## FOREWORD

The data presented herein have been abstracted from Annexure III, Ten-daily Discharge Data of the Krishna River System, and are subject to the remarks set out in the foreword of that Annexure.

As in Annexure III, the year has been taken as the water year applicable to the hydrologic conditions on the Krishna and the Godavari rivers, from 1st June of one year to 31st May of the following year.

The flow at any site as shown herein includes the withdrawals, if any, at that site and releases from upstream storage, if any. This flow excludes upstream withdrawals and extractions for storage, if any.

The commission found a wide variation in the methods of observation or calculation of discharges adopted at various sites, from time to time. Since the reliability of river discharge data is closely related to the method of observation or estimation of river discharges, the Commission made special efforts to ascertain these methods. The information that could be obtained in this respect has been set out in this Annexure for each site.

An index map showing all the discharge sites is at the end of this Annexure.
