THE END.

"The first volume of this work is now before us, and the value of its contents abundantly justify the pains and outlay (30,000*l.*) that have been expended on it. It embraces Behar and Shahabad, and is crowded with facts of a strange and startling character. The description of the physical aspect of these districts, of their resources, of the inhabitants, and of their habits; the buildings, the ruins and all other particulars connected with the people are in the highest degree interesting. The circumstances of the natives are as deplorable as the land they inhabit is rich and luxuriant. This terrible anomaly cannot fail to make a deep impression upon the mind of the reader, and may be regarded as the grand moral of the work. The situation of India has not been sufficiently considered in England, and information thrown into a popular shape is much wanting for the instruction of the mother country, and for the purpose of giving an impulse to legislation on behalf of our Eastern dependencies. Such works as this are well calculated to produce that desirable result."—*Atlas*.

"We have here the first volume of a work on Eastern India, by the indefatigable author of the 'History of the British Colonies,' and of various other publications relating to the Colonial dependencies of the Empire. The labours of Mr. Martin in a path, as important as it has hitherto been untrodden, are of the highest value, and will be increasingly appreciated in proportion to the vast resources, which those labours have now for the first time fully laid open to the mercantile, political, and social interests of the people of this country. We do not hesitate to class the work before us as in every point of view amongst the most important to which the modern British press has given birth. Perhaps a field more fertile in every thing calculated to interest the antiquarian, the merchant, and the general philanthropist, was never before opened to the world. Mr. Martin is deserving the thanks of every friend to the human race."—*Leeds Times*, 24th March, 1838.

"Mr. Martin could not have superintended any work, that could more forcibly impress the people of his country with proper ideas of the power they possess, and the responsibility they incur. Mr. Martin's exertions to enlighten and awaken the British Empire, as regards all our foreign possessions, are two well known to require description at our hands; and his sound judgment is here in every page apparent."—*Monthly Review*, April, 1838.

"The information collected at an expense of 30,000*l.*, and after seven years labour, was locked up in the India House, and as much lost to the world as if it never existed, until it was disinterred by the industry of Mr. Martin."—*Athenaeum*, 28th July, 1838.

"Mr. Martin is beyond comparison the most industrious author of the day. The merits of his 'History of the British Colonies,' one of the most useful works which modern intelligence has supplied to the literary and commercial world, has incontestably proved his ability to do justice to the subject he has here selected. The general introduction is admirable."—*Surrey and Middlesex Standard*.—31st March, 1838.

"A noble dedication to the East India Company ushers this valuable national work into the presence of a public that will not fail to appreciate its magnificence of design and its elaborate carefulness of execution. The world is indeed greatly indebted to Mr. Martin for his labours in illustrating and elucidating the history, condition, and resources of our magnificent Colonial possessions; but for none does he better deserve reward and congratulations than for this, his last achievement towards the extension of knowledge—the progress of civilization—and the improvement of the means and system of good government."—*Torch*, 24th March, 1838.

"By no former publication has this departmental, and at the same time universal, picture of that wonderful subject called 'British India,' been so completely executed as in the work before us. Mr. Martin, whose competency for the task, derived from experience, habit, and we may add, passion for statistical pursuits—(taking the phrase in its widest possible meaning with all its concomitant and inferential results) has presented us a most interesting, and, in many respects, a most useful picture."—*Monthly Review*, April, 1838.

"We are glad to see the commencement of an undertaking which bids fair to redeem a large portion of British India from the dark state, in which it has heretofore remained. These literary toils seem pleasures to Mr. Martin."—*Edin.*, 24th March, 1838.

"This useful and important work is in honest and competent hands. Mr. Martin has with real and unsparring labour availed himself of the resources, judiciously and creditably placed at his command by the honourable East India Company, and his illustrations cannot fail contributing largely and beneficially to the mass of oriental information, which has of late years been rapidly accumulating from the talents and researches of erudite labourers in the refreshing fields of literature. It is difficult to imagine the undertaking more handsomely placed than in the hands of its distinguished author."—*Taunton Courier*, April 11th, 1838.

"A publication of much intrinsic value and creditable to Mr. Martin."—*United Service Journal*, April, 1838.

"A work of extraordinary merit; to those who are connected with India it would prove of inestimable value. Mr. Martin has displayed his accustomed industry, perseverance and deep research."—*Liverpool Chronicle*, 31st March, 1838.

"The materials collected by this official survey, to which seven years were devoted, and which is computed to have cost 30,000*l.*, are of the most valuable kind; and it is matter of extreme regret that they should have so long slumbered in manuscript. Mr. Martin deserves great credit for having brought them from their dormitory in the East India House."—*Asiatic Journal for May*, 1837.

"Mr. Martin has rendered by his various works a service of no ordinary magnitude on all who are connected with our Colonial Possessions. Before he became their historian, the statistics of our Colonies were very little known; now every fact of interest connected with them is accessible to the public."—*Observer*, 15th July, 1838.

"This valuable work does credit to Mr. Martin's talents; to him—to the F. I. Company for having allowed recourse to be had to their documents, and to the spirited publishers for their in some respects hazardous speculation, we award all praise and cordially recommend the Volumes to our readers."—*Oriental Herald*, July, 1838, p. 24.
