The undersigned, the members of the Business Men's Commission on Agriculture, appointed by you to study the condition of agriculture in the United States and to suggest measures for its improvement, herewith submit the Commission's Report. In accordance with the terms of its appointment as a body independent of the opinions and policies of the sponsor organizations, the Commission assumes full responsibility for the conclusions and suggestions contained in its report. In face of so vast, complex and important a problem, the views of the individual members of the Commission in regard to all particulars and details of the report naturally could not be in every respect identical, but the findings and recommendations herein contained represent the consensus of the views of the Commission as a whole regarding the fundamentals of the questions which it was charged to consider.
