## INDIANS IN SOUTII AFRIOA

(By Mr. M. K. Gandhi in 'Younfr India')
E Viceregal answer to the Deputation that wated on His Eicellency was sympathetic but non-committal. It betrags unnecessary consideration for the difficalties of the Unton Government. It is Just for one Government to apprechatr the difficulties of another but the performance might easily be overdone. The Uninn (isvernment ohserved no delicacy when it had to make its cholce. The Indian Government bas had many an recassion to make such a chorce. Each time except once it has surrendered. The exception was made by Lord Hardinge who hurled defiance at the Government of south Lfrica and ranged bimself on the side of Indians in South Africa. There were reasons for it. The Indians were fighting by direct action. The method was new. They had proved therr capacty for resstance and suffering and yet they were demonstrably and wholly nonviolent. But at the present moment Indians of South Afuca are leatkrless. Wuth Sorabjı, Kachala, P. K. Nadu and now Rustomju gone, thes do not know what they should do or can do. Tbere is ample scope for non-riolent action. Bat it requires thiaking out and vigorous working out. That seems hardly possible at the present moment. I have, however, great hope of one or tro young men who are resident in Sonth Africa. Not the least among them is Sorabyl, the brave son of the buare liastomi. Young Norahji is bimself a seasond soldier in Satyagraha. He bas been to prison. He organised the mondefful receptions that were given in Natal to Sarojini Devi. Let our countrymen in South Africa realise that they must work out their own salvelion, Even besven haipg anly thase what held thefiselyes Theg will find that it they show their original grit and
spirit and sacrifice, they will have the people of India, the Government of India and the world helping and fighting for them.

There is a passage in the Viceregal pronouncement which needs supplementing. His Excellency says, "It is stated in your address that 'the Manieipal Franchise was solemnly assured to Indians by the Natal Government when in 1896 Indians were deprived of the Parliamentary Franchise.' But you have not indıcated the exact source or the nature of the assurance. My Gorernment are making the necessary enquirles to verify the position." The statement made by the Deputation is substantially correct. It was, however, not in 1896 but probably in 1894 that the assurance was given. I am writing from memory. The facts are these. It was in 1894 that the first disfranchising bill was passed by the Natal Assembly. Whilst it was passing through that assembly a petition was presented to it on behalf of Indians, wheren it was stated that the Indians enjoyed the Muncipal and induectly even the political frauchise. Fear was also expressed that the deprivation of the political franchise was likely to be a preclude to that of the Municupal Franchise. It was in answer to this petition that the late Sir John Robinson, the Premer of Natal, and the late Mr. Escombe, the Attorney Geaeral, gave the assurance that there was no intention to go further and depripe the Indians of the Municipal Franchise at a future date. The disfranchising bill was disallowed by the superior Government but another non-ramal in character was passed. The assurance referred to by me was several times repeated by Mr . Escombe who had charge of all the bills and who was virtually the dictator of Natal's policy whulst he was in office.

## VICEROY'S SPEECH AT THE INDIAN LEGISLATURE <br> On Indians Outside India

The following is the text of the portion of H. E . the Viceroy's speech at the opening of the Indan Legislature on the 20th of January dealing with Indians outside India.-.

When considering the affairs outside India, attention naturally and mevitably tarns to Indians overseas. When I addressed the Legislature in January last the position of Indrans in Kenya was critical, and I foreshadowed the appointment of a Committee to make representations on behalf of the Government of India regarding the Immigration Ordinance in Kenya in particular and other questions relating to Indians in the Colomes. The personnel of the Committee was announced in March last, and the Committee began their labours in London in April. They had a number of interviews with the Secretary of State for the Colonies and the officials of the Colonial Office and made representations regarding many important matters affecting Indians in Kenya, Fiji and the mandated territories of Tanganyika. I cannot too highly praise the thoroughness and ability with which they performed their delicate task, and I am grateful for the very patient hearing which the representative of His Majesty's Government. Mr. Thomas, and the officers of his department accorded to them. As regards Kenya, the conclusions arrived at by Mr. Thomas were announced in the House of Commons on August 7th last. On the question of franchise and the Highlands there was no.change in the position, but as regards immirration His Majesty's Secretary of State for the Colonies after hearing our representatives was not satisfied with the dats from Kenaas and was unable to mgree witb

to justify the Ordınance. He, therefore, gave an assurance that the Immigation legislation woulil not be placed on the Statute Book 'The further restrictions then on the pont of buing imposed upon the immigration of Indans were accomingly removed. As regards Inilan colonisation, Mr Thomat announced that it was pooposed to reserve an diea in the Lowlands for agricultural emigrants from India; but that before the scheme took find shape an officer with experience of the needs of Inchan settlers and agreultural knowledge wonld be sent to report on the areas to be offered for colonisation. Reports in regard to the areas have now heen received by my Government, and we are considering the question of deputing an officer to examine these areas from the aspect of thew suitabilty tor Indian settlement. These are substantal gains, and our gratitude is due to the committee for the clarity and earnestness of their representation of the Indan point of view to His Majesty's Government. Moreover, these gains are not the ouly ualvantages which accrued from then visit. A better atmosphere has - been created and that wider understandirg of different points of view has grown up. which is the outcome of personal discussion and free and frank interchange of view.

East Africa
In June last, His Majesty's Government annou ed the appointment of an East-Atrica Commid under the Chairmanship of Lord Southboroughi consider and report on certan questions repar $\neq$ the administration and economic developn al the British East-Africa dependencies. Havitul: gard to the importance of the enquiry t'-11 Indian interest, my Goverument made repr ations to secure a hearing of the Indian po; view before the committce came to concl I am glad to inform the legislature $\mathrm{t}_{2}$. representations have been accepted, and tht. borough Committee will hear the opinotia Indan representatives nom nated by my Govenín. ment upon all matters coming withon thetr purniew.

Natal Borough* Ordinance

- If the pendulam has swang in the direction destred by Indid on thes questions, the position in South Africa, on the other hamd, hat been less favourable, Towards the end of December, the new's was received that the Governor-General of ihe Union of South Africa had given his assent to the Natal Boroughs Ordinance. This measure, while safeguarding the rights of Indians upon the electoral roll of the boroughs, will prevent further enrolment of Inchans as Burgesses. The serious implications of the medsure on the future of Indians, who have spectal vocational and trading connections with the towns in Sonth Africa, will readily be reatised. From the outset the fiovernment of India had recognised the effect this measare might have upon the position of the readent Indians in Natal, both as regard their eivic and economic status. and my Government made strong representations to the Inion Government as soon as a copy of the Ordinance was received in August last. At the time, there was reason to hope that since a smmiar but more drastic measure had been disallowed previously by the Governor-General, this Ordinance would also share the same fate. To oun regret, however, the Government of the Union advised the Governor-General to give assent to the Bill and. decordingly, thr measme has now become ldw. - The situation created is engaging the most earnest attention of myself and my Government. We have lost no time in making representation, in an emphatic manner, the difficulties in which resident Indians are likelg to be placed

the powers of Dominion Governments in internal and domestic affairs, the position is one of delicacy and a solution will not be easy to find. Patience will again be necessary. I may remind you that when the pasition in Kenya neemed not unfavourable, temperate argaments and full and frank discussion resulted in a better anderstanding of the
sindian point of view and in a measure of relief to the disabilities felt by the Indians. I hope that. as in the case of Kenya so also in this case, some remedy may be devised.

## ANTI-ASIATIC AGITATION IN THE TRANSVAAL

We take the following from the Rund Daily Mail:-
The picketing of Indian stores in the Sonthern Suburbs by youths and men in bicycles has had a remarkable effect on Asiatic traders in the district.
Lakt year the Municipality issued over 90 licences to Indians in the Southern Saburbs. This year, it sstated, there has been a rednction in the number toioicences issued of about 33 per cent.
a colis information has been secured by the Suth-
'luburbs European League, which proposes to the figures at the Municipal Offices,
A Idlords who have let premises to Asiatics are dian ( $g$ signs of anxiety, and there is no doubt bers 'ee too the League's influence has been felt. against a has broken a three-years' contract with Ordina and has declared that in-future only ss are to occupy this premises.
Mr. ${ }^{1}$
have as The Menace of The Asiatic
how m. M. Ross, President of the Southern for contairopean Association writes in the Rand offencesm:

- A misunderstanding seems to exist as to the object of our Association. It came into being nome eighteen months ago to protect the interests of the white residents as a whole and not any particular section. We were alarmed at the ever increasing numbers of Asiatics entering the district and dumping themselves down as traders, and we realised that something must be done to prevent the southern smburbs from developing into an Asiatic location.

A misapprehension seems to prevail that this is a storekepeers' movement, but, when one thinks of all these residents who have put their whole life's savings into their own homes, it will be realised that we are working in the interest of every European resident, irrespective of his trade, calling or profession.

This Asiatic menace is the most serious of the many problems confronting this country, but it is one of the problems that can be solved by the people themselves if they are in earnest. if they have any pride in their country and consideration for their own children's future.

I was present at the meeting of the Federation of Ratepayers when Docter Porter gave his excellent lecture on the health conditions of Johannesbarg during the past twenty years. and pointed to the Trppalling conditions in the Malay location. When we realise that Asiatics from these quarters are trading daily in our midst it is surely time that white population were educated up to the point of self-defence.

Every effort has been made by the Medical Officer of Health and his staff to get these Asiatics to improve their standard of living, but without success. In fact one speaker said that Indian landlords were receiving monthy rents up to $£ 250$ for thede slum hotels.

draft of police to force these people to be vaccinated at a time when his inspectors had found cases of small-pox, in many cises the patients being hidden away to dvoid detection. The comntry is threatened with anothet ont-break of plague, and whilst our health officers are doing their utmost to prevent it spreading, thonghtless white citizens are encouraging these plegne-carifis to roam about in their midst, handing ratables and moning freely with themselves and therr children.

Regarding a decent standard of living, many years of experience has tanght us that the Asiatic prefers fo continue under the conditions he has been accustomed to from birth. As a trader, he is not an asset to this country. He adopts methods which no reliable white trader has any desire to adopt. The insolvency couit has proved this times without namber.
They employ only their own class, because they can get them for next to nothing, and yet some people say: "Let the white storekepeer reduce his prices equivalent to the Asiatic."

I can give you an excellent example of two shops that trade in simular lines, one owned by a white trader and the otbor br an Assatic. The white storekepeer pays over $£ \because \nLeftarrow 0$ per month in wages alone, while the Astatic's wages bill is practacally negligible.

We believe that white people who trade with the Asiatics have no right to expect employment themselves from a white employer.

The solution is in the hands of the people themselves. Jet us take a broader view on the question and make a little sacrifice, if necessary, in the interest of ourselves, our children and South Afica. This is not a sectional movement, but one on which depends, to a large extent, the progress of the white race in this country.

## PATRONISE TIIE WHITE TRADER

The following leading anticle appoars in the $R$ tur Daily Mazl under the above beading -
Recently the Minister of the Interion annouluced in the House of Assembly that legislation dealing with the Asiatic question is now in comse of preparation, and will probably be introndaced at a later stage in the session. The conntrs mar, therefore, shortly be made acquainted with the Government's policy. Dr. Malan, it wall be noticed. did not give an absolutely definite assurance, and medn while the Asiatic question is certainls not becoming less acute, except here and there where the European pubirc seems determined to, work out its' own salvation.
In this connection we would draw spectal attention to the position in the southern suburbs of Johannesburg and to the letter published in the Rand Datly Mul from Mr. II. M. Ross, president of the local European Association That organisation came in existence some time ago. It was realised that action must be taken if that part of the city, where hundreds of white people have bought or erected their own homes. was to be prevented "from developing into an Ashatic location.' Support was quickly forthcoming, and so effective bave the Association's measures proved that Asiatic heences have decreased by 3.3 per cent.

What Turffontein and the adjoinng districts have accomplished can be done by other suburbs and in other towns. Lydenburg furnishes additional testimony, for the other day it was stated that Asiatic licences there had also become fewer. In Natal, Indians have entrenched themselves so strongly that the Agiatic proble:n cannot be solved without help from Parlament, but elsewhere, as we have repeatedly urged, the solation lies largels, if not wholly, in the hands of the people themselves. No law can compel them to patronise Asiatic traders or to lemee their property to Asiatice. Decidedy, no.

Indian can complain if white people make up their minds only to support men and women of thear own colour.
. It is important to remember, as Mr. Ross points out in his excellent letter, that this is not smply a storekeepers' movement. If the Astatic question concerned them alone they might be left, perhaps, to find their own remedy. Bat the future of the white race in South Africa is vitally affected, and the sooner that truth is recognised by every European, man or woman, the better will it be for the country. The Asiatic standard of hiving is much lower than that of the whites. Europeans cannot reasonably object to that, but they can, and must ensure the elimination of conditions which, in the long run, will bring about the lowering of the European standard. That is a duty which they owe to themselves, to their children, and to their country, if they wish to see European civilisation permanently established. Moreover, they dare not overlook that the more they-support Asiatic traders, the less work wall there be for persons of their owh race. These are paramount considerations today.

No injustace will be done to Asiatics by the firm determination of Erropeans to restrict their, support to their own lath and kin In their own country Indians have again and agan resorted to the boycott. It is one of their farourite weapons. They cannot grumble of the Europeans in South Africa also find it useful.
[We reserve our comment on the above for our next issue.-Ed I. O.]

## OUR LONDON THTTER

[By our own Oorrespondenti]

## 19th February 1925.

The League of Nations Union held àn International Assembly at the Imperial Institute, London University, in mal week. The great hall was decorated and around it on the massive pillars near the walls were white cards each of them bearing the name of a Contment.
$V_{1 s c o u}{ }^{2}$ tess Cecll of "Ohelwood and the ViceChancellor of the London University recerved the guests-students resident in London-who came from the Dominions and foreign countries representing many races and many cultures. Here there was no conscionsness of the existence of a colour problem in the world. Here the colours intermingled.

The Vice-Chancellor Protessor E A. Gardiner presided and in welcoming the guests referred to the objects of the Leagne of Nations and the necessity of mankind working for those objects.

Professor Gilbert Muray, who with Earl Grey and Viscount Cecnl, is well known for his endeavonts on the League of Nations that it shonld become the harbinger of peace and goodwill between all nitious on this earth, spoke of the Leagre of Nations Me recalled the work of General Smuts in England in connection with the League of Nations and apon the phrase General Smuts had then used that "Humanty is on the march" ho adulressed the Assembly present. (Bul the water wondered as he listened why General Smats did not duply his bigness of vibion to the treatmert of Induas in South Atrica, whom he with his late G vemment has reduced to a lover stutns in the comentry with lesser opportunities of existence') Prof. Gilbert Murray urged upon the stakents to carty on the work of the League in theur own conntries and so help towards the world peace and happiness. Young men and women were interesting themselsea in internationn! pritiof in a way they had neyor dona hetnef, mind hefra whi the opportanty foy preater
service, as the pioneers in the work will soon ples away, leaving them to go on with that work.

Lord Willingdon, a former Governor in In lia. was pleased to talk of that great country, Inda, in which he had spent many yerrs of his lite. He regretted that there was misunderstanding in $t$ at country. He thought the governors and the geverned should come more together and that soctals meetings helped to remove misunderstandings. IIe also then referred to the League of Nations.

Prof. P. J. Baker spoke to the proposed forma'ion of a permanent International Assembly in Lond in and that as a first step an experimental assemb!y will be held at Birbeck College of the London Untversity on February 27th and it was proposed to invite the late l'rime Minister Mr. J. Rumsay Macdonald to attencl. "Security and disarmament" is to be the subject of discussion. It will then be decided whether the Assembly is to be a permanent body. -

The specclres were followed by refreshments, Dancing contınued till 12 p.m. and most of those prosent joined in it and among them were noticeable Indian ladies in Saries.

## MR. ANDREWS ON THE KENYA LOWLANDS

Mr. U. F. Andrews writes as follows in the columus of Young Indur:-

I had intendert immediately to protest against the action proposed by the Government of India ha sending an Indian Official to Kenya to consider whether suitable land is available for Indians, an a compensation for the White laper dechaion to reserve for Europeans the Kenya Highlands To take such an action will entirely cumpoomise the whole Indlan case, and make India pas fritp irtmims,-a partner in the wrong, that has already heen done, to the Afrleans. The simple fact is, that not a single acre of land in Last Africa ought to have been alienated from the Africans. When Eist Africa was made a 'Protectorate' this was the least purtentwon that ought to have been offered. The Indan cham has never been that Indians shonld be given fop grants of land, bat only that they should be allowed to purclucve land, when it was put up for the sole in the open market. To send out an Indian officer th inspect any area in the Lowhods, with a view to fiee grants of land heing given to Indans, implies. two things :-
(1) That Indians finally give uj, thair legal
claim to purchase land an the Highlands.
(ii) That they wish to take awav fom the Africans a large area of Kenya, simitar to thit
which has been alienatel to the w'aiter in th. Highlands.
The one trath abont Kenya, which innst always be remembered is this, thut thore is no ferthis liend at all anywhere in henys whith could nol be fi" ly vorapued and cullivated by tha Afririons themselces, if only thay

Tha News From East afates
It is very difficult to make out what hat heppenel recently 14 Fist dfinca at Narobi at a moetmg of seventeen pisoms, which was calleal a' 'Spesha Eint Atncar Indan Congless Mreting.' It president, Mr. Ablal Wahul, is entirely unkaowa to me, and I do not thimk that a meeting of such a smatl nim. ber ot penple ander hos mesideney ean posably represent the whole of Imhan opmon in Eist Atrica. I understand that Mombasa, Zamabur and Tanganoba In han lex ters have alreaty hasucated themshlves homa its conclasons. No mews has yet leached me from Ugan ha Thetore I would urge readers of Foung Inidu to diseonnt reports of what has happened, until full news has come to hand. Meanwhile, it appeas to me a matter of ugency, that a responable Indina leara nhonh go to Ras
 on the spot.

## Ø!INDIAN HIGHER EDUCATION IN NaTAL

(By Couscilloor The Rey. A. hamonr m.a., b.d.)
It is now five sears ago since that hamanitarian and true friend of the Indian community in Natal passed through Durban on his way to Calcutta-the Rev. C. F. Andrews. Ile was right royally entertaine 1 by such pablic spirited Indjans of Durban as the late lamented I'arsee hustomjee whose death a few weeks ago caused - sorrow not only to his own compatriots but also to many a European in Durban who could apprectate his sterling worth and largeness of heart.
0 The state of the Indian question in Natal is at present appalling. The spirit of the British Empire is being cutraged every day by men calling themselves Brtishers tho think they are doing good scrvice by preaching the doctrine of bounding the members of the Indian race from Natal and from South Africa. But there is a parallel to this state of things indehbly engraved in the page of haman bistory. Israel in Egypt built up the fortunes of that great state-the greatest of the world of that day-by slave labour. The struggle when it reached the final stage proved that the stout hearted Eggptians were spoiled. The slave nation evactasted Egypt by a Mighty Hand.
History repeats itself. Sugar ringe and Sugar kings of Durban lave for generations exploited the Indua in Natal. By a strange process of gyratim and somersault these interests are allying themselves to mob psychology to "oust" the Indian after he has made thess interests. rich and powerful. But gratitude comats for nothing. And so does Nimesis.
Indan Edusation in Durban bas for quate twelve months been at a loose end. The primary schools, such as Depot Road and Carlisle Street Upper Grade schools, the katter dignified with the title "Ingher Grade School" have pursued the nosseless tenor of their way, A semblance of countenance was lent to Carhsle Street School when teachers exclusively reserved for secondary work were generously supplied to the Higher Grade Nchool by the Natal Edacation Department. Bat twelre months ago after the defeat at the polls of a statesmanlike Provincial Councilor-Mr. F. C. Hollander-a Liew spirt began to assert itself with a new Executive Council and a new king arose over Egypt who knew not Joseph.

By one fell swoop in the compulsory retirement of the two secondary school teachers the higher education for Indians in Durban was killed off. Since that time (Dec. 1923 ) Carlisle Street School despite the able nanagement of the School under its exceptionally gifted headmaster Mr. George Rutter is now more than it has ever beena primary school. The new Proviacial Council would not have it otherwise. And yet the Indian Edacation Advisory Board, by diligent remonstrances and expostalations, has somehow compelled the Natal Edacation Department to toe the raark and keep up a semblance of Carlasle Street being "hagher grade" Carlisle Street School is no more bigher grade in reality than such elementary schoo's as Mansfield Road, Stamford Hill or Melbourne Road. The bratal truth is that Higher Edacation for Indian boys in Darban has been not merely a step-child but even tabooed with the Administration for quite some years past. The Departmental attitnde to progress in Indian education is the attitade of the devil to holy water. The present Provinuial Conncil, Edncation Department and all, has fallen ints the anti-Asiatic vortex. The Zeitgeist is: "Keep the Indian from 'rising in the Education scale."

It is therefore gratifying to know that in the Marine College, 85 Leopold Street a gifted young Buchelor of Science from Witwatersrand University, Mr. J. I. Papert B.Sc. has stepped into the breach and made it possible for ambitious youtls of the Indian communty to go forward to MEstriculation which after all wath the Indaan as with the European is the strait gate to th: learned professions The Marine College cannot however grow and prosper withont the surport due to it by the Indian community of Dubban. We understand that
several competent teachers have joined the staff of Mr. Papert and are well able to assist their principal in carrying out his one design-to make the new College an avenue for the Indian youth of Durban and Natal generalls so as to give Indian youths "a place in the scn" within the educational horizon. When miny are talking merely Mr. Papert is acting.
One would venture to sargest to the Indian Advisury Committee on educational mattels to call a halt with respect to their expectations fiom the present Natal Education Depatment. For years that Committer has not got befond correspondence and iequisitions. During these years they have asked for bread and have got only a stone. And the bread which is even now speriously promisel will turn ont in the end to be no more than a stone.

One would also hope that the Indian National Uongress would take stock of this genune movement to give the Indian boys a chance in their struygle for higher editation. If only the Congress realised the true position of matters, the tens of boys now in Marive College would speedily bocome handreds if not thousands.

## MR. SRINIVASA SASTRI'S WARNING.

The Right Hon'ble V. S. Srmivisu Sistri internewel by a representative of the Associated Press of Inlia about Kenya problem is repoited to have sall-

From a brief summary which is all I have in this place of the spoech of His Excellency the Viceroy in opening the houses of I.cgislature, I gather that the Government of India is about to tuke steps in regard to this matter which, m my humble judgement, ought not to receive the support or induect acuuesance of the peoples representatives I refer to the appointment foreslurlowed in the speech, of an Indian officer to investagate the ateas in lowlands of Kenya which it is proposed to set apart for exclusive occupation of Indians asa sort ot compensation for their bemg shut out drom the Highlands. The rded was, first formulated by Lond Minner when he was the Secretally of State of Colonies. From that time till the other day not only our countrymen in Kenyd but, so far as pabhished documents go, the Government of India and Inila office have given no countenance to the suggestion As to the press in India and our political leaders. they have always denonnced it as a bat which should be avoiled and bribe which should be unhesitatingly rejected.

Montagu-Chechilla Neqotitions
Throughout the weary nerotiations between Mr. Winston Charchill an M r. Montara, this attatude was stearlfastly maintained. One cannot assert what hine the recent Colonies Committee took, bat I have reason to beheve that they firmly adhered to the Indian position. To depute an offi ser to examine the lowlands with a view to Indian settlement is the same as the acceptance by the Government of India of the principle of communal segregation. Its effect on our position in South Africa an lelsewhere would be disastrons. Lackily the Government will have to ask the sunction of the Ass mably for necessary appropriation of funds. The members of that chamber will know best how to deal wath the proposals of the Government in the matter. Mcanwhile I would saggent questions be asked in both the Houses to ehcit the information and also to intimate popular view to Guvernmont. Porhaps the State of basiness in the Counul of State will allow of a resolution on the subjoot at an early date.

## DOor OF Hopr shut

Sir B. N. Sarma stedilily refused to-publish papers and used to claim that there was substantial indentity of view between the Givernment and non-official public on overseds question generally. We have in the past gladly allowed this clam and
given the Government of Inda fuil credit for firm and thorough going adrocacy of our cause. Let us hope that it will do nothug now to forfert this cluim. I am avare that the refusal of the Labour Secretary of State for Colomes to re-open highland's question shats the door of hope But that is no reason why India shonld by voluntary action of hers seem to accept the principle involving st:gma no her nationals

RISHI DAYANAND CENTENARY (Contributed)
The centenarp celebrations in commemoration of Rishi Dayanand commenced uu Durban on Monday the lith and termmated on Sunday the 2ind of February 1025. Needless to mention the reforms that have takeu place from the time of the great retomer have been manitold, and to pay the necessary respect and homage was part of the daties of the Hondu communty, and as far as was possible, saccess attended every effort of the commattee. From the 15 th lectuos were delvered nightly on the lite and teachmogs of the Swam which were listered to by appreciative and attentuve audiences. Songs were sung at intervals to enhiven the proceedings.

On Samalay the 21st a meeting of scholurs was held at the Tamil Institute commencing al 12 noon where the hfe and leachings were placed before them - Thas function was brought to a successful conclasion by the distribution of pamphets on the principles of the Arya S maj.

A conference was held at Rawat's Boo Hall, commencing at 2-30 p.m on Saturday the 21st where relegates from all parts of Natal were present. The attendance at this functionwas greatly pleasing, for all sectious of the Indian community were present and-the large hall was well filled Mr Rnghoonath Sungh of Ladysmith presined orel the proceedings which commenced with payers, followed by songs by Messrs. Shank Mehtab add Esser Prasad, after which congratulatory telegrams and letters from all parts were submitted wishing the function every success.

After the speech of the Reception Committee Mr. R IK. Kapitan, the President in the course of his speech gave a full history of Rishi Dayanand and appealed to his heatess to follow the teachings of the Rishi and try and emulate some of the deeds performed by the ratormer

A most enlighteming song and lecture followed by Kumail Dhurm Devi of Maitzburg (a young lady of some 13 snmmers) on the various aspects of man'e laty to his women folk and was listened to most appreciatively. This young lady has a great future before her On the termination of her speech, Mr. A. Dookan through the president, presented her with a paur of golit bangles in appiectation of her effort A song by I, Nanoo tollowed, after whach a proposal for the adjournment of the conterence to the next day was carried

In the evening a procossion took place trom Rawat's Bio Hall to the Tamil Institute whete proceedugss were terminated with the performance of the Yagna ceremony.، At 10 am . ou Sunday proceefings commenced, when the mone senous business of resolutions was dealt with. It is most gratifying to roport that a great number of Indan ladies were present and took pait in the proceedings, and il is indeed a happy augury when such a state of affairs exist in our community.

The following resolutions were adopted -(1) Prohibition of alcohol, (2) Performance of Sanskars in accordance with the Yedas, (3). Establishment of a Cential boly to further the Vedic religion, (4) Performance of Sanlhyd and Yagna at vernacular institutions, (5) Upliftment of the poor anl
destitate, (6) Vernacular education, (7) Appreciation to reformers of the Vedic religion in this country.
Speeches by the following ladies were deli-vered:-Kumari Kunakpathy on the Purdah nys tem, Mesdames Beechook, Bugwandeen and R. M. Nadoo on facilities for education to women folk. Misses Sakuntala and Kamla on the doings of the Maba Rishi.
The formation of a central body then took place, which will be known as the Arya Pratinidi Sabha The business of the conference terminated with a vote of thanks to the officials, members and others who helped to make the centenary celebrations a success.
