## PREFACE

What I have aimed to do in this volume is to suggest some new points of emphasis in the labor problem. I have not attempted an exhaustive or even a symmetrical discussion of any one phase of the subject. This I must leave to those who can devote more intensive study to its various aspects. The first essential in considering any problem, particularly in our complex modern life, is to throw things into their proper perspective. Therefore, the suggestion of a slightly different angle of approach may prove useful.

Parts of several chapters are based upon articles that have appeared in *The Atlantic Monthly*, the *Political Science Quarterly*, and *The Annals* of The American Academy of Political Science, to which thanks are due for allowing the material to be used in this revised form. For their invaluable comments and suggestions, I desire to express my deep appreciation to Prof. Samuel McCune Lindsay, Prof. Herman Feldman, Dr. Elisha M. Friedman, Mr. Ernest G. Draper, Dr. A. A. Brill, Prof. Herbert Feis and Mr. W. J. Donald.
