

REPORT ON THE SEASON AND CROPS OF THE PUNJAB  
FOR THE AGRICULTURAL YEAR ENDING THE  
30TH JUNE, 1955.

I. INTRODUCTION

*General characteristics of the year.*

(i) The climatic conditions were generally favourable for the sowing and maturing of crops except Jowar, Bajra, Mung and Mash which were damaged owing to prolonged drought from the end of July, 1954, to the 3rd week of September, 1954. Due to increased production, decontrol, and deflationary tendencies in our economy, the harvest prices of all the foodgrains declined during the year under report as compared to the prices prevailing in the preceding year.

The condition of cattle remained generally satisfactory. The agricultural population of the State enjoyed good health. Agricultural labour was available except in Rohtak and Hoshiarpur Districts where some dearth was felt.

(ii) The total geographical area of the State according to the village papers, was 23,917,951 acres or 37,372 square miles.

(iii) The total number of villages in the Punjab was 16,477.

(iv) The total reporting area of the State was 19,279,231 acres and non-reporting area 4,638,720 acres (consisting of hilly tracts and forest area, for which figures are not available in the village papers).

II. RAINFALL (TABLE I)

(i) The rainfall in each of the main seasons was as follows :—

*Hot Weather (March to May, 1954).*—The rainfall during this period was below normal throughout the State.

*Monsoon (June to September, 1954).*—The rainfall during the monsoon period was generally above normal.

*Post-Monsoon (October to December, 1954).*—During the period, the rainfall was above normal in Rohtak, Gurgaon, Ambala and Amritsar Districts and below normal in the remaining districts.

*Winter (January to February, 1955).*—The rainfall during the winter was above normal except in Hissar, Gurgaon, Kangra, Gurdaspur, Ferozapore and Amritsar Districts, where it was below normal.

(ii) Rainfall and other weather conditions and their effects on different agricultural operations.

*Kharif Harvest.*—The rainfall during January, 1954, was above normal in all the districts of the State except Jullundur and Ludhiana, where it was below normal. In February, 1954, the rainfall was above normal throughout the State. The rainfall during the month of March, 1954, was below normal in Rohtak, Karnal, Kangra, Jullundur and Ludhiana Districts and above normal in the remaining districts. Except for light rain in parts of Hissar, Rohtak, Simla, Kangra and Gurdaspur Districts the weather remained dry during April, 1954. Light rainfall was recorded in all the districts during the month of May, 1954. During June, 1954, the rainfall was below normal throughout the State. The rainfall during July, 1954, was generally below average except in Ludhiana, Ambala, Simla, Hoshiarpur and Amritsar Districts, where it was slightly above normal.

The canals supplies were generally sufficient except in Sarusti Canal of Nirwana Circle, where the supplies were insufficient. The climatic conditions were generally favourable for sugarcane and unfavourable for other crops.

The downpour during August, 1954, was below normal in all the districts except Simla, where it was above normal. During September, 1954, the rainfall was excessive in Hoshiarpur, Jullundur, Ludhiana, Amritsar and Gurdaspur Districts and sufficient in the remaining districts. The prolonged drought from the end of July, 1954, to the third week of September, 1954, adversely affected the barani crops, especially jowar and bajra in the South-Eastern districts. Some damage to standing crops by heavy rains and floods in low-lying areas, was reported from parts of Jullundur, Ludhiana, Amritsar and Gurdaspur Districts.

*Rabi Harvest.*—In October, 1954, the rainfall was generally above normal except in Hissar District where it was below average. The weather remained dry during November, 1954. Except for light showers in parts of Simla, Kangra, Hoshiarpur and Gurdaspur Districts, there was no rainfall during December, 1954. The supply of canal water for rabi sowings was adequate in all the canals except Bist Doab Canal where it was insufficient. The climatic conditions were favourable for the sowing of rabi crops. The rainfall during January, 1955, was above normal except in Hissar, Gurgaon, Kangra, Gurdaspur, Ferozepore and Amritsar Districts where it was below normal. During February, 1955, there were only light showers. Light to moderate rainfall was recorded during March, 1955, throughout the State and proved beneficial to the standing crops. The season was, generally, favourable for the harvesting of rabi crops.

### III. CLASSIFICATION OF AREA (TABLE II)

The following table shows the total area and its classification, etc. :—

Serial No.	Classification	Area in 000 Acres		
		1954-55	1953-54	Normal (Quinquennial average)
1	Forests ..	789	784	750
2	Barren and uncultivated land and land put to non-agricultural uses ..	7,298	7,286	6,998
3	Culturable waste-permanent pastures and other grazing lands and land under miscellaneous tree crops and groves not included in the area sown ..	1,776	1,849	2,059
4	Current fallows and other fallows ..	1,309	1,731	1,904
5	Net area sown ..	12,746	12,269	12,024
	Total area according to village papers	23,918	23,919	23,735

As compared to the normal, the increase under the forest areas was due to the fact that the Government declared Birs of Chhachhrauli in Jagadhri Tehsil and some canal area in Rupar Tehsil as protected forests.

The increase in barren and unculturable land and total area as compared to the normal, was due to the inclusion of revised figures of 4,638,120 acres for un-cadastrally-surveyed-areas instead of 3,896,960 acres reported in the year 1951-52 in Kangra District.

The decrease under culturable waste lands and current fallows and increase in the net area sown as compared to the last year and the normal, was due to favourable climatic conditions at sowing time.

The net area sown was 53 per cent of the total area in the State. The area under forests was 3 per cent, under culturable waste 8 per cent, under current fallows 5 per cent and barren and unculturable land, etc., 31 per cent.

### IV. IRRIGATION (TABLE III-A)

The main sources of irrigation in the State were Government canals (61 per cent of the total net irrigated area), private canal (2 per cent) and wells (36 per cent). The area irrigated by tanks and other sources was about 1 per cent. The construction of new wells and tube-wells remained in progress during the year under report.

The total irrigated area increased from 6,019,379 acres during the preceding year to 6,489,200 acres during the year under report.

The irrigated area returned as canal irrigated by the Irrigation Department was 4,612,499 acres as against 3,503,600 acres reported by the Revenue Department. The variation in the figures was due to the fact that the figures of irrigated area reported by the Irrigation Department indicated the area which received canal water irrespective of the fact whether or not it was actually sown, and which had multiple cropping, that is, the same area having been sown more than once in the same year, while the figures reported by the Revenue Department represented only the net canal irrigated area sown.

The number of Government canals (Channels) during the year under report was 1,167 and their mileage (Canal miles) 9,114 as against 1,214 channels and 9,164 miles during the last year. The decrease was due to the fact that some bunds were shown as channels in the report for the year 1953-54 against Jullundur and Ludhiana Districts.

As compared to the last year, the number of wells in working order fell from 170,816 to 170,790 and of tube-wells rose from 1,816 to 2,367. The decline in wells in working order was attributed to the increase in the number of tube-wells this year.

The irrigated area under the principal crops as compared to the normal, was as follows :—

Name of Crop	1954-55	Normal
	Acres	Acres
Rice ..	433,887	395,118
Wheat ..	1,814,761	1,679,354
Barley ..	132,340	142,952
Jowar ..	148,256	133,778
Bajra ..	178,479	191,310
Maize ..	321,145	301,754
Gram ..	985,050	685,299
Mung and Mash ..	42,435	43,874
Massar ..	36,805	36,411
Sugarcane ..	257,655	250,286
Potatoes ..	12,404	10,623
Cotton Desi ..	146,426	221,000
Cotton American ..	582,181	220,991
Chillies ..	48,206	35,233
Fodder Crops ..	1,023,195	884,246

As compared to the normal, there was an increase in the irrigated areas under all the principal crops except bajra, mung, mash and cotton (Desi). The decrease under bajra, mung and mash and cotton (Desi) was due to the fact that more area was put under maize and cotton (American) in view of their attractive market rates.

The irrigated area sown was 40 per cent of the total sown area of the State.

#### V. CROP ACREAGE (TABLE IV)

1. The sown and matured areas of the year under report were as under as compared to the preceding year and the normal :—

	Year under report (1954-55)	Previous year (1953-54)	Normal (Quinquennial average)
Sown area (Thousand acres) ..	16,247	14,725	14,215
Matured area (Thousand acres) ..	14,520	13,868	12,299
Percentage of matured on sown area ..	89 per cent	94 per cent	87 per cent
Failed area (Thousand acres) ..	1,727	855	1,916
Percentage of failed on sown area ..	11 per cent	6 per cent	13 per cent

The total sown area increased by 10 per cent and 14 per cent as compared to the last year and the normal, respectively. This was due to favourable climatic conditions at the sowing time.

The percentage of failed area on sown area was 5 per cent more than the previous year and 2 per cent less than the normal. This was due to prolonged drought from the end of July, 1954, to the third week of September, 1954, which adversely affected the barani crops, especially jowar and bajra in the south-eastern districts.

2. The total sown area under the principal crops was as under :—

Crop	Area in acres	
	1954-55	Normal (Quinquennial average)
Rice ..	599,177	541,100
Wheat ..	3,442,008	3,084,600
Barley ..	463,161	424,900
Jowar ..	515,760	624,300
Bajra ..	1,704,384	2,032,300
Maize ..	775,108	774,800
Gram ..	4,200,643	2,629,400
Mung and Mash ..	220,059	229,500
Massar ..	88,015	93,300
Groundnut ..	103,854	83,600
Other Rabi oilseeds (Sarshaf, Taramira, Toria) ..	484,791	429,900
Sugarcane ..	343,082	329,900
Cotton Desi ..	179,051	255,600
Cotton American ..	586,823	221,700
Tobacco ..	4,773	5,700
Potatoes ..	15,843	13,600
Tea ..	8,841	9,000
Fodder crops ..	2,024,022	1,965,500

The desi cotton is being gradually replaced by American cotton, the area under which has considerably increased owing to high prices.

The area under jowar, bajra, mung, mash and sesamum decreased due to prolonged drought from the end of July, 1954, to the third week of September, 1954, which adversely affected the sowing of these crops.

The increase in the acreage of Rabi crops except massar is attributed to the favourable climatic conditions at the time of sowing.

#### VI. YIELD PER ACRE (TABLE V-A)

During the year under report, the yield per acre, as compared to the normal, was as under :—

Name of Crop	Current yield per acre in lbs	Normal Yield per acre in lbs	Difference(—) or + in column 2 on column 3
1	2	3	4
Rice (unhusked) ..	1,335	1,060	+26 per cent
Wheat ..	999	870	+15 per cent
Jowar ..	173	380	—55 per cent
Bajra ..	221	350	—37 per cent
Barley ..	843	730	+15 per cent
Maize ..	985	950	+4 per cent
Gram ..	699	620	+13 per cent
Sugarcane ..	4,118	2,620	+57 per cent
Cotton Desi ..	190	188	+1 per cent
Cotton American ..	238	220	+8 per cent
Rape (Sarshaf, Taramira and Toria) ..	360	410	—12 per cent

The general increase in the average yield per acre of kharif and rabi crops was due to favourable climatic conditions at the time of maturity of the crops. The increase in the case of American cotton was attributed to the State Cotton Extension Schemes. The yield per acre of jowar and bajra was below normal due to the fact that the crop suffered a set-back owing to continuous drought from the end of July, 1954, to that of September, 1954.

Reduction in the yield of rape (Sarshaf, taramira and toria) is attributed to unfavourable season at the time of maturity of the crop.

#### VII. TOTAL OUTTURN OF CROPS (TABLE V-B)

The total production of principal crops during the year under report as compared to the normal outturn, is illustrated below :—

Name of crop	OUTTURN IN TONS		Difference (—) or (+) per cent
	Current year	Normal	
Rice ..	357,200	316,700	+13
Wheat ...	1,535,400	1,219,600	+26
Jowar ..	39,800	65,700	—39
Bajra ..	168,500	287,300	—41
Barley ..	174,300	126,200	+38
Maize ..	340,900	318,100	+7
Gram ..	1,310,500	1,039,900	+27
Sugarcane ..	630,700	383,700	+64
Rape ..	78,000	59,700	+31
Tobacco ..	1,900	2,000	—5
*Cotton cleaned (Desi) ..	86,100	116,100	—26
*Cotton cleaned (American)	355,700	134,600	+164
Potatoes ..	83,600	54,600	+53
Mung and Mash ..	24,300	28,800	+16
Massar ..	16,300	17,600	—7
Groundnut ..	33,500	25,600	+31
†Sesamum ..	128,300	130,800	—2
‡Tea ..	2,910,000	1,762,100	+65

\*Production is in bales of 392 Lbs. each.

†Production is in terms of Cwts.

‡Production of tea is in Lbs.

As compared to the normal, the increase in the total production of food-grains (except jowar and bajra), pulses (except, Mung, Mash and Massar) and oil-seeds, was due to favourable climatic conditions at the time of maturing. The decrease in the total production of jowar, bajra, mung, mash and massar was due to the fact that there was continuous drought from the beginning of July to the end of September. The total outturn of cotton increased as a result of the State Cotton extension Schemes. The decrease in production is due to less cultivation of Tobacco owing to high excise duty. The increase in production in tea is due to favourable climatic conditions at the time of maturity of the crop.

## VIII. FARM (HARVEST) PRICES (TABLE VI)

The table below shows the average harvest prices of the principal crops during the year under report as compared with the preceding year and the normal :—

Serial No.	Name of Crop	Prices in 1954-55		Prices in 1953-54		Normal (Last five years' Prices)	
		Rs	A.	Rs	A.	Rs	A.
1	Rice (Unhusked) ..	9	5	9	15	10	10
2	Wheat ..	11	7	12	12	14	1
3	Jowar ..	6	14	8	11	9	8
4	Bajra ..	8	9	9	7	10	8
5	Barley ..	6	6	8	5	9	12
6	Gram ..	6	13	9	14	12	14
7	Maize ..	9	2	10	11	10	14
8	Cotton Desi (Unginned)	24	13	25	9	26	7
9	Cotton American (Unginned) ..	32	0	38	0	35	11
10	Sugar (raw)	12	13	16	8	18	0
11	Groundnut ..	13	2	17	15	17	5
12	Castor seed ..	19	0	..	..	31	11
13	Linseed ..	15	8	20	1	21	1
14	Rape ..	15	14	21	9	24	11
15	Mustard ..	17	2	21	8	23	15
16	Toria ..	15	4	21	14	24	5
17	Sesamum ..	22	12	28	15	31	6
18	Tobacco ..	55	3	48	12	52	6
19	Ginger ..	40	0	37	8	36	15

Due to increased production, decontrol and deflationary tendencies in our economy, the harvest prices of all foodgrains declined during the year 1954-55 as compared to the harvest prices ruling in 1953-54, as well as the normal prices of these foodgrains.

Due to increase in production, the harvest prices of both Desi and American cotton decreased.

Due to less cultivation of tobacco resulting from the high excise duty, the harvest price rose.

The value of agricultural produce in the Punjab State during 1954-55 was to the tune of Rs. 147.72 crores as detailed below :—

Serial No.	Commodity	Value in lakhs of rupees (Production × harvest prices)
1	Rice (Unhusked) ..	9,06
2	Wheat ..	47,85
3	Jowar ..	75
4	Bajra ..	3,93
5	Barley ..	3,03

Serial No.	Commodity	Value in lakhs of rupees (Production × harvest prices)
6	Maize	8,47
7	Gram	24,32
8	Sugar (raw)	22,02
9	Cotton Desi (Unginned)	3,08
10	Cotton American (Unginned)	16,43
11	Groundnut	1,19
12	Sesamum	41
13	Rape (Sarshaf, taramira, toria)	3,37
14	Mustard	1
15	Linseed	17
16	Tobacco	29
17	Mung	15
18	Mash	68
19	Massar	27
20	Potatoes	2,24
	Total	1,47,72

The crops listed in the above statement occupied 1,38,18,340 acres or 85 per cent of the total sown area in the state, viz., 1,62,47,100 acres. Assuming that the value of production per acre on the remaining 15 per cent of the area was the same as for these crops, the total value of all the crops grown in the Punjab would be Rs. 173.79 crores as against Rs. 185.35 crores estimated for the last year. The decrease is due to the low harvest prices of almost all the commodities as compared to the last year.

#### IX. AGRICULTURAL WAGES (TABLE VII)

As compared to the last year, there was a slight decrease of one anna in the daily wage rates of carpenters, black-smiths, cobblers, field labourers and other agricultural labour, which call for no remarks. The daily wages of herdsmen, however, remained stationary.

No difficulty was experienced to secure the agricultural labour in the state during the year under report except in Rohtak and Hoshiarpur Districts where some scarcity was felt.

The number of working hours of all classes of agricultural labour in the State remained generally 8 hours a day.

#### PARA X. TABLE VIII LIVESTOCK, POULTRY, AGRICULTURAL MACHINERY AND IMPLEMENTS

The fodder was, generally, sufficient. It was, however, insufficient in parts of Hissar, Gurgaon, Karnal, Simla and Jullundur Districts in the month of September, 1954.

The condition of cattle was, generally, satisfactory. The diseases affecting the livestock and their mortality during 1954-55 were as under :—

	Affected	Died
Rinderpest	1,562	554
Haemorrhagic Septicaemia	7,527	7,361
Black Quarter	555	531
Surra	413	1
Foot and mouth	7,025	15
Pleure Pneumonia	170	170
Robies	6	5
Mauge	20	..
Other contagious diseases	93	73
Other causes	15,348	999

The diseases affecting the poultry and the mortality by the each of them were :—

Name of disease	Affected	Died
Ranikhet ..	60	48
Fowl Pox ..	25	20
Other causes ..	12	12

(ii) Prompt and timely remedial and preventive measures were taken by the veterinary field staff by way of carrying out mass inoculations and vaccinations to check and control the various contagious diseases of livestock and poultry. The table below gives the total number of inoculations and vaccinations carried out during the year 1954-55.

*Vaccinations*

Goat virus ..	1,723,806
Haemorrhagic Septicaemia ..	818,148
Blackquarter virus ..	39,116
Ranikhet ..	110,421
Fowl pox ..	11,236
Contagious Pleuro Pneumonia ..	135
Equine Abortion ..	132
T.B. Tested ..	3,119
Antibarib ..	1

*Inoculations*

A.R.P. Serum ..	27,781
H.S. Serum ..	43,971
Black quarter Serum ..	13,791

(iii) The production of Antirabi, renikhet, goatis, fowl-pox H.S. and T.B Tested diseases vaccines was continued during the year as before at the B.P. Section of the Punjab College of Veterinary Science and Animal Husbandry.

450 cows bulls and 72 buffalo bulls were purchased by the District Boards from the Veterinary Department.

**XI.—CONCLUSION**

(i) The economic position of agriculturists remained satisfactory and the agricultural population enjoyed good health.

(ii) The total remission and suspensions of land revenue granted by the Punjab Government to the agriculturists during the year 1954-55 were as under :—

Name of District	Remission of land revenue	Suspension of Land revenue
	Rs	Rs
Hissar ..	1,59,888	2,25,743
Rohtak ..	138	..
Gurgaon ..	759	5,648
Karnal ..	3,670	..
Ambala ..	48,732	44
Simla ..	1,102	..
Kangra ..	2,325	..
Hoshiarpur ..	8,592	..
Jullundur ..	4,191	..
Ludhiana ..	4,570	2,851
Ferozepore ..	8,063	..
Amritsar ..	19,842	954
Gurdaspur ..	80,387	27,861

(iii) AGRICULTURAL DETERIORATION BY WATER-LOGGING.

The total number of villages affected was 1,539. The districts worst affected by *thur* are Gurgaon, Rohtak, Hissar and Amritsar, while the figures of *sem* are highest in Karnal Ludhiana and Hissar Districts. The total of *thur* in the state has increased from 76,129 acres in Kharif, 1953, to 89,904 acres in kharif, 1954, that is, by 13,775 acres. The total of *sem* has also increased from 13,508 acres in kharif 1953, to 14,695 acres in kharif, 1954, that is, by 1,187 acres.

*Thur* in cultivated area has increased from 20,615 acres to 23,741 acres, while *Sem* has gone up from 5,847 acres to 6,228 acres as compared to the figures of the last year. But a fall of 3,818 acres in the *Thur* occurred in Ferozepore, which was due to sufficient supply of canal water. The progressive total of the cultivated area gone out of cultivation and classed as banjar up till kharif, 1954, was 29,969.

Out of this, 23,741 acres have been damaged by *thur* and 6,228 acres by *Sem*.

KARTAR SINGH,  
Director of Land Records, Punjab.

STATEMENT No. I, 1954-55

Name of District	HOT WEATHER (1ST MARCH TO 31ST MAY, 1954)						MONSOON (1ST JUNE TO 30TH SEPTEMBER, 1954)						TOTAL FOR THE SEASON
