PREFATORY NOTE

THIS treatise is the outcome of a course of lectures delivered under the auspices of the University of Lucknow during the years 1921-25. I have noted in the bibliography at the end of each chapter the authorities on the various basal and borderland sciences which have guided me in the several lines of economic interpretation. The scope and treatment of the book are frankly prefatory, but I trust will suffice to foreshadow a system of economics revived at its foundations and renewed in its methods by a broad-minded co-operation of the sciences of life, mind, and society in keeping with the intellectual vogue of the day.

I have to express my special indebtedness to Dr. N. C. Sen Gupta, who has helped me through many difficulties; and to Mr. D. P. Mukherji, who read the entire manuscript with critical care. I have further to thank Professor W. Burridge, who read the first draft of Chapter XIV, and favoured me with valuable criticisms and suggestions.

RADHAKAMAL MUKERJEE.

Lucknow,
July, 1925.

CONTENTS

CHAPTER	PAGE
PREFATORY NOTE	5
I. INTRODUCTION	9
II. ECONOMICS AND ITS BASAL SCIENCES	13
III. THE UNCONSCIOUS AND THE RATIONAL	23
IV. ECONOMIC BEHAVIOURISM	31
V. THE MISFITS OF HUMAN NATURE	55
VI. THE ANTHROPOLOGICAL STANDPOINT	77
VII. THE INSTITUTIONAL BACKGROUND	87
VIII. THE HUMANIZATION OF ECONOMICS	100
LX. THE GROUP CONCEPT	120
X. THE MEASUREMENT OF THE AFFECTIVE PROCESSES	140
XI. ANTI-INTELLECTUALISM IN ECONOMICS	158
XII. THE PSYCHO-ANALYTIC VIEW OF ECONOMICS	169
XIII. HUMAN GEOGRAPHY AND ECONOMICS	183
XIV. PHYSICS AND ECONOMICS	197
XV. BIOLOGY AND ECONOMICS	218
XVI. SYMBIOSIS, ORGANIC AND ECONOMIC	240
XVII. THE NEW ALLIES OF ECONOMICS	254
INDEX	273

INDEX

- Ability, natural, neglect of, 221
 Acclimatization, 223, 263
 Achievement v. wealth, 71-2
 Acquired characters, 223-4
 Acquisitive instinct, 46-9, 170, 173
 Acquisitive tradition, 52; Western economic reform and, 53
 Adornment or display impulse, 44, 56, 63, 64
 Agriculture, forward policy in, 220; human values of, 114-5; in conflict with urbanism, 114-6; one-crop v. rotational, 116
 Altruism, 243
 American herd instinct, 161-2
 Anarchism, Russian, basis of, 52-3
 Anderson's social values, 127-30
 Animals, in alliance with plants, 245-6; lessons in co-operation from, 232-6; social self-subordination of, 73, 230-1
 Anthropology, physical, 228-30; regional, 10; the new, 83-4
 Anti-intellectualism, 158-60; corrective to, 265
 Ants, 48, 73, 221, 225, 233-4, 235, 240-1
 Apperception, laws of, 155
 Art impulse, 44
 Ascetism, degenerate, 67
 Athanasia, on organic heat production, 204
 Atwater's metabolic balance sheets, 201-2
 Authority, deference to, 58
 Averages and indexes, limitations of, 118

 Back to the land, 70, 171, 180
 Backward races, control of, 21; interference with, 52
 Bacteria, symbiotic, 244, 246
 Baden-Powell on the Indian village, 52
 Bagehot, 101
 Baldwin, 127; on the social self, 126
 Balkan peasant industries, 82; village communes, 82
 Bax on socialism, 163
 Beavers, 47, 234
 Bees, 40, 46-7, 48, 73, 225, 233
 Behaviourism, 14, 101, 164-5; economic factors and standards of, 143-5, 256; experimental, 16, 103; regional, 264-6; rhythm of, 14
 Bentham, 101, 102, 142

 Berboussou, 186
 Bergson, 159, 249
 Bianchi on chemical changes connected with emotions, 149; on climate and metabolism, 187; on economic evolution, 237-8; on higher emotions and law of pleasure and pain, 150-1; on intelligence and thought, 210-2; on sociality, 236-7
 Binet, 109
 Binet-Simon system, 220
 Bio-energetics, 256
 Biological and eugenic conclusions, 220-2; light on capital and labour, 225-6; mutuality, 245-6; sciences as allies of economics, 222-3; selection, 252
 Biology, 15, 17-9, 31, 32, 218; and the social sciences, 13, 218; organism-function-environment relation in, 260, 266; suggestions from 226-7
 Bionomics, 227-8
 Bio-physics, 255
 Birth-control, 219
 Blood supply and emotion, 151-2
 Bolshevism, basis of, 52-3
 Bolton and Watt, 197
 Boltzmann on the struggle for free energy, 201
 Boucke on marginal economics, 142-3
 Boutmy on racial effects of climate, 186
 Brentano, 102
 Brett on social psychology, 77
 Brotherhood, workingman's, 174-5
 Bucher, K., on the rhythm of the machine, 181-2
 Buckle, 185, 263
 Building trades workers, 45
 Burrige's experiments, 206-8
 Butler, Samuel, 244

 Calorimetry, human, 201-2, 255
 Campbell, Dr. C. Macfie (*see* Mental Disease Levels)
 Capital and labour, biological light on, 225-6, 234-5, 248; in China, 97-8; in Japan, 90, 95-6
 Capital, continuous flow of, 134
 Carile on Austrian value theory, 241
 Carnot, 197
 Carpenter, Edward, 258

- Carver, on human adaptation, 55
 Cash nexus, 33-4
 Caste, competition restrained by, 91; occupation determined by, 90; ties of in India, 60
 Chauveau's physiological labour, 203, 204
 Chemical origin of emotions, 149; of sleep, 150
 Chestnut-gathering in France, 50
 Children and occupations, 67; deformed and abnormal in country schools, 70-1
 China, capital and labour in, 97-8; clan ties in, 60-1; guilds and collective life in, 93-4, 98; village and city communal government in, 93
 Choice, conscious, 145, 155
 City environment and morale, 65; and physical deterioration, 70-1, 114
 Civilization, new rural-urban economy required by, 115; population and, 220
 Clark, J. M., 257
 Class-conflict no solution, 103-4
 Class-consciousness, sublimation of, 178-9
 Climate and social life, 185-6, 263-4; determines diets and wage levels, 262; importance of, 261; organic and psychic effects of, 186-7
 Clothes, importance of, 63, 64
 Cold and mental initiative, 189
 Collecting hobby, 49, 170-1
 Commercial parasitism in the tropics, 116
 Commons, on group equity, 136-7
 Communalism, Eastern, not tribal, 88; Eastern, spirit of, 83; industries favouring, 50, 51
 Community life of plants and man, 242-5
 Competition, cut-throat, 171; evolved from pugnacity, 80-1; in biology, less successful than combination, 232; in classical economics, 39; individual, almost superseded by group, 113; racial differences in, 81; restraint of in India, 90-1
 Competitive régime, evils of, 74-5; remedies for, 75
 Comte, 165, 254; his order of sciences modernized, 254-5
 Conceptual constructions superseded by exact ideas, 11
 Conceptualism, the enemy, 140-1
 Concrete foundations of abstract sciences, 255-6
 Conditions of life and human evolution, 250
 Confucius, 60
 Conscious self, in conflict with unconscious, 26-7; tyranny of, 24
 Consciousness as a function, 209; search for physical basis of, 205-9
 Conservation of energy as basis for new calculus of values, 255; in economic life, 212-5; in the living organism, 201-2
 Consumption, economic, as nutrition, 214; recoupment and uplift in, 216
 Continuity and the frontiers of science, 13
 Cooley, 127, 266; on imitation based on inequality, 163-4
 Co-operation, evolution by, 232; in Japan, 95, 96; in Slavonic lands, 81; lessons in, from animal life, 232-6
 Co-operative and non-co-operative industries, 50-1
 Country, man's natural environment, 70, 114
 Curiosity, instinct of, 59
 Darkness and light, 187
 Darwin and Malthus, 218, 230; and nutrition, 228; on diversifications, 245; on emotional production of nervous energy, 205-6
 Darwinism, 33, 122, 230; careless, 33, 230-1, 252; new, 231-2
 Davenport, 258
 Defective stocks, 221
 Delaroche, 186
 Demand and supply, 15
 Demand, modern views on, 105-6, 130
 Desirability, 199
 Desires, transmutation of, 258
 Determinism, economic, 18
 Dewey, 270
 Dietetics, 223
 Dietzal, 125
 Disease, biological conception of, 17
 Disgust, a co-ordinating instinct, 57
 Distribution, cry for justice in, 175; modern, violates biological law, 221; psychology and, 113; true theory of, 134
 Division of labour and solidarity, 164; between man and woman, 229
 Domestication, 241
 Downey on temperament, 80
 Drink, dullness and, 69
 Drummond, 230
 Duguit, 267
 Durkheim, 77, 266; on division of labour, 164, 165-6; on herd instinct, 160-1; social solidarity concept, 132
 Eastern communalism, 83; adaptation of to new conditions, 85
 Ecology and economics, 227-8
 Economic and behaviouristic man, 14
 Economic evolution at work, 251; influenced by biologic and psychic factors, 237-8
 Economic group v. economic man, 39, 124, 128-9
 Economic man, modern, 123, 165
 Economic pathology, 224-5, 227, 259
 Economic theory, contributions to of the new biology, 248-51
 Economic types and their formation, 192-3

- Economic vitalism, 25
- Economics, behaviouristic standards in 143-5, 256; biological aspect of, 17-19; changed outlook in, 124; enlarged conceptions of, 124-6; enlargement and humanization of, 116-7; human value in, 268; humanization of, 259-60, 270-1; new basis for, 123-4; new biology and, 248-51; new standards necessary to, 143; now social rather than individualistic, 15; psychological foundations for, 256-7; standards of, 16; welfare aspect of, 17; widened scope of, 31-2
- Economics, Austrian school of, 101, 126, 128, 129, 130, 134, 141
- Economics, businessman's, 100-1
- Economics, classical and neo-classical, biology and, 218; Darwinism and, 33, 122, 230-1, 252; founded on rationalism, 23-4, 32, 184; inadequate psychology of, 35, 38-9, 100-1, 121; mechanical ideal of, 33; modern psychology and, 101, 218; not abreast of modern science, 13, 32, 254; urbanism of, 115
- Economics, evolutionary, in the making, 252; need and scope of, 21-2
- Economics, historical school of, 21, 124-3
- Economics, individualistic, break-down of, 120-3
- Economics, New Theory of, suggestions for, 143-8; welfare, not wealth, the motive, 183-5
- Economics, price, inadequate, 117-8, 257
- Economics, regional, studies in, 262-4
- Economics, Smithian, and individualism, 33
- Edgeworth, 101, 102
- Efficiency, factors in, 105, 210; in standardized production, preferred to originality, 224; instinct and custom as affecting, 104-7; study of and its results, 107-9; vital, sacrificed to wealth-getting, 222

BY THE SAME AUTHOR

The Foundations of Indian Economics

14s. net.

The Saturday Review.—"Mr. Mukerjee states the situation with lucid clearness. Mr. Mukerjee has laid his finger upon a social and economic weakness which is well known in this land. He has indicated a method of dealing with it which may be applicable in England, but which certainly is worth considering by all who are interested in the fortunes of our citizens in India."

The Manchester Guardian.—"A great deal of hard work and much sincere thinking has gone to the making of the book."

The Nation (New York).—"Most illuminating is the careful description and illustration of the various hereditary trades and their process of production and distribution."

The Mysore University Magazine.—"The book is excellently and most creditably written and gives evidence of a vast range of knowledge."

Democracies of the East

15s.

The Times.—"This study in comparative politics contains a learned but simple and always lively examination of the roots of organic communal life in the East, with special reference to India and China. . . . A valuable history of local institutions."

The Glasgow Herald.—" . . . Its subject is really the contribution which the East may make to the science of government and the lessons which may be drawn from the actual social organisation there existing, and the author conceives that these lessons may be specially valuable at a time when the Western theory of the State seems in process of disintegration. . . . A notable contribution to the comprehension of Indian history, Professor Mukerjee's excellent study is also a valuable sociological examination which demands the attention of Western readers."

Principles of Comparative Economics

VOL. I. 15s. VOL. II. 18s.

Journal of the Indian Economic Society.—"It is refreshing to find how Professor Mukerjee tries to fructify economics and raise it to a sounder level by application of the comprehensive sociological method to economic theory and practice. The book is a welcome and timely addition to the literature of Economics, showing how the economic branch of social science will bear fruit only if it draws its sap from Sociology, and adopts the methods of dealing with complex social causation developed by Comte, Spencer, Le Play, Ward, and other sociologists and social psychologists. . . . We heartily recommend the book to all interested in sound development of economic method and doctrine."

Principles of Comparative Economics—*continued.*

Hindustan Review.—"There is plenty in the book that will cause many a searching in the hearts of the orthodox economist, and perhaps make him revise some of his accepted theories. It is a book of first-rate ability and is bound to place Dr. Mukerjee in the front rank of constructive thinkers."

The Englishman (Calcutta).—"The author of this excellent treatise on comparative economics is one of the few really distinguished students of economic science in India. He has effected a very remarkable synthesis of the different branches of economic and social science, setting an example which is certain to be followed."

New Statesman.—"This is the most substantial and, it may be said, also the best-written treatise on economics that has yet been produced by a native of India. . . . Dr. Mukerjee has not followed the scheme of a treatise on the 'Principles of Economics,' which has for a century or more been traditional in Great Britain. He has written an original and stimulating book, which will be read in India, and which ought to be considered by British economists. . . . An interesting and elaborate economic treatise rich in first-hand information."

Cambridge Review.—"Professor Mukerjee has written a book full of suggestive ideas that provoke thinking. . . . In the second topic which the author treats, he is brilliant and at his best. Herein he emphasizes the new idea of Regional Economics. Differences in wants and habits due to geographic and other causes must change economic organization, and our treatment of the laws underlying it. . . . The book is written in good style."

The Courant (Edinburgh).—"Original research combined with philosophic insight into economic problems have gone to the production of a work which is bound to take a high place in economic literature and to exercise wide influence in advancing economic studies along new and fruitful lines of investigation."

Pioneer (Allahabad).—"Professor Radhakamal Mukerjee is one of the borderland workers. He has read widely in biology, in psychology, and in sociology; and his tendency of thought is to link the science of economics with those and other subjects with which it has obvious relations. . . . The work, by its sociological method of treatment, is a real and solid contribution to economic science. It is very necessary that such books with a broad outlook and wide field should be written and read."

Freeman (New York).—" . . . He gives us in this book much solid information concerning a social-economic order that is very little known in Western countries."

The American Political Science Review.—"This differs from the usual works on economics in the emphasis laid on the study of regional factors and on relativity in economic theory."

The Interest Standard of Currency

By ERNST DICK, PH.D.

Demy 8vo.

10s. 6d.

This is a reassuring book. It shows that the elements of the traditional monetary system, if rightly applied, suffice to produce a stable standard of price, and that all that is needed to achieve the great boon of stability is a very simple and obvious rearrangement of those elements; no State control of banking and of wholesale trade, no need of special international agreements, no conscious managing. The author claims to have discovered an entirely new principle which, he thinks, will not only revolutionize the theories of currency and value, but also give a new direction to political tendencies. The problems of debt, both national and international, of reparations, of the exchanges, of unemployment, will be brought nearer to a solution by this new principle. No economist either practical or theoretical, no managing banker, no statesman who has to battle with the economic and financial entanglements of the time should miss this contribution.

"He applies Marx's economic interpretation with consistent brilliance to every phase of social life."—*New Leader*.

"He is certainly to be ranked among the most adventurous pioneers of new economic thought. He is, perhaps, the one constructive economic thinker America . . . has yet given to the world."—*New Statesman*.

The Marxian Economic Handbook and Glossary

By W. H. EMMETT

Demy 8vo.

12s. 6d.

"The meticulous cleverness of the book is beyond question, and his extensive correction of the earlier translators and commentators will make considerable demands on the attention of any who may desire to put up defences for Kerr and others in respect of their alleged misrepresentation."—*Yorkshire Observer*.

Borderlands of Economics

BY RADHAKAMAL MUKERJEE, PH.D.

Author of "The Foundations of Indian Economics," "Principles of Comparative Economics," "Democracies of the East," etc.

Demy 8vo.

12s. 6d.

A treatise on the alliance of economics with kindred sciences (e.g., biology, psychology, ethnology, etc.) which help to elucidate its problems. The author sees in this scientific co-operation the beginnings of a New Economics taking account of regional and human differences, and aiming at the general welfare of man.

The Relation of Wealth to Welfare

BY WILLIAM A. ROBSON, B.Sc.(ECON.) LOND.

Barrister-at-Law

Cr. 8vo.

6s.

"A powerful plea for the extension of collective activity in various important fields."—*Nation*.

"A book to stimulate thought."—*New Statesman*.

Economics of Fatigue and Unrest

And the Efficiency of Labour in English and
American Industry

BY P. SARGANT FLORENCE, PH.D.

Demy 8vo.

16s.

"It is safe to say that this work is by all odds the best existing introduction to the subject. It has, moreover, the great merit of being really interesting. . . . The book should be made compulsory reading for every member of Parliament and for every employer who writes to the press on the problem of output. To have dealt so illuminatingly and so simply with so complex a subject is a public service of no mean rank."—*Manchester Guardian*.

Organised Labour

Demy 8vo.

BY G. D. H. COLE

6s.

"A careful and well-arranged account of a very difficult and intricate subject."—*Daily News*.

The Philosophy of Labour

By C. DELISLE BURNS

Author of "Government and Industry," "Industry and Civilisation,"
"A Short History of International Intercourse," etc.

Cr. 8vo.

3s. 6d.

This is an attempt to state the point of view of workers who regard labour as the most important factor in the life of the community, who are therefore proud to be workers, and especially to be manual workers. It is not a discussion of programmes or policies; but it explains how far the worker's view undermines the traditional admiration for wealth and establishes a new basis for industrial and political organization.

Industry and Civilisation

By C. DELISLE BURNS

Demy 8vo.

10s. 6d.

"In this illuminating analysis Mr. Burns brings his readers from the dangerous realm of phrase into the dispassionate world of realities. . . . After reading it, those whose concern is to understand the world in which they live will certainly be wiser."—*The Times*.

The Labour Revolution

By KARL KAUTSKY

TRANSLATED BY H. J. STENNING

Cr. 8vo.

Cloth, 7s. 6d.

"Extremely interesting and suggestive."—*Star*.

"For all students of Labour politics and economics, the experience and industry of this veteran will bring up new outlines of policy for consideration."—*Manchester Guardian*.

Population and the Social Problem

By J. SWINBURNE, F.R.S.

Demy 8vo.

15s.

"Mr. Swinburne is the happy possessor of one of the rarest of all forms of literary talent . . . he has much of Mr. Bernard Shaw's vividness of phrase, of his turn for epigram and paradox, much of his brilliance and certainty of attack . . . the book is quite as entertaining as the average novel and vastly more informative."—*Sunday Times*.

"For all students of Labour politics and economics, the experience and industry of this veteran will bring up new outlines of policy for consideration."—*Manchester Guardian*.

Population and the Social Problem

By J. SWINBURNE, F.R.S.

Demy 8vo.

15s.

"Mr. Swinburne is the happy possessor of one of the rarest of all forms of literary talent . . . he has much of Mr. Bernard Shaw's vividness of phrase, of his turn for epigram and paradox, much of his brilliance and certainty of attack . . . the book is quite as entertaining as the average novel and vastly more informative."—*Sunday Times*.

A Grammar of Politics

By HAROLD J. LASKI

Demy 8vo. Author of "Foundations of Sovereignty," etc. 18s.

This work is not only a full discussion of the basis of political institutions, but also a series of concrete and practical proposals for the reconstruction of the present social order. Mr. Laski deals with the political system as it manifests itself not only in legislation and administration, but also in the courts and economic enterprise. His proposals attempt the detailed readjustment of them all to the political philosophy upon which his work is based. The volume therefore appeals not only to the student of political science, but to the lawyer and the civil servant, to all, indeed, who are interested in the development of a new politics.

Land Tenure and Unemployment

By FRANK GEARY, B.Sc. (ECON.) HONS. LOND.

Demy 8vo. Barrister-at-Law 10s. 6d

The majority of works on Unemployment accept this evil as inevitable. They start with unemployment as an accepted fact and then elaborate schemes for its alleviation. Mr. Geary challenges all this. He regards involuntary unemployment as unnatural and unnecessary. He attacks the problem from a side almost entirely neglected. Starting with an analysis of what unemployment really means, and how the wealth which the unemployed lack is produced, the author proceeds to trace, from Saxon times until the present day, the beginning and growth of involuntary unemployment and to show that it was due to a gradual and increasing monopoly of the land. From a discussion of the cause we are led to see the remedy. Mr. Geary draws largely on contemporary records, and puts up a strong case for his contention that there is a close and necessary connection between these two phenomena.

"Liberal study circles will find this an ideal text-book."—*Daily News*.

The Equipment of the Social Worker

Cr. 8vo. By ELIZABETH MACADAM 6s.

Social Administration is only beginning to be recognized as a coming profession, which makes a special appeal to the present generation. The writer, who is an experienced social worker and intimately connected with the movement for social study, describes the provision at present made by the universities for training, and relates it to the needs of workers in each group included in the comprehensive term "Social Services." These cover certain branches of the civil and municipal services; numerous forms of professional social work provided by private initiative and, not least, the voluntary activities of a large army of men and women on public bodies or in less conspicuous forms of personal service. She also urges the need for some systematic social study for those engaged in professions not primarily social in character (e.g., the Church, Medicine, Education, and Administration of Justice). This book should be read not only by all social workers, by officials, teachers, and students in search of a career, but also by public-spirited citizens who look for a high standard in the social administration of the country.
