OUTLINE OF ENGLISH HISTORY,

B.C. 55—A.D. 1886.

By **SAMUEL RAWSON GARDINER, LL.D.**

Fellow of Merton College, Oxford.

'No manual of English History for children lately published can compare with this little book, which will be heartily welcomed by all interested in education. Instead of being a collection of detached scraps of information of very unequal importance, interspersed with needless dates and names, it is really the story of our country's history. Children will not learn from it that Henry I. died from eating lampreys, nor that his son was drowned in the White Ship, nor will they be wearied with the names and dates of all the battles of the Wars of the Roses; but they will learn—what no history written for them has yet taught—that every nation, like every individual, has a continuous life and growth. No event affecting the development of the English nation is passed over, while such as have left no lasting results are either omitted, or only lightly touched on. More than this, the thoughts and feelings, the needs

and sufferings, which formed the roots of the nation's growth, are not left untold; and not only will the reasoning powers of children be stimulated by the tracing of cause and effect, but their best sympathies will be awakened by all that is noblest in their country's history. But that which above all distinguishes this little book is the remarkable fairness with which Prof. GARDINER deals with those subjects which are too often misrepresented from political or religious bias. The rare sense of justice is apparent throughout, but strikingly so in those chapters which deal with monasteries and with the Reformation. The simple language, the clear explanations of difficulties, and the excellent maps, add to the value of the book, which is not only the work of a scholar, but of one who evidently sympathises with the children for whom he writes.'
