Another View of Industrialism

BY THE SAME AUTHOR

**Observations on Method in Moral
Science**

Being an Essay of Criticism and Suggestion

"We have read his book with great interest. It is the work of a man who has read widely and thought deeply on the problems with which he deals. . . . The book before us is worthy of the closest study and attention."—*Aberdeen Daily Free Press*.

"The essay is ingenious and original, and it cannot fail to interest anyone who reads it."—*Scotsman*.

"William Mitchell Bowack shows himself a thinker of unusual acuteness, and reveals an uncommon attitude of mind. . . . To all interested in psychology the essay will be full of interest, particularly as showing the reflections of an eager and sanguine mind."—*Dundee Advertiser*.

**The Formation of Philosophical
Opinion**

"Two thoughtful and readable essays by William Mitchell Bowack, who shows in the handling of his subject a grasp of the history of philosophy and considerable power of speculation."—*Glasgow Herald*.

EDINBURGH: JAMES THIN

ANOTHER VIEW OF INDUSTRIALISM

By

William Mitchell-Bowack

Author of

“Method in Moral-Science,” “The Formation of Philosophical Opinion,”
and “Poverty and Old Age in Relation to the State.”
