TABLE I

Area, Houses and Population.

The areas in column two are those of the latest determinations of the Survey Department. The total area of the province in the table differs by one square mile from the added areas of individual districts. The area of each district had to be taken to the nearest square mile for the purposes of this table, but in obtaining the provincial area the actual district areas were added and the resulting figures then rounded. This is a more accurate method than adding the rounded district figures. A similar explanation applies to Ganjam and East Godavari areas.

2. A house was defined at this census as 'every dwelling with a separate main entrance.' This differs from the 1921 and former definition of 'the residence of one or more families possessing a common entrance from the public way.'

3. 'Towns' are places of usually not less than 5,000 inhabitants possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated. 'Village' is the revenue administrative unit, not the residential village. 'Urban' and 'Rural' refer to persons living in towns or villages as above defined.

REA, HOUSES AND POPULATION

TABLE II

Variation in Population since 1891.*

This table compares the population as ascertained at the census of 1931 with those of the previous censuses. Previous census figures have been adjusted to allow for inter-district transfers, etc., i.e., to show the population existing at these enumerations in the areas now forming the districts.

On account of extensive changes in 1901-11 in the district constitution of the province it is not possible to make such adjustments for censuses earlier than 1891.

TABLE IV

Cities and Towns classified by population with variation for fifty years.

The census town covers every municipality and cantonment and also any other continuous collection of houses considered to have definite urban characteristics. In the last class a population minimum of 5,000 was usually applied but fifteen cases with fewer inhabitants than this have been classed as towns. Ten of these are in British Territory, four in Pudukkottai State and one in Sandur.

'City' covers all towns of 50,000 or more inhabitants.

2. One continuous urban aggregation lies partly in Pudukkottai State and partly in Ramnad district. Its component parts have been indicated by an asterisk.

3. Forty new towns appear at this census and seven former towns disappear. New towns are printed in italics. Towns in a lower class now than in 1921 are underlined.

The statement below summarises the changes in town population :—

Places treated as towns in 1921 but now omitted.		Places treated as towns which were not so treated in 1921.		Net variation in the decade 1921-31 due to differences in the list of towns.	Variation in aggregate population of places which were treated as towns at both censuses.
Number.	Aggregate population in 1921.	Number.	Aggregate population in 1931.		
7	34,435	40	285,671	+ 251,236	+ 860,595

4. Where possible, the former population of places now treated as towns for the first time has been extracted from village statistics and variation figures shown in italics. Where this could not be done the columns have been left blank.

5. The town populations for previous censuses are those then recorded ; no adjustments have been made for intervening changes in area. The class totals are similarly unadjusted for subsequent additions to or deletions from the list of places treated as towns.

TABLE VII
Age, Sex and Civil Condition

I.—Districts and States.

II.—Cities.

Separate district and state figures are given only for religions with an appreciable following. No religion detail is given for cities.

2. The provincial figures given for Arya, Brahmo, Radhaswami, are also included under Hindu.

3. Some persons returned under 'Indefinite Beliefs' in Table XVI have been classed under communities for the purpose of Table VII. Particulars are :

Religion.	District.		Persons.	Males.	Females.
		Total ..	40	26	14
Hindu ..	Madras	15	8	7
	Tanjore	25	18	7
		Total ..	1	..	1
Muslim ..	Chingleput	1	..	1
		Total ..	23	20	3
Christian ..	Nellore	1	1	..
	Bellary	2	1	1
	Madras	8	7	1
	Chingleput	1	1	..
	South Arcot	1	1	..
	Nilgiris	6	5	1
	Malabar	4	4	..

Certain details in the two tables therefore differ accordingly:

4. Provincial totals under Hindu and Tribal religion agree with those in Table XVI. The religious association of primitive tribes with Hinduism; however, is a very varying quantity and the tribal association is of more importance for the matters dealt with in this table. For Ganjam and Vizagapatam Agency, therefore, figures have been given in this table for all members of primitive tribes, not only for that section of them returned as Tribal by religion in Table XVI. The difference is indicated by the use in these two Agencies of the term 'Primitive Tribes.'

TABLE VIII

Civil Condition by age for selected communities.

The communities in this table are arranged in the order of frequency of child marriage, i.e., according to the proportion which the number in each community of married females under 13 years of age bears to its total female population.

2. The same communities appear in Table XVII—Race, Tribe or Caste, and details of principal habitat will be found there.

3. Eighty-three persons who returned themselves as Deshastulu (43 males and 40 females) were on subsequent enquiry found to be Telagas. Age distribution for Deshastulus was not extracted, consequently these 83 have been excluded from this table.

TABLE IX

Infirmities.

I—Distribution by age.

II—Distribution by Districts and States.

The infirmities recorded were insanity, deafmutism, blindness and leprosy.

2. Persons afflicted with more than one infirmity have been shown under each, but are counted only once for the purpose of columns 2—4. Consequently the total population afflicted (134,611 persons) is less than the aggregate of the totals for each infirmity (134,902 persons) by 291, as 285 persons with two infirmities have been counted twice and 3 with three infirmities thrice. The following is a list of these cases:—

1	Persons.	Males.	Females.

TABLE XIV

Literacy by Selected Communities.

Figures are given in this table for all communities treated as depressed classes and for a representative selection of others. Depressed classes are distinguished by the letters 'D.C'.

2. Chief habitat and other details for these communities will be found in Table XVII—Race, tribe or caste.

3. For reasons explained in the flyleaf to Table VIII, figures for 83 Deshastulus have been excluded from this table.

Mother-tongue.

A.—Vernaculars of India

I.—Languages of the present
II.—Non-presidency languages

B.—Asiatic non-Indian and African languages.

C.—European languages.

2. Details are given below for the mother-tongues grouped under others in the main table. These represent languages either confined to restricted areas (e.g., Gondi, Mahl) or returned (in most districts) by very few persons (e.g., Konkani, Tulu, Bengali, Panjabi and European languages). Where the district contribution is appreciable it has been given below the total.

TABLE XVI

I.—Religion.

I—Main Religions.

II—Details of 'Hindu' and 'Christian'.

2. Retrenchment considerations produced the abandonment of the sectarian detail hitherto given for Christians and Muslims and of a contemplated sectarian division of Hindus and Jains. Sect detail is therefore restricted to the broad categories in the table.

3. In 1921 Arya and Brahma were classed as non-Hindu, the former being shown in the flyleaf to the religion table under 'others'. This time they are brought under the general term 'Hindu'.

4. 'Others' includes the following:—

TABLE XVII

Race, Tribe or Caste.

I—Communities in alphabetical order.

II—Territorial distribution of principal communities.

The need for research made it impossible to extract figures for every community returned. This table, therefore, represents only a selection. All depressed classes and all primitive tribes, however, are included. The criterion for inclusion in the depressed classes was untouchability.

2. In the last column of Part I is given the principal habitat of small communities not included in Part II. Figures in Part II are given only for communities contributing more than one per thousand to the presidency population and a district is mentioned only when the community contributes more than one per thousand to its population.

3. To facilitate comparisons certain returns are grouped below under the three general heads, Barber, Washerman and Oilman.

	Persons.	Males.	Females.		Persons.	Males.	Females.

4. Having regard to the advent of an Orissa Boundary Committee, figures were extracted for every community in Ganjam District and in the Vizagapatam Agency. These figures will be found in the section of the Report which deals with that area.

5. The religion of Anglo-Indians is Christian and of Labbais Islam. For all the other communities except the primitive tribes (P.T.) the religious association is Hindu. The numbers given of primitive tribes include not only those who have returned their religion as Tribal but also those returned as Hindus or Christians.

6. Total figures for primitive tribes and depressed classes are :

Primitive Tribes.	Persons.	Males.	Females.	Depressed classes.	Persons.	Males.	Females.
Province	1,338,899	665,704	673,195	Province	7,299,400	3,589,231	3,710,169
British Territory	1,338,899	665,704	673,195	British Territory	7,234,104	3,558,003	3,676,101
States	States	65,296	31,228	34,068

Communities coming within both categories figure in both totals.

TABLE XIX

Europeans and Allied Races and Anglo-Indians by Race and Age.

I—Districts and States.

II—Cities.

2. A more detailed age distribution is given in B than in A. European children of school-going age do not usually remain in India; the same applies to Europeans who have reached old age.

3. Eight Armenians enumerated in the City of Madras have been included in 'Europeans and allied races'. Four of these were males (aged 16, 42, 48 and 50) and four females (aged 17, 23, 27 and 53).

THE PROVINCIAL TABLES.

PROVINCIAL TABLE I

Area and Population of Taluks.

The area of each taluk was taken to the nearest square mile but in obtaining the district area the actual taluk areas were added and the resulting figures then rounded. Previous census figures have been adjusted to allow for inter-taluk transfers, i.e., to show the population existing at these enumerations in the areas now forming the taluks.
