## SEASON AND CROP REPORT OF GUJARAT STATE FOR THE YEAR 1973-74.

### *Introduction :*

The season and crop report is an annual publication of the Directorate of Agriculture, Gujarat State, Ahmedabad. This is the fourteenth report brought out in the series after formation of Gujarat State. This report deals with agricultural statistics of the Gujarat State. It gives in detail information regarding seasonal conditions, rainfall, land utilization, area irrigated crop-wise and source-wise and total area under each crop along with the out turn of different crops. Information on agricultural wages (daily) and farm (harvest) prices along with livestock situation of the State during the year under report is also incorporated in this report.

Two years data at a glance for the state as a whole have been shown in summary tables, while district wise data for the 1973-74 are shown in statistical tables. This report is prepared on the basis of standard forms prescribed by the Directorate of Economics and Statistics, Government of India, New Delhi.

(R. L. Pathak)  
Director of Agriculture,  
Gujarat State, Ahmedabad.

### *Season for the year 1973-74*

During the year 1973-74, premonsoon showers in some of the places in Banaskantha, Dangs and Rajkot districts were received during the second fortnight of May. Onset of the monsoon in the State can be said quite normal as most of the talukas received adequate rainfall for sowing during the second week of June. This rainfall however was not adequate for sowing in Dholka and Dhandhuka talukas of Ahmedabad district, Broach, Hanost and Vagra talukas of Broach district, Matar, and Cambay talukas of Kaira district. Only 50% of the area of all the talukas of Amreli district received adequate rainfall. While Okha, Kalyanpur, Jodia, Jamjodhpur, and Bhanwad talukas of Jamnagar district also did not receive adequate rainfall while in remaining talukas only 50% of the area received adequate rainfall. Seven talukas out of twelve talukas of Bhavnagar district did not receive adequate rainfall, while only half of the area of Junagadh district received adequate rainfall for sowing. In Kutch district all the talukas except Rapar taluka did not receive adequate rainfall. Eight talukas, out of thirteen talukas of Rajkot district did not receive adequate rainfall while in Surendranagar district only 30% of the area received adequate rainfall for sowing. From the 3rd week of June onwards, there was complete dry spell in all over the state which lasted for a period varying from two to three weeks. There was revival of monsoon in the first fortnight of July in all over the Baroda region except few pockets. In the districts of Rajkot region even though rainfall was received in the first fortnight of July was not adequate except in Junagadh district, while Lakhpat taluka of Kutch district continued to be under dry spell. Similarly Dholka and Dhandhuka talukas of Ahmedabad district, Jodia taluka of Jamnagar district, continued to be under the grip of dry spell even in the first fortnight of July.

In the second fortnight of July, all the districts of Baroda region received rainfall, while districts of Rajkot region were not fortunate to receive adequate rainfall in the second fortnight of July. In Baroda region there was again a dry spell for a period of one week. Thereafter rainfall continued all over Baroda region upto the middle of Sept. Most of the districts of Baroda region except Surat, Bulsar and Dangs witnessed unprecedented heavy rains and floods in the first week of Sept. All the rivers were in spate. Due to heavy rain and floods, kharif crops were affected in an area of about eight lakh hectares. In sharp contrast with most of the areas in Rajkot region except Junagadh district continued to be under the grip of severe drought,

The monsoon of the year 1973-74 can be termed as complete failure in most of the Rajkot region except Junagadh district. While there were excessive rains resulting in destruction of kharif crops in Baroda region. Thus monsoon on the whole can be termed as abnormal and disappointing one. Harvesting of kharif crops was started little late than usual and was continued till the end of November.

Sowing of rabi crops was started during the second fortnight of October and continued upto the end of Dec. Due to adequate moisture in soil in Baroda region, condition of dry as well as irrigated wheat and other rabi crops except flood affected areas was reported to be satisfactory.

There was no serious pests and diseases reported in the State during the year under report except bollworms, aphids and jassids on cotton in Ahmedabad, Gandhinagar, Kaira, Mehsana, Surat, Junagadh Kutch, Bular, Baroda and Broach districts.

**Rainfall**

District wise rainfall (in m. m.) received during the year 1973-74 is shown in table No. 1. The district wise annual average rainfall and district normal rainfall depicted in barehart (fig. 1)

**Land Utilization.**

The total geographical area of Gujarat State according to Surveyer General of India, during the year under report is 19598400 hectares, while the total reporting area for land utilisation purpose is 18812400 hectares. The area under nine standard heads of land use classification alongwith percentage of the total reporting area for land utilisation have been shown herebelow.

Sr. No.	Category	Area in '00 hect.	Percentage of the total reporting area for land utilisation purpose.
1.	Forest.	15683	8.34
2.	Barren and unculturable land	26444	14.05
3.	Land put to non agril. use	10940	5.82
4.	Culturable waste.	22100	14.75
.	Permenent pasture and other grazing land.	8556	4.54
6.	Miscellaneous tree crop and groves not included in net area sown.	49	0.03
7.	Current fallow	3519	1.87
8.	Other fallow	3234	1.72
9.	Net area sown	97599	51.88

The paidiagram showing classification of reporting area for land utilisation purpose during the year 1973-74 is shown in Fig. 2.

**1. Forest.**

This class includes all lands classed as forest under any legal enactment dealing with forest or administrated as forest. Whether state owned or private and whether wooded or maintainedas potential forest land. The area under crops raised in forest and grazing lands or area open for grazing within the forests should remain included under the forest area.

The total area under forest in Gujarat State during the year under report is 15683 (hundred) hectares i. e. 8.34% of the total reporting area, while in previous years, the total area under forest was 15674 (hundred) hect. i. e. 8.33 % of the total reporting area.

Dangs, Junagadh and Panchmahals, districts account for 10.8 % , 12.4 % and 14.3 % of the total area under forest in the State. While Surat, Broach, Banaskantha, Bulsar and Kutch districts account for 9.5 %, 9.0 %, 8.4 % 8.0 % and 6.6 % respectively of the total area under forest. Out of the remaining districts no district accounts more than 5% of the total area under forest in the State.

## 2. Barren and unculturable land.

This class of land includes all barren and unculturable land like mountains, deserts, etc. land which cannot be brought under cultivation except at an exorbitant Cost has been classed as unculturable whether such land can be isolated blocks or within cultivated holdings.

Nearly 37.66 % of the total reporting area of Kutch district falls under this category. This land use class accounts for 14.84 percent, 13.62 % 12.20 % 10.53 % of the reporting area in Surendranagar, Sabarkantha, Jamnagar and Rajkot districts respectively while it is 9.82 % in Bhavnagar district. The area under barren and unculturable land varies from 5.0 % 6.0 % of the reporting area in Gandhinagar Kaira and Surat district respectively. In rest of the districts, area under this category is not sizable.

## 3. Land put to non-agricultural uses.

This class of land includes all lands occupied by buildings, roads, and railways or under water i. e. rivers and canals and land utilised for other than agriculture purposes. Area under this category of land during the year under report is 10940 (hundred) hectares. This works out to 5.82 % of the total reporting area in the State.

4. **Culturable waste.** This class of land includes lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during current year and last five years or more in succession for one reason or other. Such land may be either fallow or covered with shrubs and jungle which are not put to any use.

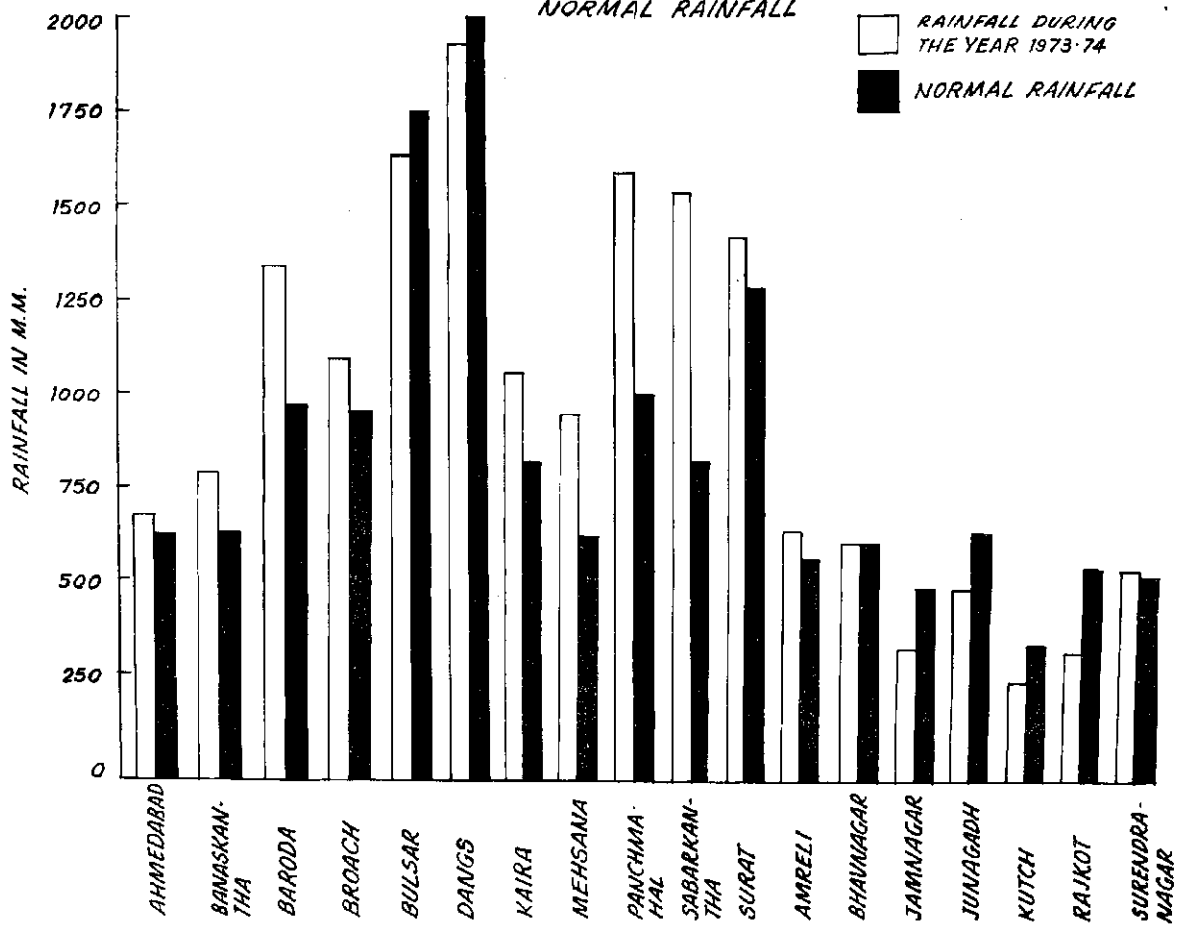

It may be assessed and may be in isolated blocks or with in cultivated holdings, land once cultivated but not cultivated for five years in succession also gets included in this category at the end of five years. An area of 22100 (hundred) hectares i. e. 11.75. % of the total reporting area falls under this category.

5. **Permanent pastured and other grazing land.** This class of land includes all grazing lands, whether they are permanent pastures and meadows or not, village common grazing land is included under this head.

Area under this category during the year under report is 8556 (hundred) hectares. This works out to 4.54 % of the total reporting area.

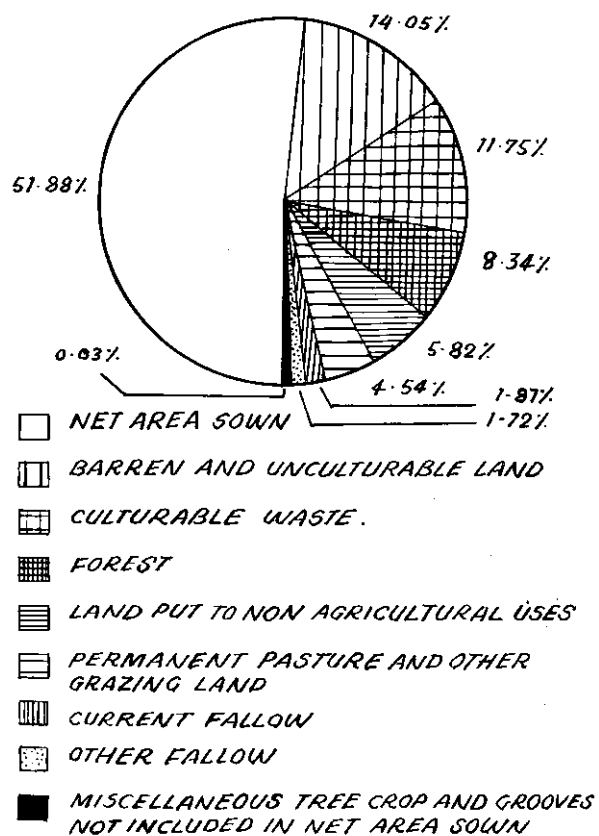

6. **Miscellaneous tree crops and groves not included in net area sown.** This class of land includes all cultivable land which is not included in "net area sown" but is put to some agricultural use. Land under casimna trees, thatching grass bamboo, bushes and other groves etc. which are not included under "Orchards" are classed under this category.

BAR CHART SHOWING DISTRICTWISE ACTUAL RAINFALL 1973-74 AND NORMAL RAINFALL

*CLASSIFICATION OF REPORTING AREA  
FOR LAND UTILIZATION PURPOSE FOR  
THE YEAR 1973-74*

Area under this category of land is only 49 (hundred) hectares which works out to 0.03 of the total reporting area of the State.

7. **Current fallow** This class of land represents cropped area which is kept fallow during the current year. Land used for raising seedlings but is not cropped during the year under report is treated as current fallow. Area under this category of land during the year under report is 3519 (hundred) hectares which works out to 1.87 % of the total reporting area of the State.

8. **Other fallow :** (Fallow land other than current fallow) This class of land includes all lands which are taken up for cultivation (but are temporarily out of cultivation for a period of not less than one year and not more than five years. The reason for keeping such lands fallow, may be one or more of the following.

- (1) Poverty of the cultivators.
- (2) Inadequate supply of water
- (3) Malarial climate
- (4) Unremunerative nature of farming.

Area under this category of land is 3234 (hundred) hectares which works out to 1.72 % of the total reporting area of the State.

#### Net area sown.

This class of land represents total area sown with crops and orchards, counting area sown more than once in the same year only once.

Such type of land during the year under report is 97599 (hundred) hectares (excluding the net area sown of Dangs district) which works out to 51.88 % of the total reporting area.

Ahmedabad; Amreli, Gandhinagar, Kaira and Mehsana dists., net sown area constitutes more than 70.0 % of the reporting area while in Kutch and Dangs districts only 14.1 % and 28.8 % respectively of the total reporting area is under net sown area. Net sown area varies from 50.0 % to 70.0 % of the reporting area in the remaining districts. Area sown more than once in the state is only 7.5 % of the net area sown during the year under report.

#### Area irrigated by different sources.

The net area irrigated by different sources during the year under report is 14016 (hundred) hectares which works out to 14.3 % of the net area sown in the State. The percentage of net and gross cropped area irrigated in Gujarat State is as under

	Area in '00 hect.
1. Net sown area (including Dangs dist.).	98089
2. Net irrigated area	14016
3. Percentage of net irrigated area in terms of net area sown.	14.3
4. Gross cropped area.	105415
5. Gross irrigated area.	15913
6. Percentage of gross irrigated area in terms of gross area sown.	15.1

The information on source wise net irrigated and net irrigated area expressed as percentage of total net area irrigated in the State for the year 1973-74 is presented in table given below.

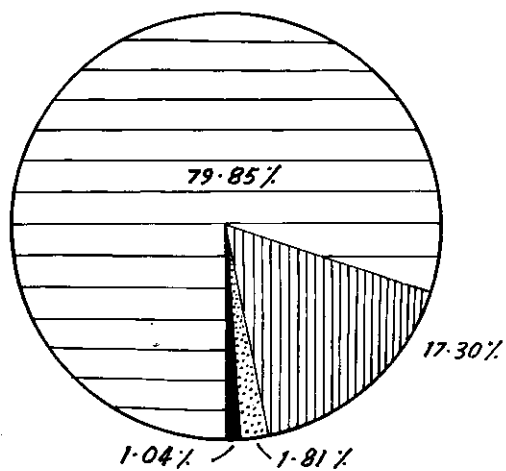

Sr. No.	Source of irrigation.	Net area irrigated '00' hectares.	Percentage of total net irrigated area.
1.	Gannals	2425	17.30
2.	Tanks.	254	1.81
3.	Tube wells.	1288	9.19
4.	Wells	9904	70.66
5.	Other sources.	145	1.04
	Total:	14016	100.00

Net area irrigated by different sources during the year under report is depicted in piodigram in Fig.

*NET AREA IRRIGATED BY  
DIFFERENT SOURCES - 1973-74*

-  BY WELLS (INCLUDING TUBE WELLS)
-  BY CANALS
-  BY TANKS
-  BY OTHER SOURCES

In 44.0 % of the talukas, gross irrigated area is hardly up to 9.9 % of the total cropped area, while in 31.0 % of the talukas, gross irrigated area ranges from 10.0 % to 19.9 % of the total cropped area. In 11.4 % 5.4 % and 6.0 % of the taluka gross irrigated area ranges from 20.00 to 29.99 %, 30.00 to 39.99 and 40.00 to 49.99 % respectively of the gross cropped area. In 1.2 %, 0.5% and 0.5 % of the talukas gross irrigated area ranges from 50.00 to 59.99, 60.00 to 69.99 and 70.00 to 79.99 % of the total gross cropped area.

Number of districts and talukas falling in different percentage area classes of gross irrigated area according to sources of irrigation.

No. of districts and talukas falling in different percentages area classes of irrigated area according to sources of irrigation (over gross irrigated area).

Year 1973-74

Percentage area under irrigation.	All sources		Name and sources of irrigation.		Canal		Tanks		Wells.		Other sources.	
	Dist.	Tal.	Dist.	Tal.	Dist.	Tal.	Dist.	Tal.	Dist.	Tal.	Dist.	Tal.
0.10 to 9.99	6	81	9	28	12	37	-	1	8	21		
10.00 to 19.99	8	57	2	16	2	4	1	6	1	3		
20.00 to 29.99	4	21	3	8	-	1	-	8	-	7

40.00 to 49.99	-	11	-	6	-	2	1	5	-	-		
50.00 to 74.99	-	4	-	10	-	1	4	32	-	1		
75.00 to 100.00	-	-	1	6	-	1	13	129	-	-		
<b>Total :-</b>	<b>19</b>	<b>184</b>	<b>17</b>	<b>88</b>	<b>14</b>	<b>50</b>	<b>19</b>	<b>184</b>	<b>9</b>	<b>33</b>		

It can be seen from the above table that well is the main source of irrigation in Gujarat State. In as many as 13 districts out of 19 districts and in as many as 129 talukas out of 184 talukas well irrigation accounts for more than 75 % of the total irrigated area. While cannal as a source of irrigation ranks second. There are 88 talukas out of 184 talukas in 17 districts of the state in which facility of cannal irrigation exist. Out of these 88 talukas in as many as 72 talukas, cannal irrigation accounts for less than 50 % of the total irrigated area. While in 10 talukas irrigated area by cannal ranges from 50.00 to 74.99 % and in remaining 6 talukas it ranges from 75.00 to 100.00 % of the total irrigated area.

#### 4. Crop wise area irrigated.

During the year under report, an area of 15913 (00) ha. (15.10 % of total cropped area) received irrigation in the State while in the previous year an area of 15212 (00) ha. (14.71 % of the total cropped area) received irrigation. Thus, there has been an increase by 0.39 % in area receiving irrigation crop wise area and irrigated area is shown in the statement given below. Barchart depicting this information is presented in fig.

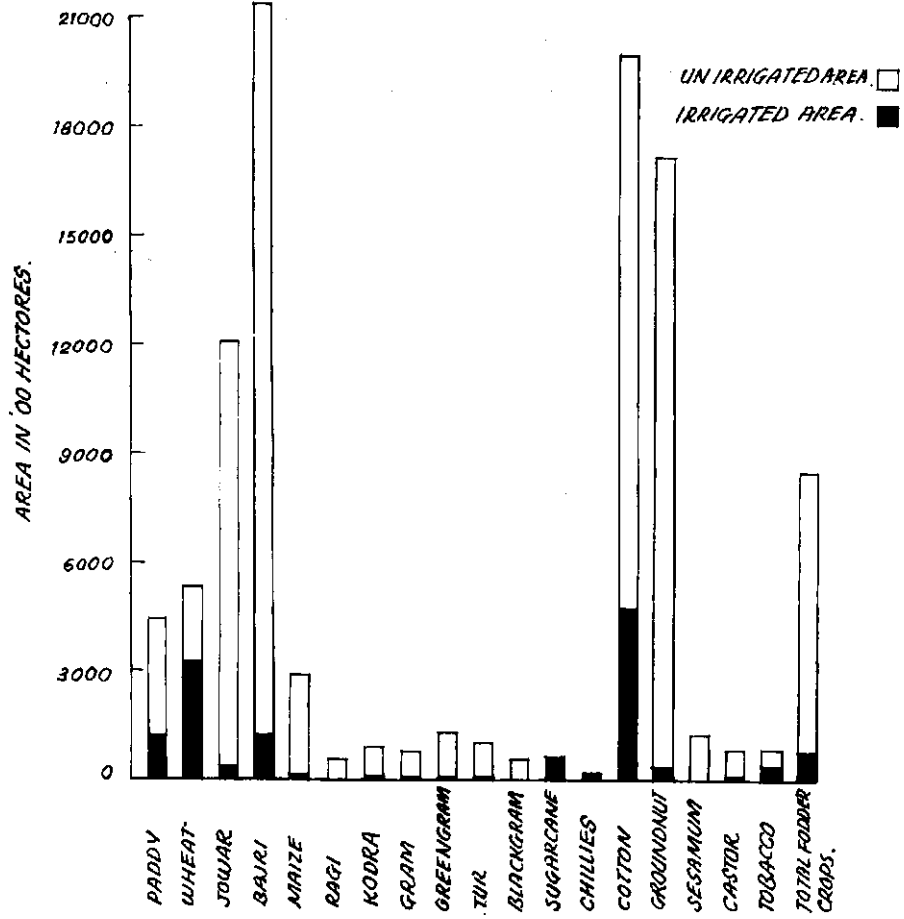

Crop wise total area area irrigated and irrigated area as percentage of total area under the crop for important crops during the year 1973-74.

Sr. No.	Name of the crop	Area under the crop in '00 ha.	Irrigated area in '00 ha.	irrigated area as percentage of total area under the crop.
1.	Paddy	4434	1273	28.71

19.	Misc. food crop	-	-	-	-
20.	Total food crops	50061	48.6	55969	53.1
21.	Cotton	21477	20.8	19907	18.9
22.	Total fibres	21539	20.9	19907	19.0
23.	Groundnut,	19487	18.9	17047	16.2
24.	Sesamum	1044	1.0	1186	1.1
25.	Castor	635	0.6	791	0.8
26.	Total oilseeds.	21899	21.2	20039	19.0
27.	Tobacco	902	0.9	810	0.8
28.	Total Drugs & Narcotics.	1165	1.1	1011	1.0
29.	Total fodder	8414	8.2	8414	8.0
30.	Misc. non-food crops.	9	-	3	-
31.	Total non-food crops.	53026	51.4	49446	46.9
32.	Total cropped area.	103087	-	105415	-

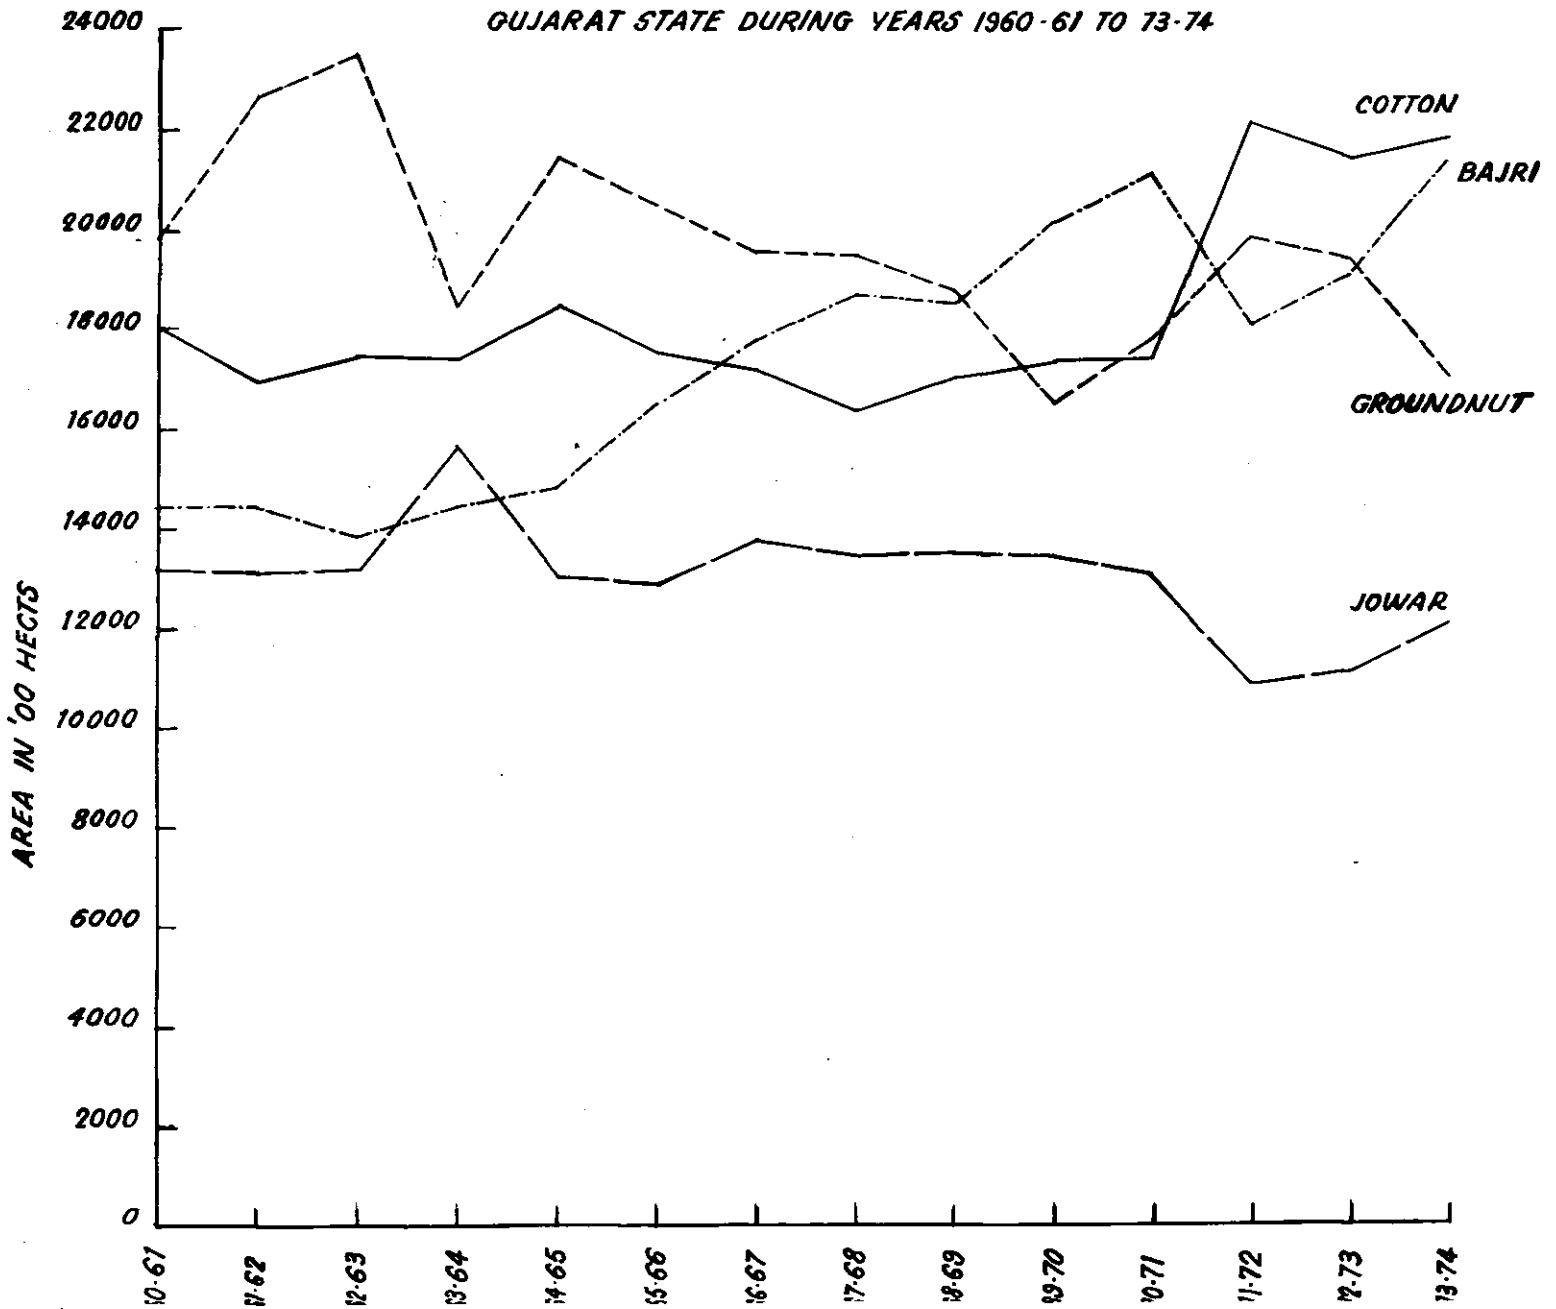

Jowar bajri cotton and groundnut crops accounts for 66.9 % of the total cropped area during the year under report as against 68.9% of the total cropped area in the State during previous year. These four principal crops are found to have been grown in almost all the districts of the State. The graph showing fluctuation in area under these crops is shown in fig.

6. Crop wise state average yield per ha. and the total outturn during the year under report and previous year have been shown in summary table 'E' While farm harvest prices of principal crops and monthwise daily agricultural wages for the year 1972-73 and 1973-74 are shown in summary tables No F and G Information on number of live stock, poultry and agricultural machinery as per 1972 live stock census have been shown in summary table No. H

BAR CHART SHOWING AREA UNDER PRINCIPAL CROPS FOR THE YEAR 1972-73 AND 1973-74 IN GUJARAT STATE.

FLUCTUATION IN AREA UNDER JOWAR, BAJRI, COTTON AND GROUNDNUT CROPS IN GUJARAT STATE DURING YEARS 1960-61 TO 73-74

Summary Table-A.

Classification of area.		Area in '00 hectares.				
Sr. No.	Head of Classification.	1972-73		1973-74		Percentage increase (+) or decrease(-)
		Area	% of reporting area for land utilisation purpose.	Area	% of total area for land utilisation purpose.	
1	2	3	4	5	6	7
1.	Total Geographical area, of state territories.	195984	-	195984	-	-
2.	Reporting area for land utilisation purpose.	188124	-	188124	-	-
3.	Forest	15674	8.33	15683	8.34	+0.06
4.	Barren and unculturable land.	26510	14.30	26444	14.05	-1.73
5.	Land put to non agricultural use.	10458	5.56	10940	5.82	+4.61
6.	Permanent pasture and other grazing land.	8551	4.55	8556	4.54	+0.06
7.	Land under misc. trees crops and groves not included in area, sown.	61	0.03	49	0.03	-19.67
8.	Culturable waste.	22170	11.79	22100	11.75	-0.32
9.	Current fallow.	4748	2.52	3519	1.87	-25.88
10.	Other fallow	3530	1.88	3234	1.72	-8.39
11.	Net area sown	96023@	51.04	97599@	51.88	+1.64
12.	Area sown more than once	6570*	3.49	7324*	3.89	+11.48
13.	Total cropped area i. e. gross cropped area.	102592@	54.53	104923@	55.77	+2.27

@ Excluding the net sown area and cropped area of Dangs district.

\* Excluding area sown more than once of Dangs district.

Summary Table-B

Source of water supply and the area irrigated there from in Gujarat State during the year 1973-74.
