# ALLEN'S NATURALIST'S LIBRARY.

The extraordinary favour which Jardine's Naturalist's Library has enjoyed during the last fifty years has induced the proprietors of the copyright to issue a series of volumes, written by some of the most eminent naturalists of the day, under the title of "Allen's Naturalist's Library."

The Publishers have secured for the Editorial work the services of Dr. R. BOWDLER SHARPE, of the British Museum, whose long and honourable connection with that Institution, coupled with his experience of the Editorship and publication of many of the most important of modern works on Natural Science, entitle him to be considered one of the fittest men in England for the task.

The Editor has obtained the co-operation of the following eminent naturalists:—

Mr. B. LYDEKKER, M.A. (Mammalia).  
Mr. H. O. FORBES (Mammalia and Birds).  
Mr. W. B. OGILVIE-GRANT (Birds).  
Mr. W. F. KIRBY (Insects).  
Professor R. H. TRAQUAIR, F.R.S. (Fishes),

while the Editor undertakes several of the Ornithological volumes.

Over 1,000 steel-plate engravings, many of them by the most eminent artists of the time, will be utilised for the purposes of the present work, and will be produced in the highest style of modern chromolithography, in addition to which the services of Mr. KEULEMANS and other leading artists of the day have been secured for the illustration of those forms of animal life which it has been found necessary to depict, in order to bring the present work up to the standard of Modern Science.

The volumes are published at the popular price of 6s. Each volume containing about 320 pages of letterpress, together with from 20 to 40 coloured plates.

## TENTATIVE SCHEME OF VOLUMES.

*The following List will give an outline of the General Scheme, but it may be varied if, in the opinion of the Editor and Publishers, an alteration would improve the Series.*

## PREFATORY NOTE,

---

To all who have personally aided me in any way with materials for the work now completed, I beg to offer my sincere thanks. There is one kind friend, however, to whom such thanks are especially due for services which no words of mine can adequately express. To the zealous co-operation of Dr. Alexander Grant this book is indebted for most of those personal details which serve to fill up and enliven the narrative of a great man's public career. Besides the valuable body of notes and reminiscences which he placed so generously at my disposal, the perfect confidence placed by Lady Connemara\* in the discretion of her father's intimate friend enabled him to furnish me with other information, such as her Ladyship would have deemed herself precluded by her father's instructions from giving directly to a mere stranger.

As one who served in India during the first six years

\* Now Lady Susan Brown (1895).

of Lord Dalhousie's Government, and again during the Mutiny, I may claim to have had some direct acquaintance with many of the topics handled in these pages. My subsequent studies of Indian history, carried on now for over thirty years, have enabled me, in my *History of India under Victoria*, to follow up the good work begun by those who first undertook the task of vindicating the greatest and noblest of Indian Viceroy's from the reproaches cast upon him by his own countrymen during and after the catastrophe of 1857. Further research in the writing of the present volume has served only to deepen my former conviction of the injustice which clouded the last years of a life remarkable for rare achievements and heroic sacrifices in the cause of duty.
