## NOTE

All sums of money in this Review are stated in rupees and their equivalents in pounds sterling.

For 1898-99 and subsequent years a pound sterling is equivalent to ₹15. The rupee is divided into sixteen annas and the anna into twelve pies. The anna is, at the stated rate of exchange, equal to one penny.

A sum of ₹1,00,000, ordinarily termed a lakh, is equivalent to £6,666 13s 4d. and a crore of rupees, which is 100 lakhs, is equal to £666,666 13s. 4d. The simplest method of conversion is to multiply the number of rupees by 2 and put a decimal point to the left of the unit figure and then divide by 3, the quotient being the sterling equivalent in pounds and decimals. If it is desired to reduce these decimal figures to shillings and pence, the first two decimal figures should be divided by 5 to furnish the number of shillings, and the remainder to two places divided by 4 to find the number of pence.

Weights in this Review are stated in lbs, cwts, and tons, but for purpose of reference to current literature about Indian trade, it is well to state that the weights most commonly quoted in such literature are as follows:—

Divisions	Systematic name	Metric value Grammes	British Imperial value Grains
	1 Tola	= 11.6633	= 180
5 Tolas	= 1 Chittak	= 58.319022	= 900
			Pounds
16 Chittaks	= 1 Seer	= 933.10436	= 2 $\frac{2}{3}$
		Kilogrammes	
5 Seers	= 1 Passeeree or Punsarie	= 4.66552	= 10 $\frac{1}{2}$
8 Passeerees or 40 seers	= 1 Imperial or Indian Maund	= 37.324	= 82 $\frac{1}{2}$

*This map is intended to illustrate the principal sources of specific products. The principal areas of production of the staple crops of British India, namely, rice, wheat, oil-seeds, sugarcane, tea, coffee, cotton, and jute, are indicated by hatchings—horizontal, vertical, and diagonal—in two colours, black and red; and the location of the principal coal-fields is marked with black dots. For want of data, no information is given as regards Native States, and the districts in which the area under the selected crop is less than 10 per cent. of the total cropped area have been ignored. The chief railway systems are indicated by thin black lines.*
