NOTE.—The excess in some cases of the total area of crops irrigated (column 18) over the total area irrigated (column 13) is due to the inclusion in column 18 of the area irrigated at both harvests.

(a) Includes 7 acres on which two crops were raised.

(b) There is but little irrigation in Assam.

(c) Figures not available, except for columns 2 to 7.

NOTE.—There is but little irrigation in Assam, and the columns relating to irrigation are omitted from this table.

(a) Decrease due to the statistics of crops other than tea not being available.

(b) Includes culturable wastes other than fallow in Cachar, Sylhet, and Lakhimpur.

(a) Details of the areas under crops of Almora and Garhwál are not available, except those of tea, as annual papers are not prepared in those districts.

(b) The areas under mixed crops which were hitherto included under "Other food-grains" were eliminated and their component parts entered under the principal crops. The acreage under pure crops has therefore increased, while that under "Other food-grains" has decreased.

(1) The figures are for 1896-97: no figures were collected for the North-Western Provinces and Oudh for 1897-98.
 (2) The sum of the area in col. 4 (3) plus the cultivated portion of the area not fully assessed agrees with that entered under head 41 of Table A—3, except in the case of Garhwāl in which the fully assessed area according to the revised settlement is stated.
 (3) The tenure in Oudh is all zamindari, and includes village communities in the case of temporarily settled areas.

* The estimate framed for unhusked rice has been reduced by 39 per cent to give the yield of husked rice.

NOTE.—The average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped, adding the yield of unirrigated land multiplied by the unirrigated area cropped, and dividing the sum of these products by the total area cropped.
