prison, exile, and death, burned out their  
lives trying to attain freedom, peace,  
and brotherhood for the  
common people.*

## BIOGRAPHICAL NOTE

HAINES, ANNA J.

Nurse; born in Moorestown, New Jersey, 1886; educated at Friends Academy, Moorestown, Westtown Boarding School, Bryn Mawr College, Nurses' Training School of the Philadelphia General Hospital, and Pennsylvania School for Social and Health Work; after graduation from college taught for a year and a half in public schools; worked one year with Children's Bureau, and three years doing settlement work, in Philadelphia; acted as housing inspector in Department of Public Health, Philadelphia, for four years; went to Russia in 1917 as relief worker for American Friends Service Committee, returning to the United States in 1919 and working for a year under American Red Cross in western Virginia; went again to Russia for a year as representative of American Friends Service Committee; returned to America and studied nursing in Philadelphia General Hospital and in Pennsylvania School for Social and Health Work; went once more to Russia for American Friends Service Committee in 1925 for a period of almost two years; now planning to return to Russia as soon as sufficient funds have been raised for the American Friends Service Committee to establish a Nurses' Training School in Moscow, for which the Soviet Government has already given its permission; author of several articles on experiences in Russia and on subjects related to nursing, published both in America and in Russia.

## EDITOR'S INTRODUCTION

THE Russian Revolution startled a war-diseased world and ushered in the most daring political and economic experiment of the twentieth century. Considering the vast territory affected, the radical changes inaugurated, and the influence which has been and still is being exerted on international relations, there is probably no greater event in modern history, whether for good or evil. Most Americans forget that a decade has already passed since Lenin and his Communistic followers assumed the power. The period of rapid revolutionary change has gone. Russia is painstakingly, step by step, building something different, something unique, something whose final destination is unpredictable.

America has been a land of discovery from its foundation. Not only in the realm of scientific invention, but in first attaining the coveted North Pole and in exploring other unknown areas of the world, Americans have given generously of life and treasure. Today we are uninformed about a great nation covering one-sixth of the land surface of the world. Russia is cut off by an Atlantic Ocean of prejudice, misunderstanding, and propaganda. We still maintain a rigid official quarantine about the Soviet Government. The result is ignorance frankly admitted by one "of the highest authorities in our Government," who declares this inevitable "in the absence of diplomatic relations." The late Judge Gary corroborated this verdict, "Like many other Americans, I am ignorant in regard to many

of the conditions which exist in Russia at the present time."\*

Every scientist realizes that ignorance is one of the most dangerous forces in the world today. No matter how good or how bad the Soviet system, we should know all about it. Instead, we have been ruled by propaganda and hearsay.

The fact is that for the past ten years the Bolshevik government has been operated on, dissected, and laid in its coffin amidst loud applause and rejoicing by distinguished orators in all parts of the world; yet today it is stronger, more stable, than ever before in its history and its leaders have been longer in power than any other ruling cabinet in the world. It is high time that we appraise this government as scientifically and impartially as possible, without indulging in violent epithets or questionable and controversial dogmas. Surely the world is not so abysmally ignorant that after ten years of the rule of the Soviet we cannot discover a common core of truth about Russia.

Whether the Communists are thought to be "dangerous enemies of society" or the "saviors of humanity," the facts should be known before judgment is pronounced. No matter what our conviction, we have to admit that the Bolsheviks are hammering out a startling new mechanism in the field of political control. Their experiment deserves scientific study, not hostile armies; intelligent criticism; not damning epithets.

In the past, America has been flooded with propaganda of all shades. Dr. E. A. Ross dedicates his last volume on Russia "To my fellow-Americans who have become weary of being fed lies and propaganda about

\* *Current History*, February, 1926.

Russia." In his chapter on the "Poison Gas Attack" he lists forty-nine stories broadcast throughout America which have been proved totally false. Other writers have pointed out similar facts. Walter Lippman, Editor-in-Chief of *The New York World*, in his illuminating study of all Russian news which appeared in *The New York Times* in the early period of the Revolution, has proved the stupidity, inaccuracy, and falsehood of the "facts and fabrications" which have passed as news. Even those articles and books which have tried to deal honestly with the subject have usually been inadequate. They have either been too general or they have been specific but too brief to be of more than passing value. In all too many cases they are based on only a few weeks of observation in Russia by someone who did not know the native language.

The present series is designed to meet the need for reliable, accurate information on the major aspects of present-day Russia. We have tried to make it as scientifically accurate as is possible in the treatment of contemporary phenomena. It has been our aim in selecting each author to choose someone who because of previous experience and training was peculiarly well qualified as an authority on the particular subject to which he was assigned. In every case we have chosen those who either have made a prolonged stay in Russia, actually writing their volumes while in the country, or those who have made a special trip to Russia to secure the facts about which they write. We have tried to make the series inclusive, covering the more important aspects of the many-sided developments in Russia. Each volume is devoted to one major subject alone. People want detailed, accurate facts in readable form.

of the conditions which exist in Russia at the present time."\*

Every scientist realizes that ignorance is one of the most dangerous forces in the world today. No matter how good or how bad the Soviet system, we should know all about it. Instead, we have been ruled by propaganda and hearsay.

The fact is that for the past ten years the Bolshevik government has been operated on, dissected, and laid in its coffin amidst loud applause and rejoicing by distinguished orators in all parts of the world; yet today it is stronger, more stable, than ever before in its history and its leaders have been longer in power than any other ruling cabinet in the world. It is high time that we appraise this government as scientifically and impartially as possible, without indulging in violent epithets or questionable and controversial dogmas. Surely the world is not so abysmally ignorant that after ten years of the rule of the Soviet we cannot discover a common core of truth about Russia.

Whether the Communists are thought to be "dangerous enemies of society" or the "saviors of humanity," the facts should be known before judgment is pronounced. No matter what our conviction, we have to admit that the Bolsheviki are hammering out a startling new mechanism in the field of political control. Their experiment deserves scientific study, not hostile armies; intelligent criticism, not damning epithets.

In the past, America has been flooded with propaganda of all shades. Dr. E. A. Ross dedicates his last volume on Russia "To my fellow-Americans who have become weary of being fed lies and propaganda about

\* *Current History*, February, 1926.

Russia." In his chapter on the "Poison Gas Attack" he lists forty-nine stories broadcast throughout America which have been proved totally false. Other writers have pointed out similar facts. Walter Lippman, Editor-in-Chief of *The New York World*, in his illuminating study of all Russian news which appeared in *The New York Times* in the early period of the Revolution, has proved the stupidity, inaccuracy, and falsehood of the "facts and fabrications" which have passed as news. Even those articles and books which have tried to deal honestly with the subject have usually been inadequate. They have either been too general or they have been specific but too brief to be of more than passing value. In all too many cases they are based on only a few weeks of observation in Russia by someone who did not know the native language.

The present series is designed to meet the need for reliable, accurate information on the major aspects of present-day Russia. We have tried to make it as scientifically accurate as is possible in the treatment of contemporary phenomena. It has been our aim in selecting each author to choose someone who because of previous experience and training was peculiarly well qualified as an authority on the particular subject to which he was assigned. In every case we have chosen those who either have made a prolonged stay in Russia, actually writing their volumes while in the country, or those who have made a special trip to Russia to secure the facts about which they write. We have tried to make the series inclusive, covering the more important aspects of the many-sided developments in Russia. Each volume is devoted to one major subject alone. People want detailed, accurate facts in readable form.

Here they can be found, ranging all the way from an analysis of the governmental machinery to the school system. Within this series some repetition has been inevitable. The editor believes that this is distinctly desirable since each author expounds his subject in his own way, with an emphasis original to him and in the light of his own data. No effort has been made to eliminate contradictions, yet they are surprisingly few. Where the testimony of all is unanimous, the conclusions reached are overwhelmingly strong. Where differences exist, they should stimulate the reader to weigh the evidence even more carefully.

It is probably too much to hope that propaganda organizations will not endeavor to discredit any such genuine effort to arrive at the truth. Perhaps it is sufficient to say in refutation that no similar attempt to secure the facts about Russia from trained experts has yet been made in America or elsewhere, so far as the writer is aware. There is scant ground for intelligent criticism unless similar scientific studies have been made with conflicting results; even then time alone can proclaim the final truth. No sincere and unprejudiced scientist will deplore an effort to study and describe what has happened in the first experiment the world has ever seen in applied communism, even if mistakes have been made in the analysis.

These volumes, on the whole, not only contain the most valuable data so far available, but they will probably remain of permanent worth. In the future no real historian endeavoring to master the facts about the great political upheaval in Russia will care to ignore them. Is Russia the most tyrannical dictatorship of bloody despots that the world has ever seen? Is Russia the first step in the building of a new world order

whose keynote will be industrial democracy? We do not pretend to give here the final judgment of history, but we do claim to have made a sincere effort to portray the facts.

Thanks are due to the authors who have so painstakingly sought to present the truth as they found it, to the publishers for their assistance in making this a notable and usable series, and to all those whose labor, whether by hand or brain, has helped to give these volumes to the American public.

JEROME DAVIS,  
*Yale University.*

ally do, the essential information to the making of a picture. And it is this picture more than a scientific presentation that I think will give value to the book. It ought to have a permanent place in the vexed years of Russia's adventure. Miss Haines tells her story and gives her information with the simplicity, the veracity, and obviously with the single purpose of sharing her intimate knowledge of Russia's attempts to give protection through health measures to her people.

LILLIAN D. WALD.

# CONTENTS

<i>Chapter</i>		<i>Page</i>
I.	INTRODUCTION . . . . .	I
	Constructive experiments of the Soviet Commissariat of Health deserve attention outside of Russia—the writer's contacts and period of service in Russia—sources of statistical information.	
II.	MEDICINE UNDER THE OLD REGIME . . . . .	8
	High scientific standards—institutions and personnel insufficient for medical needs of the country—high mortality and morbidity rates.	
III.	THE FUNDAMENTAL PRINCIPLES OF SOVIET MEDICINE . . . . .	13
	"Nationalization of health service" defined—five basic principles: unification of medical service; accessibility of medical aid to all citizens; free medical service; qualified personnel only; emphasis on prophylaxis.	
IV.	STATE HEALTH INSURANCE . . . . .	23
	Substitute for charity—administration of state health insurance—medical institutions supported by insurance funds—positive industrial hygiene.	
V.	THE MEDICAL UNION . . . . .	29
	Pre-Revolutionary medical professional associations—organization of amalgamated medical workers' union—rules for membership.	

<i>Chapter</i>		<i>Page</i>
VI.	DR. N. A. SEMASHKO, THE COMMISSAR OF HEALTH . . . . .	34
	A builder of modern Russia—youth in country—education and early radical activity—imprisonment as a radical leader—life as an emigré—return to Russia after Revolution—constructive work in Commissariat of Health.	
VII.	THE ORGANIZATION OF THE COMMISSARIAT OF HEALTH . . . . .	42
	Place of the Commissariat of Health in the scheme of the Soviet government—duties of the Commissariat of Health as outlined in the original statute creating it—the Commissar, Collegium, Scientific Medical Council, State Scientific Institutes—outline and diagram of the organization of the administrative departments.	
VIII.	THE DEPARTMENT FOR THE PROTECTION OF MOTHERHOOD AND INFANCY . . . . .	59
	Need for work of this department—description of its various types of institutions—attitude of department toward abortion, birth control, and removal of babies from mothers' care—model infant welfare exhibition—statistical results of ten years' work.	
IX.	THE DEPARTMENT FOR THE PROTECTION OF CHILDREN'S HEALTH . . . . .	73
	Aim of department—medical care of children from three to eighteen years—children's own committees for health work—statistics of child health—forest schools—health problem of homeless children—physical culture encouraged.

<i>Chapter</i>	<i>Page</i>
XV. HEALTH WORK AMONG THE SOLDIERS AND TRANSPORT WORKERS . . . . .	134
Medical care of soldiers—education of soldiers to be teachers of hygiene in villages—army health statistics—special medical work for railroad workers.	
XVI. THE RUSSIAN RED CROSS . . . . .	139
History of the Russian Red Cross—present membership and sources of income—present program: medical work on frontiers of civilization; introduction of "health service" among children.	
XVII. MEDICAL EDUCATION IN RUSSIA . . . . .	145
Increase in number and change in type of recent medical students—present emphasis on service rather than scientific research—program of five years' medical course for doctors—present status of <i>feldshers</i> —education of midwives—education of nurses.	
XVIII. TAKING HEALTH TO THE PEOPLE . . . . .	162
Propaganda applied to health work—exhibitions, moving pictures, mock trials, radios, etc.—health education adapted to the village—the introduction of an infant welfare station on a steppe—health propaganda in clubs of city workers.	
XIX. CONCLUSION . . . . .	174
Value of work of Commissariat of Health to Russia—to other countries.
