TO
THE W.E.A. STUDENTS
OF THE
HUNTER RIVER VALLEY

GENERAL PREFACE.

The scarcity of authoritative Australian books on economic and political problems has been severely felt during the development of the Workers' Educational Association in the Commonwealth. On the foundation of the Federal Council of the W.E.A., in 1918, a means of overcoming this difficulty was sought. Among the professors, lecturers, and tutors, who have so readily assisted the tutorial class movement, some had collected valuable material bearing on these problems. Through the Federal Council it was thought possible to assemble some of this material for publication in a series of monographs intended for the use of students in tutorial classes and elsewhere. Thus has the W.E.A. Series of publications been founded, and it is hoped that its utility will extend beyond the immediate needs of members of the W.E.A. to the growing number of students of social problems in Australia.

The chief aim of the Series being to encourage investigation in fields of study hitherto surprisingly neglected in Australia, the W.E.A. does not accept responsibility for the views expressed by the writers therein. Its purpose is to stimulate thought, not to propagate doctrines. A disclaimer of this kind may appear odd in a preface, but our experience of the persistency with which our critics insist on attributing to the Association the opinions of those who happen to be connected with it has convinced us that it is necessary.

G. V. PORTUS,
General Editor.
