## APPENDIX II

*A Scheme for the Collection of Statistics of Wages of Agricultural Labour*

1. *Object*—At present statistics of wages of agricultural labour are not collected in a uniform manner in all the States. Most of the States do not collect this information at all, while the information collected by one or two States cannot be tabulated for all-India purposes. The information available for the country in this respect is as a whole given in the "Quinquennial Wages Census Report". Even this census is not carried out simultaneously in all the States and so it has been difficult to form an idea of the comparative variations in the level of wages paid to agricultural labour. Agricultural wages constitute a major item in the cost of the production of crops and it is essential to have an idea of the actual variations in this item in order to assess the trends in agricultural costs. It is necessary, therefore, that statistics of wages of agricultural labour prevailing in the selected villages should be regularly collected on a uniform basis.

2. *Standard Proforma*—The form in which the information regarding the wages has to be collected is attached herewith. The information should be collected in this form and after being consolidated, should be sent to the Directorate of Economics and Statistics, Ministry of Food and Agriculture, New Delhi. The report should relate to the ordinary skilled labour and the un-skilled casual labour employed on a daily wage rate and paid either in kind or in cash. The cash wages as well as the equivalent of wages paid in kind and their totals in cash equivalent should be given in this proforma. The wages of men, women and children in case of un-skilled labour should be shown separately. Ordinarily, women and children do not occur in case of skilled labour and if there be any isolated case, that can be left out.

3. *Periodicity*—The data as per above proforma should be collected on *monthly basis* and the wages reported therein should be those most *commonly current* during the month. The data should relate to the calendar months. The primary reporting agency should generally send the data for the month on the 2nd of the next month, which should be scrutinized, and if necessary consolidated at the district headquarters (when received from more than one village) by the end of the first week of the month and sent immediately to the State headquarters. The State headquarters should be able to consolidate the data for the whole of the State by the middle of the 2nd week of the month and send copies to this Directorate so that the same could be received by the end of the 2nd week of the month *e.g.*, the data for July, 1950, should be sent by the primary reporting agency to the district headquarters on the 2nd of August, by the district headquarters to the State headquarters by the 6th or 7th of August, by the State headquarters to the Directorate of Economics and Statistics, Ministry of Food and Agriculture by the 12th or 13th of August.

4. *Agency*—The State Governments are at liberty to make use of whatever agencies they find most suitable for the collection of these statistics. They can collect the data through *patwaris*, through presidents of the Local Panchayat Boards, through primary school teachers, through *Mamlaidars* and *Mahalkaris*, through Firka Development Officers etc. and arrange for their consolidation at district headquarters through any of their departments which can most conveniently handle this work. The Officer-in-charge at the district headquarters should properly scrutinize the returns received from the primary reporting agencies and should be responsible for the accuracy and punctual submission of the same to the State headquarters.

5. *Consolidation and Publication*—The consolidation of the returns at the State headquarters may as well be done by any department according to the convenience of each State. The consolidated statements showing the statistics of wages of agricultural labour at the different centres should be published in the State Gazette. They may also be published in any other statistical bulletin issued by the States. An advance copy of the same should be sent to the Directorate of Economics and Statistics as pointed out in paragraph 2 above.

6. *Selection of Centres*—Such information on the prevailing wage rates should be collected from each district of the State, particularly when agricultural conditions are not homogeneous in the different districts. In any case if some States find it difficult to arrange for the necessary staff, at least one district in every 5 may be selected representing the various administrative divisions and agricultural regions. In each district one village may be selected so as to represent the wages and general agricultural conditions of the district. It shall be appreciated if more than one village in one district are selected, particularly, from non-homogeneous parts of the district.

7. *Classification*—Since the wages paid vary with the type of the work, it will be necessary to specify the nature of the work to which the wages relate. For this purpose the following classification is proposed:—

## (i) Skilled labour—

(a) Carpenters;

(b) Blacksmiths;

(c) Cobblers (Mochies).

## (ii) Field labour.

(iii) Other agricultural labour.

(iv) Herdsmen.

The definition of each one of these is given in the proforma—
