

# AGRICULTURAL STATISTICS

OF

## INDIA

FOR THE YEARS

1903-04 TO 1907-08

VOLUME I—BRITISH INDIA

### Prefatory Note

In 1866 a set of tables, proposed by a specially appointed Statistical Committee, was prescribed by the Government of India for general adoption as appendices to the annual reports on general administration.

In 1884, at the instance of the Secretary of State for India, some of these forms, relating to agriculture, land, and tenures were re-considered and modified after examination and discussion by a conference of officers of the Agricultural Departments. The modified tables, eight in number, were compiled for the first time for 1884-85, and published under the title of 'Returns of Agricultural Statistics of British India.' These tables were prepared and published annually until 1887-88, when a re-arrangement was made of the headings of four statements dealing with area, irrigation, crops, and agricultural stock, though no modification was made in substance.

In 1891, the tables were again revised and, to some extent, re-cast. The revised series of 1891 has, with a few unimportant alterations, been maintained to the present time, with the exception that two tables (wholesale prices and varieties of tenure) have been discontinued, other arrangements having been made to secure a record of prices.

The following schedule compares the three series of 1866, 1884, and 1891 :—

1866	1884	1891
IA. 1.—Area cultivated and uncultivated.	A.—Area cultivated and un-cultivated.	A.—Total acreage, classification of areas (including irrigation), area under crops, and stock.
IIID. 1.—Crops cultivated.	Irrigation.	
IIID. 2.—Agricultural stock.	B.—Crops cultivated.	B.— Prices of produce. (Discontinued from 1894-95.)
IIIE. 1.—Prices of produce.	IIID. 2.—Agricultural stock.	
	IIIE. 1.—Prices of produce.	C.—Incidence of the land revenue on area and population.
IE. 2.—Surveyed and assessed area.	C.—Surveyed and assessed area.	
IE. 3.—Varieties of tenure held direct from Government.	IE. 3.—Varieties of tenure held direct from Government.	D.—Varieties of tenure held direct from Government. (Discontinued from 1901-02.)
IE. 4.—Varieties of tenure not held direct from Government.	(Discontinued.)	
IE. 5.—Register of transfers.	IE. 5.—Register of transfers.	E.—Register of transfers of landed property. (Discontinued.)
IIID. 3.—Rates of rent and produce.	(Discontinued.)	

The tables of the series of 1891 as published in this volume consist of six separate tables numbered, 1 (area), 2 (classification of area), 3 (area under crops), 4 (live-stock, etc.), 5 (land revenue), and 6 (transfers of land). Each table gives the figures for each province for five years, with a total for British India, and is followed by subsidiary statements numbered 1-A, 1-B, 1-C, etc., giving similar figures for each district in each province. Besides these there is an Appendix consisting of three statements of a special nature, which deal with A—area and yield of certain crops, B—average yield per acre of principal crops, and C—changes in district, divisional, and provincial boundaries. Statements A and B are first published separately and then included in this volume. Statement C is explanatory of the variations in the areas shown in table No. 1.

The general scope of the figures given in these tables may be explained as follows:—

The total area of India is 1,136,449,383 acres, or 1,775,702 square miles, with a population of 294 millions. This may be divided as follows:—

(1) British Provinces (including Native States under the control of Local Governments) .	Acres.	Population.
	753,934,009	252,453,350
(2) Native States under the control of the Government of India . . . . .	315,589,934	40,358,452
(3) Certain Native States * in Burma not included under (1) . . . . .	37,065,600	1,137,444
(4) British Baluchistan (including administered areas) . . . . .	29,859,840	343,187

The area of British Baluchistan is excluded entirely from the Agricultural Statistics of India. The area of British Provinces only is dealt with in this volume—tables 1—6 and Appendix C. In Appendices A and B figures relating to certain Native States are included. Volume II deals only with Native States.

The total area of the British Provinces dealt with in this volume—753,934,009 acres, or 1,178,022 square miles—includes 130,985,447 acres, with a population of over 22 millions, belonging to Feudatory and Tributary States, which are under the political control of Local Governments. These include, in Burma, the Mông Mit State, the Hsawngsup State, the Singkaling State, and the Chindwin States; in Eastern Bengal and Assam, the Khási and Jaintiá Hill States, Manipur, and Hill Tippera; in Bengal, Sikkim, Cooch Bihar, and the Tributary States of Orissa and Chota Nagpur; in the United Provinces, Rampur and Tehri; in the Panjab, the Phulkian States, Bahawalpur, the Delhi, and the Jallandhar Division States, and the Simla Hill States; in the North-West Frontier Province, the Phulera and the Upper Tanawal States; in Sind, the Khairpur State; in Bombay, the Gujarat States (excluding Baroda), the Konkan States, the Satara Jagirs, and the Southern Maratha States; in the Central Provinces, the Chhattisgarh States; in Madras, the States of Travancore, Cochin, Pudukkottai, Banganapalle, and Sandur. No returns of Agricultural Statistics are prepared for these States (except for three States in the Panjab, *viz.*, Patiala, Nabha and Bahawalpur, for which returns have been prepared from 1907-08). There is also an area of 3,492,429 acres for which no returns are prepared. This comprises certain British Hill tracts in Eastern Bengal and Assam and certain unsurveyed tracts in Ajmer-Merwara, in which there is no agency for collecting statistics and for which no estimates are at present forthcoming. Thus by deducting 130,985,447 acres belonging to Feudatory and Tributary States and another area of 3,492,429 acres for which

no returns at present exist, from the total area of 753,934,009 acres included in British Provinces, a balance of 619,456,133 acres is left, as shown in table No. 1, which represents the area for which Agricultural Statistics are forthcoming. These statistics are, however, prepared in a number of provinces or parts of provinces from village papers; and the area given in the village papers of the United Provinces, the Central Provinces, Madras, the Panjab, and the North-West Frontier Province differs to some extent from the area ascertained by professional survey. The actual area therefore for which statistics are prepared is 615,332,755 acres, or 961,457 square miles.

Less than two-thirds of this area is available for cultivation; 82,282,579 acres are under forests; and land absolutely barren or unculturable or covered by buildings, water, and roads, or otherwise appropriated to uses other than agriculture amounts to 153,526,625 acres. The balance 379,523,551 acres represents the area available for cultivation, of which 210,883,511 acres were actually cropped during the year. The remainder is divided between current fallows (55,351,706 acres) and land available for cultivation but not cultivated and not classed as current fallows (113,288,334 acres).

Table No. 3 shows the number of acres cultivated with each kind of crop in each year. In the case of land from which more than one crop is taken, the area actually cultivated is shown under each crop-heading, but the total number of acres from which more than one crop was taken in the year is also recorded. Thus, in 1907-08, the total area cultivated with different crops was 237,635,144 acres. But 26,751,633 acres were cropped more than once. The net area cropped according to the available statistics is therefore only 210,883,511 acres.

The proportion which this area bears to the whole area of India may be seen from the following summary:—

	Acres.
Total area of India . . . . .	1,136,449,383
<i>Deduct</i> —Area not dealt with in this Volume—	
1. British Baluchistan . . . . .	29,859,840
2. Shan States . . . . .	37,065,600
3. Native States under the Government of India (partly dealt with in Volume II and also in appendices A and B. of this Volume) . . . . .	315,589,934
Balance dealt with in this Volume, tables 1—6 and appendix C . . . . .	753,934,009
<i>Deduct</i> —Area for which no Agricultural Statistics are available—	
1. Tributary and Feudatory States under Local Governments . . . . .	130,985,447
2. Other areas for which returns are not prepared . . . . .	3,492,429
Balance for which Agricultural Statistics are prepared . . . . .	619,456,133
Corresponding area in village papers . . . . .	615,332,755
<i>Deduct</i> —Area not available for cultivation—	
1. Forests . . . . .	82,282,579
2. Others . . . . .	153,526,625
Balance available for cultivation—	
1. Uncultivated . . . . .	113,288,334
2. Fallow . . . . .	55,351,706
3. Actually cropped . . . . .	210,883,511

The notes prefixed to each table explain the changes which have been made since 1866 in the tables now published. The general instructions for compilation are given in the General Notes, and local peculiarities or methods of compilation are mentioned in the Provincial Notes.

Such statistics as have been supplied for the permanently-settled tracts of Bengal and Eastern Bengal have been included in the tables since 1892-93; but, with the exception of the North Bihar and Orissa districts in Bengal and Chittagong and Backerganj in Eastern Bengal, which have recently been surveyed, they are not based upon accurate surveys or village papers, and must therefore for the most part be regarded as estimates.

The Native States from which agricultural statistics are received are Mysore, from 1886-87; Jaipur, from 1892-93; Gwalior, from 1896-97; Bikaner, Marwar and Tonk, from 1898-99; Alwar, Bharatpür, Kishangarh, Jhalawar and Kotah, from 1900-01; Indore, Rajgarh, Narsingarh, Nagod, Patiala, Nabha and Bahawalpur from 1907-08. The statistics relating to all these States, which in some cases are very imperfect, are separately printed as volume II. Those tables however which cannot be split up and contain figures for Native States as well as for British provinces are inserted in volume I. These are appendix A "Estimated Area and Yield of Crops" (including Hyderabad, Mysore, and certain States in Rajputana, Central India, Bombay, and Sind); and appendix B "Average Yield of Principal Crops" (including Mysore).

Certain statements are prepared for the Agricultural (or the Revenue) year which ends on different dates in different provinces:

Year ending 31st March . . . . .	in Bengal, Eastern Bengal and Assam, Coorg and Maupur;
" " 31st May . . . . .	in the Central Provinces and Berar;
" " 30th June . . . . .	in Madras, United Provinces, Burma, and Ajmer-Merwara;
" " 31st July . . . . .	in Bombay;
" " 30th September . . . . .	in the Panjab and the North-West Frontier Province.

The crop statistics, however, in every province refer to the year closing with the harvesting of the *rabi* or spring crop.

A glossary is attached to this note giving the meaning of vernacular words used in the explanatory notes which are prefixed to the tables in this volume.

## Vernacular terms used in the Explanatory Notes.

**Bané** (Coorg).—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.

**Bhagdari**.—See *Narvadari*.

**Gorait** (United Provinces).—Village watchman.

**Indm** (Madras).—Whole *indm* villages are *entire* villages held on such tenure; *minor indms* are portions of villages, generally a number of fields held on *indm* tenure.

**Istamári** (Panjab, Ajmer-Merwara).—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.

**Izáfat** (Bombay).—A form of service tenure.

**Isdra** (Berar).—Land leased under the waste-land rules on stipulated terms.

**Jagír** (Berar).—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.

—(Ajmer-Merwara).—Land granted revenue-free on condition of military service or as a charitable endowment.

—(Bombay).—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.

—(Coorg).—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.

**Jamma** (Coorg).—A tenure under which lands are held on half the ordinary assessment on condition that the holders should perform certain services to Government, if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.

**Jodi** (Madras).—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, *minus* the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.

**Khálsa** (Bombay).—Government occupancy or raiyatwari tenure.

—(Central Provinces).—Areas settled on *malguzari* or *thekadari* tenure, in contradistinction to *zamindari*.

—(Berar, Ajmer-Merwara).—Land paying full revenue to Government.

**Khatedar** (Berar).—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.

**Khiraj** (Assam).—Land assessed to full revenue.

**Khoti** (Bombay).—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.

**Kwin** (Burma).—A tract of land separated from other tracts by some well-defined boundaries, such as creeks or belts of forest.

**Lakkiraj** (Assam).—Revenue-free land.

**Mahalkari** (Bombay).—A revenue and police officer in charge of a sub-division of a taluk.

**Malguzari** (Central Provinces).—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.

**Malikmakbuza** (Central Provinces).—A person owning one or more plots of land separately assessed to revenue in a village, who is not a *malguzar*, inferior proprietor, or a member of the proprietary body of that village.

**Mamlatdar** (Bombay).—The chief revenue and police officer (native) in charge of a taluk.

**Mehwasi** (Bombay).—A proprietary tenure assessable to revenue at a lump sum.

**Milankhasra** (Bombay and Central Provinces).—An abstract record in which the village area is classified.

**Mittas, Palayams** (Madras).—Certain classes of permanently-settled estates differing in their origin from *zamindaris*. *Mittas* were artificial estates created under Madras Regulation XXV of 1802, while *palayams* are the estates of *poligars* or old chieftains. Most of the latter have been granted title-deeds of permanent settlement under the Regulation mentioned, but a few have not been settled, though in practice their revenue is treated as fixed.

**Muafi** (Manpur).—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to *jagirs*.

**Munsarim** (Berar).—A head native revenue officer.

- Narvadari, Bhagdari* (Bombay).—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump, and in the latter distributed by rates over fields.
- Nazul* (United Provinces).—Property escheated or lapsed to the State.
- Nisfkhiraj* (Assam).—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.
- Palampat* (Berar).—Land held on payment of a quit-rent, but not necessarily hereditary.
- Parpattigar* (Coorg).—A revenue officer in charge of a sub-division of a taluk.
- Patel* (Coorg).—Village headman appointed by Government.
- Peshkash* (Madras).—The fixed land revenue payable to Government on all permanently-settled estates.
- Poramboke* (Madras).—Lands reserved for public or village communal purposes.
- Poti imams* (Bombay).—Lands sub-alienated in alienated villages.
- Poti kharda* (Berar).—The unculturable area included in a survey number.
- Shandog* (Coorg).—A village accountant appointed by Government.
- Shrotriem* (Madras).—Village held on grant (originally to Brahmins), wholly or partially revenue-free.
- Talukdari* (Bombay).—A form of proprietary right in force in the northern districts of Bombay.
- Thathameda* (Upper Burma).—Household tax.
- Thekadar* (Central Provinces).—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.
- Udhaa-jamabandi* (Bombay).—A proprietary tenure subject to fixed assessment.
- Umblis* (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.
- Zamindar* (Central Provinces).—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.

**Summary of the Agricultural Statistics of British India**

---

## SUMMARY OF THE AGRICULTURAL

<i>Area in acres :</i>	1898-99	1899-1900	1900-01	1901-02	1902-03
1. By professional survey (a)	547,637,835	547,502,798	548,738,661	552,920,151	554,052,949
2. Under forest . . . . .	64,753,597	65,843,924	66,305,506	66,363,530	67,562,698
3. Not available for cultivation .	139,211,630	138,150,727	138,488,965	137,963,527	136,767,571
4. Culturable waste . . . . .	106,292,719	106,404,160	104,727,080	107,525,236	108,062,430
5. Fallow land . . . . .	41,200,284	57,165,960	42,212,336	42,146,623	37,252,452
6. Net area cropped . . . . .	196,487,658	180,150,454	197,115,565	199,708,422	205,239,350
7. Irrigated . . . . .	30,370,288	31,509,404	30,017,686	32,581,800	32,912,410
8. Under—Rice . . . . .	74,778,045	72,808,952	69,026,273	70,067,328	71,633,546
Wheat . . . . .	20,225,111	16,104,779	20,103,024	18,606,958	19,615,862
Barley . . . . .	7,072,867	6,611,984	7,592,608	6,217,738	6,549,877
Jawar . . . . .	21,765,899	21,604,321	22,018,290	21,818,880	23,125,019
Bajra . . . . .	11,265,761	8,317,180	15,089,215	13,197,027	10,000,034
Ragi . . . . .	3,677,474	3,321,899	3,600,372	3,754,281	3,686,792
Maize . . . . .	6,144,240	5,195,472	5,849,583	6,198,063	6,331,816
Gram . . . . .	9,932,818	7,573,050	10,950,048	9,784,840	10,491,802
Other grains and pulse	27,189,964	23,341,158	27,814,783	27,854,480	28,662,996
Total food-grains . . . . .	182,052,179	164,878,795	182,045,146	176,999,595	183,713,264
9. Under—Sugar . . . . .	2,890,560	2,814,667	2,651,379	2,596,592	2,491,172
Coffee . . . . .	148,389	132,373	133,361	120,175	109,709
Tea . . . . .	482,959	493,187	502,173	495,539	505,932
10. Under other food-crops (in- cluding gardens and orchards, spices and condiments)	6,133,089	6,304,556	6,528,260	6,191,194	6,314,611
11. Under—Linseed . . . . .	2,493,736	1,526,447	2,145,317	2,266,208	2,335,603
Sesamum (til or jinjili)	3,107,745	3,440,120	4,089,272	3,753,457	4,462,473
Rape and mustard . . . . .	...	(b)2,343,012	4,070,706	2,879,032	3,113,879
Other oilseeds . . . . .	6,565,520	3,018,062	2,608,077	3,069,142	3,183,610
Total oilseeds . . . . .	12,167,001	10,327,641	12,913,372	11,967,839	13,095,565
12. Under—Cotton . . . . .	9,178,060	8,375,841	9,609,820	10,298,759	11,104,298
Jute . . . . .	1,690,739	2,070,668	2,102,236	2,278,205	2,145,707
Other fibres . . . . .	687,150	403,750	510,788	563,688	624,693
Indigo . . . . .	1,013,627	1,046,434	977,349	792,179	653,801
Opium . . . . .	602,975	640,263	621,891	607,418	608,331
Tobacco . . . . .	1,092,903	915,321	973,441	952,245	935,042
Fodder crops . . . . .	2,908,946	2,946,482	3,022,585	2,944,148	3,403,100
13. Of land transferred --					
By order of Court . . . . .	524,289	636,086	715,516	689,714	833,213
By private contract or gift	3,611,667	3,584,559	3,638,383	4,464,193	4,335,766

(a) Excluding areas for which no returns are available

(b) Figures for years previous to 1899-1900, and those for Panjab only for this year, are included under "other oilseeds"

## STATISTICS OF BRITISH INDIA

1903-04	1904-05	1905-06	1906-07	1907-08	Area in acres :

(a) Excluding areas for which no returns are available.

TABLE No. 1.—AREA.

In this table is entered the total area of each district, the areas for which statistics are and are not available being separately entered.

The corresponding tables of the earlier series are I A—1 of 1866, A of 1884, and A—1 of 1891. The headings differ as set out below :—

	1866 <u>I A—1</u>	1884 <u>A</u>	1891 <u>A—1</u>
Total area in square miles	Area according to Survey Department in acres.		Area according to professional Survey in acres.
	Deduct—		Deduct—
	(a) Feudatory and Tributary States.		(a) Feudatory and Tributary States.
	(b) Area for which returns are otherwise not available.		(b) Area for which no returns exist.
	Net area dealt with in this return.		Net area by professional survey. Corresponding area in village papers.

## GENERAL NOTES.

*Column 2 (pages 13—15).*—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The provincial areas in this column exclude Native States in direct political relations with the Government of India, but include Feudatory or Tributary States politically controlled by Local Governments, with the exception of the Shan States in Burma.

In *column 3* is entered the area of any Feudatory or Tributary States included in column 2.

*Column 4.*—In this column is deducted the entire area (exclusive of Native States) for which the statistics required for tables Nos. 2 and 3 are not forthcoming in whole or in part. This area comprises chiefly estates held in permanent settlement or on privileged tenure, which have not been cadastrally surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (5 and 6) and dealt with in tables Nos. 2 and 3 correspondingly increased.

*Columns 5 and 6.*—Column 5 is a check on the accuracy of column 6. In the latter "village papers" means "the papers prepared by the village accountants." They do not in several provinces relate to the whole area included in column 5; for instance, the village returns often do not include the forest areas. In such cases, column 6 must be taken to be the total area for which statistics are available, corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts which are calculated from village papers are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns.

In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of table No. 2.

## PROVINCIAL NOTES.

*Column 2 (pages 16—19).*—Where there has been no professional survey of the district the best information available is accepted, subject to revision from time to time as surveys extend. Approximate figures for the Chin Hills and for the Kachin Hills (in the Bhamo, Myitkyina and Katha Districts) have been included from 1906-07 and for the Pakokku Hill Tracts from 1907-08.

*Columns 4 to 6 (pages 20 and 21).*—Previous to 1906-07 column 4 stated all the hill districts, all permanently settled and *lakhiraj* estates, and areas not cadastrally surveyed in Cachar and Sylhet, except—(1) reserved forest areas, and areas under tea; (2) estimated cultivated areas in the permanently settled estates in Sylhet and Goalpara and certain cultivated areas in the Khasi and Jaintia Hills; and (3) the plains portion of the Garo Hills district. From 1906-07 returns based mainly on estimates have been prepared for the unsurveyed areas in Cachar, the permanently settled and *lakhiraj* estates in Goalpara, and the hill tracts of the Garo Hills district; and from 1907-08 such returns have been prepared for the Naga and the Lushai Hills and for the remaining unsurveyed tracts of Sylhet. These areas have therefore been excluded from column 4 and included in columns 5 and 6.

The statistics shown under Eastern Bengal deal with the 15 districts transferred from Bengal and combined with the old province of Assam to form the new province of Eastern Bengal and Assam. The figures for the Assam districts have been kept separate from those of the Eastern Bengal districts.

The area cadastrally surveyed is limited to 5,551,308 acres, which is only about 19 per cent of the whole area of Eastern Bengal (exclusive of Native States).

*Columns 2 and 3 (pages 22—23).*—Hill Tippera has been entered under a separate head as Feudatory State.

*Column 4.*—Prior to 1907-08 the whole area of the Chittagong Hill Tracts district used to be shown in this column; but from that year, the forest area of the district and an estimate of the cultivated area have been excluded from this column and included in columns 5 and 6.

The statistics for Bengal published in this volume deal with the 33 districts of the newly constituted Province: the 15 districts transferred to Eastern Bengal and Assam are excluded, and Sambalpur transferred from the Central Provinces to Bengal is included.

The area cadastrally surveyed is limited to 31,488,892 acres, which is about 43 per cent of the area of the province (exclusive of Native States).

*Columns 2 and 3 (pages 24—27).*—Since 1894-95 Sikkim, Cooch Bihar, and the Tributary States in Orissa and Chota Nagpur, have been classed under a separate head as Feudatory States.

*Column 2 (pages 28—32)* includes from 1907-08 the area of the Siwalik Range in the Dehra Dun district, which was formerly excluded.

*Column 4* included until 1906-07, the area of hill tracts which possess no agency for collecting statistics. It also included the area of the family domains of the Maharaja of Benares situated in the Benares and Mirzapur districts, and some portions of Jhansi and Ballia. From that year returns have been prepared for all these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

*Column 2 (page 33)* states the area as given in the settlement records.

*Column 4* shows the areas of certain khalsa-muafi, jagir, and istimrar villages for which no returns are at present available.

*Column 2 (page 14).*—There is no record of area according to professional survey. The area stated is that of the whole pargana including jagir and inam villages as given in the settlement records.

*Column 4 (pages 34—36).*—Prior to 1906-07 the figures in this column represented, except in Simla and Kangra, the area in river beds not accounted for in the revenue papers: in Simla and Kangra the figures referred to high mountainous tracts. From 1906-07 all these areas have been excluded from column 4 and included in column 5.

*Column 6.*—Up to 1905-06 this column excluded the area in river beds not accounted for in the revenue papers, and high mountainous tracts. In 1906-07 such areas were included except in the districts of Gurgaon, Simla, Kangra and Gujrat; but from 1907-08 figures, based more or less on estimates, for all these areas have been included.

*Column 3 (page 33)* represents the area of the Phulera and the Upper Tanawal States in the Hazara district, which was formerly shown in column 4 as area for which no returns exist.

*Column 2 (pages 37—39)* states the area as returned by the provincial revenue survey and settlement department, supplemented in the case of Native States by the returns of the topographical survey. The revenue survey being incomplete in Sind, the exact area of that province is not known: the column states the area of surveyed tracts plus the estimated area of unsurveyed tracts.

*Column 4.*—Up to 1906-07 this column included areas of all unsurveyed villages for which no returns were available. From 1907-08 estimates have been prepared for all these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

*Column 6.*—The figures of column 5 are repeated because the areas in village papers are derived from the revenue survey records.

*Column 4 (pages 40 and 41)* included up to 1905-06 the unsurveyed areas of zamindari\* estates and waste land grants for which no returns were available. From 1906-07 returns based on estimates have been prepared for these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

\* In the Central Provinces the zamindars are chiefs of minor importance (or their successors) who, while holding large and compact estates on privileged tenure, have been restricted to the rank of ordinary subjects.

*Column 6.*—The area for which accurate statistics are available is steadily increasing, and until the survey is complete and resettlement finished, there will always be changes which render comparison difficult.

*Berar.* *Column 2 (page 42)* states the area as ascertained by the local survey and settlement department.

*Madras.* *Column 2 (pages 43—45)* states the area as ascertained by the provincial survey department supplemented, for tracts which have not come under the operations of that department, by areas calculated from the returns of the topographical survey.

*Column 4.*—Up to 1906-07 this column included chiefly areas of zamindaris or large proprietary estates permanently settled, which have not been cadastrally surveyed and possess no adequate agency for the collection of statistics, except some of the estates under the Court of Wards and private European managers which furnished returns. It also included certain raiyatwari and whole inam villages for which no returns were forthcoming. From 1907-08, however, estimates have been prepared for all these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

*Columns 5 and 6.*—Up to 1906-07 these columns excluded the major portion of the zamindari estates and certain raiyatwari and whole inam villages for which statistics were not available, but from 1907-08 estimates for these estates have been prepared and included. It should, however, be borne in mind that these estimates are not comparable for accuracy with the figures which are collected by adequate agency employed for the purpose. Of the total area (87,155,387 acres) entered in column 6 for 1907-08, 66,668,801 are based on actual returns and 20,491,586 on estimates.

(a) The area of Kamptee cantonment

(b) In 1906-06 the major portion (about 78 per cent) of the Sambalpur district was transferred from the Central Provinces to Bengal. The remaining portion, together with the districts of Raipur and Biláspur, was formed into the three districts of Drug, Raipur and Biláspur. The figures for the years 1903-04 and 1904-05 for the whole of the old Sambalpur district are shown in the tables for Bengal in this volume.

(a) Constituted in 1906-07 out of Malabar

(b) Travancore and Cochin

(c) Excludes a gross area of 3,194,931 acres in North Arcot, South Arcot, Salem and Madura, for which details for succeeding Tables are not available

\* See explanation given in the Explanatory Notes (page 12)

TABLE No. 2—CLASSIFICATION OF AREA.

The first part of this table deals with the classification of the area entered in column 6 of table No. 1, and gives the proportions (columns 2 and 3) withdrawn from cultivation by inclusion under forests or for some other reason, (4) cultivable land available but not yet taken up, (5) land occupied but not under crop during the year of report, (6) the net area under crop, that is, after deduction of the area cropped more than once in the year. The second part (columns 8 to 13) gives the area irrigated from various sources, and (columns 14 to 18) the distribution of the irrigated area under specified crops.

The headings altered since 1866 are noted below :

1866 I A—1	1884 A	1891 A—2
Cultivated	{ Actually cropped	Net area cropped.
	{ Current fallows	Current fallows.
Culturable	Available for cultivation	Culturable waste other than fallow.
Unculturable	Not available for cultivation.	Not available for cultivation.
Unappropriated waste.	(Omitted)	(Omitted)
Communications	(Omitted)	(Omitted)

#### GENERAL NOTES.

*Column 2 (pages 50 and 52).*—“Forests” means “any land classed or administered as forest under any legal enactment dealing with forests.” Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped), an explanation being given in a note.

The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, amongst which are these: (1) because the forest administration reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, and (3) because, on the other hand, certain forest areas worked and returned by the Forest Department are not included in the areas for which village papers exist, and are therefore excluded from these tables.

*Column 3* includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

*Column 4* includes groves not classed in the cropped area. From 1901-02 areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

*Columns 8 to 13 (pages 50—53)* state the area actually irrigated during the year, areas cropped more than once being counted once only.

*Columns 14 to 18 (pages 51 and 53)* state the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop.

The excess in some cases of the total area of crops irrigated (column 18) over the total area irrigated (column 13) is thus due to the inclusion in column 18 of the area irrigated at both harvests.

The variations in the areas shown in different years under the same item in the same district do not necessarily represent an actual increase or decrease on the area in question. In many cases a revised classification or the correction of a faulty estimate is responsible for the change.

#### PROVINCIAL NOTES.

*Column 2 (pages 54—60).*—The area entered in this column is that given in the forest administration report, and includes reserved forests and fuel reserves. From 1906-07 estimates of the forest areas in certain hill tracts have also been included.

*Column 3.*—In settled tracts the unculturable area is taken from settlement registers, but in unsettled tracts it is obtained from the best source available.

*Column 4* includes land thrown out of cultivation and abandoned. Groves, not classed in the cropped area, and bamboos, when not grown in forest areas, are also included in this column.

*Column 5* includes only such land left uncultivated as is actually in possession of cultivators. In Lower Burma such lands are assessed at privileged rates, but in Upper Burma no assessment is levied on land left uncultivated.

*Columns 14 to 18* include only crops actually irrigated; for instance, where an un-irrigated crop of sesamum is taken off land which is afterwards irrigated and planted with paddy, the area grown with sesamum is not included in this column.

*Column 2 (page 62).*—“Forests” formerly included protected and reserved forests. Since 1893-94 reserved forests only have been entered. The figures differ slightly from those in the forest administration report because of the difference in the period embraced in the two statements.

*Column 5* includes generally all lands which are thrown out of cultivation or not cultivated, but remain in the occupation of leaseholders. Estimated figures for the Naga and the Lushai Hills have been included from 1907-08.

*Columns 8 to 18.*—No figures are available of areas irrigated except for Goalpara, Kamrup, Darrang and Nowgong.

*Column 2 (pages 64—66).*—The figures represent Government forests only.

*Columns 3 and 4* include private forests and unclassified State forests.

*Columns 8 to 18.*—No reliable figures are available of areas irrigated except for Rajshahi and Rangpur and for certain cadastrally surveyed tracts in some other districts.

*Column 2 (pages 68—74).*—Up to 1905-06 the figures represented Government forests only. From 1906-07 estimates of other forest areas, furnished by district officers, have also been included.

*Columns 3 and 4* included private forests and unclassified State forests up to 1905-06.

*Columns 8 to 18.*—Since 1898-99 the areas and crops irrigated from Government canals are stated; no figures are available of areas irrigated from other sources except for cadastrally surveyed tracts.

From 1906-07 estimates have been prepared and included for Almora, Garhwal, the hill portion of Naini Tal and of pargana Kera Mangraur in Mirzapur, for which complete figures were not available before.

*Column 2 (pages 76—84)* includes forest areas administered by the district officers of some districts. Hence the figures do not agree with those in the forest administration report which exclude these areas. From 1907-08 this column also includes the Siwalik Range in the Dehra Dun district which was formerly excluded.

*Column 5.*—The maximum period for which land left untilled is reckoned as fallow is three years.

*Columns 8 to 13.*—Government canals include private canals except in Naini Tal, for which district separate figures for private canals have been obtained since 1895-96. From 1903-04, however, the areas irrigated from certain private canals in Budaun and Basti and from 1907-08 such areas in Gorakhpur, which were formerly included under “other sources”, have been shown under the proper head “private canals.” There are very few private canals in the United Provinces.

*Column 2 (page 86).*—The forest area relates to khalsa, jagir, and minor istamrar villages, but excludes village lands managed by the Forest Department which do not technically constitute Government forests.

*Column 2 (page 50).*—The forest area relates to Government forests including those in jagir lands.

*Column 6* includes the area cropped in khalsa (Government) as well as in jagir villages.

*Column 2 (pages 88—94)* includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality.

*Column 3.*—From 1907-08 this column includes 23,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, 3,896,960 acres of mountain tracts in Kangra, and 24,998 acres of the “Pabbi” forest area in Gujrat. These areas are not accounted for in the village papers, and the figures are based more or less on estimates.

*Column 4* includes large areas of Government waste not allotted for cultivation.

*Column 5.*—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually. Previous to 1901-02 this column also included the lands on which the crops wholly failed, as well as a fraction of those on which they partially failed proportionate to the degree of the deficiency.

*Column 6.*—Previous to 1901-02 the figures in this column represented the area on which the crops harvested would have been grown in a year of normal productiveness. That is to say, each of the returns of the actual areas from which crops were taken was multiplied by a

fraction representing the relation of the crop harvested to a normal crop, and the difference between this product and the actual area was added to the fallow area. From 1901-02, however, the area sown has been reported without reference to the area harvested or the condition of the crops.

*Columns 8 to 18* state the gross area irrigated, that is, land irrigated in both seasons is counted twice. As regards columns 8 to 13, prior to 1906-07, areas which bore two crops under irrigation in a single harvest were also counted twice; but from 1906-07 such areas are only counted once. As regards columns 14 to 18, prior to 1906-07, the figures were those of harvested areas reduced to a standard of normal productiveness (see note to column 6 above); but from that year areas actually sown have been entered.

*Column 2 (page 96)* includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality, and protected village waste in Hazara administered by the district officer and other waste lands in Peshawar.

*Column 4* includes large areas of Government waste not allotted for cultivation.

*Column 5.*—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Dera Ismail Khan classification is amended according to area of each class of soil actually cultivated each year.

*Columns 8 to 18 (pages 96—97)* state the gross area irrigated, that is, land irrigated in both seasons is counted twice. As regards columns 8—13, prior to 1907-08, areas which bore two crops under irrigation in a single season were also counted twice, but from that year such areas are only counted once. As regards columns 14—18, prior to 1906-07 the figures shown in them were those of harvested areas, that is, excluding areas on which the crops failed, but from that year areas actually sown have been entered.

*Column 2 (page 98).*—The figures do not agree with those in the forest administration report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision survey, which the revenue records do.

From 1907-08 estimates have been prepared and included for all unsurveyed villages for which no figures were available before.

*Column 2 (pages 100—102)* includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the forest settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions.

*Column 3* includes all land recorded at the survey and settlement as unculturable, though at times a very small quantity of this land is cultivated.

*Column 5.*—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

*Columns 8 to 13.*—The figures given for private canals, tanks, wells, and other sources are rough estimates.

*Column 16.*—By "miscellaneous food crops" are understood the crops entered in table No. 3, as sugar, orchards and garden produce, and miscellaneous food crops.

*Column 2 (pages 104—106)* shows the areas administered by the Forest Department; but the figures differ from those in the forest administration report because the actual area of the forests is not known owing to incomplete survey, also because excisions made have not yet been taken note of in the forest registers, and because in many cases raiyatwari villages settled, thekadari villages surveyed, clearance lease villages earned in proprietary rights, and villages purchased under the waste-land sale rules, have not as yet been finally disforested and struck off the forest registers. In the case of the Chanda, Drug, Raipur and Bilaspur districts, this column also includes from 1906-07 all areas in the zamindars' estates which fall outside the surveyed villages of those estates. These areas are almost wholly under forest and include only a negligible proportion of sparse and shifting cultivation.

*Column 3* states areas covered with water, hill, or rock, and land occupied by buildings and roads.

*Column 4* states (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

*Column 5.*—Land which has been fallow for not more than three years is reckoned as current fallow.

*Column 2 (page 108)* includes the forest area administered by the Forest Department, but *Berar.* excludes a large area of cultivated land in the Melghat taluk in Ellichpur shown as forest in the forest report.

*Column 3* includes village sites, tanks and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

*Column 4* includes land available for cultivation but not given out.

*Column 5* includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.

*Column 2 (pages 110—112)* includes from 1895-96 the area cultivated within forests, and *Madras.* excludes the area of forests in the Native State of Sandur, in Bellary, not included in the village papers. As this is included in the forest administration report, it accounts partly for the disagreement of its figures with those in this table.

*Column 5* includes all occupied waste, that is to say, waste portions of land for which revenue is paid.

*Column 6.*—Of the total net cropped area for 1907-08 (33,802,828 acres) stated in this column, 27,645,708 are based on actual returns, and 6,157,125 on estimates.

*Column 10.*—The term "tanks" refers to a particular kind of dammed reservoirs.

*Column 13.*—Of the total area irrigated in 1907-08 (10,321,875 acres), 7,284,801 acres are based on actual returns, and 3,037,074 on estimates.

*Columns 14 to 18* (crops irrigated) were discontinued in 1898-99, but re-instated in 1907-08.

*Column 2 (page 52)* includes reserved and protected forests only. The management of the latter having been transferred to the revenue authorities, the figures shown in the forest administration report represent the area of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different.

*Column 3* includes unculturable Government waste and unculturable *banés.*

*Column 4* states the estimated area of culturable Government waste.

*Column 5* shows (1) the estimated area of culturable *banés*, and (2) the difference between the net area cropped and the gross area of the actual holdings (exclusive of *banés*). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained.

*Columns 8 to 13.*—Figures for land partly irrigated from springs and mountain streams are not available.

*Coorg.*

\* See explanation given in the Explanatory Notes (page 48)

(a) In 1905-06 the major portion (about 78 per cent) of the Sambalpur District was transferred from the Central Provinces to Bengal. The remaining portion together with the districts of Raipur and Bilaspur was formed into the three districts of Drug, Raipur, and Bilaspur. The figures for the years 1903-04 and 1904-05 for the whole of the old Sambalpur district are shown in the tables for Bengal in this Volume.

(b) Statistics of irrigation are not collected

(c) Excluding zamindari area

\* See explanation given in the Explanatory Notes (page 49)

TABLE No. 3—AREA UNDER CROPS.

This table states the gross cultivated area under each crop, irrespective of irrigation and double-cropping, the area under the latter being included in the statement, but subtracted in column 41. The area is that stated in column 6 of table No. 2.

The headings which have been modified since 1866 are —

1866 III D-1	1884 B	1891 A-3
Other food-grains . . . . .	Other food-grains, including pulses	Barley. Cholam or jawar. Cambu or bajra. Ragi or marua. Maize. Gram. Other food-grains, including pulses.
Oilseeds . . . . .	Oilseeds . . . . .	Linseed. Til or jinjili. Others.
Sugar . . . . .	Sugarcane . . . . .	Sugarcane. Others.
Fibres . . . . .	{ Cotton . . . . . Jute . . . . . Others . . . . .	Cotton. Jute. Others.
Vegetables . . . . .	(Omitted) . . . . .	(Omitted).
Opium . . . . .	" . . . . .	Opium.
	Cinchona . . . . .	Cinchona.

The following items were added in 1891 :—

Condiments and spices.  
Other dyes.  
Indian hemp.

Other drugs and narcotics.  
Fodder crops.  
Orchards and garden produce.

Since 1899-1900 "rape and mustard" have been separated from the head "Other oilseeds."

#### GENERAL NOTES.

In 1896 the Government of India decided that in this table should be entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown should be omitted.

Previous to this decision there was no uniformity of practice. The figures in the table represented: for Madras, Ajmer-Merwara, and Pargana Manpur the area sown or placed under crop; for Bombay the area sown, but any area on which the crop failed was treated as unsown; for the United Provinces the total cultivated area exclusive of the double cropped area and the area on which *khariif* (autumn) sowings failed; for Bengal, the Panjab, and the Central Provinces the area from which crops were actually taken. Again, in Assam, Berar, and Mysore, the area sown or placed under crop was stated for some districts, while for others the figures represented the area from which crops were actually taken. In Coorg neither the area sown nor the area actually cropped was stated: but all wet land paying assessment as cropped was entered.

In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities.

Columns 10, 15, 19, 22, 27, 34, 38, and 39 (pages 116-121).—The selection of crops for inclusion in these columns is left to the provincial authorities.

Columns 29 and 30 (pages 120 and 122).—The areas stated under "Coffee" and "Tea" differ in certain cases, especially in Madras, from those given in the special reports on tea and coffee production published separately. The principal reason is that the special reports are prepared from returns received from managers and owners of estates; and these returns, especially in Southern India, are inaccurate and defective. Minor discrepancies are also due to the fact that the figures in this table deal with the agricultural year; while those in the special reports deal with the calendar year.

The variations in the areas sown in different years under the same crop in the same district do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

#### PROVINCIAL NOTES.

*Lower* The table states the actual area sown, including the area on which crops have been destroyed, but excluding fallow. Land on which more than one crop has been grown is entered as a separate crop area.

In Cachar accurate statistics of the area under crops other than tea is available only for the cadastrally surveyed tracts, in Sylhet only for the Jaintia Parganas and Partabgarh, and in Goalpara only for the temporarily settled tracts. Estimates have, however, been prepared and included for the permanently settled tracts in Sylhet and Goalpara from 1895-99 and for the unsurveyed areas in Cachar from 1906-07. Until 1895-96 the figures for the five upper districts of the Assam valley related only to tracts cadastrally surveyed, and to *khiraj* lands and tea estates not cadastrally surveyed. Since that year the whole cropped area in these districts has been stated, with the exception of a small area cultivated by tribes paying house or poll-tax in Lakhimpur, Sibsagar, and Kamrup. In the Garo Hills district the areas under different crops are available for the plains tracts only, but from 1906-07 estimates for the hill tracts have also been included. No statistics are available for the Naga and the Lushai Hills.

*Column 37 (page 143).*—The area under orchards and garden produce includes village sites.

As no statistics are at present prepared by village or circle officers, the figures entered in this table are merely estimates, except those for Chittagong and Backerganj, in which the estimates are based on the figures collected during the cadastral survey.

No statistics are at present prepared by village or circle officers, except in the Sambalpur district. The figures for all other districts entered in this table are therefore merely estimates, except those for Sâran, Champâran, Muzaffarpur, Darbhanga, Bhagalpur, Purnea, Puri, Cuttack (exclusive of small permanently settled areas), Balasore, Angul, and the Sauthal Parganas, in which the estimates are based on the figures collected during the cadastral survey.

The area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crop by the village accountant. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jawar and arhar, bajra and arhar, and cotton and arhar, for which separate headings are provided in the crop statements, were included up to 1893-94 with "other food-grains including pulses." Since 1894-95 they have been distributed in accordance with prescribed formulæ and entered under the crops of which they are composed.

There is no agency for the collection of statistics in Almora, Garhwal, and the hill tracts of Naini Tal and Mirzapur; but from 1906-07 estimates have been framed for Garhwal and the hill tracts of Mirzapur.

*Columns 3, 4, 9, and 11 (pages 168—190).*—The whole of the area of the land planted with food-grains (wheat, barley, gram, etc.) mixed with oilseeds is shown under food-grains in this table. The area shown under food-grains which was really planted with oilseeds (as a mixed crop) is roughly estimated to have been 3,039,000 acres in the whole of the United Provinces of Agra and Oudh in 1907-08.

*Columns 12, 13, 14, and 16 (pages 169—191).*—The figures shown in these columns represent areas under "pure" oilseeds, *i.e.*, oilseeds sown unmixed with any other crop. Besides these, the oilseeds are thinly sown in combination with wheat, barley, gram, and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1907-08 (for the whole of the United Provinces of Agra and Oudh) to 263,000 acres of linseed, 900,000 acres of sesamum, and 1,870,000 acres of rapeseed.

The areas stated are actual areas sown or placed under crop in Government and jagir villages.

Prior to 1906-07, the figures in columns 2 to 39 (*pages 200—215*) did not represent the actual acreage, but the area of each harvest reduced to a conventional standard of normal productiveness. That is to say, each of the returns of the actual areas from which crops were taken was multiplied by a fraction representing the relation of the crop harvested to a normal crop. The figures in column 40 represented the area sown without reference to the area harvested and the condition of the crops; and they therefore differed from the totals of columns 2 to 39. This difference was 3,921,395 acres in 1903-04, 4,313,157 acres in 1904-05, and 6,388,136 acres in 1905-06.

From 1906-07 the areas actually sown have been shown in all the columns.

As in the Panjab, the areas under each crop (*pages 216—219*) for the years prior to 1906-07 are not actual areas, and similarly the total in column 40 exceeds the sum of the details in columns 2 to 39. This excess was 420,824 acres in 1903-04, 521,362 acres in 1904-05, and 410,722 acres in 1905-06.

From 1906-07 the areas actually sown have been shown in all the columns.

From 1907-08 estimates have been framed and included for all unsurveyed villages for which no figures were available before.

*Column 37 (pages 237 and 239)* includes groves situated within the home farm of the landlord or the holding of a plot proprietor or tenant.

*Column 36 (pages 251—253)* states the areas sown with grass and crops solely for fodder. Lands left waste for grazing and on which grass grows spontaneously are not included in this column.

*Column 32 (page 122).*—The cultivation of cinchona has to all intents been entirely abandoned in Coorg.

\* See explanation given in the Explanatory Notes (page 115)

(a) Statistics not available

(b) Includes areas under "Condiments and Spices", "Maize," and "Gram"

(c) Includes areas under "Sesamum", "other fibres", "Indigo", and "other dyes"

(d) Includes areas under miscellaneous non-food crop

(e) Includes 222,880 acres in the Naga and Lushai Hills for which details of crops are not available

No. 3-D

(a) In 1905-06 the major portion (about 78 per cent) of the Sambalpur district was transferred from Central Provinces to Bengal. The remaining portion together with the districts of Raipur and Bilāspur was formed into the three districts of Drug, Raipur, and Bilāspur. The figures for the years 1903-04 and 1904-05 for the whole of the old Sambalpur district are shown in the Tables for Bengal in this volume.

\* See explanation given in the Explanatory Notes (page 115)

TABLE No. 4—LIVE-STOCK, PLOUGHS, AND CARTS.

This table deals with agricultural stock. The headings of the form now in use differ from those of 1866 and 1884 in the following respects:

1866	1884	1891
III D—2	III D—2	A—4
Cows and bullocks . . . . .	Cows and bullocks . . . . .	{ Bulls and bullocks. Cows. Male buffaloes. Cow buffaloes. Young stock (calves and buffalo calves).
.....	Buffaloes . . . . .	
.....	.....	
Horses } . . . . .	Horses and ponies . . . . .	Horses and ponies.
Ponies }		
Donkeys . . . . .	Mules and donkeys . . . . .	Mules and donkeys.
Sheep and goats . . . . .	Sheep and goats . . . . .	{ Sheep. Goats. Camels.
.....	.....	

In most provinces mules have been separately enumerated since 1899-1900.

#### GENERAL NOTES.

In some provinces the figures include, and in others exclude, animals in towns, cities, and cantonments. The Government of India decided in 1896 that live-stock in cities and cantonments should be included wherever it is possible to secure their enumeration, and that oxen and buffaloes not old enough for work or to produce young should be treated as "young stock."

The figures generally are greatly lacking in accuracy.

#### PROVINCIAL NOTES.

The figures of live-stock in Upper and Lower Burma were collected until 1897-98 by thugyis or headmen when preparing the capitation tax or *kathameda* (household tax) rolls, or when required for the statement. Cattle were not counted on any particular day.

Since 1898 annual statements of cattle and agricultural implements have been prepared in Lower Burma, during the field season, by circle thugyis and revenue surveyors.

The figures include all animals in towns and also those employed in each district by Government departments, such as transport, military, police, and by municipalities.

The statistics are based on a cattle census taken every five years. The census is, however, not taken at one time throughout the province.

In the Assam Valley districts (excluding the permanently-settled tracts of Goalpara) the last census was taken in 1904. In Cachar it was taken in 1907, and in the Garo Hills (plains portion only) in 1903.

In Sylhet the last census was taken in 1904 in the Jaintia Parganas only; for the rest of the district an estimate was made on the assumption that the proportion between cattle and population found in the Jaintia Parganas holds good in the rest of the district.

Statistics of live-stock are collected only in tracts where surveys are being made or a record of rights prepared. The figures, however, are not collected each year, but for each tract when the tract is under survey. In the present table figures have been given only for the two districts of Backerganj and Chittagong, of which the whole area has been cadastrally surveyed.

Statistics of live-stock are collected only in tracts where surveys are being made or a record of rights prepared. The figures, however, are not collected each year, but for each tract when the tract is under survey. In the present table figures have been given only for the eight districts of Champaran, Muzaffarpur, Saran, Darbhanga, Balasore, Angul, Puri, and Sambalpur, of which the whole area has been cadastrally surveyed.

Until 1897-98 the figures of live-stock were obtained by an annual census made by the patwari when he made his round for the record of the spring crops. A rough record of the detail for each tenant was made by the patwari and tested from time to time by the kanungo. The resultant totals were preserved in the patwari papers. The table is now prepared quinquennially on a census in each district taken every five years. The last census was taken in 1903-04 in all the districts, except Almora and Garhwal, under the supervision of the superior kanungoes and such members of the district and tahsil staff as could be spared. For Almora and Garhwal the figures collected in the previous census of 1898-99 were retained. The figures obtained by the quinquennial census are believed to be more accurate than the earlier figures.

The table is prepared quinquennially, and the figures were last collected in 1903-04.

An annual census is taken on the 15th March.

Until 1897-98 the table was based on figures furnished by patwaris who made an enumeration of the cattle in a village every fourth year, when a detailed *ja mbandi* was prepared. The enumeration was not made on a particular day, but whenever the patwari found time for it, between April and August. The result was that in a fourth of the province an enumeration was made every year, and the fresh figures for that fourth part were incorporated in the annual statement by subtracting from the preceding year's figures the old statistics and adding the new figures. This system has been replaced by a census for the whole province to be taken every fifth year in the first week of February. The last census was taken in February 1904.

Until 1896-97 stock in cantonments was excluded except in Lahore. Since that year cattle in cantonments and municipalities have been included; and since 1897-98 all cattle belonging to Government have been included.

A census for the whole province is taken every fifth year in the first week of February. The last census was taken in 1904. All cattle belonging to Government were included.

Until 1901-02 the figures were collected annually by village officers at a house-to-house enquiry in June. In that year it was decided that they should be collected once in five years, and the first quinquennial return of live-stock was prepared for 1905-06. The next return will be due for 1910-11.

All animals belonging to a family are entered against the name of the head of the family even though the animals are temporarily absent from the village. Animals belonging to other villages are excluded, and those belonging to a roving grazier who has no permanent residence are noted, but are not included in the village resources. The figures are regularly tested by circle inspectors (*kanungoes*).

Stock statistics are not collected in the city of Bombay. Arrangements are, however, being made for the enumeration of stock there in 1910-11.

The figures were collected for the first time in 1899-1900; and, as in Bombay, it was decided in 1901-02 that they should be collected once in five years, and the first quinquennial return of live-stock was prepared for 1905-06.

The figures are collected annually, between the 1st January and the 15th March, by the patwaris for each village of the areas in their charge. The total figure is recorded in the *tahsil* by the *kanungo* in a village register. The patwari takes into account all animals, including those temporarily sent elsewhere (*e.g.*, for grazing), which belong to residents of the village, and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Stock in cities, large towns, and cantonments has been included from 1896-97 and that in forest villages from 1907-08.

A census is made annually by the village officers.

All cattle belonging to one owner are entered against his name, even though the animals are temporarily absent from the village. When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other villages, but temporarily in the village for grazing, are not entered in the statement for that village.

Previous to 1884 a census was taken every five years. From that year until 1898-99 a census of cattle in Government villages was taken annually, but it was then decided to revert to the former practice and take a census every five years. The last quinquennial census was taken in 1904-05. In *inam* villages, however, there is no suitable agency for the work, and Collectors obtain information for these villages as best they can: it is not known to what extent any census is made in them. No information exists regarding live stock in permanently-settled (*zamindari*) estates.

The table includes stock statistics of all towns and cantonments except those in *zamindaris*, and those which do not form part of any revenue village and where the statistics are not collected because there is no agency for the purpose.

The table is prepared quinquennially on a census taken every five years.

The last census was taken in March 1905 by the circle *shanogs*, and the particulars entered in a register maintained under Rule 73 of the Rules framed under the Coerg Land and Revenue Regulation, 1899.

Animals in municipal towns are included.

TABLE No. 5—LAND REVENUE.

This table is intended to indicate the relation between area, population, and land revenue, or, in other words, to exhibit the mean burden of the State assessment on the land assessed to it and on the community at large. It was prescribed in 1884, and revised in 1893. Similar information previous to 1884 is contained in Tables I D, I E—2, and I E—6, appended to the General Administration Reports.

The two main classes of tenure, (1) raiyatwari and (2) zamindari and village communities, specified in 1884, were not exhaustive, and the provincial administrations were allowed to make additions in accordance with local requirements. The table now states all tenures under one or other of three heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

The present form differs from that prescribed in 1884 in the following respects:—

1884	1893
I.—(1) Raiyatwari (2) Zamindari and village communities	{ (1) Raiyatwari. (2) Zamindari and village communities (temporarily settled). (3) Zamindari (permanently settled).
II.—Deduct area not fully assessed, including estates assessed at privileged rates.	{ Deduct { (a) Area not fully assessed. (b) Area for which the returns required for this table are not available.
III.—Balance of area fully assessed.	{ Balance, that is, fully assessed area for which returns are available. (a) Total. (b) Cultivated.

## GENERAL NOTES.

In July 1893 the following rules were prescribed for filling in this table:—

*Entry 1 in general table No. 5 (pages 284—289), column 2 in provincial tables Nos. 5 (A to O) (pages 296—322).*

The varieties of tenure entered should be included, as far as possible, under one or other of the following heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

*Entry 2 (a) in general table (pages 284—289), column 3 (a) in provincial tables (pages 296—322).*

Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population head 10 (column 11). In Madras, Bombay, and Berar all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) should be classed for the purposes of this column as "area not fully assessed." Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

*Entry 3 in general table (pages 284—289), column 4 in provincial tables (pages 296—322).*

This column should be subdivided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste.

*Entry 4 in general table (pages 284—289), column 5 in provincial tables (pages 296—322).*

Where the land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those due by raiyats to the zamindars. The actual realisable demand for the year should be entered, after excluding arrears for past years. Sums remitted on account of unoccupied lands, short crops, etc., should be excluded. In 1904 it was decided by the Government of India that this column should include all the heads classed as "Land Revenue" in the Civil Accounts.

*Entry 7 in general table (pages 290—295), column 8 in provincial tables (pages 297—323).*

As in entry 4 (column 5), but only ordinary land revenue on fully assessed areas is to be entered.

*Entry 8 in general table (pages 290—295), column 9 in provincial tables (pages 297—323).*

To be entry 7 (column 8), divided by entry 3 (a) [column 4 (a)].

*Entry 9 in general table (pages 290—295), column 10 in provincial tables (pages 297—323).*

To be entry 7 (column 8), divided by entry 3 (b) [column 4 (b)].

Areas under forest are included in entry 1 (column 2), under the prevailing tenure of the province.

The population in entry 5 (column 6) is that of the last general census.

### PROVINCIAL NOTES.

*Column 1 and 3 (a) (page 296).*—No areas are now classed as zamindari, as no system of communal assessment prevails. Column 3 (a) shows grants under Appendices I and II of the Rules under the Upper Burma Land and Revenue Regulation. Before 1902-03 such grants were classed as zamindari (temporarily settled).

*Column 3 (b)* includes non-State lands in districts where no land revenue rates are yet imposed and where the *thathameda* rates have not yet been adjusted.

*Column 4 (a)* contains figures of State and non-State lands assessed to land revenue, including current fallows which are not assessed to land revenue. This column also includes the areas of waste land grants of which the rates have been fixed in perpetuity.

*Column 5* states ordinary land revenue, *thathameda*, water rate, rents of fisheries, and items under "Miscellaneous Land Revenue," appearing in the Civil Accounts.

*Column 8 (page 297)* states the ordinary land revenue, as defined in the Civil Accounts, on areas fully assessed.

*Column 11.*—The population of villages and kwins is considered as belonging to fully or not fully assessed area accordingly as the greater portion of the village or kwin lands are or are not fully assessed.

*Column 1 (page 298).*—No areas are now classed as zamindari, as no system of communal assessment prevails. Before 1893-94, however, all grants made under the waste land rules were classed as zamindari (temporarily settled); and since that year until 1902-03 grants under the waste land rules of Arakan (1839-41), and Pegu (1865), were classed as zamindari (temporarily settled), while grants under Lord Canning's rules (1863) were classed as zamindari (permanently settled).

*Column 3 (a)* includes special grants which are not yet fully assessed.

*Column 3 (b)* includes old grants exempt from the payment of revenue under special terms.

*Column 4 (a)* states the areas of occupied lands, cultivated or left fallow; it also includes the areas of waste land grants of which the rates have been fixed in perpetuity.

*Column 4 (b)* excludes current fallows.

*Column 5* shows ordinary land revenue, rents of fisheries, and the items under "Miscellaneous Land Revenue," appearing in the Civil Accounts.

*Column 8 (page 299)* states the ordinary land revenue, as defined in the Civil Accounts, on areas fully assessed; revenue on fallow areas which are treated as fully assessed is also included.

*Column 1 (page 300).*—*Raiyatwari* includes all unsettled Government waste and forest and areas in which house-tax or poll-tax is levied. *Zamindari (temporarily settled)* includes fee-simple grants, wholly or partially revenue-free tenures, and grants under progressive assessment; it also included up to 1901-02 certain temporarily settled estates in Sylhet, but from 1902-03 they have been included under raiyatwari.

*Column 3 (a)* excluded until 1902-03 an area of 21,000 acres of *lakhiraj* land in Goalpara, which was treated as fully assessed area on account of the difficulty of separating its population from that of the permanently-settled estates. It also excluded until 1903-04 about 78,000 acres of uncultivated land in the revenue-free estates.

*Column 5* includes all the items falling under the head "Land Revenue" in the Civil Accounts.

*Column 6* included the population of the Feudatory States in the Khasi and Jaintia Hills until 1900-01, but from 1901-02 the column shows the population of British territory only.

*Column 10 (page 301).*—Since 1893-94 the incidence has been calculated on the cultivated portion of the fully assessed area. Information has not been available for the cultivated portion of the fully assessed area in Sylhet from 1903-04, in Kamrup from 1905-06, and in Nowgong from 1906-07.

The table is prepared quinquennially, and the figures were last collected in 1907-08.

*Column 1 (page 302).*—Since 1896-97 the following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily-settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

*Column 2* stated until 1896-97 the area of estates borne on the revenue roll of the district, whether entirely situated within the district boundaries or not, and did not include lands of estates partly situated within the district boundaries but borne on the revenue roll of another district. This accounted for the discrepancy between the district areas stated in this column and those entered in table No. 1.

Since 1896-97 the area in this column agrees with the area entered in table No. 1. It represents the total area by survey less the area of Feudatory States.

*Column 4 (b)* includes in certain cases fully assessed current fallows.

*Column 5* includes all the items falling under the head "Land Revenue" in the Civil Accounts.

The table is prepared quinquennially, and the figures were last collected in 1906-07.

*Column 1 (pages 304—306).*—Since 1896-97 the following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily-settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

*Column 2* stated until 1896-97 the area of estates borne on the revenue roll of the district, whether entirely situated within the district boundaries or not, and did not include lands of estates partly situated within the district boundaries but borne on the revenue roll of another district. This accounted for the discrepancy between the district areas stated in this column and those entered in table No. 1.

Since 1896-97 the area in this column agrees with the area entered in table No. 1. It represents the total area by survey less the area of Feudatory States.

*Column 5* includes all the items falling under the head "Land Revenue" in the Civil Accounts.

The table is prepared quinquennially, and the figures were last collected in 1906-07.

*Columns 3 (a) and 3 (b) (pages 308—310)* exclude small revenue-free plots, for which details are not forthcoming.

*Column 4 (b)* states the net cropped area of the year corresponding with that in column 4b of table No. 3 (area under crops), but limited to the fully assessed area for which returns are available of column 4 (a).

*Column 5* states—(1) "ordinary revenue," comprising (a) fixed collections, (b) fluctuating collections (including collections from estates under direct management), (c) surplus collections, and (d) collections from Government estates; (2) sale-proceeds of Government estates; (3) sale-proceeds of waste lands and redemption of land tax, comprising (a) capitalised value of abatement of land revenue, etc., and (b) other receipts; (4) "miscellaneous," comprising (a) malikana revenue, (b) fines and forfeitures of revenue courts, (c) recoveries in India of law charges in England on account of appeals from India, (d) rent of railway class C lands and rents of buildings situated on such lands, (e) recoveries on account of law charges in civil suits, (f) recoveries of cost of erecting boundary pillars, (g) contribution on account of establishment for attached estates, (h) miscellaneous receipts, (i) mutation fee, (j) mutation fines, (k) sale of waste paper, (l) land revenue on resumed gorait jagirs in Basti, (m) receipts from quarries and minor mineral products in forests and land not under the management of the forest department, (n) recoveries of building advance to patwaris, (o) water mill rent, (p) voluntary contributions for the maintenance of special patwari circles, and (q) patwari miscellaneous receipts (including receipts for sale of waste patwari records).

*Column 6.*—The total population of the provinces excludes the population of the family domains of the Maharaja of Benares in the Benares and Mirzapur districts, except that of the Gangapur taluka in Benares.

*Column 11 (pages 309—311)* includes population of revenue-free lands when the area of such lands is less than an entire village. The inclusion does not materially affect the incidence entered in column 12.

No figures have been entered in columns 8 to 13 opposite "Lucknow, permanently settled," as no portion of the permanently settled area has been fully assessed to land revenue.

*Columns 13 and 14.*—The figures are taken from the latest census report.

The table is prepared quinquennially, and the figures were last collected in 1906-07.

*Column 1 (page 310).*—Since 1893-94 the khalsa area has been classed as "zamindari and village communities (temporarily settled)" and the jagir and istamrari areas as "zamindari (permanently settled)".

*Column 4* includes in the case of the khalsa villages the assessed cultivated area, including assessed fallows.

*Column 5* states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

*Column 10 (page 311).*—The cultivated area is, in the case of "zamindari (temporarily settled)," the cropped portion of the fully assessed area.

*Column 11* excludes population of jagir villages.

*Entry 5 (page 287)* includes since 1893-94 the population of jagir villages which was previously omitted.

*Columns 3 (a) and 3 (b) (page 312)* include villages receiving frontier remissions, tracts <sup>P</sup> which are entirely unassessed (such as the Kulu mountains), and istamrari tenures.

*Column 5* includes assigned revenue. As regards the heads of land revenue included in this column until 1903-04, the practice was not uniform, different districts having included different items. From that year the column includes all the items falling under the head "Land Revenue" in the Civil Accounts.

*Column 10 (page 313).*—The cultivated area taken for calculating the incidence is, since 1893-94, exclusive of current fallows.

*Columns 3 (a) and 3 (b) (page 314)* include villages receiving frontier remissions and istamrari tenures.

*Column 5* shows all the items falling under the head "Land Revenue" in the Civil Accounts, including assigned revenue.

*Column 10 (page 315).*—The cultivated area taken for calculating the incidence is exclusive of current fallows.

*Column 3 (a) (page 314)* includes fallows and fully assessed unoccupied area.

*Column 4* excludes fallows and fully assessed unoccupied area [see note to column 3 (a)]. Fallows are assessed once in five years.

*Column 5* states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

*Column 10 (page 315).*—The incidence is calculated from the cultivated area (excluding fallows) and the assessment on that area.

*Column 1 (page 316).*—Lands held under special tenures, such as talukdari, meh-wasi, udhad-jamabandi, narvadari, and bhagdari in Gujarat, and khoti and izafat in the Konkan, are classed as "zamindari and village communities (temporarily settled)."

*Column 3 (a)* includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and also the fully assessed unoccupied area since 1893-94.

*Column 3 (b)* includes land not available for cultivation or unassessed.

*Column 4* includes land under temporary cultivation; also pôt inâms paying full assessment.

*Column 5* states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

*Column 10 (page 317).*—The incidence is calculated from the occupied area, which, in the Presidency proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

*Column 11* includes population of pôt inâms and the like scattered areas which cannot be distinguished from the population of the fully assessed area.

*Column 12.*—The incidence is based on the figures given in column 11 and those in column 3, plus the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment.

*Column 1 (page 318).*—Zamindari (temporarily settled) includes malguzari and thekadari

*Column 2* states the area by village papers (column 6 of table No. 1).

*Column 3 (a).*—Zamindari estates properly so-called (that is, excluding malguzari) are classed as not fully assessed.

*Column 4 (b)* excludes fallows since 1894-95.

*Column 5.*—The figures represent different items of land revenue for different districts, no uniform practice having been followed throughout the province.

*Column 10 (page 319).*—The cultivated area referred to in this column included fallows until 1894-95. Since then the net cropped fully assessed area has been taken in calculating the incidence.

*Column 3 (a) (page 320).*—This column states jagir, izâra, and palampat villages, all unassessed land, forest areas, village sites, roads, rivers, etc.

*Column 4 (a).*—Pôt kharâb lands are excluded from this column, which includes only occupied lands available for cultivation.

*Column 4 (b)* states the cultivated area in khalsa villages only.

*Column 5.*—The figures include the revenue derived from jagir, palampat, and izára villages. As regards the items of land revenue included, the practice has not been uniform, different districts having entered different items.

*Column 6.*—The population is that of the last general census.

*Column 8 (page 321)* includes assessment on occupied lands only, as stated in column 4 (a).

*Column 10.*—The incidence since 1896-97 has been calculated on the area entered in column 4 (b), that is, the cultivated area in khalsa villages only.

*Column 11* excludes population of jagir and izára villages.

The table is prepared quinquennially. The figures were last collected in 1903-04.

*Column 3 (a) (page 322).*—In the case of raiyatwari tracts this column states the area of unoccupied assessed lands, of all unassessed poramboke, of minor inám lands in Government villages held rent-free or subject to quit-rent, and of forest lands, excluding portions of the first mentioned two classes occupied under "miscellaneous;" and in the case of zamindari tracts the areas of hills, porambokes, and minor ináms are entered. The entire area of whole inám villages is deducted in this column.

*Column 3 (b).*—Raiyatwari; includes the area of the Agency tracts, except in Godávári, for which district particulars for such tracts are reported by the Collector.

*Column 4 (a).*—Raiyatwari; states the total occupied area as stated in village papers.

*Column 5* stated until 1903-04 only "ordinary revenue" according to the classification in the Civil Accounts. In the case of raiyatwari villages, this item comprised the net land revenue demand, excluding remissions and deductions, but including quit-rent on minor ináms and miscellaneous revenue from the cultivation or occupation of lands not included in holding and also water-tax. In the case of zamindari and whole inám villages, it comprised the *peshkash* or quit-rent payable to Government, and the water-rate on lands included in such tracts, as also jodi or quit-rent on minor ináms situated therein. From 1903-04 the column includes all the items falling under the head "Land Revenue" in the Civil Accounts.

*Column 8 (page 323).*—Until 1903-04 this column stated in the case of raiyatwari the net land revenue demand, excluding remissions and deductions and revenue from minor ináms (quit-rent and water-tax); and in the case of zamindari it showed the *peshkash* or quit-rent payable to Government, excluding the jodi or quit-rent and water-rate on minor ináms. From 1903-04 this column shows only the "ordinary revenue," as defined in the Civil Accounts, on areas fully assessed.

*Column 10.*—The cultivated area is, in the case of raiyatwari lands, the total area cropped out of the area given in column 4 (a). No corresponding information is available for the zamindari area.

*Column 11* states the entire population of raiyatwari and zamindari villages, respectively, except of raiyatwari Agency tracts in Ganjam and Vizagapatam.

The table is prepared quinquennially, and the figures were last collected in 1907-08.

*Entry 2 (page 259)* includes bané and cardamom lands.

*Entry 4* shows ordinary revenue, sale-proceeds of waste lands, and miscellaneous land revenue.

TABLE No. 6—TRANSFERS OF LAND.

This table is intended to exhibit the number of voluntary and compulsory transfers of ownership of land or tenant-right, and the area so transferred. Voluntary transfers mean transfers made by actual contract or gift, transfers by inheritance not being taken into account.

The table now in use was prescribed in 1891; it differs from the tables formerly in use in the following respects:—

1866 I E—5	1884 I E—5	1891 E			
<i>Nature of tenure</i>	<i>Nature of tenure</i>	<i>Nature of tenure</i>			
Great zamindaris, complete.	Proprietors.	Revenue-paying.			
Shares in such zamindaris, complete.			Revenue-free.		
Large zamindaris.				Tenants who have statutory (or otherwise recognised) powers of transfer.	
Shares in such zamindaris.					(No alteration.)
Small zamindaris.					
Shares in such zamindaris.					
Villages owned by cultivating communities.					
Shares in villages owned by cultivating communities.					
Holdings of proprietary cultivators.					
Intermediate holdings of a transferable character.					
Holdings of raiyats at fixed rates.	(No alteration.)				
Holdings of raiyats with right of occupancy.					
Revenue-free tenures.					
<i>Number of transfers recorded</i>	<i>Number of transfers</i>	(No alteration.)			
(a) By voluntary sale or gift.	(a) By private contract or gift.				
(b) By compulsory sale.	(b) By order of court.				
(c) By inheritance.	(Omitted.)				
<i>Average area in acres of each holding transferred</i>	<i>Total area transferred</i>	(No alteration.)			
(a) By voluntary sale.	(a) By private contract or gift.				
(b) By compulsory sale.	(b) By order of court.				
(c) By inheritance.	(Omitted.)				

## GENERAL NOTES.

It is optional with local Governments to enter or omit transfers of lands held by tenants.

In August 1896 the following rules were prescribed:—

- (1) Changes of entry due to succession, partitions, or simple mortgages, are not really transfers, and should be excluded from the table, as also should redemptions of mortgage;
- (2) All temporary transfers such as leases should also be excluded, but mortgage with possession should be treated as a transfer and entered in the table;
- (3) All transfers made by order of a court should also be included in the table;
- (4) The word "court" in the entry "by order of court" should be held to include a revenue court.

Instructions were issued in 1891 to the authorities of the Panjab and the Central Provinces to the effect that the entries under "by order of court" should state not merely the transfers occasioned by debt, but all forms of transfer effected through the medium of a court.

## PROVINCIAL NOTES.

Transfers of property in land are not as yet registered in Upper Burma; the information is collected by revenue officers. The statement includes cases in which land has been permanently transferred by gift, sale, or other transaction, for valuable consideration. The term "court" includes a revenue office as well as a civil court.

No record of transfers of property in land was kept in the Kamrup district for 1903-04 and 1904-05.

Columns 12 to 21 (page 335) exclude the areas transferred in the Sylhet and Goalpara districts, the information not being available.

Previous to 1896-97, in most districts all kinds of transfers, including transfers by inheritance and non-permanent transfers, such as leases, or usufructuary mortgages, were entered. Since 1896-97 transfers by order of a revenue court have been included; transfers by inheritance and non-permanent transfers have been excluded.

The table is not prepared, the information not being available.

The table is not at present prepared, the information not being available.

Transfers by inheritance or non-permanent transfers, such as leases or usufructuary mortgages for short periods, are excluded, but mortgages with possession are included, as also all transfers made under order of a court.

Transfers of *malikana* rights, that is, rights to receive a portion of the profits of an estate, not amounting to proprietary rights, which were formerly included in the table, have been excluded since 1905-06.

Statistics of transfers of tenant-right are not given. Transfers by gift have been included since 1896-97.

The figures exclude all changes due to successions, partitions, simple mortgages, redemptions of mortgages, and temporary transfers, such as leases; but mortgages with possession are included. The column "by order of court" includes transfers occasioned by debt incurred by judgment-debtors, as also all other transfers effected by order of courts, civil and revenue.

Transfers of property in land are not permitted in Manpur.

Before 1895-96, the statistics of the different kinds of tenure were presented collectively, separate figures for each kind not having been available, and the figures included all kinds of transfers relating to the tenant-rights of proprietors and occupancy tenants, but excluded transfers by inheritance. The transfers included were, (1) partitions, (2) gifts and exchanges, (3) mortgages with possession, (4) redemption of mortgages, (5) sales and permanent transfers for value, (6) other transfers, which last included cases of a miscellaneous nature, such as enhancement of rent or corrections of errors. The few cases of transfers for arrears of revenue which occurred were included under "by order of court."

From 1895-96 the table includes only transfers by mortgage and sale.

Transfers by mortgage and sale only are included.

The table has been prepared since 1901-02.

Transfers of tenant-right have been included since 1892-93. The figures against "proprietors" are filled up from returns compiled on the basis of mutation proceedings. Those against "tenants" are based on statements furnished by patwaris in which all transfers are entered, including transfers by mortgage with possession as well as transfers by sale but excluding transfers by inheritance. The statement does not include leases or mortgages without possession.

The information is obtained from the Registration Department.

The table includes all transfers effected by sale of fields under decree of a court (including a revenue court) either in execution of the decree or for recovery of arrears of land revenue. Private sales or recognised divisions of fields necessitating a change in the name of the registered occupant are entered under "by private contract or gift," as also are mortgages with possession. Transfers due to succession, by inheritance, simple mortgages, and leases are omitted.

Only permanent transfers, as by sale or gift, are included, when the parties concerned apply for and obtain transfers of revenue registry. These are entered under "private contract or gift." Cases in which lands are sold for arrears of revenue due to Government are also included if the lands are purchased by private parties, but excluded if the lands are purchased by Government.

Transfers of tenant-right are not entered, the information not being available.

The entry under the head "revenue-paying" includes raiyatwari holdings paying full assessment, and permanently-settled estates paying *peshkash*; and the entry under the head "wholly or partially revenue-free" relates to minor ináms and whole inám villages.

The statement includes all legal transfers of property (a) by voluntary action of the owners (b) and (c) by virtue of decrees of civil and orders of revenue courts.

Transfers ordered by courts in cases of disputed succession, and those occasioned by debt incurred by the judgment-debtors, are included under the heading "by order of court." This heading also includes transfers ordered by civil courts from registered holders to decree-holders, of lands sold by civil courts in satisfaction of decrees, and of holdings sold by the revenue authorities for arrears of revenue.

See explanation given in the Explanatory Notes (page 325)

(a) In 1905-06 the major portion (about 78%) of the Sambalpur district was transferred from the Central Provinces to Bengal. The remaining portion together with the districts of Raipur and Bilāspur was formed into the three districts, Drug, Raipur and Bilāspur

**APPENDIX**

---

## APPENDIX A—AREA AND YIELD OF CROPS

### GENERAL NOTES

In the course of each year periodical estimates of the area and yield of certain crops are compiled from local returns and issued by the Commercial Intelligence Department.

The general practice is to issue a preliminary forecast, a second estimate, and a third (and final) estimate, fuller and more precise than the first two. The figures in these tables are abstracted from those appended to the final estimates and they show the area sown and the estimated yield of the crops.

The estimates state the area actually sown, whether the crop comes to maturity or not, but fields which have been sown with other crops, owing to the failure of the first sowings, are not entered.

The areas covered by the several crops in a mixed field are estimated in various ways in the different provinces and the estimates are based on formulæ prescribed by the provincial authorities.

The estimates are not generally made for the whole of India and they are necessarily, in the most favourable circumstances, only approximations to the truth. The very complete agricultural records in most of the provinces in connection with the assessment of the land revenue render it possible in many cases to state with great exactness the area sown with each crop; but an equally important factor in determining the outturn, namely, the average yield per acre, has to be estimated, and exactness can be obtained only by the most careful consideration of the classes of soil, the methods of cultivation, and the climatic conditions which depend mainly on the quantity and timeliness of the rainfall in every part of the reporting areas. The quantitative estimates are thus often imperfect and they have generally been too low. The attention recently paid to the estimates of the cotton and wheat crops showed that some of the estimates relating to past years were extremely defective, but measures have been taken which appear already to have effected a substantial improvement. The revision of the estimates which was attempted has not, however, been entirely successful, for the reason that there are large unregistered movements of cotton across provincial boundaries by road, while the information from some of the Native States is defective and the internal consumption other than that in mills defies accurate computation. A conventional estimate of consumption outside mills has, however, been made in consultation with the Bombay Cotton Trade Association and included in the figures of net exports and consumption shown at the end of the table relating to cotton. In view of the carrying over of stocks from one year to another it is interesting to calculate the averages on these figures. Estimates of area and production are now received from various areas which were formerly unreported; but the fact that the total estimated outturn continues to fall short of the total of net exports and consumption shows that there is still much room for improvement in the estimates of production.

Attention has also been paid to the improvement of the jute forecast, and the yield for past years, from 1895 to 1904, has been corrected by the statistics of exports and consumption, but the estimates of the area cultivated are based on data, which are still uncertain, although they have recently been improved. Next to those for cotton and jute the estimates of acreage are most complete in respect of wheat. For the other crops, however, the estimates of area apply only to the specified regions where those crops are largely grown, and not to the whole of India. Thus, the rice estimates relate only to Bengal, Eastern Bengal and Assam, Lower Burma, and Madras, and those for sugarcane to Bengal, Eastern Bengal and Assam, Madras, the United Provinces, the Panjab, the North-West Frontier, and Bombay. Again, for the reporting territories the estimates are sometimes imperfect, for, with some exceptions, those tracts have been excluded which have not been accurately surveyed or are held under privileged tenures, and hence do not possess the regular establishments maintained elsewhere for reporting the area placed under each crop. The most serious defect from this cause is in the figures for Madras, which is a large producer of rice, cotton, sesamum, and indigo, but which up to 1906-07 made forecasts only for the raiyatwari villages or about two-thirds of the area of the British districts. The Feudatory States within provincial boundaries are also generally omitted from the forecasts of all the provinces except Bombay and Sind. But for these omissions and a certain element of uncertainty in regard to crops which are grown conjointly or interspersed in the same field, the estimates of area relating to the Panjab, the United Provinces, the Central Provinces, Berar, and Madras may be regarded as fairly exact. The statistics for the British districts of Bombay are also very correct, but in this publication they are combined with the more conjectural figures of the provincial Feudatory States in which a large proportion of the cotton, oilseeds, and wheat is grown. The statistics of area for Bengal and Eastern Bengal which relate to nearly the whole of the cultivated portion of the province, omitting unimportant Feudatory States, are also conjectural, since they consist of estimates which are founded on information of varying degrees of accuracy and which have been verified by cadastral survey in respect of only about 43 per cent for Bengal and 19 per cent for Eastern Bengal.

The statistics for the States of Hyderabad and Mysore and the numerous States in the Central India and Rajputana Agencies rest on data similar to those of British India, and like them mostly refer to tracts in which there exists a reporting agency not equal in efficiency to that of the neighbouring British Provinces. Estimates are also included for some of the revenue-free lands held on privileged tenures.

## PROVINCIAL NOTES.

Estimates are made for rice, cotton and groundnut.

The figures for area are obtained from the assessment rolls prepared by revenue surveyors.

The original information about the yield is obtained from township officers, Inspectors of Land Records, and from the more important of the Land Revenue subordinate officers. In this way the estimate of each district is based on the information furnished by some thirty or more persons.

The figures for both area and yield are tabulated by the Superintendent of Land Records and checked by the Deputy Commissioner. The Director of Land Records compares the estimated yield with a standard representing the normal yield which was fixed after an extensive series of experimental crop cuttings by settlement officers.

Estimates are made for the fifteen chief rice-producing districts of Lower Burma, namely, Akyab, Kyaukpju, Hanthawaddy, Pegu, Tharrawaddy, Prome, Ma-ubin, Pyawön, Bassein, Henzada, Myaungmya, Amherst, Tavoy, Toungoo, and Thatön. The standard is 32 baskets (of 48lb each) = 1,536lb of unhusked rice to the acre.

Until 1902-03 the estimates for cotton related to the five principal cotton-growing districts, namely, Sagaing, Lower Chindwin, Meiktila, Myingyan, and Thavetmyo. Since that year all the cotton-producing districts have been reported on. Except in districts, where a settlement officer has conducted experiments in crop cutting, it is not possible to estimate accurately the average yield per acre.

Estimates are framed for rice, cotton, mustard, jute, and sugarcane. The information is received from district officers, who in their turn obtain figures from mandals in the case of the temporarily-settled areas and from zamindars in the case of the permanently-settled portion of Goalpara. These figures are said to be checked by sub-divisional and district officers, but, except where the district or the sub-divisional officer is himself able to do it, there is no valid check at all, and sometimes figures returned by district officers are more or less inaccurate and inconsistent.

The estimates for rice relate to all the plains districts (*i.e.*, excluding the hill tracts). The crop includes the *bhadai*, *aus*, or autumn rice, and the *aman*, *bae*, or winter rice. The yield of a normal crop is taken to be 6 cwt per acre for autumn rice and 9½ cwt per acre for winter rice.

Cotton is grown in the Garo and the Khasi and Jaintia Hills, in Cachar, Sylhet, Goalpara, Kamrup, Nowgong, and Sibsagar. It is also believed to be grown in the Naga Hills, but it is not possible to make any estimate of the crop there. The crop is sown in March and April. The normal rate of outturn is taken to be 200lb of cleaned cotton (400lb of seed cotton) per acre.

Mustard is grown in all the districts; but the estimates in this table relate to temporarily-settled tracts only. Up to 1901-02 the season's figures were based on a standard (600lb to the acre) which was first adopted in 1893. In 1902-03 a separate standard rate of outturn was fixed for each district. These rates were revised in 1907-08.

The estimates for jute relate to all the districts of the province except the Naga Hills, the Khasi and Jaintia Hills, and the Lushai Hills. The Bengal rate of 1,200lb (= 3 bales) per acre for a normal crop is taken to estimate the yield of the crop.

The estimates for sugarcane relate to all the plains districts. The average yield of raw sugar (*gur*) is taken to be 24 cwt per acre.

Estimates are made for rice, wheat, cotton, oilseeds, jute, and sugarcane. The figures are more or less conjectural, being based mainly on rough approximate estimates made by district officers, who obtain their information from thana (police) officers. The system of making crop cuttings, as in other provinces, over a series of areas and seasons for the ascertainment of standards of yield has been in force in Eastern Bengal for the last fourteen years, but sufficiently trustworthy figures of yield have not yet been obtained from these cuttings to enable Government to accept them as standards.

The rice crop includes the *bhadai*, *aus* or autumn rice (sown in May and mostly reaped by the middle of September), the *aman* or winter rice (sown in May and June, transplanted in August and September, and reaped in November and December), and the *boro* or summer rice (sown towards the close of the cold weather and reaped in April to June). The yield of a normal or 100 per cent crop is taken to be 9½ cwt per acre for winter rice, 6 cwt per acre for autumn and 10 cwt per acre for summer rice. These rates have been assumed to represent the average yield in cleaned rice.

The only districts in which wheat is grown to any considerable extent are Faridpur, Rajshahi, Rangpur, and Pabna. The normal yield of the crop has been determined to be 7 cwt per acre.

For cotton four reports are prepared during the season. The crop is sown before the monsoon rains commence and harvested in winter, and is grown in Jalpaiguri, Maimensingh, and the Chittagong Hill Tracts. Separate rates of standard outturn have been adopted for each district.

The oilseeds are linseed, rape and mustard, and sesamum. The first three are grown in all districts (excepting Jalpaiguri and Rangpur, in the case of linseed), and are sown generally in October and reaped early in winter. The average yield is assumed to be 4 cwt per acre.

Sesamum is grown in all districts; it is sown generally in October and reaped early in winter. A late variety is sown in the cold weather and reaped in May. The average yield is assumed to be 4 cwt per acre.

The estimate of the jute crop covers all the districts except Chittagong. A general rate of 1,200lb, or three bales, is assumed to represent the average production per acre for every jute-growing district in the province.

The report on sugarcane relates to all the districts of the province; it is sown during the winter season and harvested after a year. The average yield of raw sugar (*gúr*) is estimated at 22 cwt per acre.

Estimates are made for rice, wheat, cotton, oilseeds, jute, indigo, and sugarcane. In the absence of any Revenue Agency the figures are based mainly on rough approximate estimates made by district officers, and are more or less conjectural. The district officers obtain information from the sub-divisional officers through the agency of the police. The system of making crop cuttings, as in other provinces, over a series of areas and seasons for the ascertainment of standards of yield has been in force in Bengal for the last fourteen years, but sufficiently trustworthy figures of yield have not yet been obtained from these cuttings to enable Government to accept them as standards.

The rice crop includes the *bhadoi*, *aús* or autumn rice (sown in May and mostly reaped by the middle of September), the *áman* or winter rice (sown in May and June, transplanted in August and September, and reaped in November and December), and the *boro* or summer rice (sown towards the close of the cold weather and reaped in April to June). The yield of a normal or 100 per cent crop is calculated as follows: the area cultivated with winter rice is multiplied by 15 maunds to the acre, and the area with autumn and summer rice by 10 maunds (the maund in each case being equal to 82½lb). These rates have been assumed to represent the average yield in cleaned rice.

Wheat is grown in all the districts, excepting Howrah, the 24-Parganas, Khulna, and Puri. Of the total area under the crop the districts of the Patna and Tirhut Divisions contain about one-half and those of the Bhágalpur division about one-third. The average yield has been fixed provisionally at 12 maunds or 984lb per acre for the Bihar districts, 10½ maunds or 861lb per acre for the Bengal districts, and 451lb per acre for the districts of the Chota Nagpur Division.

For cotton two reports were prepared up to 1904-05, one on the early and the other on the late crop; but from 1905-06 four reports are prepared during the season. The early crop, which is sown before the monsoon rains commence and harvested in winter, is grown in the districts of Bankura, Midnapur, Saran, Monghyr, Bhágalpur, the Santhal Parganas, and in the Chota Nagpur and Orissa Divisions and also to a limited extent in Shahabad and Darbhanga. The late crop, which is usually sown at the close of the rainy season and harvested in May and June, is grown in the districts of Bankura, Midnapur, Manbhum, Singhbhum, and in the Patna, Tirhut, Bhágalpur, and Orissa Divisions, excepting the districts of Gaya, Purnea, the Santhal Parganas, and Angul. Separate rates of standard outturn for the early and the late crops have been adopted for each district.

The oilseeds are linseed, rape and mustard, and sesamum. The first three are grown in all districts (excepting Darjeeling, Angul, and Ranchi, in the case of linseed), and are sown generally in October and reaped early in winter. The average yield is assumed to be 6 maunds per acre.

Sesamum is grown in all districts except Darjeeling; it is sown generally in October and reaped early in winter. A late variety is sown in the cold weather and reaped in May. The average yield is assumed to be 4½ maunds per acre.

The estimate of the jute crop covers seventeen districts in which jute is grown, namely, Burdwan, Midnapur, Hooghly, Howrah, all the districts of the Presidency Division, Champaran, Muzaffarpur, Bhágalpur, Purnea, Darjeeling, the Santhal Parganas, Cuttack, and Balasore. A general rate of 1,200lb, or three bales, is assumed to represent the average production per acre for every jute-growing district in the province.

The report on indigo relates to districts in which the crop is still grown, namely, Nadia, Jessore, all the districts of the Patna and Tirhut Divisions except Patna, and all the districts of the Bhagalpur Division except Darjeeling. The average yield is assumed to be 20lb an acre in the districts of Monghyr, Bhágalpur, Purnea, and in the districts of the Patna and Tirhut Divisions, and 12½ an acre in all the remaining districts of the province. These rates serve as multipliers of the acreage under cultivation in each district in a year of normal, that is, 100 per cent, outturn.

The report on sugarcane relates to all the districts of the province; it is sown during the winter season and harvested after a year. The average yield of raw sugar (*gúr*) is estimated at 22 cwt per acre.

Estimates are made for wheat, cotton, linseed, rapeseed, sesamum, indigo, and sugarcane. The area is taken from the crop statements based on field-to-field inspections, which are furnished by patwaris and checked by higher revenue officers. The estimates of the standard

yield are based on the results ascertained from crop cutting experiments conducted in selected districts. The standards, which are separate for irrigated and unirrigated crops, are revised every five years on a consideration of the results of crop experiments, and are applied to the condition of the crops reported by district officers and selected land-holders whose number exceeds five hundred.

The Native State of Rampur, which is the only cotton-growing State in the province, is included in the estimates from 1905-06. The estimates of both area and yield are based on the figures furnished by the six tahsils of the State.

The estimates for all oilseeds show separately the mixed crop, that is, crop grown in the same field with other crops, which is gathered in small quantities over a wide area mostly for home consumption. The estimates of the mixed crop are, however, highly conjectural.

Linseed, unmixed with any other crop, is chiefly grown in the districts of the Rohilkhand, Allahabad, Benares, Gorakhpur, Lucknow, and Fyzabad Divisions, and in Naini Tal; and rapeseed in the districts of the Meerut, Rohilkhand, Gorakhpur, Lucknow, and Fyzabad Divisions, and in Naini Tal.

The only districts in which til (sesamum), unmixed with any other crop, is cultivated to any considerable extent are Dehra Dun, Banda, Hamirpur, Jhansi, Jalaun, Mirzapur, Gorakhpur, Sitapur, and Bahraich.

In estimating the yield of indigo (dye), it is assumed that one-tenth of the total area is annually set aside for seed, and that one-fourth of a factory maund of dye represents the full average yield in an average year.

---

Estimates are prepared for wheat, cotton, rapeseed, sesamum, indigo, and sugarcane.

The figures of area are based on actual measurements by the revenue staff. Estimates of yield are recorded by Collectors after personal enquiry from tahsildars and leading agriculturists. The total number of agriculturists consulted by the Collectors and tahsildars must amount to several thousands.

The estimates of the wheat crop relate to all the districts of the province and include the following Native States from 1907-08:—Patiala, Kapurthala, Nabha, Jhind, Bahawalpur, Faridkot, Maler Kotla, Mandi, and Suket.

The estimates of the cotton crop relate to all the districts except Simla, and include the following Native States from 1904-05:—Patiala, Kapurthala, Bahawalpur, Nabha, and Jhind.

The estimates for rapeseed relate to all but four districts, the exceptions being Simla, Jalandhar, Montgomery, and Gurdaspur.

The estimates for sesamum relate to twenty-two districts: Hissar, Gurgaon, Karnal, Ambala, Ferozpur, Kangra, Hoshiarpur, Jalandhar, Multan, Jhang, Montgomery, Lahore, Amritsar, Gurdaspur, Sialkot, Gujrat, Gujranwala, Rawalpindi, Attock, Mianwali, Dera Ghazi Khan, and Muzaffargarh.

Until 1904-05 the estimates for indigo related to seven districts: Hissar, Rohtak, Gurgaon, Karnal, Multan, Dera Ghazi Khan, and Muzaffargarh; in two of these (Hissar and Rohtak) the crop was grown only for seed, and in the remaining five partly for seed and partly for dye. From that year the estimates relate to four districts only: Rohtak, Multan, Dera Ghazi Khan, and Muzaffargarh.

The estimates for sugarcane include all but 7 districts, the districts omitted being Hissar, Montgomery, Jhelum, Rawalpindi, Mianwali, and Dera Ghazi Khan. The crop is sown in March and April.

---

Estimates are prepared for wheat, cotton, rapeseed, and sugarcane. Until 1903-04 an estimate was made for the sesamum crop also, but as the area never exceeded 10,000 acres it has been discontinued.

The figures of area are based on actual measurements made by the patwaris in their field-to-field inspection in each harvest. They are further checked by higher revenue officers.

The estimates of the standard yield are based principally on data derived from a large number of tests made during the progress of settlement operations in which crops were cut and weighed. They were framed for each assessment circle which is the unit of area, and separately for lands irrigated by canals, by wells, for alluvial (*sailab*) lands, and for lands entirely dependent on rain. The standards are applied to the estimates received from the district officers who frame their estimates in consultation with local agriculturists. The exact number of agriculturists consulted by the district officers is not available, but it must amount to several hundreds.

The estimates for wheat relate to all the districts of the province, and include the Tochi Agency from 1904-05, and the Kurram Agency from 1906-07.

The estimates of the cotton crop include all the districts of the province.

The estimates for rapeseed up to 1905-06 relate to all districts except Kohat. From 1906-07 Kohat has been included.

The sugarcane crop is sown in March and April. The estimate relates to three selected districts, namely, Hazara, Peshawar, and Bannu.

---

Estimates are framed for wheat, cotton, linseed, rapeseed, sesamum, groundnut and sugarcane. The estimates include British districts as well as Native States.

In the British districts of the Presidency the area under different crops is ascertained in the first instance by village officers and recorded in village returns which are checked by circle inspectors and other revenue officers, and compiled by the former for their circle, and then for the taluka. The taluka figures are totalled up for each district in the Director's office. For Sind this work is done by local officers, and the Director receives district-by-district figures. The information received is for villages for which regular statistics are available, the proportion of reporting area being 91.2 per cent. in the Presidency proper and 99.6 per cent. in Sind. In the case of Native States the acreage is estimated on the best local data available. The approximate numerical strength of the reporting agency is 175 in the Presidency proper, 57 in Sind, and 33 in the Native States.

No standard of yield has yet been adopted. Local estimates are converted to quantitative figures by a formula based partly on actual ascertainment of yield by crop cuttings and partly on returns of estimated yield and local enquiry. The ascertainment of actual yield is being systematically continued in each district under the direction of the provincial Agricultural Department, and the results are tabulated and compared in order to form a basis for a revision of the formula. The unit of area in the formula is the taluk and dry and irrigated crops are separately dealt with.

Each year's estimate is prepared by the mamlatdars (or mahalkaris where the taluk is sub-divided) from notes which they make and from reports from village accountants and circle inspectors. The estimate is sent direct to the Director of Agriculture, who, in the light of the general prospects of the season, makes the quantitative calculations. A copy of the estimate is at the same time sent to the Collector through the sub-divisional officer, who sends his remarks, if any, to the Collector, forwarding a copy of the same to the Director. The Collector on receipt of these remarks forwards to the Director his opinion as regards the general condition of the whole district.

Except for Gujarát, the formula is framed on a system by which allowance is made in the quantitative yield for the ascertained tendency of the raiyat to under-estimate good yields and to over-estimate poor yields.

For Sind there are no formulae, and all the necessary information is obtained by the District Collectors in the form of estimates on the basis of twelve, together with quantitative equivalents gathered from general experience.

For the Native States estimates are obtained, and the formula for adjoining British districts is applied.

The estimates for wheat include the British districts and Native States in Gujarát, Deccan, Karnátak, and Sind.

The figures for cotton relate to the whole area under that crop in the Bombay Presidency (including Sind) and include both the early crop of the Deccan sown in July to August and harvested in December, and the late crop of Gujarát, Karnátak, and Sind sown in September to October and reaped in February to March.

The estimates for linseed include the British districts and the Native States in Gujarát, Deccan, and Karnátak.

Those for rapeseed include the British districts and the Native States in Gujarát and Sind.

The estimates for sesamum include the British districts and the Native States in Gujarát, Deccan, Karnátak, Konkan (excluding Kanara), and Sind.

The estimates for groundnut include the British districts and Native States in the Deccan and the Belgaum district in Karnátak.

#### Estimates are framed for wheat, cotton, linseed, and sesamum.

As regards acreage, the figures for cotton and sesamum are estimates based on reports furnished by the local officials of the Land Records staff. The figures for wheat and linseed represent the actual areas sown with those crops as disclosed by the field-to-field inspection by patwaris. The reporting agency consists of 217 revenue inspectors with, on an average, 24 patwaris working under each inspector. Each tahsil has usually 4 revenue inspectors.

Standards of outturn were framed for each crop from the results of crop cutting experiments on selected fields under the supervision of responsible and selected officials during the years 1884-85 to 1887-88. For wheat the standard was framed separately for first and second class lands, and the proportion in which the area of each class was cropped was taken into account; irrigation also was taken into account, but in a less degree, as it is of importance only in the case of the rice crop for which no estimates are made. The standards were revised in 1894 on a review of crop cuttings made during the four years, 1888-89 to 1891-92. They were again revised in 1898 on a revision of crop cuttings made during the four years, 1892-93 to 1895-96. A fresh revision of the standards for cotton was made in 1903, and again 1908, on a review of crop cuttings made during the five years ending 1906-07. The yield expressed by the people in terms of annas in the rupee is converted into percentages, 13.8 annas, or a normal crop, being taken to be equal to 100. A full crop or 16 annas is denoted by 120, and a bumper crop or 20 annas by 150. All deductions based on the standards are made by the Director of Land Records and Settlements from the year's figures furnished by district officers, who are supposed to bear in mind the standards when estimating the yield of the season.

Until 1897-98 the figures did not take into account the zamindari areas in Raipur, Biláspur, and Drug, for which no statistics were available, the survey being in progress. Since that year the surveyed portions of these zamindari areas have been included.

The area sown with wheat as a mixed crop with gram is reduced for the purpose of excluding gram by 15 per cent. in the districts of the Nagpur and Chattisgarh Divisions, and by from 25 to 40 per cent. in the rest of the province.

The area on which cotton is grown mixed with other crops is reduced by deductions varying in the different districts from 7 to 16 per cent.

In the case of linseed sown with gram the area is reduced by 20 per cent. for the purpose of excluding gram.

Estimates are framed for wheat, cotton, linseed, and sesamum.

The system by which areas are returned is similar to that in the Central Provinces.

No standard yield was fixed until 1903-04 and there was no specific system for estimating the yield of the harvests for the purposes of the forecasts. The estimates from 1903-04 have been calculated on the lines followed in the Central Provinces. The standards of normal outturn adopted in 1903-04 were revised in 1908.

Estimates are framed for rice, cotton, sesamum, groundnut, indigo, sugarcane, and castorseed.

The estimates of the rate of yield are those reported by tahsildars or deputy tahsildars, which are tabulated in the office of the Board of Revenue.

For rice the standard rates are based on the grain values of soils taken for settlement purposes, and worked out for each settled district as the standard for these districts. For districts not yet settled, and for Tinnevely, the average of all settled districts is taken.

For cotton the standard has been determined on a full consideration of all available data at 55lb per acre for *Salems*, 90lb for *Tinnevellies*, and 50lb for *Northerns*, *Westerns*, *Cocanadas* and others. The sowings of cotton continue from July to October in the central and Deccan districts, and in the southern districts until the end of December. The harvesting of the crop begins in February and continues until July or August.

For sesamum the standard of yield has been fixed with reference to the latest crop cutting experiments at 386lb per acre for the Vizagapatam, Godavari, Tanjore, and Trichinopoly districts, 224lb for Malabar and the Deccan districts, and 280lb for the remaining districts.

The groundnut crop is chiefly grown in North Arcot, Chingleput, South Arcot, Tanjore, and Trichinopoly, more than half being grown in South Arcot. The rate of outturn has been fixed at 10 cwt. of nuts in shell per acre.

The estimates for indigo comprise the districts in which it is mainly grown: Kistna, Nellore, Karnul, Anantapur, Cuddapah, Chingleput, and North and South Arcot. The standard of yield was taken, on the best information on record, at 25lb of dye to the acre.

The sugarcane crop is grown chiefly in South Arcot, Trichinopoly, Ganjam, Godavari, Bellary, Anantapur, Coimbatore, and Cuddapah. The standard of yield has been fixed at 45 cwt. of manufactured jaggery (*gúr*) to the acre.

Estimates are made for cotton only. As regards area, the information is taken from the field book (*khalsa girdawari*) prepared by the patwaris in November each year and checked by the higher revenue officers. The estimates of yield are based on the average of the results obtained by crop-cutting experiments conducted each year. The Ajmer-Merwara district is divided into 12 girdawars' circles and in each circle the girdawar carries out crop experiment every harvest. The Revenue Extra Assistant Commissioner does the same in the Ajmer tahsil, and the tahsildars of Beawar and Todgarh in the two tahsils in Merwara. Each harvest a piece of land under a particular crop is selected and its yield weighed. The results of all the experiments are sent to the Revenue Extra Assistant Commissioner, in whose office a combined return is prepared and included in the annual report.

The figures include khalsa as well as jagir and istimrar areas.

Estimates are framed for wheat and cotton. They are generally defective in consequence of the absence of figures for unsurveyed areas and privileged tenures in most cases.

Estimates are framed for wheat, cotton, and oilseeds. Until 1902-03 the figures excluded jagir and such other revenue-free lands or privileged tenures; since then statistics for these areas have been obtained as far as possible and included in the statement.

Estimates are framed for wheat and cotton.

---

**Tables of Area and Yield**

---

APPENDIX A

ESTIMATED AREA and YIELD of CROPS

ABSTRACT TABLE

		1894-95	1895-96	1896-97	1897-98	1898-99	1899-1900	1900-01	1901-02	
Rice	{ acres . . .	50,002,241	49,396,747	48,031,462	52,205,466	52,682,050	51,669,635	48,932,493	48,511,190

(a) The yield in bales for all the years represents the quantities exported from India and consumed in the country in and outside mills, as the reported estimates of yield fall short of the total of net exports and consumption. (See page 363)

(b) See footnote on page 303 regarding the acreage and yield of jute.

Note.—The figures for 1908-09 are subject to revision

APPENDIX A—continued

ESTIMATED AREA and YIELD of CROPS—continued

RICE

[The figures in cwt represent the outturn of clean rice]

PROVINCE	acres	cwt	Character of season
<i>Bengal (a)</i>			
1894-95	38,639,500	418,857,200	Favourable throughout
1895-96	37,447,800	817,514,600	Rainfall insufficient during the latter part of the season
1896-97	36,177,400	179,837,400	Very unfavourable. Extensive failure of crop with famine
1897-98	39,549,500	398,142,000	Favourable
1898-99	39,605,400	405,842,900	Favourable
1899-1900	39,490,500	857,956,360	Unfavourable for autumn, but better for winter rice
1900-01	36,013,900	311,508,600	Not favourable owing to ill-distributed rainfall
1901-02	35,094,800	272,201,900	Unfavourable particularly for the winter crop
1902-03	37,553,700	358,977,300	Not unfavourable on the whole
1903-04	34,931,500	316,669,700	Not favourable owing to deficient rainfall
1904-05	38,355,200	347,229,100	Rainfall unseasonable and ill-distributed
1905-06	25,150,600	227,967,500	Crop damaged by heavy rain and floods in places
1906-07	24,516,000	195,545,800	Unfavourable owing to unseasonable rainfall and floods
1907-08	24,452,100	140,330,300	Unfavourable. Rainfall unseasonable and ill-distributed
1908-09	22,451,400	164,887,800	Not favourable for autumn, but partially good for winter crop
<i>Eastern Bengal and Assam</i>			
1906-06	15,960,200	101,397,600	Crop damaged by heavy rain and consequent floods
1906-07	15,723,500	119,835,800	Unfavourable for autumn but favourable for winter crop
1907-08	15,758,100	126,281,500	Very favourable for autumn but less so for winter crop
1908-09	15,332,500	121,699,000	Favourable on the whole except in parts
<i>Madras (b)</i>			
1894-95	6,569,400	85,662,600	Rainfall partial and insufficient
1895-96	6,881,000	56,359,500	Generally favourable, though crop affected in places by floods
1896-97	6,620,000	48,359,700	Unfavourable in northern but better in southern districts
1897-98	6,935,200	47,991,700	Crop affected by failure of north-east monsoon
1898-99	7,166,000	54,946,700	Rain deficient in northern and excessive in southern districts
1899-1900	6,429,000	39,437,100	Favourable at first, but latterly unfavourable in most districts
1900-01	6,591,600	49,023,100	Not unfavourable on the whole
1901-02	6,858,200	51,490,200	Favourable
1902-03	7,734,800	57,485,500	Favourable
1903-04	7,568,500	58,200,000	Favourable
1904-05	5,322,700	40,497,000	Unfavourable owing to failure of rains
1905-06	6,604,400	45,833,200	Not unfavourable
1906-07	6,044,400	50,438,200	Rainfall seasonable
1907-08	7,215,100	49,501,500	Water-supply not quite sufficient, but crop fair
1908-09	7,103,600	45,488,800	Water-supply insufficient, but crop fair to good

(a) Includes Eastern Bengal up to 1904-05

(b) The estimates for Madras up to 1906-07 relate only to raiyatwari villages; but since that year estimates for certain zamindari and whole inam villages have also been included

Note.—The figures for 1908-09 are subject to revision

## RICE—continued

[The figures in cwt represent the outturn of clean rice]

PROVINCE	acres	cwt	Character of season
<i>Lower Burma</i>			
1894-95 . . .	4,793,341	45,381,980	Rainfall insufficient
1895-96 . . .	5,068,147	41,481,000	Late rains unequally distributed
1896-97 . . .	5,224,062	47,679,000	Favourable
1897-98 . . .	5,720,766	52,217,000	Uniformly favourable
1898-99 . . .	5,910,650	44,851,000	Rain failed towards end of season, causing some injury
1899-1900 . . .	6,050,135	54,160,000	Good
1900-01 . . .	6,326,993	52,975,000	Not unfavourable
1901-02 . . .	6,553,190	60,602,000	Favourable
1902-03 . . .	6,553,890	53,022,000	Favourable, though floods caused damage in places
1903-04 . . .	6,761,865	64,411,000	Very favourable
1904-05 . . .	6,909,900	60,735,000	Rainfall seasonable, but crop affected by floods and high winds
1905-06 . . .	6,713,400	57,940,000	Generally favourable except for damage by floods in places
1906-07 . . .	6,873,700	61,924,000	Favourable on the whole
1907-08 . . .	7,252,000	63,148,000	Rainfall late but ample and well distributed
1908-09 . . .	7,546,300	66,835,000	Good, though heavy rain and storm affected crop in places
<i>Total</i>			
1894-95 . . .	50,002,241	497,901,780	Favourable on the whole
1895-96 . . .	49,396,747	415,855,100	Not very favourable owing to ill-distributed rainfall
1896-97 . . .	48,021,462	275,876,100	Unfavourable except in Burma
1897-98 . . .	52,205,466	498,350,700	Favourable generally
1898-99 . . .	52,682,050	505,640,600	Favourable on the whole
1899-1900 . . .	51,969,635	451,553,460	Not very favourable
1900-01 . . .	48,932,493	413,506,700	Not favourable
1901-02 . . .	48,511,190	384,294,100	Unfavourable except in Madras and Burma
1902-03 . . .	51,842,390	469,484,800	Favourable on the whole
1903-04 . . .	49,461,465	439,280,700	On the whole not unfavourable
1904-05 . . .	51,586,900	448,461,100	Not very favourable
1905-06 . . .	54,428,600	433,138,300	Crop damaged by heavy rain and floods in many places
1906-07 . . .	54,157,600	427,748,800	Not very favourable
1907-08 . . .	54,677,300	379,211,300	Not favourable
1908-09 . . .	52,426,800	398,909,800	Not very favourable on the whole

Note.—The figures for 1908-09 are subject to revision

APPENDIX A—continued

ESTIMATED AREA and YIELD of CROPS—continued

WHEAT

PROVINCE	acres	tons	Character of season
<i>Panjab (a)</i>			
1894-95 . . . . .	8,051,800	2,395,353	Winter rain sufficient and harvest excellent
1895-96 . . . . .	6,893,400	1,753,766	Very unfavourable for dry crop owing to deficient rain
1896-97 . . . . .	6,584,300	1,872,066	Monsoon weak, but winter rains copious
1897-98 . . . . .	8,013,800	2,368,975	Favourable, but late crop damaged at harvest time
1898-99 . . . . .	7,729,200	1,977,777	Not favourable. Crop injured by deficient rain, rust, insects
1899-1900 . . . . .	6,366,500	1,823,183	Monsoon rains scanty, but winter rains beneficial
1900-01 . . . . .	8,766,400	2,940,602	Very favourable, except for damage by rust and excessive rain
1901-02 . . . . .	7,227,100	1,846,332	Monsoon ceased early. Winter rains failed
1902-03 . . . . .	6,995,200	2,311,714	Favourable, except for damage by drought in mid-season
1903-04 . . . . .	7,765,700	3,075,161	Distinctly favourable
1904-05 . . . . .	7,712,100	2,355,300	Favourable
1905-06 . . . . .	8,572,100	3,510,300	Very favourable
1906-07 . . . . .	9,100,100	3,266,900	Favourable, except for local damage by excessive rain, rust, hail
1907-08 . . . . .	8,271,800	2,488,500	Monsoon ceased early. Winter rains late and scanty
1908-09 . . . . .	9,002,100	3,062,200	Favourable at first, but not so afterwards.
<i>N.-W. Frontier (b)</i>			
1901-02 . . . . .	796,500	159,279	Unusual drought throughout season
1902-03 . . . . .	822,900	234,594	Favourable on the whole
1903-04 . . . . .	994,082	302,094	Very favourable
1904-05 . . . . .	882,200	267,600	Favourable
1905-06 . . . . .	1,024,600	279,700	Favourable on the whole
1906-07 . . . . .	1,146,400	305,200	Favourable on the whole
1907-08 . . . . .	977,700	213,200	Restricted sowings; but late rains beneficial
1908-09 . . . . .	1,019,500	213,300	Fairly good, though crop affected by hail-storms in places
<i>United Provinces</i>			
1894-95 . . . . .	6,333,688	1,469,996	Rain excessive. Crop injured by high winds and cloudy weather
1895-96 . . . . .	5,177,261	1,591,294	Rain deficient throughout season
1896-97 . . . . .	4,931,710	1,850,914	Autumn rain irregular. Winter rain well distributed
1897-98 . . . . .	5,985,146	2,249,333	Favourable generally
1898-99 . . . . .	6,348,688	2,277,414	Favourable on the whole
1899-1900 . . . . .	6,202,826	2,410,052	Rainfall deficient at first but favourable later
1900-01 . . . . .	6,730,440	2,384,005	Favourable, except for damage by cloudy weather and rust
1901-02 . . . . .	6,461,729	2,401,940	Rainfall late and deficient
1902-03 . . . . .	6,909,519	2,972,497	Favourable on the whole
1903-04 . . . . .	7,788,753	3,230,018	Remarkably good
1904-05 . . . . .	7,706,500	1,897,000	Favourable at the beginning but disastrous afterwards
1905-06 . . . . .	6,478,900	2,428,700	Favourable for irrigated crop
1906-07 . . . . .	7,044,000	2,164,500	Favourable at first, but unfavourable afterwards
1907-08 . . . . .	4,405,700	1,674,700	Unfavourable on the whole
1908-09 . . . . .	5,874,700	2,132,100	Rainfall scanty and moisture insufficient for growth of crop
<i>Central Provinces</i>			
1894-95 . . . . .	3,398,348	502,275	Crop suffered from heavy rain and fungoid diseases
1895-96 . . . . .	2,713,454	369,038	Unfavourable
1896-97 . . . . .	1,969,623	332,645	Winter rains generally favourable
1897-98 . . . . .	2,171,714	543,096	Crop suffered somewhat from insufficient moisture
1898-99 . . . . .	2,505,299	456,169	Not favourable
1899-1900 . . . . .	1,633,070	201,803	Very unfavourable
1900-01 . . . . .	2,055,736	440,909	Favourable, except for damage by rust
1901-02 . . . . .	2,620,138	571,049	Unfavourable owing to insufficient rainfall
1902-03 . . . . .	2,284,908	666,539	Favourable, except for damage by frost and insects
1903-04 . . . . .	2,921,161	751,368	Favourable, except at the end of the season
1904-05 . . . . .	3,068,500	751,900	Favourable, except for damage by frost and rust in places
1905-06 . . . . .	3,019,500	773,700	Favourable on the whole
1906-07 . . . . .	3,274,100	831,500	Favourable on the whole
1907-08 . . . . .	2,427,900	455,200	Unfavourable owing to deficiency of moisture
1908-09 . . . . .	2,469,850	637,900	Favourable, though crop affected by frost and hail in places

(a) Includes Native States from 1907-08

(b) Constituted in 1901 out of the Panjab

Note.—The figures for 1908-09 are subject to revision

## APPENDIX A—continued

ESTIMATED AREA and YIELD of CROPS—continued

## WHEAT—continued

PROVINCE	acres	tons	Character of season
<i>Bengal (a)</i>			
1894-95 . . . . .	1,413,000	686,300	Crop suffered somewhat from drought
1895-96 . . . . .	1,427,400	345,600	Autumn rains ceased early, and winter rains failed
1896-97 . . . . .	1,341,700	386,400	Unfavourable at first, but slightly better afterwards
1897-98 . . . . .	1,569,500	592,600	Favourable
1898-99 . . . . .	1,582,500	656,400	Uniformly favourable
1899-1900 . . . . .	1,550,300	572,700	Not favourable on the whole
1900-01 . . . . .	1,498,700	472,600	Unfavourable
1901-02 . . . . .	1,408,300	391,500	Unfavourable owing to failure of rains
1902-03 . . . . .	1,417,000	485,900	Unfavourable on the whole
1903-04 . . . . .	1,508,600	527,800	Generally favourable
1904-05 . . . . .	1,324,900	433,200	Unfavourable on the whole
1905-06 . . . . .	1,248,300	396,600	Crop seriously damaged by continuous rain and hailstorms
1906-07 . . . . .	1,402,600	388,700	Unfavourable
1907-08 . . . . .	1,003,100	299,200	Very unfavourable
1908-09 . . . . .	1,255,200	319,800	Not favourable owing to drought
<i>Eastern Bengal</i>			
1904-05 . . . . .	180,700	62,000	On the whole not favourable
1905-06 . . . . .	159,800	50,000	Not favourable owing to ill-distributed rainfall
1906-07 . . . . .	135,900	31,900	Unfavourable
1907-08 . . . . .	92,800	21,300	Very unfavourable
1908-09 . . . . .	77,100	14,300	Very unfavourable owing to drought
<i>Bombay (including Native States) (b)</i>			
1894-95 . . . . .	2,678,665	741,961	Favourable, though crop injured by cloudy weather, rust, frost
1895-96 . . . . .	2,288,838	454,865	Unfavourable owing to deficient moisture
1896-97 . . . . .	1,446,741	288,002	Unfavourable. Rains failed
1897-98 . . . . .	2,004,832	627,914	Rain continuous and excessive
1898-99 . . . . .	2,470,998	737,385	Not favourable on unirrigated but good on irrigated land
1899-1900 . . . . .	1,157,077	99,408	Very unfavourable. Rains failed
1900-01 . . . . .	1,433,810	298,479	Unfavourable owing to want of rain
1901-02 . . . . .	1,510,459	179,034	Unfavourable owing to deficient rainfall. Damage by rats
1902-03 . . . . .	1,797,245	532,601	Favourable on the whole
1903-04 . . . . .	2,174,076	560,279	Fairly good on the whole
1904-05 . . . . .	2,260,900	356,609	Not favourable owing to deficient rain, cold and frost
1905-06 . . . . .	1,347,200	275,100	Unfavourable owing to insufficiency of moisture
1906-07 . . . . .	1,662,900	338,200	Not favourable on the whole
1907-08 . . . . .	1,677,700	336,200	Generally unfavourable owing to deficient water-supply
1908-09 . . . . .	1,600,200	357,800	Not very favourable owing to deficient rain and frost
<i>Barar</i>			
1894-95 . . . . .	889,326	150,232	Not very favourable owing to heavy rain
1895-96 . . . . .	747,025	103,984	Unfavourable owing to early cessation of monsoon
1896-97 . . . . .	381,425	23,413	Crop failed owing to want of rain
1897-98 . . . . .	390,378	41,983	Unfavourable on the whole
1898-99 . . . . .	436,362	53,671	Not favourable on the whole
1899-1900 . . . . .	17,910	414	Disastrously bad owing to failure of rains
1900-01 . . . . .	243,554	29,900	Unfavourable on the whole
1901-02 . . . . .	280,085	34,385	Favourable, but crop damaged by rats
1902-03 . . . . .	216,955	34,625	Favourable, but sowings restricted
1903-04 . . . . .	452,663	70,052	Not very favourable owing to heavy rain and hailstorms
1904-05 . . . . .	428,600	80,000	Favourable on the whole
1905-06 . . . . .	424,300	60,700	Not very favourable owing to deficient monsoon
1906-07 . . . . .	440,300	72,600	Favourable on the whole
1907-08 . . . . .	286,900	33,400	Not favourable owing to deficiency of moisture
1908-09 . . . . .	310,950	65,800	Favourable on the whole

(a) Includes Eastern Bengal up to 1903-04

(b) Includes the State of Baroda also

Note.—The figures for 1908-09 are subject to revision

1907-08 . . . . .	22,824,500	6,106,700	Favourable at first, but dull weather prevailed later
1908-09 . . . . .	26,978,200	7,590,000	Crop injured by deficient rain, cold winds, frosts
			Not very favourable. Winter rains generally deficient

(a) The figures for the years previous to 1902-03 exclude jagir areas

Note.—The figures for 1908-09 are subject to revision

APPENDIX A—continued

ESTIMATED AREA and YIELD of CROPS—continued

COTTON

[The figures in bales represent the outturn of cleaned cotton, i.e., cotton with the seeds extracted]

PROVINCE	acres	bales of 400 lb	Character of season
<b>Bombay (including Native States) (a)</b>			
1894-95	5,292,717	880,240	Not favourable owing to ill-distributed rainfall
1895-96	5,303,598	1,024,455	Favourable on the whole
1896-97	5,083,549	827,819	Unfavourable on the whole, owing to drought
1897-98	4,751,103	948,514	Not very favourable owing to damage from blight and locusts
1898-99	5,098,145	1,232,861	Favourable on the whole
1899-1900	3,095,206	(5)81,647	Extremely unfavourable owing to failure of rains
1900-01	4,240,140	759,096	Not favourable owing to deficiency of late rains
1901-02	4,394,796	567,386	Unfavourable owing to insufficient rain
1902-03	4,786,657	943,327	Favourable, though crop affected by excessive rain and cold
1903-04	5,702,000	1,059,000	Favourable on the whole
1904-05	5,955,000	796,000	Unfavourable owing to deficiency of moisture
1905-06	6,665,000	1,198,000	Favourable at first, but not so afterwards
1906-07	7,383,000	1,762,000	Favourable
1907-08	7,101,000	1,039,000	Not favourable owing to early cessation of monsoon
1908-09	6,012,000	1,257,000	Not quite favourable owing to ill-distributed rain, cold frost
<b>Berar (c)</b>			
1894-95	2,102,956	255,628	Not favourable owing to excessive rain
1895-96	2,071,856	451,230	Favourable on the whole
1896-97	2,306,870	336,376	Not favourable owing to failure of monsoon after August
1897-98	2,150,329	439,980	Favourable on the whole
1898-99	2,476,300	617,222	Outturn good, though late rains failed
1899-1900	1,983,602	104,693	Very unfavourable owing to failure of rains
1900-01	2,521,651	730,962	Favourable on the whole
1901-02	2,630,201	612,344	Favourable, though crop injured by rats
1902-03	2,705,635	710,668	Favourable, though crop damaged by heavy rain in November
1903-04	2,951,000	486,000	Not favourable owing to heavy rain
1904-05	3,069,000	755,000	Favourable on the whole
1905-06	3,142,000	475,000	Not favourable owing to ill-distributed rainfall
1906-07	3,288,000	553,000	Crop injured by heavy and continuous rain
1907-08	3,168,000	371,000	Unfavourable owing to want of moisture
1908-09	3,016,000	541,000	Favourable, though crop affected by heavy rain
<b>Madras (d)</b>			
1894-95	1,521,500	106,980	Unfavourable owing mainly to want of timely rains
1895-96	1,623,900	120,524	Favourable on the whole
1896-97	1,395,400	104,655	Not favourable owing to ill-distributed rainfall
1897-98	1,509,100	118,876	Crop injured by blight or drought in places
1898-99	1,321,700	127,670	Not very favourable
1899-1900	1,382,700	101,440	Unfavourable on the whole
1900-01	1,373,300	118,320	Not favourable on the whole
1901-02	1,351,200	130,130	Fair on the whole
1902-03	1,580,900	167,109	} Favourable
1903-04	1,665,000	175,000	
1904-05	1,755,000	132,000	} Not favourable owing to want of sufficient rain
1905-06	1,507,000	145,000	
1906-07	1,703,000	157,000	Favourable
1907-08	1,855,000	193,000	Favourable
1908-09	1,607,000	165,000	Rainfall defective, but crop fair to good

(a) Includes the State of Baroda also

(b) The estimate for the year is too low, as the mill consumption for the year ending the 30th June and the net exports for the year ending the 30th September were 605,000 bales. For both the preceding and the following years the trade figures are however lower than the estimates, so that for the 3 years 1898-1901 the production would seem to be understated only by 109,000 bales. In this calculation the excess of the exports from the districts of the North and East Deccan over their reported production, which averages 208,000 bales in the twelve years 1891-1903, has been taken to represent imports by road into the Presidency from the neighbouring Native States

(c) The figures of production for Berar for the years previous to 1903-04 represent the mill consumption for the year ending the 30th June and the exports for the year ending the 30th September, as the provincial estimates of the outturn were extremely defective

(d) The estimates for Madras up to 1903-07 relate only to *raiyatwari* tracts; but since that year estimates for certain *saminadari* and whole *inam* villages and Native States have also been included

Note.—The figures for 1908-09 are subject to revision

## COTTON—continued

[The figures in bales represent the outturn of cleaned cotton, i.e., cotton with the seeds extracted]

PROVINCE	acres	bales of 400 lb	Character of season
<b>Hyderabad (a)</b>			
1894-95	1,811,912	117,277	Crop suffered from excessive rain
1895-96	1,492,768	173,283	Not reported
1896-97	1,538,296	137,152	} Not favourable
1897-98	1,653,689	163,449	
1898-99	1,738,379	222,302	Not very favourable
1899-1900	1,292,329	91,975	Very unfavourable owing to drought
1900-01	1,698,886	288,570	Not very favourable owing to sudden cessation of winter rains
1901-02	1,689,139	300,301	Favourable
1902-03	2,359,130	280,267	Not favourable owing to cloudy weather and untimely rain
1903-04	2,661,000	275,000	Not favourable owing to heavy rain and strong winds
1904-05	2,731,000	330,000	Favourable
1905-06	2,537,000	303,000	Crop suffered through failure of late rains
1906-07	3,480,000	449,000	Favourable on the whole
1907-08	3,100,000	293,000	Favourable for early crop, but better for late crop
1908-09	2,802,000	295,000	Rain excessive for early and deficient for late crop
<b>United Provinces (b)</b>			
1894-95	1,214,747	198,933	Unfavourable owing to heavy rain and stormy winds
1895-96	1,060,905	280,414	Favourable on the whole
1896-97	1,150,069	200,521	Crop injured by drought and dry west winds
1897-98	919,671	225,478	Not unfavourable on the whole
1898-99	933,395	261,304	Favourable on the whole
1899-1900	996,673	227,787	Unfavourable on the whole
1900-01	1,046,176	294,169	Favourable on the whole
1901-02	1,153,870	368,638	Favourable though rains were late
1902-03	1,239,131	327,728	Crop suffered from deficient rain, high winds and insects
1903-04	841,000	184,000	Not favourable owing to excessive rain and winds
1904-05	1,201,000	368,000	Favourable on the whole
1905-06	1,372,000	394,000	Crop suffered from deficient rainfall
1906-07	1,489,000	639,000	Very favourable
1907-08	1,461,000	268,000	Not favourable owing to early cessation of monsoon
1908-09	1,363,000	419,000	Favourable on the whole.
<b>Panjab (b)</b>			
1894-95	1,161,200	241,667	Favourable on the whole
1895-96	1,176,700	204,803	Rainfall generally insufficient and untimely
1896-97	1,128,400	223,947	Monsoon ceased early and irrigation inadequate
1897-98	783,600	166,707	Not favourable owing to insufficient rain
1898-99	938,400	138,926	Unfavourable owing to scanty and irregular rainfall
1899-1900	1,215,400	205,203	Unfavourable owing to the holding off of rain
1900-01	1,080,200	219,646	Crop suffered from heavy rainfall and insects
1901-02	1,026,800	213,466	Not very favourable on the whole
1902-03	1,193,600	229,005	Rainfall deficient
1903-04	1,205,100	261,241	Fairly satisfactory on the whole
1904-05	1,698,000	409,000	Favourable
1905-06	2,020,000	192,000	Disastrous owing to injury by green fly, drought and boll-worm
1906-07	1,413,000	357,000	Favourable on the whole
1907-08	1,474,000	356,000	Not very favourable owing to abrupt cessation of monsoon
1908-09	1,562,000	324,000	Favourable at first, but crop affected by heavy rain afterwards
<b>N.-W. Frontier (c)</b>			
1901-02	30,400	6,759	Not favourable on the whole
1902-03	27,400	7,420	} Favourable on the whole
1903-04	35,900	8,424	
1904-05	49,000	10,000	} Not unfavourable on the whole
1905-06	59,000	13,000	
1906-07	61,000	13,000	} Not favourable on the whole
1907-08	48,000	9,000	
1908-09	54,000	12,000	Generally good

(a) The figures for the years previous to 1902-03 exclude *jagir* areas

(b) Includes Native States from 1904-05

(c) Constituted in 1901 out of the Panjab

Note.—The figures for 1908-09 are subject to revision

APPENDIX A--continued

ESTIMATED AREA and YIELD of CROPS--continued

COTTON--continued

[The figures in bales represent the outturn of cleaned cotton, i.e., cotton with the seeds extracted]

PROVINCE	acres	bales of 400 lb	Character of season
<b>Central Provinces</b>			
1894-95	601,984	81,196	Not favourable owing to excessive rain
1895-96	541,087	105,940	Favourable
1896-97	718,186	86,950	Not favourable owing to scanty rainfall
1897-98	668,847	118,994	Crop injured by excessive rain
1898-99	668,522	165,169	Not favourable owing to ill-distributed rainfall
1899-1900	712,836	117,050	Very unfavourable owing to exceptional drought
1900-01	1,004,812	268,958	} Not favourable owing to irregular rainfall
1901-02	981,342	267,737	
1902-03	1,136,431	260,798	} Not favourable on the whole
1903-04	1,293,000	274,000	
1904-05	1,484,000	474,000	Favourable
1905-06	1,657,000	343,000	Not favourable owing to ill-distributed rain
1906-07	1,389,000	328,000	Crop damaged by heavy rain and floods in places
1907-08	1,264,000	224,000	Unfavourable owing to want of moisture
1908-09	1,159,000	227,000	Favourable, though crop affected by heavy rain
<b>Rajputana</b>			
1894-95	619,862	184,896	} Not reported
1895-96	514,854	150,862

1897-98	542,435	137,689	
1898-99	478,604	117,743	Unfavourable on the whole
1899-1900	325,933	44,161	Very unfavourable owing to failure of rains
1900-01	369,884	104,390	} Not reported
1901-02	2,1,934	87,868	
1902-03	458,503	164,142	Favourable on the whole
1903-04	395,000	113,000	Not favourable owing to high winds and locusts
1904-05	469,000	186,000	Favourable on the whole
1905-06	231,000	61,000	Unfavourable
1906-07	428,000	201,000	Favourable
1907-08	438,000	91,000	Not favourable
1908-09	407,000	86,000	Crop damaged by heavy rain in many places
<b>Central India</b>			
1894-95	512,936	38,000	} Not reported
1895-96	420,239	49,500	
1896-97	522,683	45,900	} Not reported
1897-98	417,456	60,600	
1898-99	471,408	46,800	Favourable on the whole
1899-1900	479,565	23,100	Very unfavourable owing to failure of rains
1900-01	542,673	63,900	} Favourable on the whole
1901-02	529,094	72,200	
1902-03	591,006	115,878	} Favourable on the whole
1903-04	772,000	125,000	
1904-05	846,000	136,000	Favourable
1905-06	979,000	130,000	Unfavourable except at sowing time
1906-07	1,132,000	222,000	Favourable
1907-08	993,000	55,000	Unfavourable
1908-09	957,000	144,000	Crop suffered through want of rain in many places
<b>Sind (including Native States)</b>			
1894-95	113,589	55,141	Crop damaged by floods and blight
1895-96	111,856	51,018	Water-supply deficient
1896-97	123,706	56,694	Fairly good
1897-98	108,227	40,176	Not favourable
1898-99	92,312	39,712	Not favourable owing to frost
1899-1900	92,089	20,507	Unfavourable owing to deficient water-supply
1900-01	84,560	43,031	} Not unfavourable on the whole
1901-02	129,409	72,553	
1902-03	195,486	110,808	} Favourable on the whole
1903-04	209,000	115,000	
1904-05	221,000	97,000	Not unfavourable on the whole
1905-06	283,000	84,000	Favourable, but crop damaged by boll-worm
1906-07	250,000	155,000	Favourable on the whole
1907-08	259,000	135,000	Not favourable owing to deficient water-supply
1908-09	257,000	97,000	Inundation favourable, but crop suffered through frost

(a) Exclusive of zamindari area in Raipur, Bilaspur, and Drug

(b) Represent exports and consumption of the years ending the 30th September as the reported estimates of the yield were imperfect

Notes.—The figures for 1908-09 are subject to revision

## APPENDIX A—continued

## COTTON—concluded

[The figures in bales represent the outturn of cleaned cotton, i.e., cotton with the seeds extracted.]

PROVINCE	acres	bales of 400 lb	Character of season
<i>Burma</i>			
1898-99	167,821	—	
1899-1900	148,533	32,900	Not unfavourable, though crop damaged by heavy rain
1900-01	141,718	21,077	Heavy rain injured the crop
1901-02	130,610	13,125	Unfavourable owing to want of rain
1902-03	148,867	21,114	Fair on the whole
1903-04	165,000	27,000	Not unfavourable on the whole
1904-05	189,000	39,000	} Favourable on the whole
1905-06	183,000	35,000	
1906-07	187,000	36,000	Fairly favourable on the whole
1907-08	195,000	29,000	Unfavourable owing to deficient rainfall
1908-09	193,000	31,000	Unfavourable at first, but latterly favourable
<i>Bengal (a)</i>			
1894-95	206,200	63,871	Favourable on the whole
1895-96	197,900	53,353	Favourable except at sowing time
1896-97	157,100	40,154	Unfavourable owing to deficient rainfall
1897-98	174,000	52,590	Favourable on the whole
1898-99	187,900	45,560	Unfavourable owing to uneven character of monsoon.
1899-1900	160,600	39,705	Unfavourable owing to inadequate rain
1900-01	127,700	41,262	Unfavourable for early but fairly favourable for late crop
1901-02	118,500	32,094	} Unfavourable owing to deficient rain
1902-03	100,300	29,866	
1903-04	98,000	28,000	Not very favourable on the whole
1904-05	78,000	20,000	Not favourable owing to ill-distributed rain
1905-06	71,000	16,000	} Crop suffered from excessive rain and floods
1906-07	75,000	16,000	
1907-08	70,000	14,000	Not favourable owing to floods and drought afterwards
1908-09	67,000	14,000	Favourable for early, but less so for late crop
<i>Eastern Bengal and Assam</i>			
1903-04 (b)	31,000	12,000	Not very favourable on the whole
1904-05	50,000	17,000	Generally favourable
1905-06	61,000	17,000	Crop injured by excessive rain
1906-07	76,000	17,000	Not favourable on the whole
1907-08	79,000	24,000	Very favourable
1908-09	80,000	19,000	Favourable at first, but rain excessive afterwards
<i>Mysore</i>			
1903-04	70,000	13,000	} Not reported
1904-05	71,000	5,000	
1905-06	76,000	5,000	} Generally favourable
1906-07	89,000	10,000	
1907-08	84,000	6,000	
1908-09	63,000	3,000	Crop suffered through want of crop
<i>Ajmer-Merwara</i>			
1903-04	33,000	5,000	Unfavourable owing to early cessation of rains
1904-05	52,000	18,000	Favourable
1905-06	29,000	5,000	Unfavourable owing to high winds
1906-07	40,000	19,000	Favourable
1907-08	41,000	10,000	Not favourable on the whole
1908-09	40,000	9,000	Heavy rain affected crop
<i>Total</i>			
	Acres	Outturn as shown above (in bales of 400 lb)	Net exports and consumption (in bales of 400 lb) (c)
1894-96	14,959,103	2,228,029	2,989,019
1895-96	14,515,662	2,670,388	3,632,042
1896-97	14,643,495	2,264,890	3,351,408
1897-98	13,683,437	2,473,033	3,396,563
1898-99	14,602,892	3,015,269	3,866,730
1899-1900	11,384,576	1,090,163	2,526,880
1900-01	14,231,150	2,953,381	3,592,372
1901-02	14,506,295	2,744,591	4,054,588
1902-03	16,581,046	3,367,030	4,540,217
1903-04	18,025,000	3,160,665	4,269,267
1904-05	19,918,600	3,791,000	4,454,254
1905-06	21,072,000	3,416,000	4,685,751
1906-07	22,484,000	4,931,000	5,361,655
1907-08	21,630,000	3,122,000	4,291,000
1908-09	19,739,000	3,643,000	4,776,000

(a) Includes Eastern Bengal up to 1903-04

(b) Assam only

(c) For the years up to 1907-08 the exports as well as the mill consumption are for the year ending the 30th September. For 1908-09 they are for the year ending the 30th June. No reliable information exists as to the annual consumption outside the mills, but in 1907 it was settled in consultation with the Bombay Cotton Trade Association to adopt the conventional estimate of 750,000 bales. This figure has been included in the figure for each year shown in this column

Note.—The figures for 1908-09 are subject to revision

1902-03	491,137	42,352	Not favourable owing to drought, frost and insects
1903-04	808,566	77,567	Not favourable owing to absence of winter rains
1904-05	825,700	67,300	Unfavourable owing to frost, cloudy weather, and storms
1905-06	815,400	69,600	Crop damaged by frost and hailstorms
1906-07	1,061,200	97,700	Crop suffered through cloudy weather, frost, rust, hail
1907-08	491,500	21,700	Very unfavourable on the whole
1908-09	398,400	76,700	Fairly favourable in principal districts

(a) "Pure" means seed sown by itself; "mixed" means seed sown in the same fields with other crops. The estimates of the mixed crop of the United Provinces are highly conjectural; hence they have been kept separate  
(b) Includes Eastern Bengal up to 1903-04

Note.—The figures for 1908-09 are subject to revision

1903-04	855,700	78,000	
1904-05	674,200	55,100	Rainfall insufficient
1905-06	723,300	55,000	Not unfavourable on the whole
1906-07	556,900	45,800	Early rainfall insufficient
1907-08	647,000	53,100	Not unfavourable on the whole
1908-09	747,800	62,500	Rainfall seasonable
<i>Bombay (including Native States) (b)</i>			
1894-95	754,073	100,438	Rainfall unseasonable.
1895-96	843,039	98,104	Crop suffered from want of moisture
1896-97	770,553	65,600	Crop suffered through early cessation of monsoon
1897-98	681,905	103,136	Favourable on the whole
1898-99	754,327	115,566	
1899-1900	303,148	6,186	Extremely unfavourable owing to failure of rains
1900-01	719,642	105,167	Favourable
1901-02	862,935	64,421	Unfavourable. Late rains failed
1902-03	901,523	177,137	Favourable
1903-04	1,125,655	218,219	Satisfactory
1904-05	793,900	52,700	Unfavourable owing to deficient rainfall
1905-06	908,100	105,100	Not favourable on the whole
1906-07	1,049,500	186,000	Fairly satisfactory
1907-08	992,700	61,400	Unfavourable owing to deficient rain and disease
1908-09	951,700	98,300	Not favourable on the whole
<i>Central Provinces</i>			
1894-95	520,009	27,714	Not favourable owing to excessive rain
1895-96	569,407	45,243	Favourable at first, but not afterwards
1896-97	627,943	43,953	Not favourable on the whole
1897-98	749,491	67,770	Exceptionally favourable
1898-99	634,268	43,475	Unfavourable owing to ill-distributed rainfall
1899-1900	1,026,257	62,132	Favourable at first, but not afterwards
1900-01	983,260	82,138	
1901-02	719,641	39,029	Unfavourable. Early rains excessive. Late rains failed
1902-03	1,075,957	16,610	Favourable on the whole
1903-04	962,295	73,551	Not very favourable owing to heavy rainfall
1904-05	779,600	68,900	Unfavourable. Rainfall irregular
1905-06	686,800	57,700	Crop injured by heavy rain and mists
1906-07	717,700	60,700	Crop damaged by heavy rain
1907-08	881,109	45,400	Unfavourable owing to early cessation of rains
1908-09	773,500	56,600	Favourable at first, but not afterwards

(a) The estimates for Madras up to 1906-07 relate only to *raiyatwari* villages; but since that year estimates for certain *samindari* and whole *inam* villages have also been included

(b) Includes the State of Baroda also

ESTIMATED AREA and YIELD of CROPS—continued

## SESAMUM—continued

PROVINCE	acres	tons	Character of season
<i>Bengal (a)</i>			
1904-95 . . . . .	356,200	43,400	Not quite favourable
1905-96 . . . . .	368,900	36,000	
1906-97 . . . . .	332,500	30,800	
1907-98 . . . . .	367,500	49,900	Favourable on the whole
1908-99 . . . . .	367,200	52,100	
1909-1900 . . . . .	388,200	49,700	Not favourable. Rainfall capricious and irregular
1900-01 . . . . .	396,000	45,400	
1901-02 . . . . .	411,100	54,900	Crop suffered through drought
1902-03 . . . . .	384,800	45,000	Not favourable on the whole
1903-04 . . . . .	428,300	58,000	Favourable on the whole
1904-05 . . . . .	283,800	30,800	Crop damaged by hail, frost and excessive rain
1905-06 . . . . .	283,200	33,400	Latterly favourable
1906-07 . . . . .	273,200	36,000	Rainfall ill-distributed
1907-08 . . . . .	195,800	14,100	Unfavourable owing to failure of rains
1908-09 . . . . .	205,200	22,900	Not favourable for early but favourable for late crop
<i>Eastern Bengal</i>			
1904-05 . . . . .	209,900	28,200	Crop damaged by hail and excessive rain
1905-06 . . . . .	231,800	28,300	Not favourable. Rain ill-distributed
1906-07 . . . . .	223,100	36,200	At first favourable, but drought affected crop
1907-08 . . . . .	223,600	32,200	Crop affected by drought
1908-09 . . . . .	267,000	40,900	Favourable for early but not so for late crop
<i>United Provinces</i>			
1894-95 (b) { Pure . . . . .	177,043	15,513	Crop damaged by excessive rain
{ Mixed . . . . .	448,000	40,000	
1895-96 { Pure . . . . .	143,833	14,554	Crop suffered from scanty rainfall, insects and strong winds
{ Mixed . . . . .	560,000	55,000	
1896-97 { Pure . . . . .	177,785	12,222	Crop affected by early withdrawal of monsoon
{ Mixed . . . . .	672,000	45,000	
1897-98 { Pure . . . . .	147,817	14,994	Favourable on the whole
{ Mixed . . . . .	584,000	60,000	
1898-99 { Pure . . . . .	155,178	15,159	Excessive late rain affected crop
{ Mixed . . . . .	713,000	70,000	
1899-1900 { Pure . . . . .	203,604	22,743	Favourable on the whole
{ Mixed . . . . .	517,000	60,000	
1900-01 { Pure . . . . .	238,154	28,431	Favourable on the whole
{ Mixed . . . . .	622,000	75,000	
1901-02 { Pure . . . . .	252,870	23,226	Crop suffered through deficient late rain
{ Mixed . . . . .	611,000	60,000	
1902-03 { Pure . . . . .	318,150	35,279	Favourable generally
{ Mixed . . . . .	717,000	80,000	
1903-04 { Pure . . . . .	374,559	34,345	Crop damaged by excessive rain and strong winds
{ Mixed . . . . .	747,000	70,000	
1904-05 { Pure . . . . .	304,100	13,900	Unfavourable owing to excessive rain at first and drought afterwards
{ Mixed . . . . .	600,000	35,000	
1905-06 { Pure . . . . .	278,200	17,500	Not favourable. Rainfall deficient
{ Mixed . . . . .	700,000	45,000	
1906-07 { Pure . . . . .	309,200	36,200	Favourable on the whole
{ Mixed . . . . .	775,000	90,000	
1907-08 { Pure . . . . .	329,800	10,000	Favourable at first, but not afterwards owing to drought
{ Mixed . . . . .	900,000	30,000	
1908-09 { Pure . . . . .	321,800	34,000	Favourable, though crop affected by heavy rain in parts
{ Mixed . . . . .	1,000,000	100,000	

(a) Includes Eastern Bengal up to 1903-04

(b) "Pure" means seed sown by itself; "mixed" means seed sown in the same fields with other crops. The estimates of the mixed crop of the United Provinces are highly conjectural; hence they have been kept separate.

Note.—The figures for 1908-09 are subject to revision

APPENDIX A—continued

ESTIMATED AREA and YIELD of CROPS—continued

SESAMUM—continued

PROVINCE	acres	tons	Character of season
<i>Panjab and N.-W. Frontier (a)</i>			
1894-95 . . . . .	319,200	31,917	Favourable on the whole
1895-96 . . . . .	189,400	18,772	} Unfavourable
1896-97 . . . . .	223,400	21,379	
1897-98 . . . . .	195,400	22,984	Favourable on the whole
1898-99 . . . . .	252,600	25,350	Favourable, though rain ceased somewhat early
1899-1900 . . . . .	216,400	16,253	Favourable at first, but unfavourable later
1900-01 . . . . .	218,500	19,077	Unfavourable owing to heavy floods
1901-02 . . . . .	211,500	17,640	Unfavourable. Rainfall unevenly distributed
1902-03 . . . . .	244,000	20,819	Not unfavourable on the whole
1903-04 . . . . .	246,600	26,143	Favourable on the whole
1904-05 . . . . .	158,000	16,000	Unfavourable owing to insufficient moisture
1905-06 . . . . .	146,300	13,900	Unfavourable on the whole. Rainfall deficient
1906-07 . . . . .	95,500	8,800	Unfavourable. Rainfall irregular
1907-08 . . . . .	84,100	4,700	Very unfavourable. Rains ceased early
1908-09 . . . . .	148,700	20,200	Fairly favourable, though rainfall excessive
<i>Sind (including Native States)</i>			
1894-95 . . . . .	191,040	15,892	Favourable
1895-96 . . . . .	151,038	12,052	Scanty rains and low inundation
1896-97 . . . . .	183,873	12,384	Inundation good
1897-98 . . . . .	154,812	8,260	Not favourable
1898-99 . . . . .	114,129	8,285	Inundation low
1899-1900 . . . . .	158,957	7,323	} Unfavourable on the whole
1900-01 . . . . .	105,881	4,468	
1901-02 . . . . .	99,693	5,985	Water-supply deficient
1902-03 . . . . .	118,044	7,602	Not quite favourable
1903-04 . . . . .	122,496	5,665	Crop suffered from blight and insects
1904-05 . . . . .	83,700	5,800	Inundation low
1905-06 . . . . .	84,400	6,300	Favourable on the whole
1906-07 . . . . .	55,900	4,300	Crop damaged by insects
1907-08 . . . . .	55,600	4,200	Inundation low
1908-09 . . . . .	73,500	11,100	Inundation favourable and rainfall good
<i>Barar (b)</i>			
1894-95 . . . . .	69,715	2,359	Not favourable. Rainfall excessive
1895-96 . . . . .	76,155	2,704	Not favourable owing to drought
1896-97 . . . . .	103,298	3,515	Favourable at first, but drought later
1897-98 . . . . .	135,164	6,573	} Favourable
1898-99 . . . . .	135,483	5,620	
1899-1900 . . . . .	116,089	1,436	Unfavourable owing to drought and excessive heat
1900-01 . . . . .	149,022	9,554	Very favourable
1901-02 . . . . .	118,249	2,968	Unfavourable. Rainfall excessive and continuous
1902-03 . . . . .	138,592	5,402	Favourable at first, but late rain untimely
1903-04 . . . . .	121,551	11,630	Crop damaged by heavy rain
1904-05 . . . . .	111,500	10,100	Unfavourable. Rainfall irregular
1905-06 . . . . .	106,100	9,200	At first favourable; but drought damaged crop
1906-07 . . . . .	90,200	9,700	Not unfavourable on the whole
1907-08 . . . . .	96,500	10,000	Crop suffered through want of moisture
1908-09 . . . . .	95,900	9,400	Favourable at first, but not afterwards

(a) The figures of both area and yield from 1904-05 relate to Panjab only, the forecast of the sesamum crop of the North-West Frontier Province having been discontinued from that year

(b) The estimates of yield for the years previous to 1903-04 are defective, being based on incorrect data

Note.—The figures for 1903-09 are subject to revision

\* The estimates of the area under jute in Bengal previous to 1904 are based on very uncertain data

(a) Including Eastern Bengal up to 1904

(b) Revised according to the statistics of trade and consumption, and including the production of Assam, Cooch Bihar and Nepal

(c) The figures up to 1904 relate to Assam only, the figures for Eastern Bengal for those years being included under Bengal

(d) Included in the figures shown under Bengal for these years.

(e) Not reported

(f) Excluding the figures for Nepal, Upper India and Madras, which are stated below (bales):—

	Nepal	Upper India ( <i>vide</i> E. I. Ry.)	Madras ( <i>vide</i> B. N. Ry.)
1905 . . . . .	84,300	26,269	4,257
1906 . . . . .	50,018	10,520	1,057
1907 . . . . .	77,600	5,500	7,800

Note.—The figures for 1908 are subject to revision

(a) Includes Eastern Bengal up to 1904-05

(b) No information

(c) The estimates for Madras up to 1906-07 relate only to *raiyatwari* villages; but since that year estimates for certain *samindari* and whole *inam* villages have also been included

Note.—The figures for 1908-09 are subject to revision

## APPENDIX B—AVERAGE YIELD OF CROPS.

This statement shows the average yield in lb per acre of the principal cultivated crops, revised with reference to the results of experiments made up to the year 1906-07.

### GENERAL NOTES.

At the instance of the Secretary of State for India a provisional return of the yield of the principal crops cultivated in India was first compiled in 1892, from various statistical publications, such as, agricultural and settlement reports, crop forecasts, gazetteers, replies to the enquiries of the Famine Commission, etc., and to provide for the periodical revision of the estimates a system of experimental crop cuttings was prescribed by the Government of India, the results of which were to be reported in quinquennial returns.

The instructions for the preparation of these returns are that the estimate given should be that of the average outturn on average soil in a year of average character as deduced from a consideration of the information obtained or experiments made during the years under review: so that when multiplied by the average area cropped, it may give as near an approximation as possible to the outturn of the crop in an average year. The Agricultural Department of each Province has at its disposal a provisional estimate of the average yield of land of average quality (under the two major heads of irrigated and unirrigated land) for the several crops in each district. The object of the experiments annually made is to test the accuracy of these estimates, and to enable the head of the Agricultural Department in each province to revise his provincial estimates when necessary. Should it happen that the period has been one of exceptionally poor harvests which are reflected in the crop experiments received by the Agricultural Department from the districts, this would not necessarily involve the reduction of the standard estimates for the district or for the province, unless there were other reasons for thinking that, as estimates of yield in average years, they had been pitched too high.

The experiments made during the present quinquennium (1901-02 to 1906-07) are more numerous and are believed to be more accurate than in any of the preceding periods. In all but two provinces they have justified considerable modification of the provincial averages previously accepted as correct, the general trend of the changes being in the upward direction. In the case of Bengal and Bombay, the old provincial averages have been repeated without alteration, as the results of the experiments made in the present quinquennium have not been held to justify any revision. As regards Bengal, however, the district figures have been revised in many instances.

Though the figures of provincial average outturns are believed to approximate to the outturn on average soil in a year of average character, yet the variations between the results of experiments on the same crop in different provinces are so divergent, that some of the returns must still be regarded as problematic.

### PROVINCIAL NOTES.

The experiments made from 1902 to 1907 have been more numerous than those in the preceding quinquennial period and give evidence of increasing care and judgment, but the results in Upper Burma are still susceptible of improvement. The experiments have, as before, been usually conducted by Township Officers and occasionally by Deputy Commissioners and Sub-Divisional Officers. In order to show the main product only the following deductions, as in the last quinquennium, have been made from the gross outturn of the crops, namely, for rice 33 per cent, for jawar 30 per cent and for cotton 70 per cent. The estimate of average outturn of husked rice in Lower Burma has decreased from 1,200 to 1,176 lbs. and in Upper Burma from 1,060 to 1,028 lbs., and the yield of wheat and jawar has also been reduced slightly. The average outturn of gram, til and cotton on the other hand has been raised. The variations in outturn are explained to be due mainly to a new method of procedure in calculating the averages. Figures for peas are shown for the first time, as the cultivation of this crop in the province is said to be extending.

In the previous quinquennium, before the constitution of the new province, figures for Assam were shown separately. In the present returns figures for Assam and the districts transferred from Bengal have been combined to give the average of the new province. Detailed figures for each district are not available except for winter rice, rape and mustard, sugarcane, and cotton. In the case of cotton a deduction varying between 40 and 50 per cent has been made as indicating the proportion of lint to seed cotton.

During the quinquennium there has been some improvement in the number and quality of the experiments made, but the results are still far from satisfactory. In many cases representative crops have not been selected and sometimes the area cut has been less than one-tenth of an acre. The experiments are too few and the results too discrepant to justify any general conclusions as to the average yields of the various crops, or afford grounds for

Justifying the provisional estimates previously adopted by the Agricultural Department, which are in part a reproduction of the estimates of 1892. In tabulating the returns these unrevised provisional estimates continue to appear in the statement of provincial averages, but in the detailed table the average outturn based upon the experiments conducted during the quinquennial period are shown for each district, irrigated and unirrigated crops being classified separately.

The experiments made during the quinquennium have not necessitated any considerable changes in the provincial averages. Such alterations as have been made are, with the exception of barley, in the upward direction, showing that outturns had been underestimated previously. The yield of maize has increased from 950 to 1,050 lbs., of sugarcane from 2,500 to 2,600 lbs., and of cotton from 150 to 160 lbs. The other changes are unimportant.

During the quinquennium, 162 crop cutting experiments (70 in Ajmer and 92 in Merwara) were carried out. The average yield of jawar has been raised, and of maize, cotton and barley lowered, the most important change being the reduction of the yield of maize unirrigated from 1,428 to 960 lbs. A deduction of 70 per cent has been made to obtain the yield of cleaned cotton.

Experiments in districts under settlement and in the canal colonies have usually been made on much more extensive areas than one-fortieth of an acre adopted in ordinary districts, and the returns in consequence show fewer abnormal results. Though the accuracy of the experiments is not yet as great as desirable, there has been a steady improvement in the last few years. In the case of most crops the average yield has been raised. The most important changes are as follows:—Average outturn of irrigated rice increased from 1,126 to 1,183 lbs., of irrigated wheat from 935 to 994 lbs., and of irrigated and unirrigated barley from 903 to 1,053 lbs. and from 520 to 652 lbs. respectively. The average outturn of irrigated sugarcane has decreased from 1,727 to 1,607 lbs., and of unirrigated from 1,390 to 1,288 lbs.

The estimates of average outturn are believed to approximate much more closely to accuracy than previous figures, as they are based in all districts, except Peshawar, on the estimates framed by Settlement officers. The average outturn of rice has been raised from 843 to 1,202 lbs., of bajra from 402 to 497 lbs., of maize from 1,159 to 1,342 lbs., and of sugarcane from 1,513 to 2,673 lbs. The outturn of wheat has decreased from 669 to 618 lbs. and of jawar (unirrigated) from 602 to 326 lbs.

In all districts figures taken from previous returns have been repeated for the majority of crops. Of the experiments selected as giving results typical of an average crop during the present quinquennium four were on wheat, three on jawar and bajra, and one each on sugarcane, rapeseed, and barley. As a result of these experiments, the provincial average outturn of wheat has been raised from 1,066 to 1,229 lbs., of barley from 965 to 1,076 lbs., and of bajra from 763 to 776 lbs. The very high yield of jawar given in the previous return, 1,793 lbs., has been reduced to 1,233 lbs. The average outturn of sugarcane also has decreased from 4,315 to 4,233 lbs., and of rapeseed from 653 to 590 lbs.

The estimates of 1897 were prepared with great care and the experiments made in the last two quinquennial periods have not justified any general revision. No change, therefore, has been made in the provincial averages previously reported, though there are indications that the average outturn of wheat and ragi has been pitched a little too low and that of sugarcane somewhat too high.

In the previous quinquennium separate figures were given for the Central Provinces and for Berar, but the provincial averages are now compiled for the first time from the combined figures. The bulk of the experiments have been carried out by Settlement officers; but such experiments as have been made by District officers show greater care in selection of crops for experiment and fewer gross errors than in the previous quinquennium, though it is stated there is still room for improvement. The tendency has been on the whole to lower average outturn of different crops. The relatively small yield in comparison with the average yield of other provinces is due to the fact that most of the crops are not irrigated.

The experiments accepted as unobjectionable during the quinquennium were 3,348 in number against 2,619 in the previous quinquennium. The average assessment of the plots of land selected for experiment is in excess of the average assessment of the whole province, and the average yield of the several crops exceeds the standard figures based upon settlement estimates for all sorts and kinds of soil, which, however, are believed to be

below the mark. The average yield of the majority of crops is higher than the average of the previous quinquennium, especially in the case of sugarcane, the outturn of which has been increased from 5,127 to 6,089 lbs. Figures for rice, bajra, and ragi (irrigated and unirrigated) are also higher, and the only decreases are jawar and jinjili (unirrigated). The yield has been reported of paddy instead of husked rice, and a deduction of 38 per cent has been made to obtain the yield of rice (husked).

---

The only experiments made have been on rice. The average outturn has been raised from 1,446 to 1,507 lbs., which is very high in comparison with the reported yield of other provinces, but is accounted for by favourable climatic conditions, the average rainfall being 123 inches.

---

Experience gained in the conduct of experiments is believed to have improved the results considerably. The somewhat unfavourable conditions of two years in the quinquennium are counterbalanced by the favourable conditions of the two preceding years, and the average of the whole period may therefore be taken as fairly correct. The average yield of sugarcane has been reduced from 3,399 to 3,279 lbs., of til (sesamum) from 231 to 215 lbs., and of ragi from 578 to 562 lbs. The average outturn of cleaned cotton has been increased from 52 to 89 lbs., and of horse gram from 212 to 229 lbs.

NOTE.—The average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped, adding the yield of unirrigated land multiplied by the unirrigated area cropped, and dividing the sum of these products by the total area cropped.

\* The estimates for Bengal are the standards, adopted provisionally by the Agricultural Department of the province, which are partly based on the information collected in 1892. The results of the experiments for the period ending 1906-07, as recorded in Appendix B—III, are not considered sufficiently reliable to justify a revision of the provisional estimates.
