

**REPORT ON THE SEASON AND CROPS OF THE PUNJAB  
FOR THE AGRICULTURAL YEAR ENDING THE 30TH  
JUNE, 1959**

---

**I.—INTRODUCTION**

1. *General characteristics of the year.*—The climatic conditions were generally satisfactory for the sowing and maturing of crops. The prices of foodgrains were generally high and the zamindars derived handsome income from their produce.

2. The condition of livestock was average on the whole. The supplies of fodder were generally sufficient except in parts of Simla and Gurgaon Districts. The health of the rural population continued to be satisfactory.

3. According to the village records, the total geographical area of the State was 30,284,351 acres (including 4,638,720 acres of high mountainous and forest areas classified as non-reporting in the Kangra District).

4. The total number of villages was 22,850.

**II.—RAINFALL (TABLE I)**

5. (i) The rainfall in the main seasons was as under:—

(a) *Hot weather (March to May, 1958).*—The Rainfall was below normal throughout the State.

(b) *Monsoon (June to September, 1958).*—The rainfall during the season was above average in all the districts of the State excepting Mahendragarh where it was below normal.

(c) *Post-Monsoon (October to December, 1958).*—The rainfall was above normal in all the districts excepting Gurgaon and Mahendragarh where it was below average.

(d) *Winter (January to February, 1959).*—The rainfall was above normal in all the Districts excepting Gurgaon, Karnal, Simla, and Mahendragarh where it was below average.

(ii) Rainfall and other weather conditions and their effects on different agricultural operations:—

6. (a) *Kharif crops.*—The rainfall during January and February, 1958, was below average everywhere. The weather remained dry during April, 1958, in the districts of Hissar, Rohtak, Ferozepore, and Bhatinda while the rainfall recorded elsewhere in the State, was below normal. The downpour during May, 1958, was below normal in all the districts. The rainfall during June, 1958, was below normal in the State, excepting Amritsar, Kapurthala, Bhatinda and Sangrur Districts where it was above normal. The showers proved beneficial to cotton, sugarcane vegetable and fodder sowings. During July, 1958, the rainfall was above normal except in Hissar, Amritsar, Ludhiana, Kapurthala, Mohindragarh and Sangrur Districts where it was below normal. The downpour proved beneficial to the standing crops and the sowing of other Kharif crops. In August, 1958, the rainfall was below normal except in Rohtak, Gurgaon, Karnal, Ambala, and Gurdaspur Districts where it was above normal. The rainfall during September and October, 1958, was above normal throughout the State and, by being excessive and by causing floods, it damaged the standing crops in Hoshiarpur, Jullundur, Ferozepore, Amritsar, and Gurgaon Districts

(b) *Rabi crops*.—The September-October, rains facilitated the preparatory tillage for and the sowing of rabi crops except in the case of low-lying areas where excessive moisture resulted in late sowings. but for light showers in parts of Hissar, Rohtak, Kangra, Ferozepur, and Mohendragarh Districts, the weather during November, 1958, remained dry. The season was favourable to Rabi sowings. The rainfall during December, 1958, was above average throughout the State except in Gurgaon District where the weather remained dry.

In January 1959, the rainfall was generally above normal, except in Kangra, Kapurthala, and Mahendragarh Districts where it was below normal. It proved beneficial to standing rabi crops. The rainfall during February, 1959 was generally below average every where with the exception of Kangra, Hoshiarpur, Jullundur, Gurdaspur, and Patiala Districts where it was about average.

During March, 1959, the rainfall was generally below average throughout the State except in Simla, where it was above normal. In April, 1959 there were light showers in parts of all the districts of the State excepting Hissar, Gurgaon, Karnal, Jullundur, Ludhiana, Kapurthala, and Mahendragarh where the weather remained dry. The season was favourable to harvesting operations.

#### II-A.—DAMAGE TO CROPS BY OTHER CALAMITIES

7. The cotton crop was damaged by jassid and white fly in parts of a few districts and the sugarcane by borer in parts of some districts. The wheat and gram crops were slightly damaged by rust and wilt respectively in a few districts.

#### III.—CLASSIFICATION OF AREA (TABLE II)

8. The following table shows the total area and its classification, etc.-

| Serial No. | Classification                                                                                                                                 | Area in (Thousand acres) 1958-59 | Area in (Thousand acres) 1957-58 | Normal (Quinquennial average) |
|------------|------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|----------------------------------|-------------------------------|
| 1          | Forests                                                                                                                                        | 941                              | 926                              | 872                           |
| 2          | Barren and unculturable land put to non-agricultural uses                                                                                      | 7,898                            | 7,767                            | 7,771                         |
| 3          | Culturable waste, permanent pastures and other grazing lands and land under miscellaneous trees, crops and groves not included in area sown .. | 1,804                            | 2,061                            | 2,336                         |
| 4          | Current fallows and other fallows                                                                                                              | 1,153                            | 1,459                            | 1,652                         |
| 5          | Net area sown ..                                                                                                                               | 18,488                           | 18,070                           | 17,657                        |
| 6          | Total area according to village papers ..                                                                                                      | 30,284                           | 30,283                           | 30,288                        |

The increase in the figures of area under forests was due to acquisition of land for afforestation by the Forest Department. The area under barren and unculturable land increased during the year under report because of departmental activities in the matter of roads and canals. Due to allotment of *banjar* area to tenants for cultivation under the Land Utilization Act and completion of consolidation of holdings operations in various villages, the area under culturable waste land resulted in decrease. The mechanised farming also contributed to it. The

decrease in the current fallows and the increase under net area sown resulted from the grow-more-food Kharif and rabi campaigns and favourable climatic conditions. The percentages of areas were as below:—

|                                  |    |             |
|----------------------------------|----|-------------|
| 1. Net area sown                 | .. | 61 per cent |
| 2. Forests                       | .. | 3 per cent  |
| 3. Culturable waste              | .. | 6 per cent  |
| 4. Current fallows               | .. | 4 per cent  |
| 5. Not available for cultivation | .. | 26 per cent |

Out of the total cropped area of 24,527 thousand acres, 6,039 thousand acres were sown more than once.

#### IV. IRRIGATION (TABLE III-A)

9. The area irrigated by various sources in the State was as under:—

|                      | <i>Acres</i> |
|----------------------|--------------|
| 1. Government Canals | 4,858,000    |
| 2. Private Canals    | 123,200      |
| 3. Tanks             | 16,800       |
| 4. Wells             | 2,077,100    |
| 5. Tube-wells        | 245,200      |
| 6. Other sources     | 40,300       |
| Total                | 7,360,600    |

The total net irrigated area during the year under report as compared to the preceding year, registered a decrease, which was due to heavy rains at the sowing time.

The variation in the area irrigated by canals as reported by the Irrigation Department in the quantum of 6,725,415 acres as against 4,981,200 acres reported by the Revenue Department, was due to the fact that the revenue figures represented only the net canal irrigated area, whereas the canal figures covered the area which received canal water irrespective of the fact whether it was actually sown or not and also the cropped area sown more than once in the same year.

The number of Government canals (Channels) during the year under report, was 1,522 with mileage (canal miles) 13,609 as against 1,519, with mileage, 13,472 of the last year.

As compared to the preceding year, the number of wells in working order registered a decrease from 230,965 to 229,972 while the tube-wells increased from 5,052 to 5,737. The decrease in the number of working wells and the increase in the number of tube-wells resulted from the growing tendency of the farmers towards power-irrigation and the policy of the Government to advance loans for the sinking of tube-wells.

10. The irrigated area under the principal crops, as compared to the quinquennial average, was as under:—

| Names of Crops | <i>Area in acres</i> |                               |
|----------------|----------------------|-------------------------------|
|                | 1958-59              | Quinquennial average (normal) |
| Rice ..        | 660,439              | 506,894                       |
| Wheat ..       | 2,503,166            | 2,501,469                     |

| Names of Crops     | Area in acres |                                  |
|--------------------|---------------|----------------------------------|
|                    | 1958-59       | Quinquennial<br>(average normal) |
| Barley ..          | 120,544       | 157,295                          |
| Jowar ..           | 195,856       | 174,623                          |
| Bajra ..           | 305,312       | 285,590                          |
| Maize ..           | 559,453       | 460,943                          |
| Gram ..            | 1,300,688     | 1,215,403                        |
| Sugarcane ..       | 362,090       | 340,120                          |
| Potatoes ..        | 22,075        | 16,192                           |
| Cotton Desi ..     | 583,420       | 1,204,546                        |
| Cotton American .. | 834,767       |                                  |
| Chillies ..        | 60,681        | 62,730                           |
| Fodder Crops ..    | 1,495,575     | 1,436,333                        |

The irrigated area under all crops excepting barley and chillies, increased during the year under report as compared to the normal. The increase in area was due to more irrigational facilities while the decrease in the case of barley and chillies resulted from unfavourable climatic conditions at the sowing time.

#### V.—CROP ACREAGE (TABLE IV)

11. The area, sown and matured, in the Punjab during the year under report was as under :—

| Serial No. | Kind                                       | in Thousand acres         |                       |
|------------|--------------------------------------------|---------------------------|-----------------------|
|            |                                            | Year under report 1958-59 | Previous year 1957-58 |
| 1          | Sown area ..                               | 24,527                    | 23,641                |
| 2          | Matured area ..                            | 22,181                    | 20,738                |
| 3          | Percentage of matured area to sown area .. | 90%                       | 88%                   |
| 4          | Failed area ..                             | 2,346                     | 2,903                 |
| 5          | Percentage of failed to sown area ..       | 10%                       | 12%                   |

12. The total sown area (irrigated and unirrigated both) under the principal crops was as under :—

| Serial No. | Crops     | Area in acres |                               |
|------------|-----------|---------------|-------------------------------|
|            |           | 1958-59       | Normal (quinquennial average) |
| 1          | Rice ..   | 900,841       | 707,200                       |
| 2          | Wheat ..  | 5350,863      | 4,661,000                     |
| 3          | Barley .. | 523,080       | 563,600                       |
| 4          | Jowar ..  | 737,873       | 716,300                       |

| Serial No. | Crops                | Area in acres |                               |
|------------|----------------------|---------------|-------------------------------|
|            |                      | 1958-59       | Normal (quinquennial average) |
| 5          | Bajra ..             | 2,305,029     | 2,563,000                     |
| 6          | Maize ..             | 1,240,352     | 10,36,100                     |
| 7          | Gram ..              | 6,459,677     | 5,621,500                     |
| 8          | Groundnut ..         | 153,584       | 137,200                       |
| 9          | Sesamum ..           | 55,025        | 62,500                        |
| 10         | Sugarcane ..         | 503,168       | 435,300                       |
| 11         | Cotton (Desi) ..     | 1,500,565     | 1,272,600                     |
| 12         | Cotton (American) .. |               |                               |
| 13         | Tobacco ..           | 4,371         | 6,000                         |
| 14         | Potatoes ..          | 29,421        | 20,400                        |
| 15         | Fodder Crops ..      | 2,926,135     | 2,889,100                     |

The increase in area under wheat was due to Grow-More-Food Campaign and the one under cotton to high prices and extension schemes. The increase in area under other crops was the result of favourable climatic conditions. The tendency towards growing commercial crops resulted in decrease in area under the bajra and barley crops. The decrease under tobacco was attributable to heavy excise duty.

#### VI.—YIELD PER ACRE (TABLE V-A)

13. The figures showing the yield per acre during the year under report, as compared to the normal (quinquennial average), are tabulated below :—

| Serial No. | Name of Crop                          | Current yield per acre in lbs. | Normal (Quinquennial yield) per acre in lbs. | Percentage of increase (+) or decrease |
|------------|---------------------------------------|--------------------------------|----------------------------------------------|----------------------------------------|
| 1          | Rice (unhusked) ..                    | 854                            | 1,274                                        | —33                                    |
| 2          | Wheat ..                              | 959                            | 933                                          | +3                                     |
| 3          | Jowar ..                              | 156                            | 185                                          | —16                                    |
| 4          | Bajra ..                              | 256                            | 321                                          | —20                                    |
| 5          | Barley ..                             | 769                            | 803                                          | —4                                     |
| 6          | Maize ..                              | 905                            | 1,149                                        | —21                                    |
| 7          | Gram ..                               | 831                            | 673                                          | +23                                    |
| 8          | Sugarcane ..                          | 3,244                          | 2,620                                        | +24                                    |
| 9          | Cotton (Desi) ..                      | 174                            | 190                                          | —8                                     |
| 10         | Cotton (American) ..                  | 197                            | 220                                          | —10                                    |
| 11         | Rape (Sarshaf, Taramira and Toria) .. | 391                            | 410                                          | —5                                     |

The increase in yield per acre of gram and sugarcane was due to favourable climatic conditions, improved farming and use of artificial fertilizers. The decrease in the case of cotton (Desi and American), rice, jowar, bajra and maize, yields was attributed to heavy September rains which affected the crops adversely. The decrease in the average yield of barley and rape crops and the increase in the case of wheat crop was insignificant.

#### VII.—TOTAL OUTTURN OF CROPS (TABLE V-B)

14. As compared to the normal quinquennial acreage, the total production of principal crops during the year under report was as under :—

| Serial No. | Name of Crop                       | Outturn (in hundred tons) 1958-59 | Normal (Quinquennial average (in hundred tons) | Percentage of increase (+) or decrease (—) |
|------------|------------------------------------|-----------------------------------|------------------------------------------------|--------------------------------------------|
| 1          | Rice ..                            | 5,425                             | 3,924                                          | +38                                        |
| 2          | Wheat ..                           | 23,013                            | 18,693                                         | +23                                        |

\*Production is in bales of 392 lbs each.

†Production is in terms of cwts.

‡Production is in lbs.

The decrease in the production of jowar, bajra, barley, maize, tobacco, mung and mash and tea was due to crops having been damaged by heavy rains and floods at the time of maturity. The decrease in the production of tobacco was attributed to less area sown owing to excise duty. The increase in the production of other crops was due to more area sown.

## VIII.—FARM (HARVEST) PRICES (TABLE VI)

15. The average harvest prices of principal crops during the year under report, as compared to the prices prevailing during the preceding year and the normal (quinquennial average), are given below :—

| Serial No. | Name of Crop                           | Prices in 1957-58 | Prices in 1958-59 | Normal (Quinquennial average) |
|------------|----------------------------------------|-------------------|-------------------|-------------------------------|
|            |                                        | Rs nP.            | Rs nP.            | Rs nP.                        |
| 1          | Rice (Unhusked) ..                     | 11.15             | 12.26             | 10.37                         |
| 2          | Wheat ..                               | 14.28             | 15.30             | 13.50                         |
| 3          | Jowar ..                               | 9.89              | 11.99             | 9.00                          |
| 4          | Bajra ..                               | 11.49             | 13.25             | 10.12                         |
| 5          | Barley ..                              | 10.60             | 11.29             | 9.00                          |
| 6          | Gram ..                                | 11.38             | 12.62             | 9.87                          |
| 7          | Cotton Desi (unginned)                 | 27.91             | 26.98             | 26.25                         |
| 8          | Cotton American (unginned) ..          | 32.49             | 31.23             | 33.00                         |
| 9          | Sugar (Raw) ..                         | 13.64             | 15.83             | 13.75                         |

| 13         | Linseed ..                             | 23.01             | 24.47             | 20.31                         |
| 14         | Rape (Sarshaf, Taramira, and Toria) .. | 25.96             | 26.78             | 22.44                         |
| 15         | Mustard ..                             | 22.37             | 21.53             | 21.25                         |
| 16         | Sesamum ..                             | 31.48             | 29.95             | 28.00                         |
| 17         | Tobacco ..                             | 57.76             | 64.12             | 54.81                         |
| 18         | Ginger ..                              | ..                | ..                | ..                            |

16. There was a rise in prices of foodgrains as compared to the last year.

Despite increase in the acreage under and production of foodgrains, the prices did not recede but recorded an advance due to more demand resulting from increase in population.

17. The value of principal crops in the Punjab State during the year, 1958-59, was in the order of Rs 309.72 crores, detailed as under :—

| Serial No. | Name of Crop    | Value in lakhs of rupees (harvest prices) |
|------------|-----------------|-------------------------------------------|
| 1          | Rice (unhusked) | 1,809                                     |
| 2          | Wheat           | 9,577                                     |

| Serial No. | Name of Crop               | Value in lakhs of rupees (harvest prices) |
|------------|----------------------------|-------------------------------------------|
| 3          | Jowar                      | 167                                       |

| 13         | Rape                       | 895                                       |
| 14         | Mustard                    | 1                                         |
| 15         | Tobacco                    | 26                                        |
| 16         | Sesamum                    | 46                                        |
| 17         | Potatoes                   | 423                                       |
|            | Total                      | 30,972                                    |

18. The crops listed above occupied an area of 20,580,948 acres, i.e., 84 per cent of the total sown area of 24,527,457 acres. Assuming the value of the produce of other crops to be the same as in the case of these crops, the total value of all crops grown in the State works out to Rs 368.71 crores as against Rs 316.33 crores estimated for the last year.

#### IX.—AGRICULTURAL WAGES (TABLE VII)

19. The daily wages of carpenters, blacksmiths, cobblers, field labour and herdsmen increased by 7 naye Paise to 25 naye Paise as compared to the wages prevailing in the last year.

20. The labour for agricultural purposes was adequate throughout the State, excepting Ballabgarh Tehsil of Gurgaon District where some scarcity of labour was felt due to industrial attractions occasioned by the installation of more factories at Faridabad industrial town.

21. The working hours of all classes of agricultural labour in the State were generally eight hours a day.

#### X.—LIVESTOCK, POULTRY, AGRICULTURAL MACHINERY AND IMPLEMENTS (TABLE VIII).

22. The condition of livestock was generally satisfactory. The subordinate Revenue and Veterinary staff remained vigilant throughout the year and the diseases detected in the cattle were dealt with promptly. There was no dearth of fodder except in the Simla and Gurgaon Districts, where it had to be imported from the adjoining areas.

23. (a) The table below shows the diseases affecting the livestock and their mortality during the year 1958-59 :—

| Serial No. | Name of disease           | Number affected | Died   |
|------------|---------------------------|-----------------|--------|
| 1.         | Rinderpest                | 1,508           | 715    |
| 2.         | Haemorrhagic Septicaemia  | 12,629          | 11,303 |
| 3.         | Black Quarter             | 179             | 97     |
| 4.         | Surra                     | 538             | 22     |
| 5.         | Foot-and-Mouth            | 10,222          | 26     |
| 6.         | Rabies                    | 32              | ..     |
| 7.         | Mange                     | 5               | ..     |
| 8.         | Pleuro Pneumonia          | ..              | ..     |
| 9.         | Other contagious diseases | 1,943           | 540    |
| 10.        | Other causes              | 3,467           | 1,504  |
| 11.        | Scabies                   | ..              | ..     |

(b) The following table displays the diseases affecting the poultry and their mortality :—

|    |                           |     |    |
|----|---------------------------|-----|----|
| 1. | Ranikhet                  | 50  | 39 |
| 2. | Fowl Pox                  | 17  | 15 |
| 3. | Spirchactosis             | ..  | .. |
| 4. | Coccidiosis               | ..  | .. |
| 5. | Other contagious diseases | 150 | 50 |

24. The preventive and remedial measures were taken by the Veterinary field staff by way of carrying out mass vaccinations and inoculations to check and control the contagious diseases of livestock and poultry.

25. The table below shows the total number of vaccinations and inoculations carried out during the year 1958-59:—

|                   | Vaccinations | Inoculations   |          |
|-------------------|--------------|----------------|----------|
| Goat tissue virus | 703,795      | A. R. P. Serum | 2,12,230 |
| H. S. Vaccine     | 1,903,623    | H. S. Serum    | 89,896   |
| B. Q. Vaccine     | 35,906       | B. Q. Serum    | 5,699    |
| Ranikhet Vaccine  | 99,183       |                |          |
| Fowl Pox          | 12,605       |                |          |

26. The field staff of the Veterinary Department undertook extensive touring for the control of contagious diseases. H. S. Goat Tissue Virus, Ranikhet and Fowl Pox Vaccines were produced, as before, at the Biological Products Section of the Punjab College of Veterinary Science and Animal Husbandry, Hissar, during the year 1958-59.

27. During the year under report, 245 bulls were purchased by the District Boards in the State.

#### XI.—CONCLUSION

28. The prices of agricultural commodities remained high. The general economic condition of the agricultural population was satisfactory with the exception of flood-affected areas of the Gurgaon District where some scarcity of food grains and fodder was felt and the zamindars had to go in for purchase in the adjoining areas.

29. On the whole, it has been a good agricultural year and the zamindars evinced interest in adopting modern methods of cultivation and improved farming.

30. The total remissions and suspensions of land-revenue granted to the agriculturists during the year under report were as under:—

| Serial No. | District     | Suspension | Remission |
|------------|--------------|------------|-----------|
|            |              | Rs         | Rs        |
| 1          | Hissar       | ..         | 1,60,331  |
| 2          | Rohtak       | 34         | 1,43,002  |
| 3          | Gurgaon      | 2,354      | 4,01,731  |
| 4          | Karnal       | ..         | 1,97,989  |
| 5          | Ambala       | 44         | 65,530    |
| 6          | Simla        | ..         | 3,328     |
| 7          | Kangra       | ..         | 7,691     |
| 8          | Hoshiarpur   | ..         | 28,556    |
| 9          | Jullundur    | 23,989     | 86,001    |
| 10         | Ludhiana     | ..         | 3,27,770  |
| 11         | Ferozepore   | ..         | 2,92,504  |
| 12         | Amritsar     | 35,884     | 2,43,220  |
| 13         | Gurdaspur    | ..         | 2,05,138  |
| 14         | Kapurthala   | 16,531     | 3,33,829  |
| 15         | Patiala      | 57,733     | 1,03,934  |
| 16         | Bhatinda     | 746        | ..        |
| 17         | Sangrur      | 92,069     | 4,96,463  |
| 18         | Mahendragarh | ..         | ..        |
|            | Total        | 2,29,384   | 30,97,017 |

31. *Agricultural deterioration by water-logging.* (i) The *thur* and *sem* girdawari operations were carried out in the fifteen affected districts of the State. No *thur* or *sem* was reported from the districts of Simla, Kangra and Mahendragarh. The *thur* and *sem* area was recorded by the Revenue Patwaris twice a year at the time of Kharif and Rabi harvest-inspections. In the case of *thur* in cultivated land, only that field was recorded as *thur* which was unable to produce more than  $\frac{1}{4}$  crop on account of the damage resulting

therefrom. If an affected field gave more than -/4/- crop, it was not recorded as *thur*-affected. In the case of *sem* in cultivated as well as banjar area and in the case of *thur* in banjar area, the affected area was recorded in full as *sem* or *thur*, as the case was, according to visual test.

(ii) The following table shows the district-wise detail of number of estates under the *thur* and *sem* girdawari operations in Rabi, 1959, as compared to that of the preceding year (Rabi 1958):—

| Serial No. | Name of the affected District | Number of estates affected by <i>thur</i> or <i>sem</i> |            | Difference |
|------------|-------------------------------|---------------------------------------------------------|------------|------------|
|            |                               | Rabi, 1959                                              | Rabi, 1958 |            |
| 1          | Amritsar ..                   | 579                                                     | 576        | +3         |
| 2          | Ferozepore ..                 | 448                                                     | 448        | ..         |
| 3          | Gurdaspur ..                  | 117                                                     | 82         | +35        |
| 4          | Jullundur ..                  | 7                                                       | 6          | +1         |
| 5          | Ludhiana ..                   | 58                                                      | 51         | +7         |
| 6          | Hoshiarpur ..                 | 18                                                      | 18         | ..         |
| 7          | Karnal ..                     | 365                                                     | 355        | +10        |
| 8          | Rohtak ..                     | 240                                                     | 176        | +64        |
| 9          | Hissar ..                     | 19                                                      | 19         | ..         |
| 10         | Ambala ..                     | 38                                                      | 38         | ..         |
| 11         | Gurgaon ..                    | 528                                                     | 515        | +13        |
| 12         | Kapurthala ..                 | 24                                                      | 23         | +1         |
| 13         | Sangrur ..                    | 138                                                     | 134        | +4         |
| 14         | Patiala ..                    | 105                                                     | 98         | +7         |
| 15         | Bhatinda ..                   | 34                                                      | 34         | ..         |
|            | Total ..                      | 2,718                                                   | 2,573      | +145       |

(iii) The *thur* and *sem* girdawari operations were extended to 145 new affected estates in Rabi 1959. Of them, 64 were in Rohtak, 35 in Gurdaspur, 13 in Gurgaon, 10 in Karnal, 7 each in Ludhiana and Patiala, 4 in Sangrur 3 in Amritsar, and 1 each in Jullundur and Kapurthala Districts. The increase in the number of estates was partly due to general spread of *thur* and *sem* in these districts and partly to the fact that previously-unnoticed *thur* or *sem* came to be detected and recorded by the Revenue staff. Efforts to improve the recording of *thur* and *sem* area continued as before.

(iv) The acreage under *thur* in the fifteen affected districts of the State increased from 194,874 in Rabi, 1958, to 209,536 in Rabi, 1959, i.e., by 14,762 (or 7 per cent over the last year's figures). The increase was appreciable in Amritsar, Gurdaspur, Karnal, Rohtak, Gurgaon and Sangrur Districts for the reasons already discussed in para (iii) supra.

(v) The acreage under *sem* in the 15 districts also increased from 23,105 in Rabi, 1958 to 30,816 in Rabi, 1959, i.e., by 7,711 (or 33.3 per cent over the previous year's figures). The increase in Amritsar, Gurdaspur, Ludhiana, Karnal, Rohtak, Patiala and Bhatinda Districts was slight, though it was significant in Gurgaon (5,559 acres) and Kapurthala (923 acres) Districts. This was due to (a) rise in the depth of water-table

occasioned by the last year's heavy rains; and (b) lack of effective drainage system in these districts. The people of Amritsar, Ferozepore, Gurdaspur, Ludhiana, Karnal, Ambala, Gurgaon, Kapurthala, Sangrur, Patiala and Bhatinda Districts have begun to feel the ill-effects of *sem* in the shape of general fall in the yield per acre of crops and poor health of some of the inhabitants of these districts. This evil needs to be combated on a war footing.

(vi) The progressive total of cultivated areas which has gone out of cultivation on account of the spread of *thur* or *sem* also, increased from 48,119 acres in Rabi, 1958, to 55,830 acres in Rabi, 1959, i. e., by 7,711 acres (or 16.2 per cent over last year's figures).

(vii) The evils of water-logging and *thur* are gaining momentum in the State at an alarming rate and are turning good lands into poor ones. Hence strong measures to combat these evils are called for in the interest of the general welfare of the State.

KARTAR SINGH,

Director of Land Records, Punjab.

**SUMMARY TABLE "A"**

**Season and Crop Report of the Punjab for the year 1958-59  
Classification of Area**

| Head of classification                                                                                                                       | 1953-54* |                     | 1954-55* |                     | 1955-56* |                     | 1956-57* |                     | 1957-58 |                     | 1958-59 |                     |
