontier Province	49 "
Ajmer-Merwara	36 "
United Provinces	32 "
Delhi	28 "
Madras	27 "
Bihar	22 "
Orissa	21 "
Assam	10 "
Bengal	8 "
Central Provinces and Berar	5 "
Bombay	4 "
Coorg	3 "

is ordinarily heavy, the crops hardly need the help of irrigation, unless there is an unusual scarcity of rain. Of the total area irrigated in 1937-38, the Punjab accounted for 31 per cent, the United Provinces 22 per cent, Madras 17 per cent, Bihar and Sind 8 per cent each and the other provinces for the remaining 14 per cent. The proportion of irrigated to total area sown in each province is stated in the margin.

The above figures of irrigated areas do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. Counting areas sown more than once as separate areas for each crop, the gross area of irrigated crops was 57,314,000 acres in 1937-38. Of this area, 83 per cent was under food crops and the remainder under non-food crops. Of the former, 18,426,000 acres were under rice, 12,011,000 acres under wheat, 2,548,000 acres under barley, 1,331,000 acres under jowar, 987,000 acres under bajra, 1,360,000 acres under maize, 2,229,000 acres under sugarcane, and the remaining 8,428,000 acres under other food crops. Of the irrigated non-food crop area, 4,556,000 acres were occupied by cotton. These statistics of irrigated crops are in some cases defective as explained in the notes at the foot of Table III (pages 60-106).

Table IV
Area under crops

The areas cultivated with the different crops represent the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops, and in these cases the area first sown is omitted. In cases where two or more crops are grown together on the same field, an estimate is made of the area covered by each, and the areas so estimated are separately returned under the respective crop headings. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities. In certain tracts, where the village staff does not exist, estimates are framed on the best available information. An exception to the above rule is, however, made in the United Provinces, where the area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crops by the village accountant. In the same province this procedure is also followed in the case of oilseeds thinly sown in combination with food-grains, and in this case the whole area of the mixed field is assigned to food-grains.

The gross area cultivated with crops covered, as stated before, 246,863,000 acres in 1937-38. The different classes of crops and the area occupied by each class are stated in the margin. Of the total sown area, food-crops occupied

	Acres (1,000)	Per cent of total
Food-grains	186,762	75.7
Condiments and spices	1,383	0.6
Sugar	3,859	1.6
Fruits and vegetables	3,816	1.5
Miscellaneous food-crops	1,502	0.6
Total food-crops	187,322	80.0
Oilseeds	16,985	6.9
Fibres	18,944	7.6
Dyes and Tanning materials	53	..
Drugs and narcotics	2,170	0.9
Fodder crops	10,411	4.2
Miscellaneous non-food crops	978	0.4
Total non-food crops	49,541	20.0

Classification of area sown
 about 197,322,000 acres, or 80 per cent and non-food crops 49,541,000 acres, or 20 per cent. Of the food-crops, food-grains (cereals and pulses) covered as much as 186,762,000 acres†, or 76 per cent of the total area sown, and other food-crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food-crops* together) some 10,560,000 acres, or 4 per cent of the total. Of non-food crops, fibres (such as cotton, jute, hemp, etc.)

occupied 18,944,000 acres or 8 per cent and oilseeds 16,985,000 acres‡, or 7 per cent of the total area sown. The other non-food crops*—dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), fodder crops, and miscellaneous non-food crops together—occupied about 13,612,000 acres, or 5 per cent of the total.

The area under food-grains (186,762,000 acres) showed a decrease of 2,584,000 acres, as compared with the preceding year. The actual increase or decrease

	1937-38 Acres (1,000)	1936-37 Acres (1,000)	Increase (+) or Decrease (-) Acres (1,000)
Rice	69,455	69,044	+411
Wheat	26,633	25,189	+1,444
Barley	6,311	6,531	-220
Jowar	20,702	23,481	-2,779
Bajra	12,498	11,451	+1,047
Ragi	3,475	3,585	-110
Maize	5,633	5,742	-109
Gram	13,662	15,532	-1,870
Other grains and pulses	28,393	28,791	-398

Food-grains
 under each food-grain is stated in the marginal table. It will be seen that the decrease occurred mainly under jowar and gram. Of the total area under food-grains, 20 per cent was in the United Provinces‡, 13 per cent each in Bengal and Madras, 12 per cent in the Punjab, 11 per cent each in Bombay and the Central Provinces and Berar, 10 per cent in Bihar and the remaining 10 per cent in the other provinces.

The total area under oilseeds (16,985,000 acres) showed an increase of 1,420,000 acres, as compared with the preceding year. The increase occurred mainly under groundnut. The actual increase or decrease under each kind of oilseeds is stated in the margin. Of the total area under oilseeds 38 per cent was in

	1937-38 Acres (1,000)	1936-37 Acres (1,000)	Increase (+) or Decrease (-) Acres (1,000)
Linseed	2,489	2,342	+147
Sesamum	2,438	2,288	+150
Rape and mustard	3,001	3,313	-312
Groundnut	6,408	4,752	+1,656
Coconut	657	655	+2
Castor	400	417	-17
Other oilseeds	1,592	1,798	-206

Oilseeds
 Madras, 15 per cent in the Central Provinces and Berar, 14 per cent in Bombay, 9 per cent in Bihar, 7 per cent in Bengal, 6 per cent in the United Provinces‡, 5 per cent in the Punjab and the remaining 6 per cent in other tracts.

* For a list of these crops, vide Appendix C.

† In the United Provinces, the whole of the area sown with food-grains mixed with oilseeds is shown under food-grains. The area included under food-grains, which was really sown with oilseeds (as a mixed crop), is roughly estimated at 4 million acres in the whole province in 1937-38. Excluding this area of 4 million acres under oilseeds, the total area under food-grains in British India in 1937-38 would come to 183 million acres instead of 187 million acres.

‡ The figures shown under the several heads of oilseeds in Table IV against the United Provinces represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop, excluding the oilseeds which are thinly sown in combination with wheat, barley, gram, and other food-crops. If the areas occupied by the scattered oilseeds plants were added up, it is estimated very roughly that they would amount in 1937-38 for the whole of the United Provinces to 4 million acres. Including this area, the total area under oilseeds in British India in 1937-38 would come to about 21 million acres.

Condiments and spices

The total area under condiments and spices in 1937-38 was 1,383,000 acres, as against 1,326,000 acres in the preceding year. Spices are grown mostly in southern India, Madras alone accounting for about 44 per cent of the total area under condiments and spices in 1937-38.

Sugar

The total area occupied by sugar-yielding plants in 1937-38 was 3,859,000 acres, as against 4,382,000 acres in the preceding year. Of this area, 3,701,000 acres were under sugarcane, as against 4,224,000 acres in the preceding year. Of the sugarcane area, 59 per cent was in the United Provinces, 14 per cent in the Punjab, 10 per cent in Bihar, 8 per cent in Bengal and 3 per cent in Madras. The other sugar-yielding plants, namely, date palm and palmyra palm, occupied a total area of 158,000 acres, which was slightly greater than in the preceding year. Of this area, Madras accounted for 59 per cent and Bengal 40 per cent.

Fibres

Fibre crops occupied 18,944,000 acres in 1937-38, as against 18,138,000 acres in the preceding year. The actual increase or decrease under the several kinds of fibres is shown in the marginal table. The area under cotton showed an increase of about 4 per cent. Of the total cotton area, 26 per cent was in the Central Provinces and Berar, 25 per cent in Bombay, 20 per cent in the Punjab, 17 per cent in Madras, 6 per cent in Sind and 4 per cent in the United Provinces. The area under jute showed an increase of 12 per cent. Of the total jute area, 76 per cent was in Bengal and the remainder was practically confined to the adjoining provinces of Bihar, Orissa and Assam. Other fibres together showed a decrease of 3 per cent, as compared with the preceding year.

	1937-38 Acres (1,000)	1936-37 Acres (1,000)	Increase(+) or Decrease (-) Acres (1,000)
Cotton	15,359	14,839	+520
Jute	2,847	2,540	+307
Other fibres	738	759	-21

Dyes and Tanning materials

The total area under dyes and tanning materials was 53,000 acres in 1937-38. Of this, the area under indigo, which is now mostly grown for green manuring, was 38,000 acres, as against 43,000 acres in the preceding year. Other dyes and tanning materials covered an aggregate area of 15,000 acres.

Drugs and narcotics

Drugs and narcotics occupied 2,170,000 acres in 1937-38, as against 2,087,000 acres in the preceding year. The actual increase or decrease under each kind is shown in the marginal table. There has been no significant variation in the areas under the crops included under this head except in the case of tobacco, the area under which showed an increase of 9 per cent.

	1937-38 Acres (1,000)	1936-37 Acres (1,000)	Increase (+) or Decrease (-) Acres (1,000)
Opium	9	10	-1
Coffee	98	98	..
Tea	739	738	+1
Tobacco	1,138	1,048	+90
Other drugs and narcotics	186	193	-7

Fodder crops

The head "fodder crops" shows only those crops which are used exclusively as fodder in normal times. These are oats, field vetch, guinea grass, lucerne, fodder jowar, and carob or locust tree. The total area under fodder crops in 1937-38 was 10,411,000 acres, as against 10,573,000 acres in the preceding year.

Fruits and vegetables including root crops

The total area under fruits and vegetable crops in 1937-38 was 3,816,000 acres, as against 3,795,000 acres in the preceding year. [For the names of the fruits and vegetable crops cultivated in India, see footnotes on page 113 and Appendix C.]

Miscellaneous crops

The total area occupied by miscellaneous crops, that is, crops not classified under any of the heads specified above, was 2,480,000 acres. Of this 1,502,000 acres were occupied by miscellaneous food-crops and 978,000 acres by miscellaneous non-food crops. [For the names of the crops included under these heads, see footnotes on page 113 and Appendix C.]

Area sown more than once

The total extent of land on which more than one crop was cultivated during the year was 33,370,000 acres, as against 34,472,000 acres in the preceding year.

The statistics recorded in Table V are based on cattle censuses. The census is taken annually in the Central Provinces and Berar and quinquennially in the other provinces. The first general quinquennial census was taken in 1919-20, the second in 1924-25, the third in 1929-30 and the fourth in 1934-35. Two provinces, Bengal, and Bihar and Orissa, did not, however, take part in the 1934-35 census. Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. The animals are divided into three classes, namely, (1) bovine, comprising oxen and buffaloes, (2) ovine, comprising sheep and goats, and (3) others, comprising horses and ponies, mules, donkeys and camels. The total number of live-stock of each of these

Table V
Live-stock, ploughs and carts

	Number in thousands				
	Bovine	Ovine	Others	Ploughs	Carts
Ajmer-Merwara	481	515	14	50	17
Assam	5,982	795	20	1,145	63
Bengal*	25,287	6,049	116	4,592	860
Bihar and Orissa*	21,308	6,779	227	3,542	625
Bombay	9,961	3,790	190	1,214	678
Central Provinces and Berar†	12,617	1,560	145	1,643	1,082
Coorg	137	3	1	28	1
Delhi	155	36	15	18	8
Madras	24,607	18,701	201	4,384	1,194
North-West Frontier Province‡	1,038	906	169	204	7
Punjab	15,840	8,599	1,398	2,361	857
Sind	2,635	2,322	373	339	90
United Provinces	32,470	10,002	818	5,196	1,094

three classes in each province, together with the numbers of ploughs and carts, according to the latest census in each province, is stated in the margin¶. Under the bovine class almost all the provinces which took part in the census of 1934-35 showed increases as compared with the preceding census. Madras recorded an increase of over two millions, the Punjab an increase of over one million and a half and the United Provinces an increase of over one million. In the case of stock of the ovine class, the United Provinces recorded the highest increase, viz., 1,208,000 heads and Madras the largest decrease, viz., 1,569,000 heads. Under ploughs, the United Provinces showed a noticeable increase of 143 thousand and Madras a noticeable decrease of 92 thousand. In the case of carts, the United Provinces showed a noticeable increase of 96 thousand and Madras a noticeable decrease of 41 thousand.

The table below shows the approximate number of live-stock of the bovine class (cattle proper), according to the latest census in each province, per 100 acres of sown area and per 100 of the population in each province :—

	Number of cattle		Number of cattle		
	Per 100 acres of sown area	Per 100 of population	Per 100 acres of sown area	Per 100 of population	
Ajmer-Merwara	143	863	Coorg	95	84
Assam	95	69	Delhi	72	24
Bengal	102	52	Madras (b)	73	53
Bihar and Orissa (a)	83	57	North-West Frontier Province	49	42
Bombay	95	59	Punjab	58	37
Central Provinces and Berar (c)	51	82	Sind	51	68
			United Provinces	90	67

Table VI
Land Revenue Assessment

The varieties of land tenure in the different provinces are included in Table VI and are given, as far as possible, under one or other of the following three heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). When the revenue is assessed by the State, permanently or temporarily, on an individual or community owning an estate, and occupying a position identical with or analogous to that of a landlord, the tenure is known as *zamindari* or village community; and when the revenue is assessed on individuals who are the actual occupants, or are accepted as representing the occupants, of smaller holdings, the tenure

* Figures relate to 1929-30 census.

† Excludes North Waziristan and Kurram districts.

‡ Exclusive of portions of Raipur and Bilaspur districts transferred to the Orissa province.

¶ As Orissa had not been constituted as a separate province at the time of holding the 1934-35 census, figures given relate to the provinces as they existed prior to 1st April, 1936. An estimate for Orissa has, however, been framed and shown in Table No. 70. Figures for the Central Provinces, however, relate to the province as reconstituted on 1st April, 1936. Figures for the reconstituted provinces of Bihar for 1929-30 and of Madras for 1934-35 may be obtained in the manner indicated in the footnotes on pages 208 and 224 respectively.

|| Based on 1929-30 live-stock census figures.

(a) Approximate.

(b) Represents the reconstituted province of Madras.

(c) " " " " " Central Provinces and Berar.

is known as *raiyatwari*. Under either system there may be rent-paying sub-tenants. Zamindari tenure may be either *permanently settled*, i.e., where the land revenue has been fixed in perpetuity, or *temporarily settled*, i.e., where the land revenue is fixed for a limited number of years only. Village communities and *raiyatwari* tenures are, as a rule, temporarily settled, and the land revenue assessed on them is liable to change from time to time.

The following table shows the position as regards the forms of land tenure in the surveyed areas of the various provinces, according to the latest statistics available, the figures roughly indicating the extent to which the different systems prevail :—

	Raiyatwari Acres (1,000)	Zamindari (individual proprietors or village communities) settled		Total Acres (1,000)
		Permanently Acres (1,000)	Temporarily Acres (1,000)	
Ajmer-Merwara	29,868	974	797	1,771
Assam	...	3,919	1,898	58,485
Bengal	...	39,158	10,100	49,258
Bihar	...	39,694	4,630	44,324
Bombay	44,676	...	3,977	48,653
Central Provinces and Berar	11,192	...	39,465	63,092*
Coorg	1,012	1,012
Delhi	369	369
Madras	62,176	28,843	...	91,019
North-West Frontier Province	8,577	8,577
Orissa	3,930 (b)	9,861	6,815	20,606
Punjab	60,155	60,155
Sind	30,180	30,180
United Provinces	...	7,306	60,660	67,966
Total	183,034	129,755	197,243	(a) 522,467

It will thus be seen that 36 per cent of the total area (excluding Government forests in the Central Provinces and Berar, *vide* footnote * below) is held by *raiyatwari* proprietors, while 25 per cent is held by permanently settled and 39 per cent by temporarily settled *zamindari* proprietors.

The statistics for this table are collected annually in Assam, Ajmer-Merwara, the Punjab, Delhi, the North-West Frontier Province, and the Central Provinces and Berar, and quinquennially in Bengal, Bihar, Orissa, the United Provinces, Bombay, Sind, Madras and Coorg. According to the latest statistics available, the total revenue from land

	Total revenue from land (Rs. 1,000)	Total population (1,000)	Revenue per head R a.
Ajmer-Merwara	3,97	408	1 1
Assam	1,44,41	8,622	1 11
Bengal	8,18,64	48,989	— 10
Bihar	1,31,12	32,371	— 6
Bombay	3,75,38	16,716	2 4
Central Provinces and Berar	2,32,40	15,323	1 8
Coorg	4,62	183	2 12
Delhi	3,85	688	— 10
Madras	7,71,33	46,730	1 10
North-West Frontier Province	27,72	2,497	1 2
Orissa	53,06	8,045	— 11
Punjab	5,42,21	23,551	2 5
Sind	1,73,55	3,888	4 7
United Provinces	6,77,53	48,409	1 6
Total (a)	34,59,69	256,348	1 6

(excluding cesses) for the whole of British India amounts to about Rs 35 crores. This represents the actual realisable demand on account of the year, no account being taken either of the collection of arrears for past years, or of amounts remaining uncollected at the end of the year. The marginal table shows the total land revenue assessment, the total population, and the assessment per head of population in each province**. For additional details, reference should be made to Table No. 74 on pages 244-251.

* Including 12,435,000 acres of Government forests.

† Sums remitted on account of unoccupied lands, short crops, etc., are wholly excluded from this total amount in the case of provinces where all remissions are granted within the year to which the return relates, but in provinces where remissions are not granted or are only partially granted within the year, no deduction is made on account of remissions.

** Statistics of the incidence of land revenue assessment dealt with in this table show only the average amount contributed by each acre of land or per head of population in each province or district towards land revenue. They cannot be used for comparing the burden of land-revenue on land in the different districts and provinces as no valid comparison is possible without taking into account such factors as the nature of the soil, climate, facilities for irrigation, etc.

(a) See footnote (e) on page 10.

(b) Including Gountiai and Malguzari.

Table VII shows prices of staple crops at harvest-time. The provincial figures represent median averages of the district figures reported in the provincial Season and Crop Reports. Table VII
Harvest prices

The Agricultural Department or the Land Records Department in each province maintains a statement of the average yield per acre of land of average quality, irrigated and unirrigated, of crops in each district. In order to test the accuracy of the standards of normal or average yield, and, if necessary, to revise them, a system of crop-cutting experiments exists in almost all the provinces. Under this system plots of land of average quality are selected, and the crops grown on them are cut and weighed in the presence of responsible officers of the district staff or of the provincial Agricultural Department or provincial Land Records Department. The results of the experiments are reported to the head of the provincial Agricultural Department, or Land Records Department, who revises the standards in the light of these returns, local enquiries and personal knowledge. This revision is ordinarily made once in five years, although crop-cutting experiments are usually carried out for the principal crops each year. The table in Appendix A shows the figures as last revised with reference to the crop-cutting experiments and enquiries made up to 1936-37. Appendix A
Average yield of crops

Appendices B and C require little or no comment. Appendix B explains the vernacular terms used in this volume, and Appendix C, the classification in Table IV of the various crops cultivated in India. Appendix B
Vernacular terms
Appendix C
Classification of crops

The map, charts, and diagrams exhibited in the volume illustrate—

- (1) the departure of sown area and that of rainfall in 1937-38 from the average of the preceding ten years; Charts
 - (2) variations in rainfall as compared with the normal in relation to the total area sown, food crops area, and current fallows (reversed);
 - (3) total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow, and current fallows;
 - (4) total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops;
 - (5) area under rice, wheat, millets, oilseeds, cotton, jute, and other crops;
 - (6) total area sown and area under different crops;
 - (7) total live-stock divided between bovine, ovine, and others;
 - (8) shares of provinces in the total area under principal crops
- and (9) harvest prices of certain principal crops.

J. N. GHOSH,

*Offg. Deputy Director (Statistics),
for Director-General.*

Calcutta, March 10, 1941.

2. Total area sown, area under food crops, current fallows (reversed) and variations in rainfall as compared with normal.

NOTE.—(1) In the above chart figures of area represent million acres, while those for rainfall inches.
 (2) The curves relating to "Current fallows" and "Rainfall" should be read with reference to scales shown on the left hand side.

3. Total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow and current fallows.

NOTE.—(1) "Total cultivable area" represents the sum of net area sown, culturable waste, and current fallows.
 (2) "Uncultivable area" includes the area under forest.

4. Total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops.

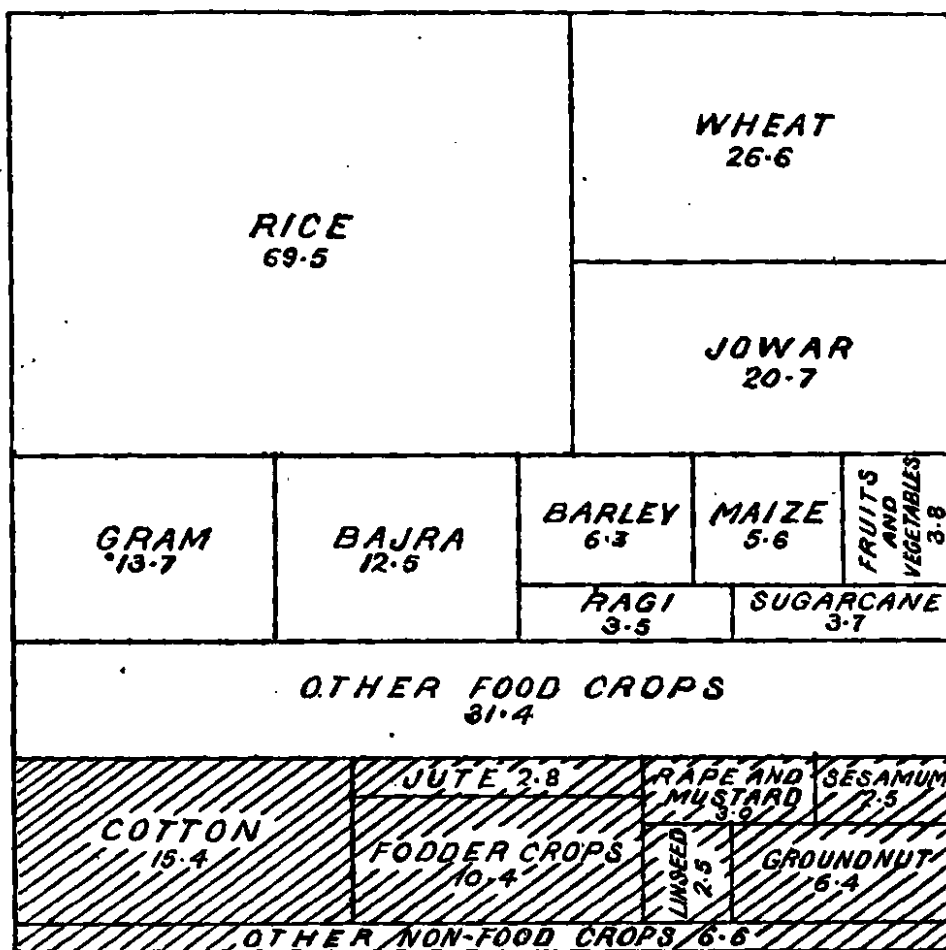

5. Area under rice, wheat, millets, oilseeds, cotton, jute, and other crops.

Note.—Millets represent jowar, bajra and ragi.

6. Total area sown in 1937-38.

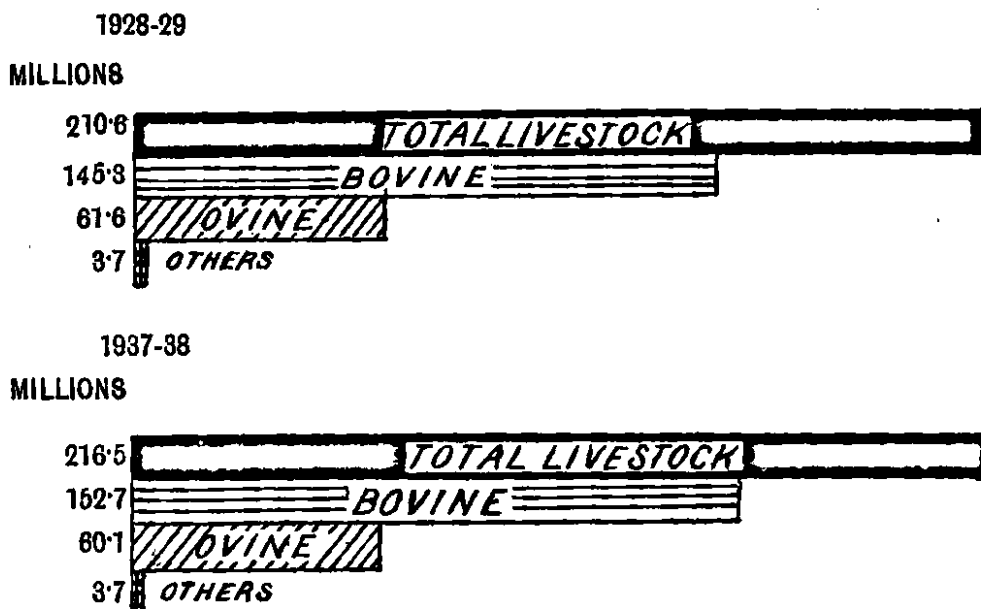

Total area sown	246.9 million acres
Area under food crops (unshaded)	197.3 " "
Area under non-food crops (shaded)	49.6 " "

NOTE.—“Other food crops” are minor food grains, condiments and spices and miscellaneous food crops.

“Other non-food crops” are oilseeds other than sesamum, linseed, rape and mustard and groundnut; fibres other than cotton and jute; dyes; drugs and narcotics; and miscellaneous non-food crops.

7. Total Livestock divided between bovine, ovine and others in 1937-38 as compared with the year 1928-29.

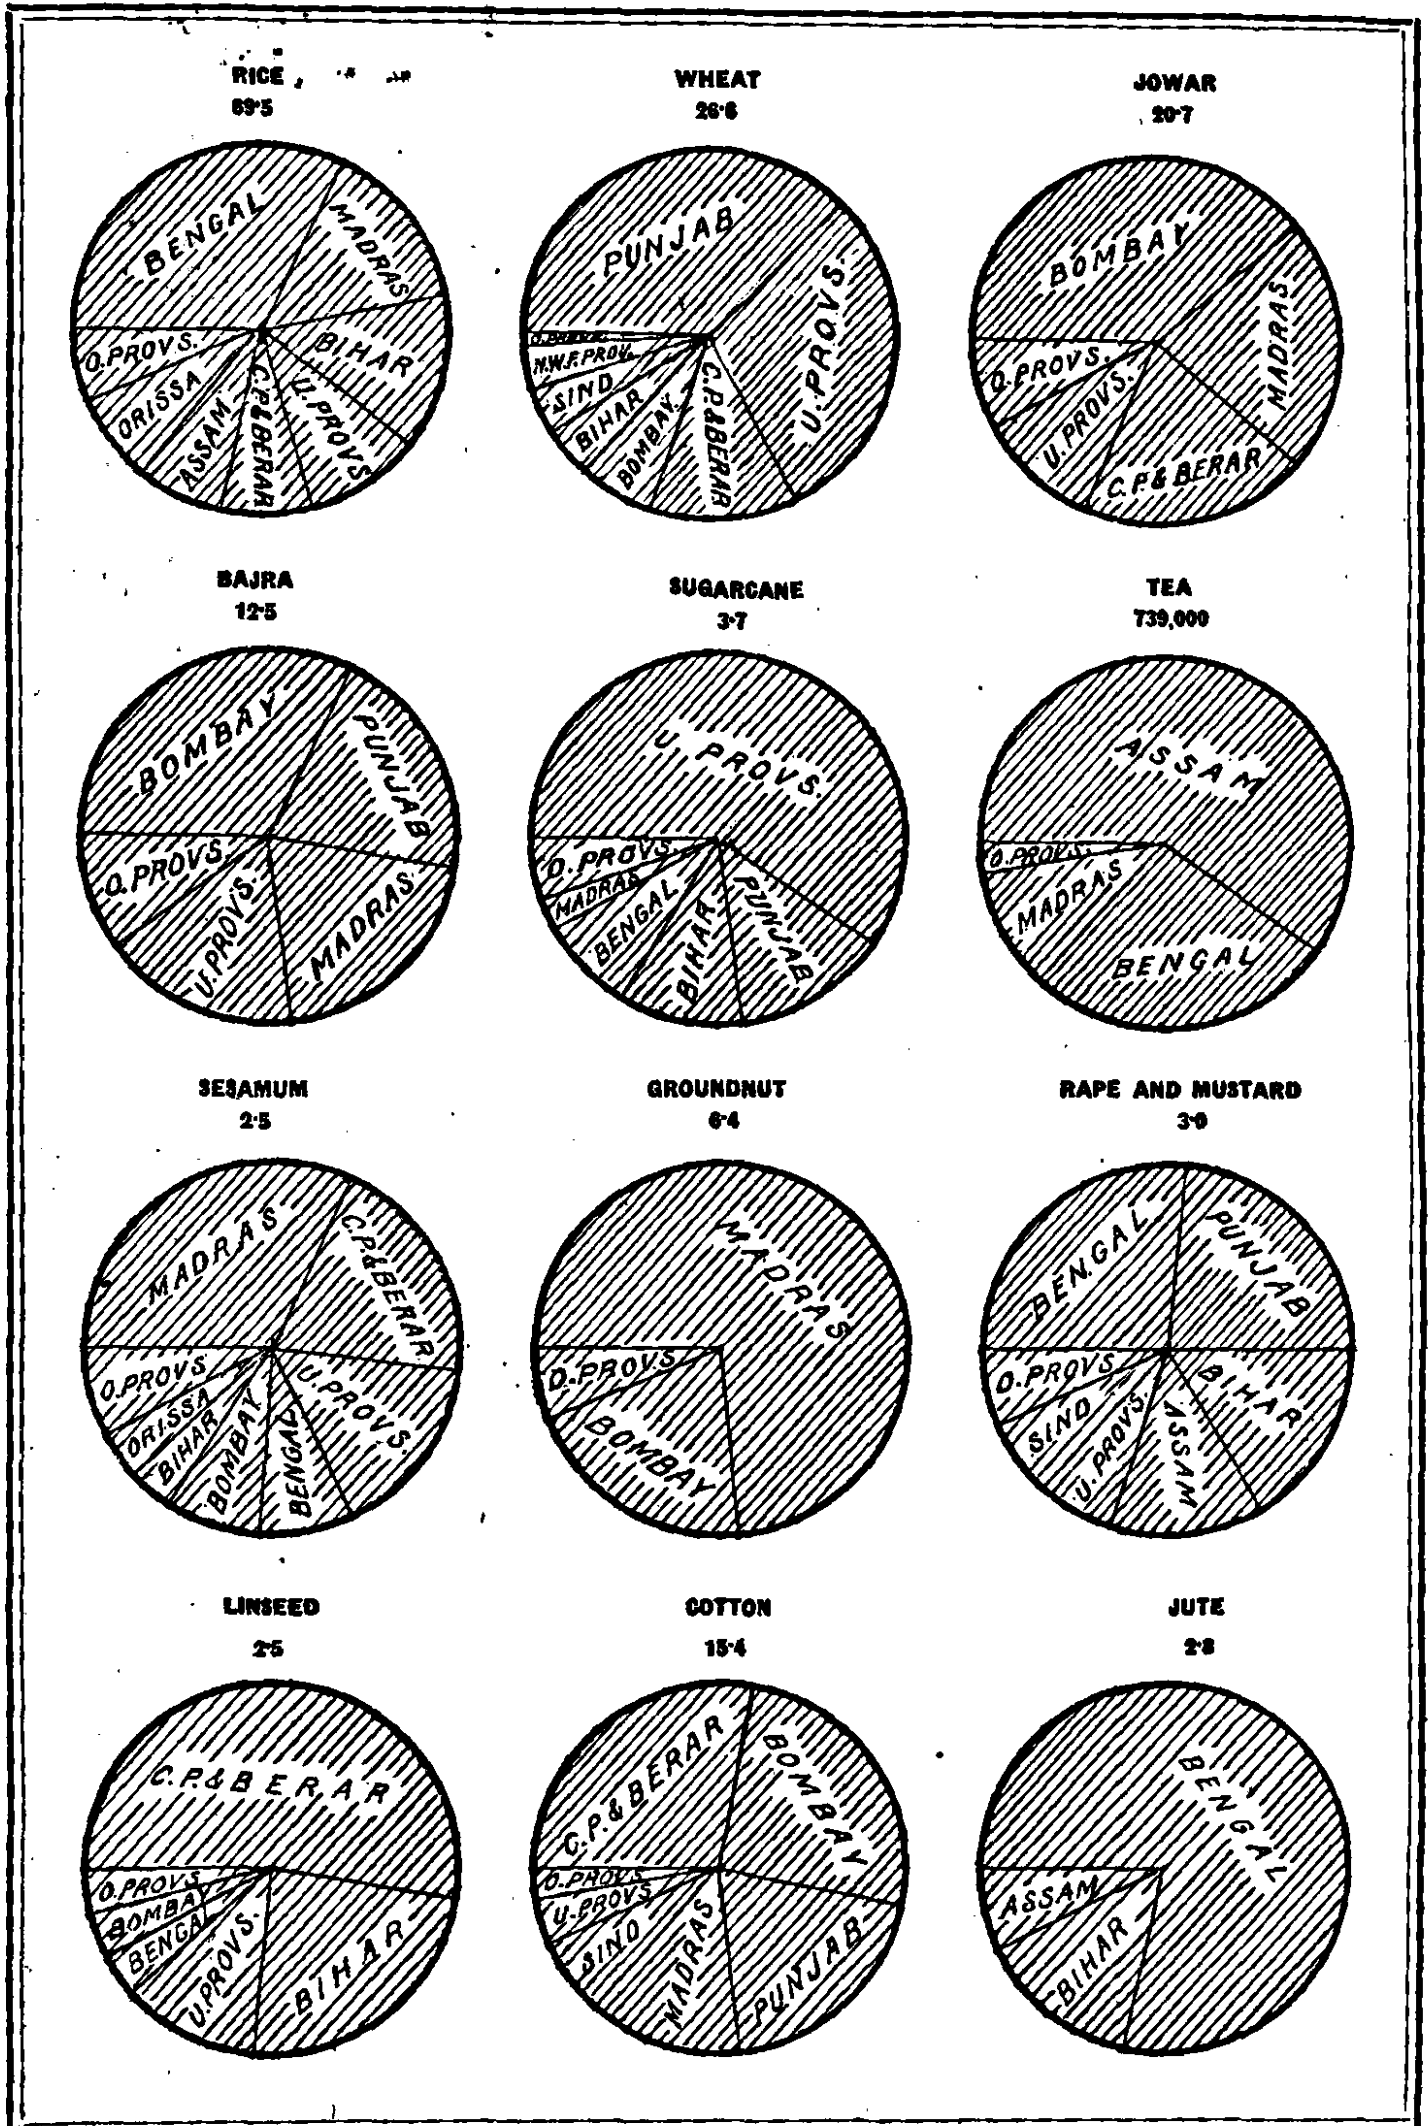

NOTE (i)—“Bovine” includes bulls and bullocks, buffaloes, calves and buffalo calves.

“Ovine” includes sheep and goats.

“Others” includes horses and ponies, mules, donkeys, and camels.

(ii) The figures for 1937-38 include the 1929-30 census figures of Bengal and Bihar and Orissa and exclude those for the two Agency districts of the N.-W. Frontier Province.

8. Shares of provinces in the total area (in acres) under Principal Crops in 1937-38.

NOTE.—In this diagram, the circles for the different crops have no relation to each other; they simply show the relative importance of each province in respect of each crop.

9. Harvest Prices (Rs. per maund) of certain Principal Crops in India

* Prices prior to 1935-36 relate to the old province of Bihar and Orissa.

† " " " " " " " " Madras.

TABLES

Summary Tables of the Agricultural Statistics of British India

No. 1—GENERAL SUMMARY, 1918-19 TO 1937-38.

Classification of area

[Thousand acres]

	1918-19	1919-20	1920-21	1921-22	1922-23	1923-24	1924-25	1925-26	1926-27	1927-28

Land Revenue assessment

[Thousand rupees]

Total revenue from land excluding cesses	30,19,51	30,72,69	30,51,41	31,05,20	31,46,97	32,45,17	31,94,74	32,41,67	32,76,25	32,76,65
--	----------	----------	----------	----------	----------	----------	----------	----------	----------	----------

* Includes 333,000 acres for which details are not available.

(a) Condiments and spices, fruits and vegetables, and miscellaneous food crops.

(b) The total of food crops and non-food crops shown here up to the year 1929-30 does not agree with the total sown area as the latter area includes certain areas in the United Provinces for which details are not available.

(c) Included under "fruits and vegetables".

(d) Included under "other oilseeds".

(e) Cinchona, Indian hemp, other dyes and tanning materials, other drugs and narcotics, and miscellaneous non-food crops.

(f) Included under "young stock" (calves).

Column 5.—Where the land revenue includes the zamindar's share, the net demand is entered, and the table states the payment wholly realised during the year or not, is entered after excluding arrears for past years. Sums remitted on account of unoccupied lands, short provinces where remissions are not granted or are partially granted within the year, no deduction is made on account of remissions. This column revenue from canals in Sind, fluctuating collections (including nazarana), over-collections (Bombay), surplus collections, collections from Government cess; (b) Motorpha (house tax) collections; (c) assessment of alienated lands less quit-rent; (d) recoveries on account of survey and settlement Government estates (Bengal); and (e) miscellaneous, comprising receipts on account of land registration fees, receipts from quarries and mine allowances to excluded proprietors, fines and forfeitures of Revenue Courts (except in Bengal and Assam), receipts under Madras Act, II of miscellaneous receipts, rents of railways class C. land, and rents of buildings situated on such lands.

Column 6.—The population is that of the last general census.

* Miscellaneous revenue.

† Excludes 5,555,403 acres in the districts of Bankura, Khulna, Murshidabad, Pabna and Rangpur for which details are not available.

‡ Excludes 2,335,334 acres for which details are not available.

§ Excludes 1,923,820 for two districts in the United Provinces for which details by tenures are not available.

(a) Incomplete.

(b) Figure not available.

(c) Figures are defective as particulars for the tracts transferred from Madras to Orissa are not available.

due by the zamindars to Government, not those due by raiyats to the zamindars. The actual realisable demand on account of the year whether crops, etc., are excluded in the case of those provinces where all remissions are granted within the year to which the return relates, but includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are:—(1) ordinary revenue, comprising fixed collections, states; (2) sale of Government estates; (3) sale proceeds of waste lands, and redemption of land tax; (4) redemption of summary settlement charge (Bengal); (5) rents, etc., of fisheries; (6) receipts for the improvement of Government estates; (7) 12 per cent on collections from mineral products in forests and lands not under the management of the Forest Department, water mills rent, haccoba tax (Sind), *malikana* or 1934, petroleum well revenue, jade and amber revenue, recoveries in India of law charges in England on account of appeals from India, 1934, petroleum well revenue, jade and amber revenue, recoveries in India of law charges in England on account of appeals from India, 1934.

Column 8.—As in column 5, but only ordinary land revenue on fully assessed areas is entered.

** See footnote ** on page viii of the Introductory Note.

(d) Defective owing to incomplete data.

(e) Includes 787,472 for one district in the United Provinces for which details by tenures are not available.

1937-38	48,721,925	48,721,925	48,721,925

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding Departments in the southern Provinces. The provincial areas in this column exclude Indian States in direct political relations with the Crown Representative, but include States politically controlled by the Provincial Governments, with the exception of the Tribal areas in the North-West Frontier Province.

Column 3.—In this column is entered the area of Indian States included in column 2.

Column 4.—Prior to 1908-09 this column showed the entire area (exclusive of Indian States) for which the statistics required for Tables II, III and IV were not forthcoming in whole or in part. This area comprised chiefly estates held in permanent settlement or on privileged tenure, which were not surveyed or which possessed no agency for the annual collection of agricultural statistics. But arrangements have since been made to prepare statistics, for the whole of this area, based either on regular returns or on estimates as has been found practicable. There is therefore no longer any unreturned area to be shown in this column.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" mean "the papers prepared by the village accountants." The village papers do not in several provinces relate to the whole area included in column 5; for instance, the village returns sometimes do not include the forest areas. There are also tracts in many provinces for which no village papers exist and for which estimates have to be made to complete the statistics. In all such cases, column 6 must be taken to be the total area corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts, which are calculated from village papers, are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns. In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 3 of Table II.

* This figure is that of settlement as there is no record of area according to professional survey.

** Excludes area of Indian States which are now in direct political relationship with the Crown Representative.

† Figures up to 1934-35 relate to "Bihar and Orissa".

‡ Figures up to 1934-35 relate to Bombay and Sind.

1937-38 : : : : : }					

Columns 2, 5 and 6.—For the unsurveyed areas of zamindari estates and waste land grants for which accurate statistics are not available, the figures are based on estimates. In the Central Provinces, the zamindars are landlords of high local standing and old family, whose estates, commonly large and compact, were originally held on quasi-feudal tenure, but who are now ordinary proprietors to whom certain concessions are allowed in consideration of their previous history.

1937-38					

Column 2 states the area as ascertained by the provincial Survey Department, supplemented, for tracts which have not come under the operations of that Department, by areas obtained with the computing scale from the Survey of India Atlas sheets of the localities concerned.

Columns 5 and 6.—The statistics for the major portion of the zamindari estates and certain *raiyatwari* and whole *inam* villages are based on estimates, owing to the absence of adequate agency for the collection of statistics in these tracts and the absence of a detailed survey. Of the total area (79,803,243 acres) entered in col. 6 for 1937-38 (page 26), 77,406,245 acres are based on actual returns and 2,396,997 acres on estimates.

1936-37	30,027,932	}	{	30,027,932
1937-38	30,179,486				

Column 2.—The revenue survey being incomplete, the exact area is not known: the column states the area of surveyed tracts plus the estimated area of unsurveyed tracts.

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (30,179,486 acres, entered in columns 5 and 6 for 1937-38, 27,875,425 acres are based on actual returns and 2,304,061 acres on estimates.

NOTE—The variations in the areas shown in different years under the same item in the same province do not necessarily represent an actual increase or decrease on the area in question. In many cases, a revised classification or the correction of a faulty estimate is responsible for the change.

Column 2.—“Forests” mean “any land classed or administered as forests” under any legal enactment dealing with forest. Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area sown). The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, the chief amongst which are these: (1) because the Forest Administration Reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, local boards, municipalities, etc., and (3) because, on the other hand, certain village and other lands not covered by forest but worked and returned as forests by the Forest Department are not treated as forests in the returns of agricultural statistics and are therefore excluded from this column.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the sown area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

* See footnote † on page 14.

See explanations given in the footnotes (page 35).

(a) Includes reserved and protected forests only. The management of the latter having been transferred to the revenue authorities, the figures shown in the Forest Administration Report represent the areas of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different.

(b) Includes unculturable Government waste and unculturable bands.

(c) States the estimated area of culturable Government waste.

(d) Shows (1) the estimated area of culturable bands, and (2) the difference between the net area sown and the gross area of the actual holdings (exclusive of bands). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained.

*See footnote (b) on page 15.

Column 2.—The figures represent reserved forests, but exclude the areas of forest villages within the reserves which are entered under the appropriate heads of this table.

Columns 3 and 4.—The figures for unsurveyed tracts in Cachar and for permanently settled tracts in Sylhet are based on estimates. In the Assam Valley unsurveyed waste is divided into culturable and unculturable on the assumption that their proportion in the surveyed area holds good.

Column 5.—Includes generally all lands which are thrown out of cultivation or not cultivated for three years. Figures for the hill districts (except the plains portion of the Garo Hills) and Sadiya and Balipara Frontier Tracts are rough estimates.

Column 6.—The figures are obtained from the abstract crop statement for districts which have been cadastrally surveyed. The figures for the permanently settled estates of Sylhet and Goalpara and for the hill districts and the Sadiya and Balipara Frontier Tracts are based on estimates.

(a) The figures relate to the plains portion only.

NOTE.—Figures for unsurveyed villages are based on estimates.

Column 2 includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions.

Column 3 includes all land recorded at the survey and settlement as unculturable, although at times a very small quantity of this land is cultivated.

Column 5—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Column 2 shows the area administered by the Forest Department, plus the areas in the Chhattisgarh and Chanda zamindaris which are outside the boundaries of surveyed villages. These latter areas are almost wholly under high forest and include only a negligible proportion of sparse and shifting cultivation. In Berar, the forest area includes that administered by the Forest Department but excludes a large area of cultivated land in the Melghat taluk in Amraoti district shown as forest in the forest report.

Column 3 states areas covered with water, hill or rock and land occupied by buildings and roads. For Berar, it includes village sites, tanks, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4 states (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub, jungle or grass, and (4) groves not included in holdings. For Berar, it includes land available for cultivation but not given out.

Column 5.—Land which has been fallow for not more than three years is reckoned as current fallow. For Berar, it includes occupied culturable land left fallow for private reasons such as grazing, rotation, etc.

Column 2 includes the area cultivated within forests. The area cultivated with coffee, tea, and rubber within forests is, however, excluded from this column and is shown under column 6.
 Column 4 includes areas occupied by *babul* and casuarina trees when they do not form parts of forest areas.
 Column 5 includes all occupied waste, that is to say, waste portions of land for which revenue is paid.

Column 2 includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality, and protected village waste in Hazara administered by the district officer and other waste lands in Peshawar.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Dera Ismail Khan classification is amended according to area of each class of soil actually cultivated each year.

Column 2 includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality.

Column 3.—This column includes 23,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, and 8,896,960 acres of mountain tracts in Kangra (mostly forest areas). These areas are not accounted for in the village papers, and the figures are based more or less on estimates.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years, but as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually.

NOTE.—Figures for unsurveyed villages are based on estimates.

Column 2—The figures in Sind do not agree with those in the Forest Administration Report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision of survey, which the revenue records do.

Column 3 includes all land recorded at the survey and settlement as unculturable, although at times a very small quantity of this land is cultivated.

Column 5—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Column 6—Of the total net sown area (5,140,479 acres) in Sind included in this column for 1937-38, 5,107,232 acres are based on actual returns and 33,247 acres on estimates.

1937-38		...	72,656	75,977	16,858	534,258	699,749

NOTE.—The statistics for Almora, Garhwal, and the hill portion of Naini Tal are based on estimates.

Column 2 includes forest areas administered by the district officers of some districts. Hence the figures do not agree with those in the Forest Administration Report which excludes these areas. This column also includes the Siwalik Range in the Dehra Dun district.

Column 5.—The maximum period for which land left untilled is reckoned as fallow is three years.

Columns 8 to 19 state the gross area of irrigated crops, areas sown more than once being counted as separate areas for each crop. The excess in some cases of the total area of crops irrigated (column 19) over the total area irrigated (column 7) is thus due to multiple irrigation at both harvests.

Column 4.—The term "tanks" refers to a particular kind of dammed reservoirs. These reservoirs are formed by enclosing depressions or throwing dams across the valleys of small rivulets and streams to intercept water during the rains.

(a) Statistics of irrigation are not collected.

NOTE.—The figures are only estimates except in the case of areas irrigated from Government canals. In the case of districts, Ganjam and Koraput, the term "tanks" refers to a particular kind of dammed reservoirs. These reservoirs are formed by enclosing depressions or throwing dams across the valleys of small rivulets and streams to intercept water during the rains.

Columns 2 to 6—Government canals include private canals except in Basti, Budaun, Dehra Dun and Naini Tal, for which districts separate figures for private canals are obtained. There are very few private canals in the United Provinces.
* Figures for 1936-37 are defective as the collection of statistics could not be undertaken in a portion of the district which was under land record operations during the year.

Note.—(i) This table shows the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by the provincial authorities.

(ii) The variations in the areas shown in different years under the same crop in the same tract do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

Column 10 (other food-grains, including pulses).—Arhar (pigeon pea), barbati, lobia or chowli (asparagus), mung (green gram), kulthi (horse gram), urad (black gram), field gram, cheik (job's tear), lentile, cheena (common millet), kangni (Italian millet), kodo or varagu, kutki (little millet), kuhudi, peas, pigeon or bottle grass, swank or shama, chickling vetch, buok wheat, wudalu or barti, beans (satri or gaurush, French or haricot, val, moth, lima, and soy).

Column 30 (other dyes and tanning materials).—Arnatto, chayroot, divi-divi, henna, madder, morinda, saffron.

Column 33.—In certain cases, notably in Madras, the areas stated under "Tea" differ from those given in the special report on Indian Tea Statistics published separately. The principal reason is that the special report is prepared from returns received from managers and owners of estates; and these returns, especially in Southern India, are in many cases inaccurate and defective. Minor discrepancies are also due to the fact that the figures in this table deal with the agricultural year; while those in the special report deal with the calendar year.

Column 37 (other drugs and narcotics).—Aloes, areca nut, ajwan or Bishop's weed, sweet basil, betel-vine, country borage, bogoda brinjal or nala mulaka, dhatura, purple flea-bane, isafagul, kolinji or vampa, senna, sweet flag.

* See footnote ** on page 14.

† " " (b) " " 60.

(a) Decrease due to exclusion of "Safflower seed" transferred to "Oilseeds—others".

NOTE.—The areas of crops except cotton and tea are collected by the Land Records staff for the temporarily settled plains revised quinquennially by the district officers except in case of forecast crops for which estimates have to be made annually. In the crops except cotton and tea, the areas are estimated in Sylhet by the Deputy Commissioner on the basis of the population figures. Statistics in all districts are supplied by the tea-garden managers and proprietors. The areas of cotton are obtained in Cachar. In Sylhet information is obtained from the Collector of *dao-tax*, in the Garo Hills from hill *mauzadars*, in Nowgong from the *dolois* and *sirdars*, and in the Naga and Lushai Hills from intelligent chiefs.

* Included under 'Other food grains, including pulses'.
† See footnote ¶ on page 108.

districts and plains portion of Garo Hills, and those for the Hills and the Sadiya and Balipara Frontier Tracts are based on estimates permanently settled tracts of Sylhet and Goalpara the areas of jute are reported by the village *chaukidari panchayats*. For other and the surveyed areas of the temporarily settled parts of the district, and in Goalpara they are obtained from zamindars. Tea from *patwaris* for the plains subdivisions and for the North Cachar Hills an estimate is made by the subdivisional officer; in supervisor kanungo of hill sub-circle, in Sibsaagar and Goalpara from *wandals* or other village officers, in Khasi and Jaintia Hills

NOTE.—The area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crops by the village accountants. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, accordance with prescribed formulae and entered under the crops of which they are composed.

Columns 3, 4, 5, 6, 9 and 10.—The whole of the area of the land planted with food-grains, wheat, barley, etc., mixed with oilseeds, is shown under food-grains in this table. The area shown under food-grains which was really planted with oilseeds (as a mixed crop) is roughly estimated to have been 3,962,000 acres in the whole of the United Provinces in 1937-38.

(a) There is no agency for the collection of statistics in Almora, Garhwal, and the hill tracts of Naini Tal. Estimates have, however, been made for them and included in the table.

Columns 12, 13 and 14.—The figures shown in these columns represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop. Besides these, oilseeds are thinly sown in combination with wheat, barley, gram and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1937-38 for the whole of the United Provinces to 632,000 acres of linseed, 955,000 acres of sesamum, and 2,375,000 acres of rapeseed.

See explanation given in the footnote (page 196).

* In Coorg a census is taken every five years. The last census was taken in January, 1935, by the circle *shambhogs* and the particulars entered in a register maintained under Rule 73 of the Rules framed under the Coorg Land and Revenue Regulation 1899. Animals in municipal towns are included.

† See footnotes on page 224.

‡ Excludes North Waziristan and Kurram districts.

(A) Total for provinces where census was taken during the year.

(B) Total for the provinces of Bengal and Bihar and Orissa where no census was taken during the year and previous census (1929-39) figures are repeated.

§ See footnote * on page 8.

Note—(i) The last quinquennial live-stock census was held in January, 1930 and the figures for 1929-30 are based on the results of this census. As on the previous occasions complete census was carried out in all the districts of Bihar and Orissa and was extended this time to Palaman, Manbhum and Singhbhum. In Hazaribagh and Rauchi, however, for want of a suitable enumerating agency a fractional census was again adopted and this time it was taken in 850 villages (instead of 48 villages of 1925) of the four representative localities of the districts and the previous figures were revised in the light of the results of the fractional census. No census of live-stock was taken in 1935.

(ii) Figures for "Bihar" as constituted since 1st April, 1936, may be obtained by excluding figures for the districts of Angul, Balasore, Cuttack, Puri and Sambalpur.

Note.—In the Central Provinces the figures are collected annually, between the 15th November and the 15th March, by the village *patwaris* for the areas in their respective charges. The figures for each village are sent to the *tahsil* and the numbers of plough cattle are entered by the *kanungo* in a village register. The *patwari* takes into account all animals including those temporarily sent elsewhere (e.g., for grazing), which belong to residents of the village, and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Stocks in cities, large towns, cantonments, and in forest villages are included being enumerated by special arrangement.

In Berar, a census is made annually by the village officers. All cattle belonging to one owner are entered against his name even though the animals are temporarily absent from the village. When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other villages, but temporarily in the village for grazing, are not entered in the statement for that village.

NOTE.—(i) The last quinquennial census was taken in January, 1935 throughout the Presidency. The census was taken in all villages, Government, *Inam* and Zamindari. Stock in cities, cantonments, and that employed in Government departments and municipalities were included. Oxen, buffaloes, horses and ponies not old enough for work or breeding were treated as young stock.

(ii) Figures for the province as reconstituted since 1st April, 1936, may be obtained by excluding from the total for the province for 1934-35 the figures for the former Vizagapatam and Ganjam districts and including figures for the reconstituted Vizagapatam district shown on pages 226-227.

Note.—The varieties of tenure are included, as far as possible, under one or other of the following heads, namely, (1) rajyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). Areas under forests are included under the prevailing tenure of the province. Areas under Government forests in the Central Provinces and Berar, and the forest area of one district in the United Provinces, are, however, shown separately.

Column 3.—Areas held revenue-free or at privileged rates are deducted, but the deduction need not be made where such areas are in any case less than an entire village and where there is any difficulty in estimating the corresponding deduction to be made in the population (column 11). In Madras, Bombay and Berar all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) is classed for the purposes of this column as "area not fully assessed". Area should not be entered under this head merely because the assessment due from them has been suspended or remitted on account of short crops or for other special reasons.

Column 4.—This head is sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste, and should be either equal to or less than the net sown area as shown in column 6 of Table II.

(S) The land revenue assessment necessarily differs from the land revenue collections which include collections on account of former balances and exclude so much of the assessment as has not been collected during the year.

* Details not available.
† Incomplete.

Column 5.—Where the land revenue includes the zamindar's share, the net demand is entered, and the table states the payments due by the zamindars to Government, and not those due by raiyats to the zamindars. The actual realisable demand on account of the year is entered after excluding arrears for past years. This column includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are:—(1) ordinary revenue comprising fixed collections, revenue from canals in Sind, fluctuating collections (including nazarana), over-collections (Bombay), surplus collections, collections from Government estates; (2) sale of Government estates; (3) sale-proceeds of waste lands, and redemption of land tax; (4) redemption of summary settlement dues; (5) moturpha (house tax) collections; (6) assessment of alienated lands less quit rent; (7) recoveries on account of survey and settlement charges (Bengal); (8) rents, etc., of fisheries; (9) receipts for the improvement of Government estates; (10) 12 per cent on collections from Government estates (Bengal); and (11) miscellaneous, comprising receipts on account of land registration fees, receipts from quarries and minor mineral products in forests and lands not under the management of the Forest Department, water mills rent, huccoba tax (Sind), malikana or allowances to excluded proprietors, fines and forfeitures of Revenue Courts (except in Bengal and Assam), receipts under Madras Act II of 1864, petroleum well revenue, jade and amber revenue, recoveries in India of law charges in England on account of appeals from India, miscellaneous receipts, rents of railway class C land and rents of buildings situated on such lands.

Column 6.—The population is generally that of the last census.

Column 8.—As in column 5, but only ordinary land revenue on fully assessed areas is entered.

Column 9.—To be, column 8 divided by column 4 (a).

Column 10.—To be, column 8 divided by column 4 (b).

† Statistics of the incidence of land revenue assessment dealt with in this table show only the average amount contributed by each acre of land or per head of population in each province or district towards land revenue. They cannot be used for comparing the burden of land revenue on land in the different districts and provinces as no valid comparison is possible without taking into account such factors as the nature of the soil, climate, facilities for irrigation, etc.

(a) Information not available.

(b) Defective owing to incomplete data.

NOTE.—The table is prepared annually.

Column 1.—The *khalsa* area has been classed as "Zamindari and village communities (temporarily settled)" and the *jagir* and *istamrdari* areas as "Zamindari (permanently settled)".

Column 4 includes in the case of the *khalsa* villages the assessed cultivated area including assessed fallows, Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area [col. 4(a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA* (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE	
		For total area	For cultivated area			Number of towns	Aggregate population

Column 1—Raiyatwari includes, besides raiyatwari tenures, all unsettled Government waste and forest lands and areas in which house tax or poll tax is levied; it also includes certain temporarily settled estates in Sylhet which were formerly (before 1902-03) included under zamindari (temporarily settled). Zamindari (temporarily settled) includes, besides temporarily settled zamindari estates, fee-simple grants, wholly or partially revenue-free tenures, and grants under progressive assessment.

Column 5.—Includes all the items falling under the head "Land Revenue" in the Civil Accounts. On the average of the last five years about 2.201 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

	Miscellaneous revenue	4,053		

The table is prepared quinquennially, and the figures were last collected in 1936-37.

Column 1.—The following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods and (b) all estates owned by Government as proprietor.

Column 5.—Includes all the items falling under the head "Land Revenue" in the Civil Accounts. On the average of the last five years about 0.38 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

The table is prepared quinquennially, and the figures were last collected in 1935-36.
 COLUMN 1.—Lands held under special tenures, such as *talukdari*, *mehwasi*, *udhad-jamabandi*, *narvadari*, and *bhagdari* in Gujarat and *khoti* and *isafat* in the Konkan, are classed as "Zamindari and village communities (temporarily settled)".
 COLUMN 3 (a).—Includes alienated area and the area held free of revenue or the revenue which has been reduced by special agreement and also the fully assessed unoccupied area.
 COLUMN 3 (b).—Includes alienated cultivated and zamindari cultivated (estimated) land.
 COLUMN 4.—Includes land under temporary cultivation, also *pot inams* paying full assessment.
 COLUMN 5.—States ordinary and miscellaneous land revenue appearing in the Civil Accounts. On the average of the last five years about 5.79 per cent of the total revenue entered in this column was remitted on account of assessed unoccupied lands, short crops, etc.

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area [col. 4 (a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA* (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

	Government Forests	890,109	830,109						

Column 2.—Zamindari (temporarily settled) includes *malguzari* and *thekadari*.

Column 3(a).—Zamindari estates properly so-called (that is, excluding *malguzari*) are classed as not fully assessed in the Central Provinces.

In Berar this column states *jagir*, *izara* and *palampat* villages, all unassessed lands, forest areas, village sites, roads, rivers, etc.

Column 4(a).—In Berar *pot khairab* lands are excluded from this column, which includes only occupied lands available for cultivation.

Column 4(b) excludes fallows in the Central Provinces. In Berar, it states the cultivated area in *khalsa* villages only.

Column 8 for Berar shows assessment on occupied lands only as stated in the explanation for column 4(a).

Column 10.—The cultivated area included for the Central Provinces in this column is the fully assessed portion of the net sown area.

In Berar, the incidence is calculated on the area entered in column 4 (b), that is, the cultivated area in *Khalsa* villages only.

Column 11 excludes population of *jagir* and *isara* villages of Berar.

* See footnote 1 on page 245.

	Whole inam villages	113,725	113,725	1,31,629	84,610

The table is prepared quinquennially. The figures were last collected in 1933-34.

Column 3 (a).—In the case of raiyatwari tracts this column states the areas of unoccupied assessed lands, of all unassessed *porambokes*, of minor *inam* lands in Government villages held rent-free or subject to quit-rent, and of forest lands, excluding portions of the first mentioned two classes occupied under "miscellaneous"; and in the case of zamindari tracts the areas of hills, *porambokes*, and minor *inams* are entered. The entire area of whole *inam* villages is deducted in this column.

Column 3 (b).—Raiyatwari includes the area of certain Agency tracts in Ganjam, Vizagapatam and Godavari, and also the difference between the area by professional survey and the area according to village papers.

Column 4 (a).—The figures for the raiyatwari tenures in this column represent the total occupied area stated in village papers which differ in some cases from the resultant of preceding columns.

Column 4 (b).—The areas shown in this column represent the actual areas cultivated except in the case of Ganjam, Vizagapatam and East Godavari districts where actuals are supplemented by estimates.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area [col. 4(a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA* (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

Column 8 shows only the "ordinary revenue", as defined in the Civil Accounts, on area fully assessed.

Column 10—The cultivated area is, in the case of raiyatwari and zamindari lands, the net cropped area out of the area given in column 4 (a).

Column 11 states the entire population of raiyatwari and zamindari villages, respectively.

* See footnote † on page 245.

The table is prepared quinquennially, and the figures were last collected in 1935-36.

COLUMN 3 (a)—Includes fallows and fully assessed unoccupied area.

COLUMN 3 (b)—Includes alienated cultivated and zamindari cultivated (estimated) land.

COLUMN 4.—Excludes fallows and fully assessed unoccupied area.

COLUMN 5.—States ordinary and miscellaneous land revenue appearing in the Civil Accounts. On the average of the last five years 17·6 per cent of the total revenue entered in this column was remitted on account of assessed unoccupied lands, short crops, etc.

The table is prepared quinquennially, and the figures were last collected in 1936-37.

Columns 3 (a) and 3 (b) exclude small revenue-free plots, for which details are not forthcoming.

Column 5 states (1) "ordinary revenue," comprising (a) fixed collections (including land revenue on account of resumed *Gorahi Jagirs*' (b) fluctuating collection, (c) surplus collections, (d) collections from Government estates (including collections from Dudhi, Tarai, and Bhabar estates, and receipts from forest estates); (2) sale of Government estates; (3) sale-proceeds of waste lands and redemption of land tax; (4) miscellaneous, comprising (a) receipt from quarries and mineral products in forest and land not under the management of the Forest Department, (b) water mills rent, (c) *malikanas* or allowance to excluded proprietors, (d) fines and forfeitures of revenue courts, (e) recoveries in India of law charges in England on account of appeals from India, (f) miscellaneous receipts, namely, (i) *patwari* miscellaneous receipts (revenue record room), (ii) mutation fees, (iii) mutation fines, (iv) sale of waste paper, and (v) partition fees, (g) rents of railway class "C" land and rents of buildings situated on such land. On the average of the last five years about 41 per cent of the total revenue entered in this column was remitted on account of unoccupied lands; short crops, etc.

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area [col. 4 (a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA** (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

APPENDICES.

APPENDIX A.

The Average Yield per Acre of Principal Crops in India.

(A provisional estimate of the yield per acre of principal crops cultivated in India was first made in the year 1892) this estimate was based on the then available materials, namely, the various statistical publications, such as the periodical agricultural and settlement reports, crop forecasts, gazetteers, replies received in response to enquiries from the Famine Commission and other *ad hoc* bodies, etc. To provide for the periodical revision of the estimates, a system of experimental crop cuttings was first prescribed in 1893 by the Government of India. The results of these experiments are reported by Local Governments and Administrations at the close of each quinquennium and form principally the raw material for this volume. The returns for the last quinquennium ending 1936-37 have been scrutinised and tabulated in the appended tables.* These figures of outturns per acre are of some importance in view of the fact that they will form, during the present quinquennium (ending 1941-42), the basis for estimating the production of crops for which forecasts are prepared.

2. The estimate of standard yield should represent the average outturn on average soil in a year of average character, as deduced from the information obtained from experiments made up to the period under review. When, therefore, this average is multiplied by the average area sown, the result should give as near an approximation as possible to the outturn of the crop in an average year. The Departments of Agriculture or Land Records in the different provinces maintain standard estimates of the average yield of land of average quality (usually under the two major heads of irrigated and unirrigated land) for several crops in each district. The object of the experiments or investigations annually made is to test the accuracy of these estimates and to enable the head of the Department in each province to revise his provincial estimates, when necessary. Should it happen that the period has been one of exceptionally favourable or unfavourable conditions which have affected the experiments reported, this would not in itself necessarily involve a change in the standard estimates for the district or for the province, unless there are other reasons for believing that, as estimates of average yield in an average year, they have been pitched too high or too low.

3. On an examination of the relevant returns for the quinquennium ending 1911-12, it was felt that the results of the experiments as conducted by the district revenue staff were generally unreliable. A change in the system was therefore considered necessary; and in 1915 the Government of India, with a view to improve the returns, issued instructions to employ, as far as possible, expert officers of the Agricultural Department to carry out experiments for the investigation of the average crop outturns in each province. The new system was, however, introduced only in some provinces, and that only to a limited extent, due mainly to paucity of staff possessing the necessary special qualifications. During the quinquennium under review no crop-cutting experiments were conducted in Bombay, Delhi, Madras, Bihar and Orissa. In the case of Bengal, the majority of experiments have been conducted by the trained officers of the Agricultural Department during the quinquennium under review, and the normal yields have been derived by equating the results of the experiments carried out during the current quinquennium with those of the preceding quinquennium. In certain other provinces, such as Sind, Ajmer-Merwara, and Coorg and in the Mysore State, the standard yields appear to have been worked out on the actual results of experiments conducted during the quinquennium under review alone without considering whether the character of the seasons included in the period was such as would justify the results to be regarded as normal or standard. In the case of the cotton crop, the standard yields have been revised in some provinces, *e.g.*, Bombay, Punjab, etc., in the light of the actual crop disclosed by available trade statistics, although, from a purely scientific point of view, such a method appears to be of doubtful accuracy.

4. As a result of the experiments conducted or investigations made during the present quinquennium, several revisions have been made in the figures of standard outturns previously adopted. Some of these variations are noted below:

The yield of rice shows an increase, in the Central Provinces and Berar (from 648 to 661 lbs), and in Madras (from 1,055 to 1,120 lbs); the outturn of the crop in the Coorg, Punjab, Sind and the United Provinces has

* The return for the previous quinquennium ending 1931-32 was published in 1935.

APPENDIX A—continued

on the other hand, been lowered from 1,580, 788, 1,255, and 900 lbs to 1,366, 747, 1,052 and 800 lbs, respectively. In the case of Bengal, the outturn has also been reduced in respect of all the three varieties, viz. the autumn, winter and summer rice (from 1,023, 1,111 and 1,238 lbs to 914, 1,030 and 1,181 lbs, respectively). The standard yield of wheat has been lowered in the United Provinces from 1,000 to 900 lbs, in the Punjab from 791 to 760 lbs, in Sind from 937 to 894 lbs for irrigated variety and from 764 to 633 lbs for unirrigated variety, and in Delhi from 982 to 867 lbs; while it has been raised in Ajmer-Merwara and the Central Provinces and Berar from 758 and 548 lbs to 902 and 561 lbs, respectively. The yield of barley has been raised in Sind from 495 to 845 lbs for irrigated variety and from 397 to 782 lbs for unirrigated variety; while there has been a decrease from 1,315 to 1,243 lbs in Ajmer-Merwara, from 924 to 762 lbs in Delhi, from 722 to 688 lbs, in the Punjab and from 1,150 to 900 lbs in the United Provinces. The yield of jowar generally shows a lower trend. The yield of bajra has been lowered in the United Provinces from 550 to 500 lbs and in the Punjab from 414 lbs to 344 lbs; while it has been raised in Madras from 494 to 520 lbs and in the North-West Frontier Province from 417 to 480 lbs. The yield of maize shows generally an upward trend. The yield of gram has been reduced in almost all the provinces; in the United Provinces, however, it has been increased from 750 lbs to 800 lbs. As regards oilseeds, the yield of linseed has been increased in Assam from 336 lbs to 392 lbs, and in Central Provinces and Berar from 215 to 219 lbs; the yield of sesamum has been slightly increased in Madras and that of rapeseed has been raised in the North-West Frontier Province from 320 to 342 lbs. In the case of sugarcane, the average yield has been raised in Bombay from 6,950 to 6,977 lbs, in Madras from 6,380 to 6,462 lbs, in the United Provinces from 2,700 to 3,050 lbs, and in Assam from 2,688 to 2,722 lbs, while there has been a decrease in Bengal from 4,643 to 4,446 lbs, in Sind from 7,200 to 5,886 lbs, in the Central Provinces and Berar from 3,390 to 3,348 lbs, in Delhi from 2,386 to 2,254 lbs and in the Punjab from 1,951 to 1,915 lbs. The yield of cotton has been raised in the Punjab from 123 to 190 lbs for *Desi* variety and from 130 to 192 lbs for *American* variety, in Sind from 215 to 225 lbs and in Assam from 188 to 196 lbs. In Bengal, the average yield of jute has been lowered from 1,465 to 1,391 lbs. The yields of tobacco have been increased in Assam, Central Provinces and Berar and Madras from 840, 675 and 1,203 lbs to 1,120, 700 and 1,220 lbs, respectively; while it has been lowered in Bengal from 1,191 to 1,115 lbs, and in the Punjab from 1,078 to 915 lbs.

5. The statement below compares the average outturns of the major crops in the different provinces. The relative importance of each province in respect of each crop has also been shown by percentages representing the proportion of the total area under each crop in British India cultivated in each province. Tea has been included in this statement, although this crop is not dealt with in the quinquennial returns, the average outturns having been calculated from the special annual returns of the crop for the five calendar years ending 1936.

APPENDIX A—continued

6. The leading features of the provincial reports are summarised below :

Ajmer-Merwara.—Experiments were conducted by the three Sub-divisional officers and the Tahsildar in Ajmer in respect of the main crops but the experimental crop cuttings were confined to irrigated variety alone in Ajmer and Kekri Sub-divisions. On the basis of the results of the experiments made, the yield of wheat has been raised from 758 to 902 lbs and that of irrigated maize from 807 to 867 lbs; while that of barley and of irrigated cotton has been lowered from 1,315 and 232 lbs to 1,243 and 160 lbs, respectively. As was noticed in the case of the last quinquennium, the provincial figures reported appear to be merely the arithmetic averages of the district figures. The accuracy of the reported yields is considered doubtful but with the recent formation of an Agricultural Department, the position will, it is stated, improve in future.

Assam.—Experiments were made during the quinquennium by the Revenue Officers on all crops for which forecasts are prepared and on certain other crops such as Matikalai (*phaseolus radiatus*), maize, potato, and tobacco. Besides, a number of experiments was also conducted on the tobacco crop by the Officers of the Agricultural Department. The total number of experiments made during the period under review was slightly greater, having been 1,034 as compared with 1,000 in the preceding quinquennium. But with the exception of winter rice, oilseeds, sugarcane and *matikalai*, the number of harvestings was less in comparison with that taken during the preceding quinquennium. The standards fixed are based on the results of these experiments as well as on the enquiries made by the provincial marketing staff and the personal observation of the Director of Agriculture. So far as important crops are concerned, the standards for winter rice and jute remain unchanged, but in the case of most other crops there has been a slight revision in the upward direction. It is, however, remarked that the enquiries made by the marketing staff have shown that the average yields are usually higher than those shown in the returns—a view which is confirmed by the personal observation of the provincial Director of Agriculture. The important changes made are an increase in the yield of tobacco from 840 to 1,120 lbs, of winter potato from 1,680 to 2,800 lbs, of summer potato from 5,600 to 6,160 lbs, of linseed from 336 to 392 lbs, of sugarcane from 2,688 to 2,722 lbs and of cotton from 188 to 196 lbs.

Bengal.—The total number of experiments made during the quinquennium under review with staple crops (rice, wheat, gram, linseed, rape and mustard, sesamum, sugarcane, jute and tobacco) was 16,395, as against 6,923 in the preceding quinquennium and 6,697 in the quinquennium ending 1926-27. As in the previous quinquennium, the largest number of experiments was carried out in respect of winter rice. Next in order of importance came jute, autumn rice and sugarcane. The majority of the experiments were also conducted, as in the preceding quinquennium, by trained officers of the Agricultural Department with due care and accuracy. The results of the experiments made, however, show a marked decrease in the average yields per acre of all the principal crops as compared with the corresponding figures in the preceding quinquennium. This decrease is ascribed to the deficient and very unevenly distributed rainfall during the major part of the first four years of the quinquennium under review, which caused partial crop-failure and consequent low outturn. The provincial Director of Agriculture has, therefore, found it expedient to equate the average yields per acre obtained in the quinquennium with those for the period ending 1931-32 so as to bring the low averages to their proper level. The provincial average yields of the staple crops have, accordingly, been based on the results of experiments of the last two quinquennial periods. The important changes are in the yield of gram from 935 to 833 lbs per acre, of autumn rice from 1,023 to 914 lbs per acre, of rape and mustard from 624 to 571 lbs per acre, of linseed from 607 to 556 lbs per acre, of winter rice from 1,111 to 1,030 lbs per acre, of tobacco from 1,191 to 1,115 lbs per acre and of jute from 1,465 to 1,391 lbs per acre. The returns do not distinguish between irrigated and unirrigated crops, the area under the former being comparatively small in the province. A few experiments were also made, as usual, with certain minor crops, such as barley, lentil, peas, *mung*, potatoes, maize, *khesari* and cotton.

Bihar.—No crop-cutting experiments were carried out in the province during the quinquennium under review and the standard yields in force have generally been maintained. In the case of winter rice, however, the provincial Government have adopted the revised figure of the standard normal yield, *viz.*, 16 maunds of paddy or 10 maunds of cleaned rice obtained from the experiments made prior to 1932. In the case of sugarcane also, the outturn has now been fixed

APPENDIX A—continued

at 10 tons of cane in North Bihar (*i.e.* the tract north of the Ganges) and at 14 tons of cane for the remaining part of the province, on the basis of the figures obtained in connexion with the local Economic Enquiry into the cost of production of sugarcane.

Bombay.—As stated in the preceding report, a scheme for conducting crop-cutting experiments on a more satisfactory basis by the agency of the Agricultural Department was prepared by the local Director of Agriculture and it was also approved by the Local Government, but its introduction was postponed, pending the establishment of a satisfactory organization for the purpose. Accordingly, no organized crop-cutting experiments have been made in the province during the quinquennium under review and the old standard yields have generally been maintained. The Director of Agriculture has, however, carried out certain modifications in the existing average yield figures of the principal crops for certain districts on the basis of advice and experience of senior district officers of the Agricultural Department who were consulted in the matter. In the case of cotton, however, the standard normal yields have been revised on the basis of the proposals made by the Provincial Officer-in-Charge, Bombay Cotton Forecast Improvement Scheme. The standard yield figures of tobacco have also been revised for the first time on the basis of special enquiries made during the quinquennium under review.

Burma*—As stated in the preceding report, standard yields in Burma are based on experiments made by Settlement Officers. The standards adopted for the quinquennium ending 1931-32 have generally been retained. But the standard yield of rice (cleaned) has been raised from 800 lbs to 870 lbs in the Amherst district, while that of groundnut has been reduced in all districts—the provincial standard being revised to 730 lbs from 1,000 lbs in the preceding quinquennium. The revision in the case of groundnut was rendered necessary as the yields previously fixed were found to be too high.

Central Provinces and Berar.—On a scrutiny of the results of crop-cutting experiments conducted by district officers during the quinquennium under review, it appears that most of the experiments were undertaken for administrative purposes with the result that they do not serve as a guide for judging the reliability of the standard outturns fixed. The defects noticed in the preceding reports with regard to the method of conducting crop experiments in the province still persist in some of the district reports, the most important among which are: (1) experiments were not distributed uniformly over the different years with the result that the resulting average yield per acre is vitiated by the larger number of experiments carried out in a poor season; (2) the plots selected in many cases do not represent the average crop of the season in the locality in which the experiment is made and (3) proper allowance for dryage has not always been made in arriving at the results. These defects are, it is stated, being brought to the notice of the district officers by the provincial Director of Land Records and it is hoped that more satisfactory data will be forthcoming in future. The method of random sampling in the case of rice crop in the Chhattisgarh districts, which had to be suspended during the latter part of the last quinquennium for financial reasons, could not be resumed during the present quinquennium. During the quinquennium under review, the *kharif* (autumn) crops except rice partially failed owing to heavy and continuous rainfall in the early monsoon periods, while the *rabi* (spring) crops which fared well in the earlier stages of their growth suffered at the time of maturity by untimely rain and hail coupled with cold, frost and rust. Naturally the results of the experiments conducted in such an unsatisfactory period could not be taken to provide a satisfactory basis for revision of the figures; and accordingly the revisions made in the present return have been reduced to a minimum. The present revision shows an increase in the yields of rice from 648 to 661 lbs, of wheat from 548 to 561 lbs, of linseed from 215 to 219 lbs, of gram from 534 to 537 lbs, and of tobacco from 675 to 700 lbs; while the yield of sugarcane has been lowered from 3,390 to 3,348 lbs. In the case of the cotton crop, the average outturn for the province as a whole, on the basis of the actuals ascertained by trade and mill statistics for the last fifteen years works out at 108 lbs of lint per acre, as against the current standard of 102 lbs. It is stated that though the standard outturn of cotton for Nimar, Akola, Amraoti and Buldana districts seems to stand in need of revision in an upward direction, no alteration has been made in the present standards, as the results of the experiments made in the quinquennium under review afforded no reliable basis for such revision.

*Ceased to be a part of India with effect from 1st April 1937.

APPENDIX A—*continued*

Coorg.—The only experiments made have, as usual, been on rice. During the period under review 120 experiments were carried out and on the results of these experiments, the average yield of rice has been lowered to 1,366 lbs from 1,580 lbs.

Delhi.—The average yields of crops reported are lower than in the preceding quinquennium except in the case of maize, the yield of which shows a slight increase. In the case of sesamum, rape and mustard and tobacco, however, the existing standards remain unchanged. The important changes are a decrease in the average yield of barley from 924 to 762 lbs, of sugarcane from 2,386 to 2,254 lbs, of wheat from 982 to 867 lbs and of cotton (ginned) from 185 to 176 lbs.

Madras.—It was explained in the preceding reports that no crop-cutting experiments were conducted in the province during the last few quinquennia and that the standard outturns adopted in Madras are not based on crop-cutting experiments alone, but on other data as well, such as the results obtained in Government farms, trade figures, etc. Two schemes of crop-cutting experiments, one on the four main food crops, *viz.*, paddy, ragi, cholam, cumbu and the other on sugarcane, conducted by Agricultural Demonstrators and Revenue Inspectors were, however, initiated towards the latter part of the quinquennium under review, but the results of these experiments will not be available before the report for the next quinquennium, *i. e.*, 1941-42. Accordingly, the existing standards have generally been maintained, but there have been some changes in the provincial standards due to the variations in the normal areas which are revised once in every three years. The principal changes in the provincial standards are an increase in the yield of sugarcane from 6,380 to 6,462 lbs, of rice from 1,055 to 1,120 lbs, of ragi from 947 to 1,012 lbs, of bajra from 494 to 520 lbs, of tobacco from 1,203 to 1,220 lbs, of maize from 635 to 646 lbs, and of sesamum (*til*) from 301 to 305 lbs, and a decrease in the yield of castor from 231 to 226 lbs.

North-West Frontier Province.—As usual, three representative districts, *viz.*, Hazara, Peshawar and Dera Ismail Khan were selected for the purpose of conducting crop experiments in the province. The experiments in the first two districts, were, in accordance with the revised instructions, conducted by the members of the Agricultural Department, while those in the last named district were carried out by the Revenue staff. Unfortunately, however, the crop returns supplied by the Agricultural Department were again incomplete, while the results of the experiments made by the Revenue staff in the Dera Ismail Khan district were considered to be unreliable as a guide to average outturn. The averages now reported have, however, been carefully scrutinized in consultation with the local officers and are believed to be correct. As a result of the present revision there has been an increase in the yield of sugarcane from 2,477 to 2,494 lbs, of maize from 1,023 to 1,049 lbs, of bajra from 417 to 480 lbs, of rapeseed from 320 to 342 lbs, and of barley from 709 to 715 lbs, and a decrease in the yield of jowar from 495 to 378 lbs.

Orissa.—No crop-cutting experiments have been carried out in the province of Orissa, which was created on the 1st April, 1936, by the amalgamation of areas transferred from the province of Bihar and Orissa, the Central Provinces and Madras. Figures of standard outturn for each district which are being used, are generally those that relate to transferred tracts, as no special enquiry has as yet been made to verify and improve the accuracy of these figures. The question of obtaining more accurate figures of standard yield is, however, reported to be under examination by the provincial Government. For the purpose of the provincial crop forecasts the gross yields are calculated by applying the standard yield per acre for North Orissa as a whole and the separate yields for each of the Ganjam and Koraput districts to the areas in the respective tracts. In the case of wheat, barley, *arhar*, linseed, and rape and mustard, however, separate figures of standard yield are not available for Ganjam and Koraput districts and the existing standards for the old Orissa Division are being *provisionally* adopted for the whole province. The provincial averages shown in the tables have generally been calculated from the total yield obtained in the manner described above on the basis of average areas under the respective crops in the whole province during the years 1936-37 and 1937-38.

Punjab.—As stated in the preceding report, a revised and improved system of crop-cutting experiments was introduced from 1930 according to which experiments were conducted by the officers of both the Agricultural and Revenue Departments separately for each district. In preparing the present return, the rates of yield fixed in the previous quinquennia or assumed for assessment purposes and the results of crop experiments made according to the revised system referred

APPENDIX A—*continued*

to above, have been considered along with the opinion of the local officers of the Revenue and Agricultural Departments before the yields were finally fixed. In the case of cotton, however, the standard outturn of the crop has been revised by the Statistician appointed by the Indian Central Cotton Committee, Bombay, under the supervision of the Director of Agriculture, Punjab, after a very careful examination of all the available data (such as results of crop-cutting experiments, outturns as shown by cotton ginning and pressing factories, factory consumption, etc.) in respect of this crop for the preceding quinquennium only. The latest revision shows a general decrease in the provincial averages. The important variations are a decrease in the yield of rapeseed from 428 to 331 lbs, of tobacco from 1,078 to 915 lbs, of rice from 788 to 747 lbs of wheat from 791 to 760 lbs, of barley from 722 to 688 lbs, of jowar from 385 to 346 lbs, of bajra from 414 to 344 lbs and of sugarcane from 1,951 to 1,915 lbs. On the other hand, there has been an increase in the standard yield of cotton from 123 to 190 lbs in respect of the *Deshi* variety and from 130 to 192 lbs in the case of *American* variety.

Sind.—The standard yields which are based mainly on the actual results of the experiments conducted during the quinquennium under review show an increase in the case of barley, gram (irrigated) and rape and mustard. The yield of barley (irrigated) has increased from 495 to 845 lbs, and that of the unirrigated variety from 397 to 782 lbs. The yield of gram (irrigated) shows an increase from 589 to 652 lbs. The yield of rape and mustard (irrigated) has been raised from 376 to 413 lbs, and that of the unirrigated variety from 362 to 369 lbs. Noticeable decreases occur in the yield of sugarcane which has been lowered from 7,200 to 5,886 lbs, of rice from 1,255 to 1,052 lbs, of wheat (unirrigated) from 764 to 633 lbs, of jowar (irrigated) from 849 to 626 lbs, and jowar (unirrigated) from 643 to 385 lbs, of bajra (unirrigated) from 322 to 200 lbs, and of sesamum (*til*) (unirrigated) from 320 to 85 lbs. The decrease in the standard yields of rice, wheat, jowar and bajra is explained by the fact that the crops were affected to some extent owing to unfavourable inundations in non-Barrage areas, rust and smut diseases and insect pests. The yield of cotton has been slightly raised, but the revision does not appear to have been based on the results of crop-cutting experiments, but on miscellaneous data.

United Provinces.—It was remarked in the preceding report that the results of the crop-cutting experiments on the basis of which the standard yields are revised were considered by the provincial Director of Agriculture to be not very reliable and that the method of crop-cutting experiments was under revision. A new (randomised) method of conducting crop-cutting experiments was therefore tried for the first time in 1933-34 in four districts with one crop, *viz.*, wheat. Though the method was extended to five more districts from 1935-36, it is still considered to be in an experimental stage. The figures reported for the quinquennium under review have accordingly been based on the usual method of crop-cutting experiments as conducted in the past in the representative districts of the province. Changes in the existing standards for crops other than sugarcane have been made on the basis of a difference of 25 per cent between the average results of the quinquennium and the existing standards while, in the case of sugarcane, the revisions have been based on 50 per cent of the difference. No change has, however, been made in cases where the average of crop-cutting returns was within 10 per cent of the existing standard, as this difference is considered to be within the limits of the probable error of the crop-cutting technique. The principal changes made are a decrease in the yield of rice from 900 to 800 lbs, of wheat from 1,000 to 900 lbs, of barley from 1,150 to 900 lbs, of bajra from 550 to 500 lbs, of linseed from 500 to 450 lbs, and of sesamum (*til*) from 280 to 250 lbs, and an increase in the yield of gram from 750 to 800 lbs., and of sugarcane from 2,700 to 3,050 lbs. The increase in the case of sugarcane is stated to be due to the introduction of improved varieties of cane.

Mysore.—As a result of the experiments conducted during the quinquennium under review, the yields of rice, horse-gram and sugarcane have been raised, while those of ragi, sesamum (*til*) and cotton lowered. The important changes are an increase in the yield of rice from 1,003 to 1,930 lbs, of horse-gram from 455 to 508 lbs, of sugarcane from 3,639 to 4,776 lbs, and a decrease in the yield of ragi from 1,016 to 981 lbs, and of sesamum (*til*) from 411 to 352 lbs.

	1,120		560		520		1,012					88				

NOTE.—The figures of yield are taken from the Season and Crop Report of Madras for 1936-37.
 * The figures of normal yield per acre in the south have been arrived at with reference to the distribution of the several varieties and hence they vary from year to year according to the distribution. Figures of average yield per acre for each variety are irrigated Cambodia 250 lbs; irrigated Karunganni in Coimbatore 150 lbs; dry Cambodia 80 lbs in Salem, Coimbatore and Trichinopoly; 100 lbs in Madura, Ramnad and Tinnevely; 50 lbs elsewhere; Uppam 65 lbs; dry Karunganni in Coimbatore 85 lbs, Nadam and Bourbon 20 lbs, and Tinnevelles 103 lbs.
 (a) The yield reported in unhusked grain has been reduced by 33 per cent in the case of rice, 15 per cent in the case of jowar, 20 per cent in the case of bajra, 10 per cent in the case of ragi and 40 per cent in the case of maize.
 (b) There is a small area under irrigation in these districts but the yield thereof does not differ much from that of unirrigated variety.

APPENDIX B

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA

- Agasi, agati, or avati* (*Sesbania grandiflora*)—A vegetable crop.
- Ajmod* (*Carum Roxburghianum*)—A kind of spice.
- Ajwan* (*Carum copticum*)—A kind of spice, "Bishop's weed".
- Akarkura or jevandi* (*Chrysanthemum coronarium*)—A non-food crop.
- Amada or mamidi allam* (*Curcuma amada*)—A condiment.
- Ampazham* (*Sponus magnifera*)—The hog plum.
- Arhar* (*Cajanus indicus*)—The pigeon pea.
- Arunelli* (*Phyllanthus distichus*)—Country star gooseberry.
- Bajra* (*Pennisetum typhoideum*)—The spiked millet.
- Banf* (Coorg)—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.
- Barbati* (*Vigna catjang*)—Asparagus, a food grain.
- Barti* (see Wudalu).
- Bel* (*Agle Marmelos*)—A fruit.
- Bhagdari* (see Narvadari).
- Bilimbi* (*Averrhoa Bilimbi*)—A fruit.
- Bimb* (*Cephalandra indica*)—A fruit.
- Chaplash* (*Artocarpus Chaplasha*)—A tree grown mainly for timber.
- Chayroot* (*Oldenlandia umbellata*)—A dye.
- Cheenu* (*Panicum miliaceum*)—The common millet.
- Cheik* (*Coix lachryma-jobi*)—A food grain, "Job's Tear".
- Chikkudukayalu* (*Dolichos lablab*)—The Indian or popat bean.
- Cholanathu* (*Andropogon sorghum*)—Fodder jowar.
- Cholum* (see Jowar).
- Chowli* (see Barbati).
- Cumbu* (see Bajra).
- Dani* (*Nipa fruticans*)—A soboliferous palm, the leaves of which are used for thatching purposes, also for matting.
- Dao-tax* (Assam)—A tax levied in Sylhet upon male Tepperas who cultivate by jhamming.
- Dhaincha* (*Sesbania aculeata*)—A plant cultivated mainly for green manure.
- Dhatura* (*Datura alba*)—A drug.
- Dividivi* (*Casalpinia coriara*)—A tanning material.
- Dolois* (Assam)—The Headman of a group of villages in the Jowar Sub-division of the Khasi and Jaintia Hills district.
- Gajar*—Carrot.
- Garmal* (*Coleus barbatus*)—A fruit.
- Gondli* (see Kutki).
- Gorait* (United Provinces)—Village watchman.
- Gountiai* (Orissa).—A form of village headman tenure in which the land revenue assessed on a village is collected and paid to Government by the village headman. As remuneration for the work of collection of the land revenue, the village headman receives in revenue-free home-farm land or, in cash, 25 per cent. of the rents settled as payable by the raiyots. He possesses no proprietary rights in the village except on the home-farm lands. He has certain rights of management over the whole village and can alienate his tenure if accompanied by a transfer of the home-farm land.
- Henna* (*Lawsonia alba*)—A dye.
- Indm* (Madras)—Alienated villages or lands granted rent-free. *Whole indm* villages are entire villages held on such tenure; *minor indms* are portions of villages, generally a number of fields, held on *indm* tenure.
- (Coorg)—A grant of land by Government as a reward for services rendered or for religious or charitable purposes.
- Isufat* (Bombay)—A form of service tenure.
- Isfagul* (*Plantago ovata*)—A drug.
- Istamdrari* (Punjab, Ajmer-Merwara)—A tenure which, though the revenue is assigned is charged with a permanently fixed quit-rent.
- Izdra* (Berar)—Land leased under the waste-land rules on stipulated terms.
- Jagir* (Berar)—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.

APPENDIX B—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—continued

- Jagir* (Ajmer-Merwara)—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Bombay)—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.
- (Coorg)—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.
- Jambo or naval*—Black plum.
- Jamma* (Coorg)—A tenure under which lands are held on half the ordinary assessment on condition that the holders should perform certain services to Government if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.
- Jenugulu*—Asparagus.
- Jinjili* (*Sesamum indicum*)—An oilseed.
- Jira*—Caraway.
- Jodi* (Madras)—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, minus the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.
- Jowar* (*Sorghum vulgare*)—The great millet.
- Kalpayaru*—Kidney bean.
- Kamranga* (*Averrhoa Carambola*)—A fruit.
- Kanda* (*Dracontium*)—A vegetable crop.
- Kangni* (*Panicum Italicum*)—Italian millet.
- Kankrol* (*Momordica cochinchinensis*)—A vegetable crop.
- Karola* (*Momordica Charantia*)—A vegetable crop.
- Karwapijai* (*Murraya Koenigii*)—A condiment.
- Kavali* (*Sterculia urens*)—The Indian katura, a fruit.
- Kavathu* (*Dioscorea alata*)—A tuber used as a food stuff.
- Khalsa* (Bombay)—Government occupancy or raiyatwari tenure.
- (Central Provinces)—Areas settled on malguzari or thekadari tenure, in contradistinction to zamindari.
- (Berar, Ajmer-Merwara)—Land paying full revenue to Government.
- Khatedar* (Berar)—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.
- Khiraj* (Assam)—Land assessed to full revenue.
- Khoti* (Bombay)—A form of tenure, found chiefly in the Konkan, the holder of which is in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.
- Kirni* (*Mimusops hexandra*)—A large tree cultivated chiefly in north-western India. It produces an olive-shaped yellow berry which is eaten chiefly during times of scarcity, and in the hot weather.
- Kodo or Kutki* (*Paspalum Scrobiculatum*)—A kind of millet.
- Kolinji* (*Tephrosia purpurea*)—A drug.
- Koorka* (*Strobilanthes*)—A vegetable crop.
- Korai*—The Indian matting sedge.
- Kuhudi* (*Panicum trypheron*)—A food grain.
- Kulthi* (*Dolichos biflorus*)—Horse gram.
- Kutki* (see Kodo).
- Likhiraj* (Assam)—Revenue-free land.
- Lobia* (see Barbatil).
- Madder* (*Rubia tinctorum* and *R. cordifolia*)—A dye.
- Mahalkari* (Bombay)—A revenue and police officer in charge of a sub-division of a taluk.
- Makham sim*—The sword bean.
- Mulguzari* (Central Provinces)—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.
- (Orissa)—A form of proprietary tenure, where the estate is held either revenue-free or at a nominal quit-rent. The holder possesses full proprietary rights in the estate.

APPENDIX B—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—continued

- Mamlatdar* (Bombay)—The chief revenue and police officer (native) in charge of a taluk.
- Mankachu* (*Alocasia indica*)—A root crop.
- Marua* (*Elusine coracana*)—A kind of millet.
- Marukkolundu* (*Artemisia vulgaris*)—The Indian worm wood.
- Mehwasi* (Bombay)—A proprietary tenure assessable to revenue at a lump sum.
- Muafi* (Manpur)—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to jagirs.
- Mung* (*Phaseolus Mungo*)—Green gram.
- Munsarim* (Berar)—A head native revenue officer.
- Narvadari, Bhagdari* (Bombay)—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump and in the latter distributed by rates over fields.
- Nem or Margosa* (*Melia azadirachta*)—A non-food crop.
- Neerali* (*Gynocordia odorata*)—An oilseed.
- Nela mulaka* (*Solanum xanthocarpum*)—The bogoda brinjal, a drug.
- Nisfkhiraj* (Assam)—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.
- Odamula* (*Ochlandra Rheedii*)—A reed.
- Ol or zaminkand*—The elephant foot, a root crop.
- Palampat* (Berar)—Land held on payment of a quit-rent, but not necessarily hereditary.
- Panchayat* (Bengal)—A committee of five respectable persons nominated or appointed by local officers of Government in a village or group of villages for the settlement of petty disputes among the people and for dealing with other small local matters, such as caste, occupation, sanitation, etc.
- Papay* (*Carica papaya*)—A fruit.
- Parpatligar* (Coorg)—A revenue officer in charge of a sub-division of a taluk.
- Parvar* (see Patol).
- Patel* (Coorg)—Village headman appointed by Government.
- Patol* (*Trichosanthes dioica*)—A vegetable crop.
- Peshkash* (Madras)—The fixed land revenue payable to Government on all permanently settled estates.
- Pinnakottai or ponna*—The mast-wood.
- Ponnagantikura* (*Alternanthera sessilis*)—A vegetable crop.
- Piramboke* (Madras)—Lands reserved for public or village communal purposes.
- Pot indms* (Bombay)—Plots of alienated land in Khalsa villages.
- Pot khardb* (Berar)—The unculturable area included in a survey number.
- Puliyavara* (*Oxalis corniculata*)—A vegetable crop.
- Ragi* (see Marua).
- Randhuni* (see Ajmud).
- Rayatwari*—State lands leased to cultivators for a fixed term. A form of tenure in which the settlement of revenue is made by Government with each individual occupant or cultivator of the land for a given term, without the intervention of a third party.
- Sabai grass* (*Ischaemum Augustifolium*)—A fibre plant.
- Sank-alu* (*Pachyrhizus angulatus*)—A root crop.
- Sapodilla* (*Achras Sapota*)—A fruit.
- Sebestan* (*Cordia Myra*)—A fruit.
- Shanbóg* (Coorg)—A village accountant appointed by Government.
- Shrotriem* (Madras)—Village held on grant (originally to Brahmins), wholly or partially revenue-free.
- Siris tree or vagai* (*Albizzia Lebbeck*)—A non-food crop.
- Sorrell* (*Rumex vesicarius*)—A vegetable crop.
- Sother*—Radish.
- Swank* (*Panicum frumentaceum*)—A food grain.
- Talukdari* (Bombay)—A form of proprietary right in force in the northern districts of Bombay.
- Tejpat* (*Cinnamomum Tamala* and *C. obtusifolium*)—A spice.
- Thattan payara* (see Barbati).

APPENDIX B—*concluded*VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—*concluded*

Thattan payara (see Barbatī).

Thekadar (Central Provinces)—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.

Thetke grass (*Imperata arundinacea*)—A small perennial grass used chiefly for thatching purposes.

Til (*Sesamum indicum*)—An oilseed.

Uchhe (*Momordica muricata*)—A vegetable crop.

Udai (*Acacia eburnea*)—A thorny tree used as fuel or for fencing purposes.

Udhad-jamabandī (Bombay)—A proprietary tenure subject to fixed assessment.

Umblī (Coorg)—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

Unda (*Pongamia glabra*)—An oilseed.

Urad (*Phaseolus radiatus*)—Black gram.

Wudalu or barti (*Panicum flavidum*)—A food grain.

Zamindār—The holder of an estate on a fixed assessment under a deed of permanent ownership granted by Government.

———— (Central Provinces)—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.

Zamindari—An estate held on a fixed assessment under a deed of permanent ownership granted by Government.

———— (United Provinces)—An undivided estate held in joint tenure.

APPENDIX C

ALPHABETICAL LIST OF CROPS CULTIVATED IN INDIA AND THEIR CLASSIFICATION
IN TABLE IV

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Agasi, agati or avati	Sesbania grandiflora	40. Fruits and Vegetables including root crops.
Agave	Agave spp.	25. Fibres—others.
Ajmod or Randhuni	Carum Roxburghianum	20. Condiments and Spices.
Ajwan or Bishop's weed	Carum Copticum	37. Drugs and Narcotics— others.
Akurkura (see Chrysanthemum)
Al (see Moringa)
Aloes	Aloe vera	37. Drugs and Narcotics— others.
Alya (see Cress)
Amada or Mamidi allam	Curcuma Amada	20. Condiments and Spices.
Amaranths	Amarantus	41. Miscellaneous food crops.
Ampazham (see Plum)
Anise seed	Pimpinella Anisum	20. Condiments and Spices.
Apple, wood	Feronia elephantum	40. Fruits and Vegetables including root crops.
" Rose	Eugenia Jambos	40. " " "
" Custard	Anona squamosa and A. reticulata.	40. " " "
Arecanut or Betelnut	Areca Catechu	37. Drugs and Narcotics— others.
Arhar or pigeon pea	Cajanus indicus	10. Other food grains, etc.
Arnatto or Arnotto	Bixa Orellana	30. Dyes and Tanning, Materials—others.
Arrowroot, West Indian	Maranta arundinacea	41. Miscellaneous food crops.
" Wild or East Indian	Curcuma augustifolia	41. " " "
Artichoke	Cynara Scolymus or Cen- tauria Cardunculus.	40. Fruits and Vegetables including root crops.
Arum (edible), Kachu or Kachalu	Colocasia Antiquorum	40. " " "
Arunelli (see Gooseberry, country star)
Bajra (see Millet)
Barbati, Lobia, Jenugulu, Thattan-payara or Chowli (Asparagus)	Vigna Catjang	10. Other food grains, etc.
Barley	Hordeum vulgare	4. Barley.
Barti (see Wndalu)
Basil, sweet	Ocimum Basilicum	37. Drugs and Narcotics— others.
Beans—
" Sim	Canavalia sp.	40. Fruits and Vegetables including root crops.
" Sutri or Ghurush	Phaseolus calcaratus	10. Other food grains, etc.
" Asparagus (see Barbati)
" Cluster (see Vetch)
" French or Haricot	Phaseolus vulgaris	10. Other food grains, etc.
" Garden	Vicia Faba	40. Fruits and Vegetables including root crops.
" Goa	Psophocarpus tetragonolobus	40. " " "
" Indian, Chikkudukayalu, Papat or Vali	Dolichos Lablab	10. Other food grains, etc.
" Kidney, Moth or Kalpayaru	Phaseolus aconitifolius	10. " " "
" Lima	" Lunatus	10. " " "
" Soy	Glycine hispida	10. " " "
" Sword or Makham Sim	Canavalia Ensiformis, C. gladiata.	40. Fruits and Vegetables including root crops.
" Velyet	Mucuna Pruriens	40. " " "
Beetroot	Beta vulgaris	40. " " "
Bel	Ægle Marmelos	40. " " "
Betel nut (see Arecanut)
" vine	Piper Betle	37. Drugs and Narcotics— others.
Bhindi (see Hibiscus, edible)

Celery	<i>Apium graveolens</i>	40. " " "
Chaplash (<i>see</i> Sam tree)
Chayroot	<i>Oldenlandia umbellata</i>	30. Dyes and Tanning Materials—others.
Cheena (<i>see</i> Millet)
Cheik (<i>see</i> Job's Tear)
Chicory	<i>Cichorium Intybus</i>	40. Fruits and Vegetables including root crops.
Chickling Vetch (<i>see</i> Vetch)
Chillies	<i>Capsicum sp.</i>	20. Condiments and Spices.
Chikkudukayalu (<i>see</i> Beans, Indian)
Cholanathu (fodder Cholam)	<i>Andropogon Sorghum</i>	39. Fodder crops.
Cholam (<i>see</i> Millet)
Chowli (<i>see</i> Barbati)
Chrysanthemum, Akurkura, or Jevandi	<i>Chrysanthemum corona-</i> <i>rium.</i>	42. Miscellaneous non-food crops.
Cinchona	<i>Cinchona sp.</i>	35. Cinchona.
Cinnamon	<i>Cinnamomum zeylanicum</i>	20. Condiments and Spices.
Citron or lime or lemon	<i>Citrus medica</i>	40. Fruits and Vegetables including root crops.
Cloves	<i>Eugenia caryophyllata</i> or <i>Caryophyllus aromaticus.</i>	20. Condiments and Spices.
Coconut	<i>Cocos nucifera</i>	16. Coconut.
Coffee	<i>Coffea arabica</i>	32. Coffee.
Coriander	<i>Coriandrum sativum</i>	20. Condiments and Spices.
Cotton	<i>Gossypium sp.</i>	23. Cotton.
Cress or Alya	<i>Lepidium sativum</i>	40. Fruits and Vegetables including root crops.
Cucumber	<i>Cucumis sativus</i>	40. " " "
Cumbu (<i>see</i> Millet)
Cumin	<i>Cuminum Cyminum</i>	20. Condiments and Spices.
Custard Apple (<i>see</i> Apple)
Dani	<i>Nipa fruticans</i>	42. Miscellaneous non-food crops.
Date palm (<i>see</i> Palm)
Dhaincha	<i>Sesbania aculeata</i>	42. Miscellaneous non-food crops.

APPENDIX C—continued

ALPHABETICAL LIST OF CROPS—continued

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Dhatura	<i>Datura alba</i>	37. Drugs and Narcotics— others.
Dill or Sowa	<i>Peucedanum graveolens</i>	18. Oilseeds—others.
Dividivi	<i>Cassalpinia coriaria</i>	30. Dyes and Tanning Materials—others.
Drumsticks or Horse-radish	<i>Moringa pterygosprema</i>	40. Fruits and Vegetables including root crops.
Elephant foot, Zaminkand or Ol	<i>Amorphophallus campanu- latus</i>	40. " " "
Elephant yam	<i>Tryphonium trilobatum</i>	40. " " "
Fennel	<i>Foeniculum vulgare</i>	20. Condiments and Spices.
Fenugreek	<i>Trigonella fœnum grœcum</i>	20. " " "
Field Vetch (<i>see</i> Vetch)
Fig	<i>Ficus Carica</i>	40. Fruits and Vegetables including root crops.
Flea-bane, purple	<i>Vernonia anthelmintica</i>	37. Drugs and Narcotics— others.
Flowers	42. Miscellaneous non-food crops.
Gajar (<i>see</i> Carrot)
Garlic	<i>Allium sativum</i>	20. Condiments and Spices.
Garmal	<i>Coleus barbatus</i>	40. Fruits and Vegetables including root crops.
Gawar (<i>see</i> Vetch)
Ginger	<i>Zingiber officinale</i>	20. Condiments and Spices.
Goa bean (<i>see</i> Bean)
Gondi (<i>see</i> Millet)
Gooseberry, Cape—or tepari	<i>Physalis peruviana</i>	40. Fruits and Vegetables including root crops.
" Country star or Arunelli	<i>Phyllanthus distichus</i>	40. " " "
Goose foot	<i>Chenopodium album</i>	40. " " "
Gourd, Snake	<i>Trichosanthes anguina</i>	40. " " "
" Bottle	<i>Lagenaria vulgaris</i>	40. " " "
" Towel	<i>Luffa acutangula</i>	40. " " "
" Red or melon pumpkin	<i>Cucurbita maxima</i>	40. " " "
" Melon, white	<i>Benincasa cerifera</i>	40. " " "
Gram	<i>Cicer arietinum</i>	9. Gram.
" Field	<i>Phaseolus trilobus</i>	10. Other food grains, etc.
" Green or Mung	<i>Phaseolus Mungo</i>	10. " " "
" Horse or Kultbi	<i>Dolichos biflorus</i>	10. " " "
" Black or Urad (Matikalai)	<i>Phaseolus radiatus</i>	10. " " "
Grape	<i>Vitis vinifera</i>	40. Fruits and Vegetables including root crops.
Groundnut	<i>Arachis hypogœa</i>	15. Groundnut.
Guava	<i>Psidium Guajava</i>	40. Fruits and Vegetables including root crops.
Guinea grass	<i>Panicum maximum</i>	39. Fodder crops.
Gumberry	<i>Cordia Rothii</i>	40. Fruits and Vegetables including root crops.
Hemp, Indian, or Ganja	<i>Cannabis sativa</i>	38. Indian hemp.
" Sunn	<i>Crotalaria juncea</i>	25. Fibres—others.
" Deccan	<i>Hibiscus cannabinus</i>	25. " "
" Sisal	<i>Agave sisalana</i>	25. " "
Henna	<i>Lawsonia alba</i>	30. Dyes and Tanning Materials—others.
Hibiscus, edible or bhindi	<i>Hibiscus esculentus</i>	40. Fruits and Vegetables including root crops.
Horse-radish (<i>see</i> Drumsticks)
Indian Hemp (<i>see</i> Hemp)
Indian worm wood (<i>see</i> Marukkolundu)
Indigo	<i>Indigofera sumatrana</i> and <i>I. arrecta</i>	29. Indigo.
Isfagul	<i>Plantago ovata</i>	37. Drugs and Narcotics— others.

APPENDIX C—continued

ALPHABETICAL LIST OF CROPS—continued

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Jack fruit	<i>Artocarpus integrifolia</i>	40. Fruits and Vegetables including root crops.
Jambotree (<i>see</i> Plum, black)
Jenugulu (<i>see</i> Barbati)
Jevandi (<i>see</i> Chrysanthemum)
Jinjili (<i>see</i> Sesamum)
Jira (<i>see</i> Caraway)
Job's Tear or Cheik	<i>Coix lachryma-jobi</i>	10. Other food grains, etc.
Jowar (<i>see</i> Millet)
Jujube	<i>Zizyphus Jujuba</i>	40. Fruits and Vegetables including root crops.
Jute	<i>Corchorus sp.</i>	24. Jute.
Kachu or Kachalu (<i>see</i> Arum)
Kakri (<i>see</i> Melon)
Kalparyu (<i>see</i> Beans, Kidney)
Kamranga	<i>Averrhoa Carambola</i>	40. Fruits and Vegetables including root crops.
Kanda	<i>Dracontium</i>	40. " " "
Kangni (<i>see</i> Millet)
Kankrol	<i>Momordica cochinchinensis</i>	40. Fruits and Vegetables including root crops.
Kaon (<i>see</i> Millet)
Kapok	<i>Eriodendron anfractuosum</i>	25. Fibres—others.
Karola	<i>Momordica Charantia</i>	40. Fruits and Vegetables including root crops.
Karuvapilai	<i>Murraya Koenigii</i>	20. Condiments and Spices.
Kavali or Indian Katura	<i>Sterculia urens</i>	40. Fruits and Vegetables including root crops.
Kavathu, pannikkavathu, pallakavathu, kolkavathu	<i>Dioscorea alata</i>	40. " " "
Kharbuja (<i>see</i> Melon)
Khesari (<i>see</i> Vetch)
Khurfa (<i>see</i> Purslane)
Kidney bean (<i>see</i> Bean)
Kirni	<i>Mimusops hexandra</i>	41. Miscellaneous food crops.
Kodo (<i>see</i> Millet)
Kokam (<i>see</i> Mangosteen)
Kolinji or vempali	<i>Tephrosia purpurea</i>	37. Drugs and Narcotics—others.
Koorka	<i>Strobilanthes</i>	40. Fruits and Vegetables including root crops.
Korai (<i>see</i> Matting sedge, Indian)
Kuhudi	<i>Panicum trypheron</i>	10. Other food grains, etc.
Kulthi (<i>see</i> Gram)
Kutki (<i>see</i> Millet)
Lemon (<i>see</i> Citron)
Lentils	<i>Lens esculenta</i> or <i>Ervum lens</i>	10. Other food grains, etc.
Lettuce	<i>Lactuca Scariola</i>	40. Fruits and Vegetables including root crops.
Lime (<i>see</i> Citron)
Linseed	<i>Linum usitatissimum</i>	12. Linseed.
Lobia (<i>see</i> Barbati)
Locust tree (<i>see</i> Carob)
Lucerne	<i>Medicago sativa</i>	39. Fodder crops.
Madder	<i>Rubia tinctorum</i> and <i>R. cordifolia</i> .	30. Dyes and Tanning Materials—others.
Mahua	<i>Bassia latifolia</i> and <i>B. longifolia</i> .	41. Miscellaneous food crops.
Maize	<i>Zea Mays</i>	8. Maize.
Makham Sim (<i>see</i> Beans, Sword)
Mango	<i>Mangifera indica</i>	40. Fruits and Vegetables including root crops.
Mangosteen or Kokam	<i>Garcinia indica</i>	40. " " "
Mankachu	<i>Alocasia indica</i>	40. " " "
Margosa or Neem tree	<i>Melia azadirachta</i>	42. Miscellaneous non-food crops.

APPENDIX C—continued

ALPHABETICAL LIST OF CROPS—continued

NAME OF CROP		Holds of classification in Table IV
English or Vernacular	Botanical	
Marians	<i>Bouea burmanica</i>	40. Fruits and Vegetables including root crops.
Marjoram	<i>Origanum vulgare</i>	20. Condiments and Spices.
Marua (<i>see</i> Millet)
Marukkoluudu or Indian wormwood	<i>Artemisia vulgaris</i>	42. Miscellaneous non-food crops.
Mast-wood	<i>Calophyllum inophyllum</i>	18. Oilseeds—others.
Mati kalai (<i>see</i> Black gram)
Matting sedge, Indian or Korai	<i>Cyperus corymbosus</i> , C. tegetum.	25. Fibres—others.
Medlar, Indian	<i>Vangueria edulis</i>	40. Fruits and Vegetables including root crops.
Melon, Kharbuja	<i>Cucumis Melo</i>	40. " " "
" Kakri	<i>Cucumis Melo</i> var. <i>momordica</i> .	40. " " "
" Musk	<i>Cucurbita moschata</i>	40. " " "
" Water	<i>Citrullus vulgaris</i>	40. " " "
" White Gourd (<i>see</i> Gourd)
Metha (Fenugreek)	<i>Trigonella foenum-graecum</i>	20. Condiments and Spices.
Millet, Bulrush, Bajra or Cumbu	<i>Pennisetum typhoideum</i>	6. Cumbu or Bajra.
" (Sorghum) or jowar or cholam	<i>Sorghum vulgare</i>	5. Cholam or Jowar.
" Italian, Kangni, or Kaon	<i>Panicum Italicum</i> or <i>Setaria italica</i> .	10. Other food grains, etc.
" Kodo or Varagu	<i>Paspalum scrobiculatum</i>	10. " "
" Little, Kutki or Gondli	<i>Panicum miliare</i>	10. " "
" Marua or Ragi	<i>Eleusine Coracana</i>	7. Ragi or marua.
" Common or Cheena	<i>Panicum miliaceum</i>	10. Other food grains, etc.
Mint or Pudina	<i>Mentha arvensis</i>	20. Condiments and Spices.
Morinda or Al	<i>Morinda tinctoria</i>	30. Dyes and Tanning Materials—others.
Moth (<i>see</i> Bean)
Mulberry	<i>Morus indica</i>	42. Miscellaneous non-food crops.
Mung (<i>see</i> Gram)
Mustard	<i>Brassica</i> sp.	14. Rape and Mustard.
Naval (<i>see</i> Plum, black)
Neem tree (<i>see</i> Margosa)
Neerali	<i>Gynocordia odorata</i>	18. Oilseeds—others.
Niger Seed or Sorguja	<i>Guizotia abyssinica</i>	18. " "
Nutmeg	<i>Myristica fragrans</i>	20. Condiments and Spices.
Oats	<i>Avena sativa</i>	39. Fodder crops.
Odamura (reeds)	<i>Ochlandra Rheedii</i>	42. Miscellaneous non-food crops.
Oil (<i>see</i> Elephant foot)
Onion	<i>Allium Cepa</i>	40. Fruits and Vegetables including root crops.
Opium	<i>Papaver somniferum</i>	31. Opium.
Orache, garden (<i>see</i> Spinach)
Oranges	<i>Citrus Aurantium</i>	40. Fruits and Vegetables including root crops.
Palm, Date	<i>Phoenix sylvestris</i>	22. Sugar—others.
" Palmyra	<i>Borassus flabellifer</i>	22. " " "
Papay	<i>Carica papaya</i>	40. Fruits and Vegetables including root crops.
Parvar or Patol	<i>Trichosanthes dioica</i>	40. " " "
Peach	<i>Prunus persica</i>	40. " " "
Peanut (<i>see</i> Groundnut)
Peas	<i>Pisum sativum</i> or <i>Pisum arvense</i> .	10. Other food grains, etc.
Pepper	<i>Piper</i> or <i>Capsicum</i>	20. Condiments and Spices.
" Black	<i>Piper nigrum</i>	20. " " "
" Long	<i>Piper longum</i>	20. " " "
Pigeon or bottle grass	<i>Setaria glauca</i>	10. Other food grains, etc.
" pea (<i>see</i> Arhar)
Pinnakottai, Ponna (<i>see</i> Mast-wood)

APPENDIX C—continued

ALPHABETICAL LIST OF CROPS—continued

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Pine apple	Ananas sativa	40. Fruits and Vegetables including root crops.
Plantain	Musa sapientum	40. " " "
Plum, black, Jambo tree or Naval	Eugenia Jambolana	40. " " "
" Hog, or Ampazham	Spondias mangifera	40. " " "
Poi (see Spinach)
Pomegranate	Punica granatum	40. Fruits and Vegetables including root crops.
Pomelo	Citrus decumana	40. " " "
Ponnagantikura	Alternanthera sessilis	40. " " "
Potato	Solanum tuberosum	40. " " "
" Sweet	Ipomoea Batatas, Batatas edulis.	40. " " "
Pudina (see Mint)
Puliyavara	Oxalis corniculata	40. Fruits and Vegetables including root crops.
Pumpkin	Cucurbita pepo	40. " " "
" Melon (see Gourd red)
Purslane	Portulaca Oleracea	40. Fruits and Vegetables including root crops.
Radish or Sother	Raphanus sativus	40. " " "
Ragi (see Millet)
Randhuni (see Ajmud)
Rapeseed	Brassica sp.	14. Rape and Mustard.
Raspberry	Rubus lasiocarpus	40. Fruits and Vegetables including root crops.
Rhea	Bœhmeria nivea	25. Fibres—others.
Rice	Oryza sativa	2. Rice.
Rose apple (see Apple)
Roselle	Hibiscus sabdariffa	40. Fruits and Vegetables including root crops.
Rubber (India)	Hevea brasiliensis, Manihot Glaziovii.	42. Miscellaneous non-food crops.
Sabai grass	Isochemum angustifolium	25. Fibres—others.
Safflower	Carthamus tinctorius	18. Oilseeds—others.
Saffron	Crocus sativus	30. Dyes and Tanning Materials—others.
Sage	Salvia officinalis	20. Condiments and Spices.
Sam tree or Chaplash	Artocarpus Chaplasha	42. Miscellaneous non-food crops.
Sank-alu	Pachyrhizus angulatus	40. Fruits and Vegetables including root crops.
Sapodilla	Achras Sapota	40. " " "
Sawan (see Swank)
Sebestan	Cordia myxa	40. Fruits and Vegetables including root crops.
Senna	Cassia angustifolia and C. ovata.	37. Drugs and Narcotics—others.
Sesamum, til or jinjili	Sesamum indicum	13. Sesamum.
Shahjira (see Caraway, black)
Shama (see Swank)
Singhara or water caltrop	Trape bispinosa	40. Fruits and Vegetables including root crops.
Siris tree or vagai	Albizia Lebbek	42. Miscellaneous non-food crops.
Sisal hemp (see Hemp)
Soapnut or Kumkudu-Kaya	Sapindus trifoliatus	42. Miscellaneous non-food crops.
Sorguja (see Niger seed)
Sorrel	Rumex vesicarius	40. Fruits and Vegetables including root crops.
Sother (see Radish)
Sowa (see Dill)
Soy bean (see Bean)
Spelt wheat (see Wheat)

APPENDIX C—concluded

ALPHABETICAL LIST OF CROPS—concluded

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Spinach	Spinacea oleracea	40. Fruits and Vegetables including root crops.
„ Indian or poi	Basella alba	40. „ „ „
„ Mountain, or Garden Orache	Atriplex hortensis	40. „ „ „
Strawberry	Fragaria vesca	40. „ „ „
Sugarcane	Saccharum officinarum	21. Sugarcane.
Sunflower	Helianthus Annuus	18. Oilseeds—others.
Swallow-wort	Calotropis sp.	25. Fibres—others.
Swank, Sawan, or Shama	Panicum frumentaceum	10. Other food grains, etc.
Sweet flag	Acorus Calamus	37. Drugs and Narcotics— others.
Sweet potato (<i>see</i> Potato)
Tamarind	Tamarindus indica	20. Condiments and Spices.
„ Manila	Pithecolobium dulce	40. Fruits and Vegetables including root crops.
Taramira	Eruca sativa	14. Rape and Mustard.
Tea	Camelia Thea	33. Tea.
Tejpat	Cinnanonum Tamala and C. obtusifolium.	20. Condiments and Spices.
Tepari (<i>see</i> Gooseberry)
Thattan-payara (<i>see</i> Barbati)
Thetkè (grass)	Imperata arundinacea	42. Miscellaneous non-food crops.
Til (<i>see</i> Sesamum)
Tobacco	Nicotiana Tabacum and N. Rustica.	34. Tobacco.
Tomato	Lycopersicum esculentum	40. Fruits and Vegetables including root crops.
Tori, Toria	Brassica Napus	14. Rape and Mustard.
Turmeric	Curcuma longa	20. Condiments and Spices.
Turnip	Brassica Rapa	40. Fruits and Vegetables including root crops.
Uchhe	Momordica muricata	40. „ „ „
Udai	Acacia eburnea	42. Miscellaneous non-food crops.
Unda	Pongamia glabra	18. Oilseeds—others.
Urad (<i>see</i> Gram)
Vagai (<i>see</i> Siris tree)
Varagu (<i>see</i> Millet)
Vempali (<i>see</i> Kolinji)
Vetch, Field, Cluster bean, or gawar	Cyamopsis psoralioides	39. Fodder crops.
„ Chickling or khesari	Lathyrus sativus	10. Other food grains, etc.
Water caltrop (<i>see</i> Singhara)
„ melon (<i>see</i> Melon)
Wheat	Triticum sativum	3. Wheat.
„ Buck	Fagopyrum esculentum	10. Other food grains, etc.
„ Spelt	Triticum sativum var. Spelta.	3. Wheat.
Wood apple (<i>see</i> Apple)
Wudalu or barti	Panicum flavidum	10. Other food grains, etc.
Yams	Dioscorea sp.	40. Fruits and Vegetables including root crops.
Zaminkand (<i>see</i> Elephant foot)
