

# REPORT

ON THE

## SEASON AND CROPS

OF THE

### PUNJAB

For the Agricultural year ending 30th  
June, 1954

CHANDIGARH :

Printed by the Controller, Printing and Stationery, Punjab,  
1959

**REPORT ON THE SEASON AND CROPS OF THE PUNJA  
FOR THE AGRICULTURAL YEAR ENDING  
30TH JUNE, 1954**

**I. INTRODUCTION**

(i) *General characteristics of the year.*—Climatic conditions were generally favourable for the sowing and maturing of crops. Due to increased production, decontrol and deflationary tendencies, the supply position of foodgrains remained easy and the prices of foodgrains fell during the year under report as compared with those prevailing in the year 1952-53.

Condition of cattle was generally satisfactory. The supplies of fodder were generally sufficient except in parts of Hissar, Amritsar and Hoshiarpur Districts. The health and economic position of the agricultural population remained satisfactory.

(ii) The total geographical area of the State according to village papers is 23,919,087 acres or 37,374 square miles. Out of this 19,280,367 acres are reporting area and 4,638,720 acres of mountain tracts and forest area in Kangra District are non-reporting area, for which no figures are available in village papers.

(iii) The total number of villages in the State is 16,477.

**II. RAINFALL (TABLE I)**

(i) Rainfall in each of the main seasons was as follows :—

*Hot weather (March to May, 1953).*—Rainfall during this period was below normal throughout the State.

*Monsoon (June to September, 1953).*—Rainfall was above normal in all the districts.

*Post-monsoon (October to December, 1953).*—Rainfall during this period remained below normal.

*Winter (January to February, 1954).*—Rainfall during winter was above normal except in Ferozepore District, where it was below normal.

(ii) *Rainfall and other weather conditions and their effects on different agricultural operations.*—*Kharif Harvest.*—Rainfall during January, 1953, was generally above average. Light rainfall was recorded during February in parts of all the districts of the State except Hissar, Rohtak and Gurdaspur where there was no rain. Weather during the month of March remained dry. Rainfall during April was below normal in all the districts except Simla where it was above normal. Light rain was recorded in May in parts of all the districts except Hoshiarpur and Ferozepore, where weather remained dry. In June, it was below average in all the districts except in Karnal, Ambala, Simla and Ludhiana where it was above average. Rainfall during July was above average throughout the State. Supply of canal-water was sufficient at sowing time. Climatic conditions were generally favourable for the sowing of Kharif crops. Rainfall during August was generally above average except Karnal, Hoshiarpur, Jullundur and Ludhiana Districts, where it was below average. It proved beneficial to standing crops. In September, the rainfall was generally below average except in Amritsar and Gurdaspur Districts where it was above average. Supply of canal-water remained sufficient for the maturing of the crops. Except for light rain in parts of some districts, weather during October remained dry. Some damage was caused to the Maize crop by heavy rains, strong winds and *Kutra* in a few districts.

*Rabi Harvest.*—Except for light rain in parts of some districts, weather during October and November remained dry. There was no rainfall in the first three weeks of December, 1953. However, light rain fell in some localities of all the districts in the State during the last week of December, 1953. Supply of canal-water was sufficient for sowings in all the canals except in Eastern and Sidhwan Branch canals where it was frugal and insufficient respectively. The season was generally favourable for sowings of Rabi crops. Rainfall during January, 1954, was above normal in all the districts of the State except Jullundur, Ludhiana and Ferozepore Districts, where it was below normal. In February, the rainfall was above normal throughout the State. Some damage by hailstorms to standing crops was reported from a few villages in Karnal, Hoshiarpur, Jullundur and Amritsar Districts. Rainfall during the month of March was above normal in Rohtak, Karnal, Kangra, Jullundur and Ludhiana Districts and below average in other districts. Supply of canal-water was adequate for the maturing of crops. Except for light rain in parts of Hissar, Rohtak, Simla Kangra and Gurdaspur Districts, weather during April, 1954, remained dry and was favourable for harvesting operations.

(iii) *Damage to crops by other calamities.*—The cotton crop was affected by *jasad* in parts of Jullundur District and sugarcane crop by *pyrilla* in parts of several districts. The latter crop also received a setback due to the attack of top-borer, particularly in Jullundur District. Due to wet season in February and March, there was spread of *rust*, *smut* and bunt to wheat crop. The attack was more in low-lying and humid areas and caused considerable damage in some of the districts. The attack was comparatively less in the dry parts of the State.

### III. CLASSIFICATION OF AREA (TABLE II)

The following Table shows the total area and its classification etc :—

	1953-54 (Area in thousand acres)	1952-53 (Area in thousand acres)	Normal (Area in thousand acres)
Forests ...	784	709	742
Barren and uncultivated land and land put to non-agricultural uses ...	7,286	7,250	6,618
Culturable waste—permanent pastures and other grazing lands and land under miscellaneous tree crops and groves not included in area sown ...	1,849	2,084	2,264
Current fallows and other fallows ...	1,731	2,145	2,016
Net area sown ...	12,269	11,732	11,860
Total area according to village papers ...	23,919	23,920	23,500

As compared with normal and last year, the increase under forest area was due to the fact that Government declared *Birs* of Chhachhrauli in Jagadhri Tehsil and some canal area in Rupar Tehsil as protected forests and also due to the revised figures supplied by Kangra District.

The increase in barren and uncultivable land and total area as compared with normal was due to the inclusion of revised figures of 4,638,720 acres for uncadastrally surveyed areas instead of 3,896,960 acres reported in the year 1951-52 in the Kangra District.

The decrease under culturable waste land and current fallows and increase in the net area sown was due to favourable climatic conditions at sowing time.

The net area sown was 51 per cent of the total area in the State. The area under forests was 3 per cent; under culturable waste 8 per cent; under current fallows 7 per cent and barren and unculturable land, etc., 31 per cent.

## IV. IRRIGATION (TABLE III-A)

The main sources of irrigation in the State are Government Canals (62 per cent of the total net irrigated area), private canals (3 per cent) and wells (35 per cent). The area irrigated by tanks and other sources is negligible. The construction of new wells and tube-wells was started during the year under report in the State.

The total irrigated area increased from 5,843,887 acres during the preceding year to 6,019,379 acres during the year under report. The area under Government canals and wells advanced by 5 and 3 per cent due to the extension of canal irrigation and increase in tube-wells, respectively.

The area returned as canal irrigated by the Irrigation Department was 4,036,882 acres as against 3,245,200 acres reported by the district officers. The difference is due to the fact that the latter figures represent the net canal irrigated area whereas the former figures cover the area which received canal-water whether it was sown or not and also cropped area sown more than once in the same year.

The number of Government canals (channels) during the year under report was 1,214 and their mileage (canal miles) 9,164 as against 1,146 channels and 6,963 miles during last year.

As compared with last year the number of wells in working order fell from 174,799 to 170,816 and tube-wells rose from 1,285 to 1,816. The decrease in wells in working order is due to the increase in the number of tube-wells this year.

The irrigated area under principal crops as compared with the normal was as follows :—

Name of crop	1953-54	Normal
	Acres	Acres
Rice	429,596	336,871
Wheat	1,746,766	1,624,384
Barley	154,031	134,379
Jowar	129,940	121,275
Bajra	218,752	191,260
Maize	328,508	248,626
Gram	801,550	661,514
Mung and Mash	51,887	41,992
Massar	36,682	34,162
Suyarcane	242,211	247,351
Potatoes	11,670	9,751
Cotton Desi	173,610	219,126
Cotton American	378,807	154,008
Chillies	34,735	31,519
Fodder crops	955,881	851,695

As compared with the normal, there was an increase in the irrigated areas of all the principal crops except sugarcane and Desi cotton.

The decrease in acreage under sugarcane has been attributed to the low price of Gur prevailing in the year 1952-53. The Desi cotton is being replaced by American cotton, the area under which has considerably increased.

The irrigated area sown was 41 per cent of the total sown area of the State.

#### V. CROP ACREAGE (TABLE IV)

(i) The sown and matured areas of the year under report were as under as compared with the preceding year and the normal :—

	Year under report (1953-54)	Previous year (1952-53)	Normal
Sown area (thousand acres) ...	14,723	13,865	13,938
Matured area (thousand acres) ...	13,868	12,083	11,773
Percentage of matured on sown area ...	94	87	84
Failed area (thousand acres) ...	855	1,782	2,165
Percentage of failed on sown area ...	6	13	16

The total sown area increased by 6 per cent as compared with last year and normal owing to favourable climatic conditions at the time of sowings.

The percentage of failed on sown area was 7 and 10 per cent less than the previous year and normal, respectively, owing to favourable climatic conditions at the time of the maturing of crops.

(ii) The total sown area under principal crops was as under :—

	1953-54	Normal
	Acres	Acres
Rice ..	588,332	499,600
Wheat ..	3,134,567	3,009,700
Barley ..	408,515	425,300
Jowar ..	667,174	582,100
Bajra ..	2,203,586	2,010,000
Maize ..	793,648	768,200
Gram ..	2,678,083	2,697,100
Mung and Mash ..	243,590	225,800
Mussar ..	85,937	91,100
Groundnut ..	87,638	79,700
Sesamum ..	66,811	58,900
Toria ..	73,135	72,400
Other rabi oilseeds (Sarshaf, Taramira, Mustard) ..	286,443	319,700
Sugarcane ..	321,320	327,000
Cotton (Desi) ..	207,248	253,000
Cotton (American) ..	380,514	154,600
Tobacco ..	6,081	5,900
Potatoes ..	15,587	14,400
Tea ..	8,851	9,000
Fodder crops ..	2,030,506	1,876,600

Desi cotton is being gradually replaced by American cotton, the area of which has considerably increased owing to high prices. The area of all other Kharif crops except sugarcane advanced as a result of favourable season at sowing time. The decrease in area under sugarcane was due to the low prices of Gur prevailing in the last year.

The area under gram, barley and other Rabi oilseeds increased as compared with last year due to favourable season at sowing time, while the decrease as compared with normal was owing to comparatively less favourable climatic conditions during the year under report than in some of the years within last five years. The increase in the acreage of wheat is attributed to the favourable climatic conditions at the time of sowings.

There were no important variations under other crops.

#### VI. YIELD PER ACRE (TABLE V-A)

During the year under report, the yield per acre compared with the normal was as under:—

Name of crop (1)	Current yield per acre in lbs. (2)	Normal yield per acre in lbs. (3)	Difference minus or plus in column 2 on column 3 (per cent) (4)
Rice (unhusked) ..	1,388	1,060	+31
Wheat ..	928	870	+7
Jowar ..	259	380	-32
Bajra ..	386	350	+10
Barley ..	903	730	+27
Maize ..	1,191	950	+25
Gram ..	828	620	+34
Sugarcane ...	2,558	2,620	- 2
Cotton Desi ..	212	190	+12
Cotton American ..	265	220	+20
Toria ..	524	630	-17
Other Rabi oilseeds (Sarshaf, Taramira & Mustard)	367	410	-10

The general increase in the average yield per acre of Kharif and Rabi crops was due to favourable climatic conditions at the time of the maturing of crops. The increase in the case of American cotton was attributed to Government Cotton Extension Schemes. The yield per acre of sugarcane was below normal due to the fact that the crop suffered a setback owing to attack of *pyrilla* and top-borer in parts of several districts. Reduction in the yield per acre of jowar was due to scarcity of rains in certain parts of Rohtak and Hissar Districts where this crop is generally sown in abundance. Although the yield per acre of toria and other Rabi oilseeds was 10 and 16 per cent more than last year respectively, yet it was 17 and 10 per cent below normal due to the fact that the season was not so favourable as it was in the last five years.

## VII—TOTAL OUTTURN OF CROPS (V-B)

The total production of principal crops during the year under report as compared with the normal outturn is as under:—

Name of crop	Current year (tons)	Normal (tons)	Difference minus or plus per cent
Rice	364,500	247,800	+47
Wheat	1,298,800	1,155,700	+13
Jowar	77,200	62,600	+23
Bajra	379,900	256,400	+48
Barley	164,600	116,700	+41
Maize	421,900	284,400	+48
Gram	989,700	1,037,400	- 5
Sugarcane	366,900	374,100	- 2
Toria and other oilseeds (harshaf taramira and Mustard)	58,940	55,500	+ 6
Tobacco	2,200	2,400	- 8
*Cotton cleaned (Desi)	111,900	106,000	+ 6
*Cotton cleaned(American)	257,600	86,700	+197
Potatoes	71,900	46,400	+55
Mung and Mash	33,000	27,300	+21
Massar	16,200	17,100	- 5
Groundnut	28,500	24,000	+19
†Sesamum	130,700	122,600	+ 7
Tea	1,717,700	2,286,600	-25

\*Production is in bales of 392 lbs. each.

†Production is in terms of cwts.

‡Production of tea is in lbs.

As compared with the normal, the increase in the total production of foodgrains, pulses (except gram) and oilseeds, was due to favourable climatic conditions at the time of maturity. The total outturn of cotton increased owing to Government Cotton Extension Schemes. The fall in the outturn of Gram, Gur, Tea and Massar was due to lesser area placed under these crops. The decrease in the outturn of tobacco was insignificant.

## VIII—FARM (HARVEST) PRICES (TABLE VI)

The table given below shows the average harvest prices of the principal crops during the year under report as compared with the preceding year and the normal.

S. No.	Name of crop	Prices in 1953-54	Prices in 1952-53	Normal (Last 5 years prices)
1	Rice (unhusked)	Rs. A. P. 9 15 0	Rs. A. P. 10 0 0	Rs. A. P. 10 14 0
2	Wheat	12 12 0	14 2 0	14 7 0
3	Jowar	8 11 0	9 11 0	9 11 0
4	Bajra	9 7 0	10 11 0	10 10 0

S. No.	Name of crop	prices in	prices in	Normal (Last 5 years
		1953-54	1952-53	prices)
		Rs. A. P.	Rs. A. P.	Rs. A. P.
5	Barley ..	8 5 0	10 5 0	9 15 0
6	Gram ..	9 14 0	15 11 0	12 0 0
7	Maize ...	10 11 0	11 12 0	10 8 0
8	Cotton Desi (unginned) ..	25 9 0	24 7 0	25 14 0
9	Cotton American (unginned)	38 0 0	32 0 0	34 2 0
10	Sugar (raw) ..	16 8 0	12 14 0	17 12 0
11	Groundnut ..	17 15 0	18 0 0	..
12	Castor-seed ..	..	32 0 0	..
13	Linseed ..	20 10 0	20 2 0	..
14	Rape ..	21 9 0	19 9 0	24 15 0
15	Mustard ..	21 8 0	22 3 0	..
16	Toria ..	21 14 0	19 10 0	24 10 0
17	Sesamum ..	28 15 0	28 6 0	..
18	Tobacco ..	48 12 0	49 10 0	55 2 0
19	Ginger ..	37 8 0	37 8 0	..

Due to increased production, decontrol and deflationary tendencies in our economy, the harvest prices of practically all foodgrains declined during the year 1953-54 as compared with the harvest prices ruling in 1952-53, as well as from the normal prices of these foodgrains.

Due to strong undertone of our cotton market, the harvest prices of both Desi and American Cotton firmed up and American Cotton showed a considerable advance over its harvest price prevailing during 1952-53.

Low acreage and production of sugarcane and high price of white sugar, resulted in comparatively a high price of *Gur*.

The harvest prices of oilseeds fluctuated erratically due to unsteady market conditions in the oilseed section of the trade, whereas the price of groundnut remained steady round the old level, the price of Mustard came down and the prices of other oilseeds registered a rise.

The price of tobacco was slightly lower than previous year's harvest price.

The value of agricultural produce in the Punjab State during 1953-54 was to the tune of Rs 154.51 crores, the details of which are given below:—

Serial No.	Commodity	Value in lakhs of rupees (Production harvest prices)
1	Rice (unhusked) ...	9,88
2	Wheat ...	45,13
3	Jowar ...	1,82
4	Bajra ...	9,77
5	Barley ...	3,74
6	Maiz ...	12,29

Serial No.	Commodity	Value in lakhs of rupees (production harvest prices)
7	Gram ..	2,664
8	Sugar (raw) ..	1,650
9	Cotton Desi (unginned) ..	413
10	Cotton American (unginned) ..	1,415
11	Groundnut ..	142
12	Sesamum ..	52
13	Toria ..	101
14	Rape (Sarshaf, Taramira and Mustard) ..	270
15	Linseed ..	22
16	Tobacco ..	27
17	Mung ..	40
18	Mash ..	121
19	Massar ..	58
20	Potatoes ..	213
	Total ..	15,451

The crops listed in the above statement occupied 12,275,000 acres or 83.37 per cent of the total sown area in the State, viz, 14,723,000 acres. Assuming that the value of production per acre on the remaining 16.63 per cent of the area was the same as for these crops, the total value of all the crops grown in the Punjab would be Rs 185 crores 33 lakhs as against Rs 189 crores 19 lakhs estimated for the last year.

#### IX AGRICULTURAL WAGES (TABLE VII)

As compared with last year, there was a slight decrease of one and two annas in the daily wage rates of carpenters and black smiths, respectively and a slight rise of one anna in the daily wages of field labour, other agricultural labourers and herdsmen. The daily wages of cobblers, however, remained stationary.

No difficulty was experienced to secure agricultural labourers in the State during the year under report except in Rohtak and Hoshiarpur Districts where some scarcity was felt.

The number of working hours of all the classes of agricultural labourers in the State remained generally 8 hours a day.

#### X. LIVESTOCK POULTRY, AGRICULTURAL MACHINERY AND IMPLEMENTS TABLE VIII

Fodder was generally sufficient except in parts of Hissar, Amritsar and Hoshiarpur Districts.

Condition of cattle was generally satisfactory. The diseases affecting livestock and their mortality during 1953-54 were as under :—

	Affected	Died
Rinderpest ..	571	322
Haemorrhagic septicaemia ..	8,947	7,7-9
Foot and mouth ..	17,343	5
Black-quarter ..	410	403
Goat pox ..	34	6
Other contagious diseases ..	95	95
Liver Fluke in sheep ..	..	..
Pleuropneumonia ..	17	9
Other causes ..	13,263	508

The diseases affecting poultry and mortality by each of them were—

	Affected	Died
Coccidiosis ..	36	11
Spirochaetosis and other contagious and parasitic diseases ..	1,454	856
Ranikhet ..	364	343

Prompt and timely remedial and preventive measures were taken by the veterinary field staff by way of carrying out mass inoculations and vaccinations to check and control the various common contagious diseases of livestock and poultry. The table below gives the total number of inoculations and vaccinations carried out during the period under report—

<i>Vaccinations—</i>	
Equine abortion ..	125
Hæmorrhagic Septicaemia ..	8,32,857
Goatvirus ..	14,04,072
Black-quarter ..	28,772
Ranikhet ..	37,579
Fowl pox ..	6,286
<i>Inoculations—</i>	
Anti-rinderpest serum ..	17,261
H. S. Serum ..	46,608
Black-quarter serum ..	7,529

The production of Anti-rabic, Ranikhet, Goatis, Fowl-pox and Hæmorrhagic Septicaemia diseases vaccines was continued as before at the B. P. Section of the Punjab College of Veterinary Science and Animal Husbandry, Hissar during the year.

The District Board took keen interest in cattle breeding and 639 cow-bulls and 13 buffalo bulls were purchased by them during the year under report.

#### XI. CONCLUSION

(i) The economic position of agriculturists remained satisfactory and the agricultural population enjoyed good health.

(ii) The total remission and suspensions of land revenue granted by the Punjab Government to agriculturists during the year 1953-54 were as below:—

Name of district	Remission of land revenue	Suspension of land revenue
	Rs	Rs
Hissar	120,086	3,09,104
Rohtak	173	..
Gurgaon	3,679	3,637
Karnal	1,884	..
Ambala	9,792	540
Simla		..
Kangra	2,305	..
Hoshiarpur	562	2,050
Jullundur	2,101	..
Ludhiana	3,865	6,690
Ferozepure	601	..
Amritsar	8,123	3,119
Gurdaspur	22,012	30,491
Total	1,75,183	3,55,631

(iii) *Agricultural deterioration by water logging.*—Hissar, Rohtak, Gurgaon, Karnal, Ambala, Hoshiarpur, Ludhiana, Ferozepore, Amritsar and Gurdaspur Districts were affected by *thur* and *sem*. The total number of villages affected was 1524. The districts worst affected by *thur* were Gurgaon, Rohtak, Amritsar, Hissar and Ludhiana while figures of *sem* were highest in Karnal, Ludhiana and Hissar. Total *thur* in the State increased from 75,984 acres in Rabi 1953 to 89,160 acres in Rabi 1954, i.e., by 13,176 acres. Total area under *sem* also increased from 13,448 acres in Rabi 1953 to 14,640 acres in Rabi 1954.

*Thur* in cultivated area decreased from 21,229 acres to 16,889 acres while *sem* increased from 4,624 acres to 5,320 acres as compared with the figures of last year. Progressive total of the cultivated area gone out of cultivation and classed as *banjar* upto Rabi 1954 was 30,024 acres. Out of this, 23,889 acres were damaged by *thur* and 6,135 acres by *sem*.

The hill torrents in Ambala District did not affect any considerable area during the year under report, due to the efforts made to enforce closures in the forest areas and also to the fact that cultivators were encouraged for terracing and reclaiming of their land. In the Hoshiarpur District, steps are being taken by the Forest Department to preserve soil from erosion by *chos*.

G. S. MANN,  
Director of Land Records, Punjab.

---

	Other Sources	261	208	231	218	168	241
Total ..		46,097	49,633	46,167	47,163	50,680	52,680
Percentage of net area irrigated to net area sown		40	42	37	40	43	36
Area irrigated more than once in the same year (in hundred acres)		237	249	5,270	9,037	7,759	7,514
Total gross area incorporated irrigated (in hundred acres)		46,334	49,882	51,437	56,200	58,439	60,194
Percentage to total irrigated area to total sown area		35	35	35	41	42	49
Number of wells having independent Ayacut		Not available		168,508	162,375	171,268	160,037
Number of wells supplementary recog- nised sources of irrigation		Not available		8,521	8,511	3,531	10,779
Percentage of area irrigated by wells having independent Ayacut to the total area irrigated		Not available		3	..	..	..

\*Detail not available.

†Included abandoned wells.

‡Figures relate to net irrigated area (Total irrigated sown area—area sown more than once in the whole year). Figures of previous years relate to the total irrigated sown area minus the area sown more than once in the single harvest.
