## PREFACE

The present publication is in continuation of several others of this nature published earlier, the last one being for the period 1942-45. As usual, it contains only the more important statistical information on education in British India for the year 1945-46. It is hoped that it will be found useful by the educationists and the public.

A similar publication on Indian States will follow shortly.

I take this opportunity to express my gratitude to the Provincial Governments and other authorities concerned who have supplied the information on which these tables are based.
