## FOREWORD

Wise use of water is vital to modern civilisation. Population growth puts the emphasis in food production on the development of water resources and their better management. Irrigation is not a single self-contained activity, but brings in soil physics, soil chemistry, agricultural meteorology, plant physiology, soil biology, engineering economics and crop husbandry. The management of irrigation water is amenable to progress provided there is greater collaboration and co-ordination among the various agencies and the scientific disciplines that make up the field. A skilful management of water supplies for successful irrigated agriculture requires development of information through research dissemination of this information and creation of an enlightened public attitude.

To explore ways and means to develop irrigated agriculture in the context of present and future water resources, a symposium on Management of Irrigation Waters was held at Simla in July 1964 along with 34th Annual Research Session of the Board. Nineteen papers were presented on the different aspects of the subject: (1) Organisational set-up for water management; (2) Agency for the construction of watercourses and field channels; (3) Supply of irrigation water and (4) Assessment of water charges. The symposium was largely attended by State Irrigation Chief Engineers, Directors, Research Engineers and Scientists of various Irrigation Research Stations and officers of State Agriculture Departments.

The views expressed by the participants on various aspects of the symposium subject were examined by a committee consisting of Sarvashri M. R. Chopra, G. A. Narasimha Rao, Baleshwar Nath, Arjan Singh, G. S. Sidhu, K. K. Uppal, S. M. Sikka and Satwant Singh and it brought out recommendations for implementation by Irrigation and Agriculture Departments.

This compilation contains symposium papers, discussions, General Report by Shri Joginder Nath, Superintending Engineer, Irrigation Department, Punjab and recommendations of the Sub-Committee. The Board expresses its grateful thanks to the authors of the papers, discussors and participants who largely contributed to the success of the symposium and also to Sub-Committee members in finalising the recommendations.

S. N. GUPTA
Secretary
Central Board of Irrigation and Power

New Delhi 22 May 1969.

## CONTENTS

|  | Pagi       |
|--|------------|
| FOREWORD   | (i)        |
| RECOMMENDATIONS OF THE SUB-COMMITTEE ON MANAGEMENT OF IRRIGATION WATERS .  | 1          |
| General Report   | 5          |
| PAPERS:  |            |
| (1) Problems of Indian Agriculture—by N. D. Gulhati  | 13         |
| (2) Field Management of Canal Supplies—A Tremendous Challenge—by Baleshwar Nath  | 20         |
| (3) Management of Irrigation Waters in Maharashtra—by N. V. Khursale and P. R. Gandhi  | 25         |
| Management of Irrigation Waters in Gujarat State—by J. P. Naegamvala, D. R. Shankara Iyer and A. V. Gururaja Rau   | 33         |
| (5) Irrigation Management in Punjab-by Madan Lai Wahi  | 40         |
| (6) Management of Irrigation Watersby Chief Engineer, Irrigation, Madhya Pradesh   | 49         |
| (7) Land and Water Management in Andhra Pradesh Outlining Recommendations for Efficient Water Use—by P. T. Malla Reddy   | 5 <b>9</b> |
| (8) Management of Irrigation Water—by V. Rama Rao  | 63         |
| (9) Management of Irrigation Watersby C. S. Parthasarathy  | 65         |
| (10) An Appraisal of the System of Distribution of Canal Irrigation Waters in Punjab-<br>by P. S. Bhatnagar and G. P. Malhotra   | <b>6</b> 8 |
| (11) Economic Utilisation of Water for Irrigation—by B. S. Sivan   | 71         |
| (12) Management of Irrigation Waters and Land—by Barkat Ram and B. D. Bali .   | 79         |
| (13) Field Distribution of Irrigation Water in the D. V. C. Area-<br>by N. C. Mukerjee   | 84         |
| (14) Management of Irrigation Waters—Role of Engineers uis-a-vis their Counterparts in other Departments—by S. M. Ramgarhia  | 93         |
| (15) An Administrative Aspect in Management of Irrigation Water—by J. D. Sahi  | <b>9</b> 8 |
| (16) Some Problems in the Management of Irrigation Water—Role of Agriculture Department—by Dr. D. G. Dakshindas  | 100        |
| (17) A Combined paper on :   |            |
| (i) The Role of Agriculture Department regarding Land Levelling, Supply of Manures etc., and how far and in what manner the Responsibility for Field Utilisation can be laid on them and |            |
| (ii) The Relative Responsibility of the various Units Responsible for these Activities and how they can be Inter-related and Co-ordinated—by V. G. Vaidya                                | 102        |
| (18) A Note on the Rote of Agriculture and Irrigation Departments in the Management of Irrigation Water for Crops—by R. R. Panje.  | 106        |
| (19) Suggestions on Efficient Management of Irrigation Water   | 108        |
| DISCUSSIONS  | 113        |
| THE BE BOARD PITELICATIONS   | 126        |
