|                          | Total                      | .. | 534  | Districts  |

The Waters of the Colony were assigned as follows :

- (a) To the Harbour Master, Assistant Harbour Master and Boarding Officer, Port-of-Spain.
- (b) The Harbour Master, San Fernando.
- (c) The Harbour Master, La Brea.
- (d) The Harbour Master, Tobago.
- (e) The Wardens having Bays, &c., under their charge.

5. Large organisations and institutions such as Constabulary, Prisons, Hospitals and Asylums were separately enumerated. The larger plantations were served by the Enumerators of the districts within which they fell, but the Superintendent Registrars were required to prepare separate recapitulations for them.

6. The Wardens and Superintendent Registrars were given discretion to readjust the enumeration districts and to increase or decrease the number of enumerators according as the development of the districts and the incidence of population seemed to warrant. Some utilised this discretion with beneficial results. The Colony was finally divided into 543 Enumeration districts and 548 Enumerators were employed.

7. The results of the Census are given under the following heads :

- I. Population.
- II. Area and Density of Population.
- III. Sex Distribution.
- IV. Conjugal Condition.
- V. Age distribution.
- VI. Occupations.
- VII. Birth Places.
- VIII. Religious Persuasions.
- IX. Education.
- X. Infirmities.
- XI. Dwellings.
- XII. Live Stock.

8. Separate tables relating to infants, *i.e.*, children from birth to the end of the 5th year (*i.e.*, 5th birthday)—those of "School attending" age from the 5th to the 15th birthday and to adults over fifteen years of age are appended. They supplement the information given in Table 4.

9. A table relating to the incidence of Civil or conjugal conditions and age distribution is appended. Such information has often been asked for, but since the Census of 1891 has not been specially tabulated.

10. Tables relating to persons in the larger institutions are also attached.

11. The usual tables are appended relating to (a) General Population (that is the population excluding the East Indians) and (b) East Indians. Observations on these are made under the appropriate heads.

12. Diagrams are given shewing the numerical and centesimal proportions of the various religious persuasions (a) In the total population, (b) of each denomination in the Christian population and (c) of the main religious attachments among non-Christians.

13. Outline maps of Trinidad and Tobago, of the Municipality of Port-of-Spain and of the Boroughs of San Fernando and Arima are appended. The maps of Trinidad and Tobago give approximately the configuration of the various registration districts of the Colony with the number of persons in each. Females in all the maps are figured in red, males and totals of each district in black.

14. The enumeration districts of the municipalities are defined by numbers corresponding with those in the *Gazette Extraordinary*. In the map of Port-of-Spain the five registration areas have been defined in red, and the municipal divisions in green, thereby affording an easy means of ascertaining the number of persons within either class of boundary.

15. The Borough of Arima is defined in outline in accordance with its Charter of Incorporation and although there is no map illustrating the existing street divisions sufficient data have been obtained to show approximately the more important sections.

#### I. POPULATION.

16. The preliminary report sent in on the 20th October last (Council Paper No. 81 of 1931), gives a forecast based on the Tabulations of the Superintendent Registrars. In this report the number of persons is returned as 411,452. Immediately after the report was published, the Schedules relating to two large plantations and one institution numbering altogether 1,331 persons were received. These brought up the total population to 412,783—an increase of 46,780, or 12·8 per centum on the 1921 Census figures.

17. An estimate of population based on the figures of 1921 and carried on to the 26th April, 1931, the date of the Census gives a total of 416,067.

|   |    |    |    |    |    |         |
|---|----|----|----|----|----|---------|

## II. AREA AND DENSITY OF POPULATION.

2. Having ascertained the population of the Towns and Counties and the numerical and centesimal increases, it is necessary to investigate the area of each of these divisions and the extent to which it affords living accommodation. The following table shews the area, population and population to the square mile of each division:

| <i>Town or County.</i>      | <i>Area in Square Miles.</i> | <i>Population.</i> | <i>Population to the Square Mile.</i> |
|-----------------------------|------------------------------|--------------------|---------------------------------------|

In 1921 the area given was 1,976.40. Recent surveys have, however, disclosed a slight difference. The number of persons to the square mile for the whole Colony was 208. The density of population in the three chief towns was 25,119, 13,669 and 10,178 per square mile respectively.

## III. SEX DISTRIBUTION.

In Trinidad the males exceeded the females by 282, in the Waters of the Colony the male excess was 971, and in Tobago the females outnumbered the males by 798.

24. The proportion of sexes in the Colony is 998 females to 1,000 males.

25. The changes in the numbers of each sex in 1931 as compared with 1921 are given in the following table :

26. The Counties of St. George with an increase of 15,039 persons and St. Patrick with 12,456 are the outstanding counties in point of increase. The former includes the village of Mucurapo to the west and the fast developing settlements of Aranguéz and Barataria to the east of Port-of-Spain which provide accommodation for the overflow population of the capital. In St. Patrick there have been inducements for an influx of labour and although the activities of the oil industry have abated there is always a tendency to "hang on" in the hope of a revival. A marked decrease in population is shewn in St. David where in comparison with the 1921 figures, there was a decrease of 548 males and 467 females—a total of 1,015 persons.

27. The population afloat, *i.e.*, in vessels on the Waters of the Colony was distributed as follows:—

|                                |                                |

| <b>Total .. ..</b>             | <b>1,030 males 59 females.</b> |

28. The Counties in which the males exceeded the females and the extent of excesses are given in the following table:

| Counties.                   | Males. | Females. | Excess. |
|-----------------------------|--------|----------|---------|
| St. George ... ..           | 43,094 | 42,810   | 284     |

| Waters of the Colony ... .. | 1,030  | 59       | 971     |

29. Females exceeded males in the following districts:—

| Districts.          | Males. | Females. | Excess. |
|---------------------|--------|----------|---------|
| Port-of-Spain .. .. | 30,469 | 39,865   | 9,396   |

| Tobago .. ..        | 12,280 | 13,078   | 798     |

30. The preponderance of females in the towns, may be due to the absence of males at, or in search of work, in other parts of the Colony. In the case of Tobago there can not be the same explanation since the number of persons born in that Ward, but residing in other parts of the Colony, also shows an excess of 253 females over males.

31. The Centesimal increases as compared with the population returned in 1921 were as follows:—

|                            |            |
|----------------------------|------------|
| Port-of-Spain .. ..        | 14.2       |

#### IV. CONJUGAL CONDITION.

32. The difficulties with regard to married conditions complained of in previous Censuses were again experienced, but only in remote districts and mostly among the "East Indians" who declared themselves "married" although not fulfilling the requirements of the law with regard to registration.

33. The head "Divorced" has also been misused by married persons living apart.

34. The total population at the present and four previous Censuses may be tabulated as follows:—

| Census.     | Married. | Widowed. | Unmarried. | Divorced. |
|-------------|----------|----------|------------|-----------|
| 1891 ... .. | 32,731   | 8,035    | 177,615    | —         |

35. The adult population calculated at 15 years and over numbered 272,737, viz.: 136,189 males and 136,548 females. These were distributed as follows:—

#### Marriageable—199,400.

| Married. | Widowed. | Divorced. | Unmarried. | Total.  |
|----------|----------|-----------|------------|---------|
| 73,337   | 15,642   | 225       | 183,533    | 272,737 |

36. The proportion of married, widowed, unmarried and divorced persons to the adult population in the 1931 and three previous Censuses is given in the following table:

37. The number of married males exceeded the number of married females in the following counties:

40. In England the age of consent to a marriage is fixed by custom at fourteen and twelve for males and females respectively and this applies so far as this country is concerned not only where both parties are domiciled here but also where one of them is domiciled abroad.

41. The Immigration Ordinance, Cap. 245 s. 16, while not limiting the age at which marriages may be contracted between Immigrants, provides that marriage between parties "both of whom "at the date of the marriage profess the same religion, not being the Christian Religion, shall, if "contracted according to the religion of such Immigrants and registered according to this ordinance "be deemed to be valid if at the date specified in the Register" the man shall have been at least 16 years of age and the woman at least 12 years of age.

42. No marriages under the General Law (Cap. 177) have been recorded in which either party was under 14 years of age and in this enumeration none has been returned as of that age.

43. East Indians regard the marriage ceremony as an essential institution of social life and accordingly early marriages are not infrequently contracted, though they are seldom ratified by registration. The tendency of East Indians to describe themselves as married where the conditions of the law have not been fully carried out has embarrassed both enumerators and tabulators.

44. The incidence of conjugal conditions in relation to age is given in the following summary :

45. It will be observed that up to 20 years unmarried females exceeded unmarried males and that in the ages above 70 years unmarried females were again in excess of unmarried males. In the married condition females exceeded males up to 40 years and males exceeded females between 40 and 90 years. There were four females in excess of the males under the head 90 years and over.

### V. AGE DISTRIBUTION.

46. The information obtained under this head has been divided into three groups, namely—Infancy, Childhood and Maturity. In the first group is included the period of life starting from birth up to the fifth birthday. The second group covers that period from the fifth to the fifteenth birthday and by maturity is meant the adult age from the fifteenth birthday onwards.

47. The number of Infants returned as under one year of age was 9,429 of whom 4,622 were males and 4,807 females, *i.e.*, an excess of females over males of 185. This is contrary to expectation as the number of males born during the decade exceeded the females by 1,596, but the rate of mortality of boys in every month of the first year of life exceeds that of girls which accounts for the greater number of girls in this and succeeding years of infancy.

48. The following table gives the number of births during the ten years preceding the Census and the male and female infantile death rates per 1,000 of the total births:—

| Year. | Total Births. | Male Deaths under 1 year. | Death Rate per 1,000. | Female Deaths under 1 year. | Death Rate per 1,000. |

49. The Infantile death rates calculated on the above basis for the ten years were 71.05 and 59.95 per 1,000 for males and females respectively.

50. The total number of infants who survived the first year and are enumerated in the group from the second to the fifth year was 37,641. The males numbered 18,742 and the females 18,899.

51. Children between five years and fifteen years numbered 92,976—47,066 males and 45,910 females.

52. The following table compares the above figures with those reported at the last Census:—

53. The Childhood period, that is the time of life which is mostly devoted to scholastic duties comprises the sixth to the fifteenth years. With regard to the educational aspect of this period a separate table has been prepared and appropriate comments have been offered; at this point our examination is confined to a comparison with the corresponding figures of the last Census as follows:

56. The age herein referred to as the adult age begins at the 15th birthday. This period which extends to 100 years and over may be divided into three parts.

1. The first 5 years extending from the sixteenth to the twentieth year inclusive when the wage earning capacity is hardly self supporting.
2. That period which extends from the 21st to the 65th year inclusive when the physical and earning powers are at their best and where burden of social responsibility rests and
3. From the 65th birthday onwards when the earning power diminishes to physical dependence and not infrequently financial indigence.

57. The following shows the populations of the adult period arranged in five year groups as compared with the same figures in the Census returns of 1921:—

## VI. OCCUPATIONS (B1 AND B2).

61. For statistical purposes the engagements of the population have been arranged into two classes, viz., *Occupational* and *Industrial*. The sense in which these terms are employed may be defined thus:—

“Occupation” is the kind of work which a person performs.

“Industry” is determined by reference to the business in or for the purposes of which occupation is followed.

62. With the above definitions in view an attempt has been made to group and codify from the Schedules—*Occupations Table B 1* and *Industries Table B 2*.—Perfection in this direction can hardly be expected in a first attempt. The writing up of the schedules by persons who did not appreciate the meaning of the columns and the hurry and consequent oversights on the part of the enumerators left much to be desired in the completeness of information given in the Schedules generally and in this direction in particular.

63. In Table B.1 Occupations have been arranged under the following order heads:

The decreases were probably due to inducements which were offered on the South American Continent during some of the years preceding the Census. From 1923 to 1927 attractions were offered in Aruba, Callao and Maracaibo which deflected the usual flow of West Indian labourers to his Colony and induced an exodus of those resident here,

## X. INFIRMITIES.

105. This table is the most unsatisfactory of all. Information is reluctantly given for various reasons such as doubt, apprehension and ignorance. Some doubt the existence or extent of their infirmities, some apprehend segregation and consequent separation from their families, while others are ignorant of their condition.

Those suffering from deafness usually believe that the condition is not permanent and that the 'inconvenience' will soon disappear. The same remark applies to blindness except that there is in addition a fear that admission of the infirmity might lead to uncomfortable consequences. The dumb and deaf mutes have no such fears and it is only in relation to them that the character of the information given in this table is reliable.

106. The deaf, dumb, blind and mentally deranged were returned as follows:—

|                           | Deaf. |     | Dumb. |     | Blind. |     | Deaf and Dumb. |     | Deaf and Blind. |     | Leprous. |     | Mentally deranged. |     |

122. There has been a falling off in the number of natives of the West Indies who are subjects of Foreign States. Hitherto the Colony afforded inducements for domestic servants, the majority of whom came from Martinique, Guadeloupe, &c., but in recent years more lucrative opportunities, it is believed, have attracted them elsewhere. The number of males returned at this enumeration was 408, and the number of females 708. The females outnumbered the males by 300; this for the reason given above.

A separate table relating to this section and dating from 1891 has been prepared and is hereto appended.

123. From an early period the population of this Colony has included representatives of Portugal and Madeira. The earliest return dealing with population and dated 1811 mentioned 4 natives of Portugal as forming part of the alien population. In 1834 a number of Portuguese immigrants arrived from the Azores and Madeira and took up work on the *Las Cuevas* estate on the North side of the Island. Further arrivals are recorded in 1846 and the following year. The only other recorded arrivals took place in 1887, since when the additions to the community have been few.

124. There are many descendants of Portuguese in the Colony but exact information as to their numbers is not available.

126. In 1806 a vessel arrived from Macao with 192 Chinese men and 1 woman. It would appear, however, that only 23 of these remained in the Colony. The first arrival of Chinese Immigrants under a regular Government system took place in 1853. There were intermittent arrivals between 1853 and 1866 when the introduction of Chinese labourers as part of the Government System of Immigration terminated.

## EAST INDIAN POPULATION.

139. The history of East Indian nationals in this Colony dates from 1845 when the ship *Fattel Rosack* arrived with the first batch of Immigrants—Other vessels followed regularly during the years 1846, 1847 and 1848. In the latter year the number of labourers from India introduced into the Colony amounted to 5,162. In the years 1849, 1850 and 1851 there was a temporary cessation of immigration but from 1852 to the end of 1916 when Immigration ceased entirely East Indians were regularly brought for field work on the sugar and cocoa estates of the Colony.

140. By repatriation and death the number of Indians was reduced by the time the Census was taken in 1851 to 3,993.

### MOVING POPULATION.

208. The number of persons met on the streets of the towns and high roads of the country and accounted for in the schedules was 593, consisting of 486 males and 107 females. In 1921 the number of Stragglers returned was 13 and they were all males. The large number of persons moving about may be explained in the first place, by the fact that it was Full Moon and that fine weather prevailed and secondly by the numerous Indian Weddings which took place all over the Country on that particular night. It is the custom among East Indians to hold their marriage ceremonies at night and at certain phases of the moon. Hence the number of East Indians, 269—Guests no doubt at these festivities.

209. In Port-of-Spain there was the usual number of street scavengers about to assume their early morning duties and here and there some belated strollers.

210. Separate tables have been prepared (although general statistics of the Census include the moving population) and from these the following facts have been obtained.

**CONCLUSIONS.**

229. Having summarised the abstracts relating to the Heads and sub-heads under which the Census Figures have been tabulated I think it will be conceded that this enumeration has been satisfactory. In the first place it bears out the estimates of population reported by the Registrar-General in his annual reports during the decade with a difference so small as to be negligible, and it also indicates that a steady improvement in the Social and Religious conditions of the people has been maintained.

230. The work has been onerous, not only because the schedules were in some cases indifferently prepared, but because the interval between these enumerations is so great that it is always difficult to select enumerators who have had previous experience or whose interest extends beyond the earning of the small remuneration offered for the work.

231. I wish to record my grateful thanks to Mr. A. L. Rhodes, Government Printer, for his ready and cheerful assistance in the preparation of the estimates and indents as well as for helpful suggestions in matters pertaining to printing in the preliminary part of the work.

232. I also record my sincere acknowledgment of the help and assistance rendered by Mr. W. Knaggs, who was specially empowered by his appointment as additional Deputy Registrar-General to relieve me of the heavy duties which devolve on this Department.

233. Finally I desire to acknowledge gratefully the work of the Census staff and to mention specially Messrs. Matthew Lee, T. H. W. St. Hill and Sydney Smith, whose solicitude for thoroughness in the work was constantly maintained.

I have the honour to be,

Sir,

Your obedient Servant,

**B. MONTSERIN,**  
*Deputy Registrar-General.*
