Reduction in regional imbalances of educational development is a major objective of the National policy on Education. To promote this programme, it is necessary to collect statistics of educational development in the different regions of the country periodically and to publish them for information and use by all concerned.

The Ministry of Education publishes annually statistics of educational development in the different States of the Indian Union. But as imbalances of educational development are more pronounced at the district than at the State level, it was decided to collect and publish statistics of educational development in the districts also every five years. Accordingly, such statistics were collected and published, for the first time, for the year 1960-61.

The study is now being repeated for the year 1965-66 and it is proposed to bring out a separate volume on the district educational statistics of every State. It will contain statistics for the year 1965-66 along with comparative data for the year 1960-61. To make inter district comparisons possible, some important indices such as enrolment ratio, percentage of trained teachers, per capita expenditure on education, etc. will also be included.

This volume is devoted to the educational statistics of the districts in Uttar Pradesh State. It has been based on the data collected from the State Department of Education.

I take this opportunity to express my appreciation of the co-operation and help received from the Director of Education, U.P. and other educational authorities in the State and the staff of the statistic and Information Division who have prepared this report.

I. Introduction

The Ministry of Education and Social Welfare publishes the statistics of education in India annually in their publications 'Education in India, Vol.I and Vol.II.' These publications give the statistics at the national and State levels, but do not provide district-wise statistics.

• To fill up this gap, the National Council of Educational Research and Training brought out a volume entitled 'Educational Statistics: District-wise giving the benchmark of educational data of various kinds for all districts for the year 1960-61. To make inter district comparison possible, some important indices such as enrolment ratios, percentage of trained teachers and per capita expenditure on education were also given. These comparative statements show a wide range of variation between the districts in every respect.

3. It has been decided to have a similar review of educational developments in the districts for the year 1965-66. Such periodic reviews are necessary for several reasons. For instance, they help to judge the effectiveness of the measures taken to correct regional imbalances at the district level. Secondly, such collection and publication of data on different aspects of education at the district level help in the preparation of educational development plans for the districts so that they can be adopted, as recommended by the Education Commission, as the principal unit for administration, planning and development of school education.

4. The present volume gives data for each of the districts of Uttar Pradesh on number of educational institutions, pupils, teachers, expenditure etc, at all levels of education. It also gives the rates of growth in different sectors from 1960-61 to 1965-66 and some important indices of educational development.

II. SUMMARY

5. In 1965-66 Uttar Pradesh with an area of 113,654 Sq. Miles and 823.64 lakhs of population consisted of fifty four districts. This constituted 14.1 per cent of the total population of the State. The percentage of enrolment receiving primary education to the population of the corresponding age-group 6-11 was 83.6 in the state as compared to the all India average of about 80. Facilities for middle school education were provided to 27.5 percent of the population of the group 11-14 as compared to all India average of 30.8.

6. The total number of teachers employed in all educational institutions was 2.8 lakhs, of which 15.8 percent were women. The average number of teachers per thousand of population was 3.4. The teacher-pupil ratio in primary, middle and secondary schools was 1:52, 1:27 and 1:27 respectively.

7. The total direct expenditure on educational institutions was Rs. 56.11 crores during 1965-66. 62 percent of this expenditure was met from government funds.
