## P R E F A C E

This volume on District Educational Statistics for the State of Madhya Pradesh is the twenty fifth in the series of such volumes, brought out for all the States and Union Territories. The main aim is to highlight the inter-district variations in a State by giving educational data at district levels with the help of some important indices such as enrolment ratio, percentage of trained teachers, per-capita expenditure and teacher-pupil-ratio etc.

In order to as- certain whether the educational imbalances have widened or narrowed down with time the data for the year 1976-77 has been analysed and compared with that for the year 1970-71.

I take this opportunity to place on record the appropriation of the Department of Education for the co-operation received from the Director of Education, Madhya Pradesh and the project staff of the Planning, Monitoring & Statistics Division who have prepared this report.

INTRODUCTION

The Ministry of Human Resource Development (Deptt. of Education) collects and publishes the educational statistics at State level on annual basis. However, keeping in view the wide disparities within a State, educational data is collected and published quinquennially separately for each State. This volume is the twenty fifth in the series of the Educational Statistics- District-wise for the years 1970-71-1976-77.

2. For making inter district comparisons, important educational indicators such as enrolment ratio, co-efficient of equality for scheduled caste & scheduled tribe teacher pupil ratio, cost per student and population served by an Institution etc. have been worked out at district level. These indices show wide range of variation among the districts and are of great use for formulating educational development plans at district level.

II - AREA AND POPULATION

3. Madhya Pradesh State consists of 45 Districts. The number of districts in the State remained the same during the period 1971 to 1977. The total area of the State being 4.43 lakh sq. kms. also remained the same during the period under review. Among the districts the area varies from as high as 39,060 sq. kms. in case of Bastar to as low as 2,034 sq. kms. of Datia.

4. The total population of the State was 416.54 lakhs (214.55 males and 201.99 females in 1971 as per Census. Among the districts the highest population was 26.14 lakhs in Raipur and the lowest was 2.55 lakhs in Datia. The population of the State is estimated to have increased to 487.98 lakhs (253.09 lakhs males and 234.89 lakhs females) in 1977. The annual growth of the population works out to be 2.4% during the period under consideration.

5. The density of population for the State as a whole was 94 per sq. km. in 1971 which is estimated to have increased to 110 by the year 1977. In 1977 the highest density of population was 306 in Indore and the lowest in Bastar 45. Statement (1) depicts the districtwise information on area, population and density of population figures for the years 1971 and 1977.

6. Population of different age-groups of the State for the years 1971 and 1977 as on 31st March of the respective year are based on the population estimates available from the office of the Registrar General of India whereas the districtwise population estimates for the age-groups 6-11, 11-14 and 14-17 for the year 1976-77 (as on 1.3.1977) have been worked out by using the following formula:-

We assume that -

$$\frac{P_{6-11}}{P} = \frac{P_{6-11}^i}{P^i} = K, i = 1, 2, 3, 4$$

$$\therefore P_{6-11} = K P$$

Where K is estimated from the formula,

$$K = \frac{P_{6-11}}{P}$$

$P_{6-11}$	=	6-11 age-group population of the State
$P$	=	Total population of the State
$P_{6-11}^i$	=	6-11 age-group population of the ith district
$p_i$	=	Total population of the ith district

7. For getting sex-wise break-up of the population in various age-groups first the girls population is estimated by the above formula by replacing total population by the girls population. Boys population can be obtained by subtracting estimated population from the total estimated population.

8. Total population in the age-group 6-11 was 57.44 lakhs (29.77 lakhs boys and 27.67 lakhs girls) which increased to 70.37 lakhs (36.37 lakhs boys and 34.00 lakhs girls) in 1977. Population in age-group 11-14 increased from 28.69 lakhs in 1971 to 36.53 lakhs (18.56 lakhs boys and 17.97 lakhs girls) in 1977. Population for age-group 14-17 was 25.85 lakhs in 1971 which increased to 32.15 lakhs in 1976-77.

9. Thus of the total population of 487.98 lakhs in 1977 school going population in age-group 6-17 was 139.06 lakhs (72.11 lakhs boys and 66.93 lakhs girls) forming 28.5%. School going population of boys is 28.6% and for girls 28.4% in 1977. Districtwise estimated population figures for different age-groups are given in Statement (2).

### III - LITERACY

10. In 1971 the effective literacy rate viz. total number of literates per one hundred of population excluding 0-4 age-group was 26.4 for the State as a whole. The literacy rate for males was 38.7 whereas for females it was quite low i.e. only 13.0 at State level. Among the districts the highest literacy was in case of Indore 50.8 followed by Jabalpur 40.9 and Gwalior 39.8. Jhabua reported the lowest literacy rate viz. only 10.0. Districtwise details of literacy can be seen from Statement (3).

IV - GENERAL VIEW

(a) INSTITUTIONS

11. There were 46,319 recognised institutions of all types of education in 1970-71 in the State which increased to 64,537 in 1976-77.
