BIBLIOGRAPHY

THE literature which has grown up about the sea, shipping and seamen is of vast extent. *The History of Merchant Shipping* by W. S. Lindsay was for long a standard work from the historical point of view. For details regarding the sailing ship of modern times the reader is referred to the excellent series by Mr. Keble Chatterton and by Mr. Basil Lubbock. The most readable book on navigation for a layman is Lecky's *Wrinkles in Navigation*, which has gone into many editions since first published two generations ago, though there are, of course, many textbooks on this subject. For the naval architecture of early ships, Mr. G. S. Laird Clowes's various works are to be recommended. *The Marine Chronometer* by Gould, Stevens on *Stowage*, Todd and Whall on *Practical Seamanship*, Martin's *Navigation*, and *The Men of the Merchant Service* by Frank Bullen are all standard works dealing with their various subjects.

The Sailing Ship by R. and R. C. Anderson is a valuable technical treatise, while the student will find much material in the yearly issues of Brassey's *Naval Annual* which contain sections devoted to merchant shipping. *The History of the Merchant Navy during the Great War* by Sir Archibald Hurd is a semi-official publication of great historical interest. There is also a mass of interesting material dealing with ships and seamen in the publications of the Hakluyt Society, the

BIBLIOGRAPHY

Navy Records Society and the Society for Nautical Research. Numerous House of Commons Papers, the various Merchant Shipping Acts, the annual report of the Controller of Navigation (Washington) and other official publications contain much information, while *Master Mariners* by John R. Spears (No. 55) in the "Home University Library" contains an historical sketch of the world's shipping.
