1974-75

GENERAL REVIEW

AS COMPILED BY THE COMMERCIAL DIRECTORATE
CENTRAL ELECTRICITY AUTHORITY

FOREWORD

As in previous years, the Central Electricity Authority is happy to present the General Review for the year 1974-75 incorporating in detail the salient features of the Electricity Supply Industry and the progress achieved in this field during the past several years. The various tables relating to generation, transmission, distribution and consumption were rearranged last year to enable quicker access to any specific information. The same arrangement has been continued this year also. As there was a demand for regionwise details, 2 new tables showing the details of generation, installed capacity and consumption on region-wise basis have been introduced. The confusion in the apportionment of system losses of B.M.B. and D.V.C. has been removed by showing them as separate entities. This has resulted in a slightly different figure of loss for the States which were receiving energy from these two systems.

The Authority expresses its gratitude to the various organisations in the public and private sectors of the power supply industry and to the industrial undertakings who have supplied the necessary data for compilation of this review. In some of the cases where the data has not been received, the compilation of the figures has had to be carried out on estimation. This publication could have been brought out earlier had the data been supplied by some organisations in time. The use of such statistical publication is greater if it is published within six months of the completion of the year to which it relates. Though we have brought down the time lag from 17 months to 14 months, we have still a long way to go. The co-operation of all Electricity Supply Undertakings is therefore solicited in furnishing statistical data to this Authority within the stipulated time. While all efforts have been made to ensure the accuracy of the information contained in this publication, the Authority accepts no responsibility for any error or omission therein.

K. P. TAIMNI

Member (Economic & Commercial)
Central Electricity Authority

9.1.18	Progress of Electricity Supply—Tripura	214
9.1.19	Progress of Electricity Supply—Uttar Pradesh	215
9.1.20	Progress of Electricity Supply—West Bengal	216
9.1.21	Progress of Electricity Supply—D.V.C.	217
9.1.22	Progress of Electricity Supply—Central Government Projects	218
9.1.23	Progress of Electricity Supply—Delhi	218

PUBLIC ELECTRICITY SUPPLY—ALL INDIA STATISTICS, 1974-75

GENERAL REVIEW

1. General Power Supply Position

1.1. Installed Capacity and Generation

The total installed capacity of the utilities as at the end of the year under review was 18317 MW inclusive of 96 MW of Chola Power Station belonging to the Central Railway. The gross addition to the generating capacity in the utility sector was 1736.43 MW which includes 6.0 MW of Shanan Power House due to upgradation of two sets of 12.0 MW to 15.0 MW each and 3.0 MW of Bhira (Tata's) due to upgradation from 22.0 MW to 25.0 MW representing an increase of 10.42% over the total installed capacity at the end of the previous year. The gross energy produced was 70191 MKWH. The percentage increase in the total energy availability over the previous year was 4.77%. The net energy sold to the ultimate consumers after taking into account the consumption in station auxiliaries, losses in transformation, transmission and distribution and unaccounted for energy was 52631.64 MKWH showing an increase of 4.74% over the previous year.

The installed capacity and the Gross energy produced mainly by industries in the non-utility sector (to the extent the details were received) were 1964.3 MW and 6451.6 MKWH respectively, as compared to the previous year's figures of 1732.7 MW and 6067.5 MKWH.

The net addition to capacity this year was 1653 MW as compared to 382 MW added during the previous year. The percentage increase in energy availability was 4.74% as compared to an increase of 3.04% during the previous year. The Steam generation showed a substantial increase of 13.44% but hydro generation decreased by 3.79% mainly because of lower generation in Bhakra.

The total energy contribution from the two nuclear power stations went down from 23.96.36 MKWH to 2206.09 MKWH. The decrease was because of low output from Tarapur Atomic Power Station.

The generation from gas turbine plants increased to 449.3 MKWH as compared to 343.1 MKWH during the previous year, but diesel generation decreased marginally to 121.27 MKWH from 124.61 MKWH in the previous year.

The power position continued to be acute in several States, Restrictions and power cuts were imposed in all the States except Kerala, Orissa and Rajasthan. The overall picture of the power development in the country since 1951 is summarised in Table-1.

1.2 Regional Grids

The entire country is divided into five regions for the purpose of co-ordinated operation of power plants—power supplies. The Northern Region consists of power supply in the States/Territories of Punjab, Jammu & Kashmir, Haryana, Himachal Pradesh, Delhi, Uttar Pradesh and Rajasthan. The constituents of Western Region are Madhya Pradesh, Maharashtra and Gujarat system. The power supply of Andhra Pradesh, Tamil Nadu, Kerala and Karnataka constitute the Southern Region. The Eastern Region comprises of Bihar, West Bengal, Orissa and D.V.C. systems. The North-Eastern region constitutes the power systems in Assam, Meghalaya, Manipur Tripura, Nagaland, Mizoram and Aunachal Pradesh. Inter-connections have been established between different power systems within the Region to permit flow of power and energy from one system to another. There were some inter-connections between the regions also. The quantum of inter-state transfer of energy was 11037.03 MKWH (including 11.54 MKWH of energy sold to Nepal and Bhutan) corresponding to 15.72% of the total energy produced by the utilities. The installed capacity and energy generated in the different regions are given in Table Nos. 2.1-7.

1.3 Classification of Electricity Supply Undertakings

Out of the 21 States only Eighteen had the State Electricity Boards in operation to produce and distribute electricity. States of Manipur, Tripura and Nagaland have yet to establish their State Electricity

Boards. During the year Meghalaya State Electricity Board came into being w.e.f. December, 1974. Apart from Electricity Boards, some Municipalities and local authorities Government departments, co-operative and private licensees were also engaged in the supply of power. Details of agencies engaged in generation and distribution or distribution only are given below :—

Ownership	Generating & distributing	Generating, purchasing & distributing	Distributing	Total
1. PUBLIC SECTOR				
(a) State Elec. Boards	18	..	18
(b) Elec. Deptt./Govt. Undertakings/Corps.	15	6	3	23
(c) Municipalities & local authorities	5	31	36
2. PRIVATE SECTOR				
Companies including cooperatives	2	17	61	80
TOTAL	17	46	94	157

NOTE—Renusagar Power Supply Co. has not been included in the list of utilities.

During the year 15 private electricity undertakings were acquired either after the expiry of the license periods or through special laws. Out of existing private undertakings six large companies were operating in Calcutta, Ahmedabad and Bombay areas supplied 80.82% of total energy sold by private licensees.

Majority of the private licensees were operating in the States of Maharashtra (23), Gujarat (12), West Bengal (13) and Uttar Pradesh (14). The States Haryana, Himachal Pradesh, Manipur Tripura, Madhya Pradesh, Nagaland, Jammu & Kashmir and Orissa did not have any private licensees/cooperatives.

2. Installed capacities and types of plants

2.1 Addition and deletion of plants

During the year under review a total of 1736.43 MW of power plant was added in the utility sector This comprised 1170 MW of steam and 564 MW of hydro. At the same time sets with an aggregate capacity of 84.05 MW were taken out of service. This comprised 69.22 MW of steam, 1.06 MW hydro and 13.77 MW of diesel. The largest unit that was retired was of the capacity of 15.0 MW at Cossipore Station in Calcutta Electric Supply Corporation. The proportions of plant additions under hydro, steam and diesel to the total added plant capacity were 32.5%, 67.4% and 0.1% respectively. The aggregate installed capacity, energy generated, KWH per KW for different types of plants (as at the end of the year) are indicated below.

Type	Aggregate installed plant capacity as on 31-3-75 (MW)	Increase over previous year (%)	Gross energy generated 1974-75 (MKWH)	% increase over previous year (%)	KWH per KW of installed capacity
	2	3	4	5	6
Hydro	7529.24	8.10	27875.18	(—)3.79	3702
Steam	9752.54	12.72	39538.72	13.44	4054
Gas	165.50	NH	449.27	30.93	2715
Diesel	229.40	(—)4.81	121.27	(—)2.68	529
Nuclear	640.00	NH	2206.09	(—)7.94	3447
TOTAL	18316.68	9.38	70190.5	5.25	2833

2.2. Ownership

Out of the aggregate capacity of 18317MW at the end of the year, bulk of the plants were operated and maintained by the State Electricity Boards, State Governments/Undertakings and Central Govt./Undertakings. The break-up of the installed capacities, and energy generated by the different organisations were as follows :—

Ownership	Total installed capacity (MW)	%age of aggregate capacity	Total energy generated (gross) MKWH	%age of aggregate generation
1. State Elec. Boards	12238.31	66.81	46100.01	65.68
2. State Govt./Undertakings	1209.86	6.61	5512.15	7.85
3. Central Govt./undertakings/corporations	3232.50	17.65	10862.77	16.48
4. Municipalities	308.56	1.68	1434.96	2.04
5. Companies	1327.43	7.25	6280.64	8.95
AGGREGATE TOTAL	18316.68	100.00	70190.53	100.00

2.3 Hydro Power Station

At the end of the year there were in all 116 Hydro stations having 376 sets, 71 stations had capacities above 10 MW and accounted for 98.71% of the total hydro plant capacity and their energy contribution was 98.84% of the total hydro energy produced. Four new hydro power houses with an aggregate capacity of 424.0 MW and 3 units with a total capacity of 131.0 MW were added as extension to existing stations. The position for hydro stations as summarised is as follows :—

	1973-74	1974-75	%age increase over 1973-74
No. of hydro stations	113	116	2.65
Aggregate plant capacity (MW)	6965.30	7,629.24	8.10
Total energy generate (MKWH)	28971.84	27,875.18	(-)3.79
Aggregate plant factor (%)	47.48	42.26	(-)10.99

The consumption by station auxiliaries in all the hydro power houses was 135.0 MKWH forming to 0.5% of the total hydro generation of 27875.2 MKWH.

2.4. Steam Power Station

There were in all 94 steam power stations (excluding nuclear) having 313 sets. Out of these 44 stations had installed capacities exceeding 50 MW and accounted 93.12% of capacity and 94.58% of energy produced. Two new stations with a capacity of 170.0 MW and 9 units with a capacity of 1000.0 MW as extension to existing stations were added during the year. The position of steam power stations is summarised below :—

	1973-74	1974-75	%age increase over 1973-74
(i) No. of Stations	95	94	(-)1.05
(ii) Aggregate installed capacity (MW)	8651.76	9762.54	12.72
(iii) Total energy generated (gross)	34853.08	39538.72	13.44

	1973-74	1974-75	%age increase over 1973-74
(iv) Installed capacity of plants above 50 MW	7963.50	9081.50	14.04
(v) Energy generated from plants above 50 MW	32841.95	37397.30	13.87
(vi) KWH/KW installed from plants above 50 MW	4124	4118	(-) 0.15
(vii) Fuel consumed			
(a) (i) Coal (Tonnes)	18306348	21678089	18.41
(ii) Calorific value Kilo cal./Kg.	5265	4973	..
(b) (i) Lignite (Tonnes)	2875000	2448000	(-) 14.92
(ii) Average calorific value k. cal./Kg.	2368	2440	..
(c) (i) Wood (Tonnes)	11707	15105	29.03
(ii) Average calorific value k. cal./Kg.	1250
(d) (i) Furnace oil (Kilo litres)	1762164	1715955	(-) 2.62
(ii) Average calorific value kilo-cal./liter	9798	9461	..
(c) (i) Overall thermal efficiency for plants above 50 MW	25.75	26.16	1.59
(f) Consumption (Coalequivalent) at 5000 k. cal./Kg.	17384946	21793775	25.36

Nine power stations reported thermal efficiency ranging between 20 to 25 percent and generated 6289.85 MKWH (15.91%) 22 stations with efficiencies between 25 to 30 per cent generated 16740.82 MKWH (42.34%). Only 8 stations operated at an efficiency of more than 30 per cent and produced 11798.50 MKWH (29.84%). Six power houses with an aggregate capacity of 900.0 MW generated between 4000 to 4500 KWH/KW, 4 stations with an aggregate capacity of 501.80 MW produced between 4500 to 5000 KWH/KW. Twenty four stations with capacity of 3,145.10 MW which produced more than 5,000 KWH/KW. The maximum output of 8038 KWH per KW was achieved by Nellore Station which has an installed capacity of 30 MW.

For the entire country 4,130.28 MKWH corresponding to 9.5% of gross energy generated was consumed in power station auxiliaries.

2.5. Nuclear power stations

There are only two nuclear power stations in the country : one in Rajasthan with a capacity of 220 MW and the other at Tarapore in Maharashtra with a capacity of 420 MW. The total generations from these two was 2206 MKWH which was lower by 190.27 MKWH than the previous year's generation. The energy consumed in station auxiliaries was 210.39 MKWH corresponding station to 9.5%. The performance of the two stations as compared to the previous year are as follow :—

Name of the P/H	Generation (MKWH)		
	1973-74	1974-75	%age increase over the year 1973-74
1	2	3	4
1. Tarapore	1908.83	1457.83	(-) 23.63
2. Rajasthan Atomic Power Project	487.53	748.26	53.48
TOTAL	2396.36	2206.09	(-) 7.94

2.6. Gas turbine and diesel power stations

Five gas turbine stations with an aggregate capacity of 165.50 MW were in operation and produced 449.27 MKWH, an increase of 30.93% over the previous year was registered. The station auxiliaries consumption was 10.17 MKWH (2.3%). These stations were located in five states viz. Andhra Pradesh, Assam, Gujarat, Rajasthan and Uttar Pradesh, the installed capacities of which being 20.0, 69.0, 54.0, 10.0 and 12.5 MW respectively.

The diesel plants were mostly concentrated in the States of Assam, Bihar, Gujarat, Punjab, Rajasthan, West Bengal and in Delhi. The position regarding diesel plants is indicated below :—

No. of generating Stations	244
No. of sets	670
Aggregate capacity of the Sets	229.40 MW
Total energy generated	121.27 MKWH
Percentage increase over the previous year	(—) 2.68
Consumption in station auxiliaries	5.35 MKWH

The consumption in station auxiliaries was 5.35 MKWH corresponding to 4.0% of the total generation by Diesel Plants.

2.7 D. C. Generation

There are still a few generating plants producing direct current and they are situated in Dharbanga (Bihar), Ambala (Haryana), Dobhoi (Gujarat), Dibrugarh (Assam) and Malda (W. Bengal).

The total capacity of the D.C. plants was 3.42 MW and produced 3.10 MKWH.

2.8. Generation voltage and frequency

The generation voltage varied from 230 volts to a maximum of 33 KV on case of A.C. sets. The most common voltage however was 11 KV. The standard frequency was 50 Hz. except for one power house namely Sivasmundram (Karnataka) plant which is still producing power at 25 Hz. The voltage range in D.C. generating sets was from 110 to 500 volts.

2.9. Per capita installed capacity and generation

The average installed capacity per thousand of population was 31.13 KW as compared to 28.90 KW in the previous year. The average installed capacity was 5.6 KW per sq. Km. as compared to 5.1 KW in 1973-74. The per capita generation was 130.31 KWH as compared to 126.26 KWH in the previous year

2.10. Details of capacity and generation in the non-utility sector

Apart from generation by the utilities a number of industrial units were also having their own generating stations either for the purpose of captive generation or for emergencies. The coverage of details about self generation was not complete, as it was difficult to collect the data from the thousands of industrial establishments having their own generating sets. However, data from most of the major industries were received. Based on the data received from 1202 industrial establishments, the total installed capacity in the non-utilities was 1964.3 MW and the gross generation was 6,451.6 MKWH. The break-up on the basis of prime movers was 1,706.7 MW of steam, 2.6 MW of hydro and 255.0 MW of gas and diesel.

3. Transmission And Distribution

3.1. Transmission and distribution lines

The power produced in the various generating stations are evacuated through an extensive transmission system. The maximum voltage in service during the year was 230 KV. The other standard voltages are 132 KV, 110 KV and 66 KV though there are some sections operating at different voltages. The power supplied to consumers also varied from 220 KV to 230 V depending upon the quantum consumed. The

table below gives the extent of transmission and distribution lines of different voltages as at the end of the year.

	1973-74 (Circuit kms.)		1974-75 (Circuit kms.)		Percentage increase over previous year	
	O.H.	U.G.	O.H.	U.G.	O.H.	U.G.
220/230 KV	13933	—	18054	—	29.59	—
132/110 KV	45041	—	46755	—	3.81	—
78/66 KV	24252	—	24731	—	1.98	—
44/33/22KV	114530	1360	125633	1436	9.89	5.59
11/6.6 KV	477713	9288	500861	9177	4.85	-1.20
3.3/2.2 KV	3806	655	2031	452	-40.64	-31.00
Upto 500 volts	855520	—	852718	—	4.35	—
		Segregation of U.G. Cables				

The densities of transmission lines 66 KV and above and distribution lines 500 V and below were 0.03 and 0.27 KM per sq. kilometre respectively. There were 1.28 km. of transmission lines 66 KV and above for every MKWH generated and 29.11 kms. of MV and LV lines for every million kWh consumed.

3.2. Transformers

There were 1114 step-up transformers with an aggregate capacity of 23,164.31 MVA corresponding to 1.26 KVA per KW of installed capacity. There were 7900 stepdown transformers with a total capacity of 52570.28 MVA corresponding to 2.87 KVA per KW of installed capacity. As at the end of the year there were 343413 distribution transformers with an aggregate capacity of 25883.68 MVA.

4. Utilisation

4.1. Sectorwise Utilisation

Out of the 70190.53 MKWH gross energy generated 4,130.28MKWH was consumed in station auxiliaries. The net energy available was 66199.18 MKWH after taking into account the purchase of 138.93-MKWH from non-utilities. The transmission, transformation and distribution losses and energy unaccounted for amounted to 13556.00 MKWH corresponding to 20.48% of the total energy available. The corresponding percentage for the previous year was 20.46.

Total energy sold during the year to the ultimate consumers by the utilities was 52631.64 MKWH showing an increase of 4.74% over the previous year. In addition to it and a sale of 11.54 MKWH was made to Nepal and Bhutan. Most of the sales was by the Electricity Boards and the balance by private licensees municipalities, Govt. Deptts., corporations etc. The details of sales by different agencies are given below:—

Ownership (1)	Energy sold to ultimate consumers (MKWH) (2)	Increase over previous year (%) (3)
(i) Electricity Boards	37016.99	8.44
(ii) Govt. Deptts. Undertakings including D.V.C.	4072.88	21.36
(iii) Municipalities, DESU	1977.19	-28.62
(iv) Private Licensees	9564.60	-4.22
TOTAL	52631.64	4.74

4.2. Pattern of utilisation

The number of new consumers added to the system was 1.37 million bringing the total to 20.79 million at the end of the year, an increase of 7.05% over 1973-74. The percentages of sales to different categories of consumers were as follows :—

Category	No. of consumers (Thousand)	Connected load (MW)	Energy consumed (MKWH)	%age of total of consumption	% increase in consumption over previous year
Domestic	14191	8447.90	5,172.79	9.83	11.37
Commercial	3019	2741.85	3,081.57	5.85	3.14
Industrial	741	15529.88	32,690.28	62.12	0.64
Public Lighting	141	245.87	579.71	1.10	4.86
Traction	0.05	592.19	1,531.17	2.91	0.02
Agricultural	2622	10422.81	7,762.73	14.75	23.01
Public Water Works	21	496.97	1227.04	2.33	9.85
Miscellaneous	52	806.81	586.35	1.11	(—)5.76
TOTAL	20786	39285	52631.64	100.00	4.74

4.3. Rural Electrification

The total number of villages electrified during the year was 15465 bringing the total number of electrified to 172169. Out of the total number (579062) towns and villages existing in the country. All the towns except 6 were having electricity and the percentage of villages electrified stood at 29.89. Haryana, Tamil Nadu, Kerala and Punjab led in this field. Percentage of electrified villages being 100.0, 98.0, 93.2 and 63.3 respectively.

4.4. Irrigation pumpsets

The number of pumpsets supplied with electricity during the year was (170055) bringing the total in the country to 2611657 sets. The largest number of pumpsets was in Tamil Nadu. The average H. P. per pumpset was 5.35 and average annual consumption of energy per pumpset was 2972.34 KWH.

4.5. Industries

As in the previous years the largest consumption was in industrial sector. The total consumption was 39141.9 MKWH inclusive of self generation 6451.6, the percentage increase over the previous year being 15.38%. There were 12436 consumers taking power at high voltage their share being 85.1% out of the total energy received from public utilities. The rest was consumed in small industries taking power at medium and low voltage (below 500 V). The type of industries which consumed more than one billion kWh during the year were as follows :—

Category	Consumption 1974-75 (Mkwh)	Consumption 1973-74 (Mkwh)	Percentage increase
1. Aluminium (Primary)	2917.47	2756.33	5.85
2. Cement (Primary)	1509.08	1219.56	23.73
3. Chemicals	2028.33	1544.61	31.32
4. Fertilizers	3047.62	3114.81	(—) 2.16
5. Iron & Steel (Primary)	3825.47	3432.98	11.43
6. Paper	1188.39	1058.85	12.23
7. Textiles	4393.01	4055.60	8.32

4.6. Railways

The consumption by Railways for Traction was 1531.2 MKWH which corresponded to increase of 0.02% over the previous year. The Railways had their own captive plants with an installed capacity of 64.27 MW and produced 36.30 MKWH. Excluding Chola Power Station which has been included in the utilities.

4.7. Per capita consumption

The per capita consumption of energy including consumption through self-generation rose marginally from 97.48 KWH in 1973-74 to 98.99 KWH during the year under review. The utilisation was 16043 KWH/sq. kilometres as compared to 15317 KWH in the previous year. Among the States the Gujarat had the highest per capita consumption of 177.30 KWH. The State of Gujarat, Haryana, Karnataka, Maharashtra, Punjab, Tamil Nadu & West Bengal had per capita consumption of 100 and more.

5. Accidents

The total number of reported accidents during the year was 3527 out of which 1430 were human fatal accidents as compared to 1251 reported last year. There were 493 fatal accidents to animals and 1540 human non-fatal accidents. (64 accidents involving human and animals).

6. Progress Of Electricity Supply

The progress in the matter of electricity generation and supply for the country as a whole are furnished in Section-6. These tables indicate growth in installed capacities, generation from different sources, consumption by different categories of consumers from 1947 to date.

7. Financial Data Of Public Electricity Supply Undertakings—1973-74

7.1. General

This Section gives consolidated financial data viz. Capital Expenditure Operating Revenue, Operating Expenses, etc. of the Electricity Supply Undertakings as compiled from their Annual Statutory Accounts. Whenever the accounts were not received figures have been estimated or the previous years figures have been repeated.

At the end of the year Electricity Supply Industry held gross assets worth Rs. 45486.8 Million as against Rs. 41974.2 Million in the previous year, an increase of 8.4%. This takes into account the data received from 161 out of 172 undertakings owned and operated by the State Electricity Boards, Government Departments, Power Corporations, Municipalities and Private Licensees.

The break-up of the assets according to ownership-wise is given below :—

	1972-73	1973-74	Percentage increase
	(Rupees in Million)		
1. Governments, Boards and Corporations	37388.3	40,825.8	9.2
2. Municipalities	1372.5	1,537.8	12.0
3. Private Companies	3213.4	3,123.2	(—) 2.8
TOTAL	41974.2	45,486.8	8.4

The category-wise break-up of the aforesaid figures under different heads of generation, transmission, distribution, etc. is also given below :—

	1972-73	1973-74	Percentage increase
	(Rupees in Million)		
Generation	17277.9	18154.7	5.1
Transmission	7111.2	7507.9	5.6
Distribution	15577.5	17593.0	12.9
General	2007.6	2231.2	11.1
TOTAL	41074.2	45486.8	8.4

The average cost per kW installed works out Rs. 2873 in 1974 as against Rs. 2696 in 1973.

7.2. Financing

Under the existing provisions of the Electricity (Supply) Act, 1948 the assets of the State Electricity Boards are made up of the borrowings from the public, financial institutions & the State Governments. The private licensee's assets are financed from the share capital as well as debentures and secured loans.

The capital accounts of the private companies for the year 1973-74 indicate that the equity and preference share capital and loans were Rs. 4373 Million and Rs. 93.5 Million respectively, corresponding figures for the previous year being Rs. 458.8 Million and Rs. 96.2 Million respectively at the end of 1972-73 (Table 7.1.2).

7.3. Revenue

7.3.1 The revenue realised by sale of electricity during the year indicates general overall increase in all categories of service, as per details given below :—

Sale of Electricity	1972-73	1973-74	Percentage to total revenue in 1973-74
	(Rupees in Million)		
(i) Domestic and residential	1117.4	1247.5	12.4
(ii) Commercial	698.0	759.8	7.6
(iii) Industrial	3458.0	3833.8	38.1
(iv) Public Water Works & Sewage Pumping	293.6	131.7	1.3
(v) Traction	181.4	184.5	1.8
(vi) Public Lighting	131.1	136.0	1.3
(vii) Irrigation/Agriculture	912.9	1006.1	10.0
(viii) Other revenue	2158.1	2765.7	27.5
TOTAL	8951.4	10065.1	100.0

7.3.2 The total operating revenue and expenses during the year (Ownership-wise) are given below :—

	1972-73	Percentage	1973-74	Percentage
A. REVENUE				
		(Rupees in Million)		
1. Government Depts./State Elec. Boards/Power Corporations	6687.9	74.71	7615.5	75.66
2. Municipalities	560.4	6.26	628.5	6.25
3. Companies	1703.1	19.03	1821.1	18.09
TOTAL	8951.4	100.00	10065.1	100.00

	1972-73	1973-74
B. OPERATING EXPENSES		
	(Rupees in Million)	
1. Government Depts./State Elec. Boards/Power Corps.		
(i) Expenses (O & M)	4038.1	4928.2
(ii) Depreciation	1126.9	1147.6
(iii) Interest Charges Paid	1524.7	1776.4
TOTAL	6689.7	7852.2
2. Municipalities		
(i) Expenses (O & M)	398.2	481.4
(ii) Depreciation	33.6	37.7
(iii) Interest Charges Paid	62.3	57.3
TOTAL	494.1	576.4
3. Companies		
(i) Expenses (O & M)	1365.0	1512.0

(iii) Interest Charges Paid	65.1	64.8
TOTAL	1521.3	1664.0
GRAND TOTAL (1+2+3)	8705.1	10092.6

7.4. Revenue per KWH sold under each Category

The average overall revenue by sale of electricity (excluding misc. revenue) for the year 1973-74 was 14.53p. per unit. Table 7.1.6 gives the revenue realised by each category of consumers for the electricity supply industry as a whole.

7.5. Tentative Financial results of the Government Departments, State Electricity Boards, Municipalities, Companies, etc.—1974-75.

A few broad particulars of the tentative financial results of operation of the Government Departments, State Electricity Boards, Municipalities, Companies etc. for 1974-75 are summarised below :—

	State Elec. Boards/ Depts./power corps.	Municipalities	Private companies	Total
		(Rupees in million)		
1. Total Capital fixed assets in use	43021.0	1623.5	3181.8	47826.3
2. Gross Operating revenue	8589.8	707.9	2317.9	11615.8
3. Total operating expenses including depreciation & interest charges paid	8728.4	652.1	2112.3	11492.8
Surplus/Deficit	(—)138.6	(+)55.8	(+)205.6	(+)122.8

8. ELECTRICITY TARIFF

8.1. General

Table No. 8 shows the average rates of electricity from 1974-75 with duty tax applicable in different State Electricity Board/Public Electricity Deptt./major licensees of the country for some typical categories of consumers. During the period from April, 74 to March, 75 (1974-75) several changes in electricity tariff were made effective in the country. The State Elec. Board of Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh & West Bengal increased their tariff with effect from 1-6-74, 1-1-75, 16-4-74, 1-7-74, 1-9-74, 20-5-74, 1-7-74, 1-8-74, 1-7-74, 1-1-75, 1-5-74, 1-7-74, 9-10-74, 12-10-74 & 30-11-74 respectively. Tariff were also increased by A & N Islands, Goa, Daman & Diu, Manipur & Pondicherry, w.e.f. 1-6-74, 1-1-75, 15-1-75, 1-8-74 respectively. The major licensees such as Ahmadabad has increased their tariff w.e.f. 2-6-74. D.V.C. increased their tariff twice in the year w.e.f. 1-8-74 & 1-12-74.

8.2. Average Rates

The minimum and maximum rates applicable for the following categories in different State Electricity Boards are given below :—

Sl. No.	Category	Minimum		Maximum	
		Rate per KWH	State Elec. Board	Rate per KWH	State Elec. Board
1	Domestic lights & fans 30 KWH per month	20.00	Himachal Pradesh (Rural)	40.00	Bihar, Assam, W. Bengal & U. P. (Rest)
2	Commercial lights & fans 200 KWH per month	28.50	Orissa	67.50	Tamil Nadu*
3	Agricultural 10 HP, 15% LF 817 KWH p.m.	9.00	Himachal Pradesh & Kerala	22.00	West Bengal
4	Small Industry 10 KW, 20% LF 1460 KWH p.m.	7.67	Kashmir	30.00	Tamil Nadu*
5	Large Industry 1000 KW 50% L.F. 365,000 KWH p.m.	3.79	Kashmir	25.25	Tamil Nadu*

*An additional levy of 2 p. per KWH will be charged from the consumers of the metropolitan area of Madras City.

9. STATEWISE PROGRESS

This section indicates the progress of each State regarding installed capacity, electricity generation from different sources, electricity consumption by different categories of consumers, length of Transmission lines & transmission and distribution losses from the year 1951 to date (last year of each plant). The Table also includes similar details for the D.V.C. and Central Govt. Power projects and the Union Territory of Delhi.

TABLE NO. 2-1-10

Installed Capacity, Energy Generated, Energy sent out by Central Government Projects D. V. C.

Sl. No.	Name of Power Station	Installed Plant Capacity (M.W.)	Energy Generated (M. kWh)		Off take by the States (including losses) i.e. at P.H. Busbar	
			Gross	Net	Name of the States	M. kWh
1	2	3	4	5	6	7
1	Tarapore (Nuclear)	420.00	1,457.83	1,337.03	Gujarat	669.53
					Maharashtra	667.50
2	Chola (Steam)	96.00	144.30	127.39	Central Rlys. (Maharashtra)	127.39
3	Pong/Beas Talwara (Steam)	10.00	27.47	22.44	Beas Project (Unit II Punjab)	22.44§§
4	R.A.P.P. (Nuclear)	220.00	748.26	658.67	Rajasthan	658.67
5	Neyveli (Lignite)	600.00	2,288.62	2,020.36	Tamil Nadu	1,788.25@@
6	Badarpur (Steam)	300.00	846.84	738.53	Haryana	226.96
					Punjab	116.14
					U.P.	295.01
					Delhi	80.88
					Himachal Pradesh	8.67
					Chandigarh	10.87
7	D. V. C. §	1,301.50	4,465.45	4,017.14@	Bihar	2,549.36*
					West Bengal	1,921.25**

§§—Apart from their generation project also purchased energy from Punjab State Electricity Board.

§ D.V.C. is owned by three partners viz. Central Govt., Bihar Govt. and West Bengal Govt.

@@ 232.11 M. kWh (difference between energy sent out and net generation) has been consumed by Neyveli Lignite Corpn. within works.

@ Net Generation does not tally with total of energy sent out by D.V.C. since energy sent out includes purchase by D.V.C.

** Includes 596.16 M. kWh direct sale by D.V.C. to ultimate consumers in West Bengal area.

* Includes 895.37 M. kWh direct sale by D.V.C. to ultimate consumers in Bihar area.

@@—The figures of capacity of step-down transformers was wrongly printed during 1973-74 which was actually (2591·79 MVA).

'R'—Data repeated.

**—Includes transformer controlled by B.M.B.

'RR'—Step down transformers data of Andhra Pradesh State Electricity Board repeated due to non-availability.

* The abnormal increase is due to inclusion of 3 step-up transformers at Ranapratap Sagar and Jawahar Sagar which were not included last year.

@ The figures of capacity of transformers was wrongly printed during 1973-74 which was actually (2220·37 MVA).

NOTE—(A) Including tea gardens consumption of 68.19 m. units & consumption by AIR, Airport, defence & university etc.

'B'—Includes supply to projects i.e., B. S. L., Giri Bata etc.

'C'—Includes 9.52 MU consumption of Tea gardens-Kannen Deven Hills.

'D'—Includes 5.27 MU supply to Cochin Port Trust.

'E'—Estimated.

'F'—Includes Public Water Works category consumption of Punjab State Electricity Board.

'G'—660.47 MU consumption by Nangal Fertilizer Factory has been included in the Punjab State.

'H'—D. V. C's sale to ultimate consumers in Bihar & West Bengal area has been included in consumption of Bihar & W. Bengal State respectively.

'I'—Consumption under Traction category of Gujarat State Elec. Board has been included in Industrial Power (Low & Medium) category.

'J'—Included sale of 9.36 MU to I. B.

'R'—Repeated.

A—Includes Tea garden consumption of 68.19 million units & consumption by A.I.R., Airport, Defence & University etc.

B—Includes supply to Projects.

C—Includes 9.52 M.U. consumption of Tea Gardens—Kanan Devan Hills.

D—5.27 M.U. supply to Cochin Port Trust.

E—Estimated.

F—Includes Public Water Works.

G—Does not include consumption by Nangal Fertilizer Factory.

H—The DVC's sale to ultimate consumers in Bihar & West Bengal area is excluded.

I—The separate figure for Traction are not available. It is included in Industrial Power, Low & Medium category.

§Figures pertain to Erstwhile Punjab.

*Transmission lines of B.M.B. have been included.

NOTE :—1 Figures of installed capacity and generation from 1965-66 and onwards have been changed by taking the installed capacity and generation of jointly owned projects according to the share of participating States instead of the previous practice of taking the total values against the State having major share.

** Figures of installed capacity and generation for all the years from 1966-67 onwards are for the area under re-organised Punjab. Figures of the years 1951, 1960-61 and 1965-66 present Punjab and Chandigarh combined due to want of data at present.

(A) Includes N.P.F.

(B) Includes Public Water Works and I.B. Consumption.
