P R E F A C E

This volume on District-wise Educational Statistics for the state of West Bengal is the seventh in the series of such volumes which will be brought out for all the states and Union Territories. The main aim is to highlight the inter-district variations in a state by giving educational data at district levels with the help of some important indices such as enrolment ratio, percentage of trained teachers, pupil teacher ratio and area served by a school etc.

In order to ascertain whether the educational imbalances have widened or narrowed down with time, the data for the year 1981-82 have been analysed and compared with that of 1977-78.

I would take this opportunity to acknowledge the assistance and co-operation received from the Director of Public Instruction, West Bengal and the project staff of the Planning, Monitoring and Statistics Division in preparing this report.

Regional imbalances exist in the field of Educational Development too just as in Urbanisation, industrialisation, distribution of income and wealth. With a view to highlight national variations in the educational sector, the Ministry of Human Resource Development brings out the publication Educational Statistics - District-wise quinquennially.

2. A volume of this nature was first published by National Council of Educational Research and Training in 1960-61. There after it was decided that such reviews will be brought out in respect of each state every five years by the Ministry of Human Resource Development. Accordingly the reviews for the year 1965-66 were brought out by this Ministry in respect of some states. However for the quinquennial year 1976-77 such reviews were brought out for all the states and union territories with legislature.

3. For making inter district comparisons possible, some important indices such as Enrolment Ratio, Percentage of trained teachers and teacher pupil ratio etc. have been worked out. These indices show wide range of variations between the districts and are of much need for formulating educational plans at the district level.

II. AREA AND POPULATION:

4. The area of West Bengal State is 88752 Sq. Kms. as per 1981 Census. It consists of 16 districts. The number of districts in the State remained the same during the period 1978-1982. The district-wise area in West Bengal varies from 14136 sq.kms. in case of

24 Parganas to 104 Sq. Kms. in case of Calcutta.

5. The estimated population of West Bengal State was 514.51 lakhs (271.54 lakhs males and 242.97 lakhs females) in 1978 whereas according to 1981 census, the estimated population was 557.13 lakhs (291.35 lakhs males and 265.78 lakhs females) in 1982. The population varies among the districts from 109.62 lakhs in 24 Parganas followed by Midnapore (69.83 lakhs) to 10.46 lakhs in Darjeeling district.

6. The overall density of population per sq. km. was 506 in 1978 which increased to 620 in 1982 at State level. The density of population in 1982 varied widely among the districts from 32436, the highest in Calcutta district to 302, the lowest in Purulia district. The area, total population and density of population for different districts for the year 1978 and 1982 are given in Table 1. General view of the extent of variation in area, population and density is given below:-

7. The population of the State of different age-groups for the years 1978 and 1982 given in this report are based on the revised population (as on 1st March of the year) available from the office of the Registrar General of India. District-wise population in the age-groups 6-11, 11-14 and 14-17 are based on the following formula :-

We assume that

$$\frac{P_{6-11}}{P} = \frac{P_{6-11}^i}{P^i}$$

$$P_{6-11}^i = KP^i \quad \text{where } K = \text{is estimated from the formula}$$

$$K = \frac{P_{6-11}}{P}$$

P_{6-11} = denotes 6-11 age-group population of the State

P = total population of the State

P_{6-11}^i = total 6-11 age-group population of the i th district

P^i = total population of the i th district

8. To get the sex-wise break-up of total population in the various age-groups of the districts, first the population of girls is estimated by using the above formula. The boys population is obtained by subtracting girls population from total estimated population.

9. The total population of children in the age-group 6-11 was 69.41 lakhs (34.97 lakhs boys and 34.44 lakhs girls) in 1978 which is estimated to have increased to 71.27 lakhs (36.13 lakhs boys and 35.14 lakhs girls) by 1982. In 1982, 6-11 age-group population formed 12.8% of the total population.
10. The total population of children in the age-group 11-14 was 30.30 lakhs (19.40 lakhs boys and 10.90 lakhs girls) in 1978 which is estimated to have increased to 41.28 lakhs (21.05 lakhs boys and 20.23 lakhs girls) by 1982. The percentage of population in the age group 11-14 to total population in 1982 was 7.4%.
11. Similarly the population in the age-group 14-17 in 1978 was 35.31 lakhs (18.19 lakhs boys and 17.12 lakhs girls) which is estimated to have increased to 50.87 lakhs (26.23 lakhs boys and 24.64 lakhs girls) by 1982. Population in the age-group 14-17 formed 9.1% of the total population in 1982.
12. Out of the total Census population of 557.13 lakhs in 1982 of the State, the school - going population in the age-group 6-17 years was 163.41 lakhs consisting of 83.41 lakhs boys and 80.00 lakhs girls. The population in the age-group 6-17 years constituted **29.3% of the total population**. The percentage for boys was 28.6% while for girls it was 30.1%. The district-wise population of different age-groups is given in Appendix No. 3.

III. LITERACY :

13. According to the 1981 Census the effective literacy rate i.e. the number of
...../-

literate per hundred of the population in the West Bengal State is 40.9. The literacy rates for males and females is 50.7 and 30.3 per hundred respectively. The highest literacy is in 24-Parganas (72.3) and the lowest in Malda (23.1). The literacy rate of Scheduled Castes is 24.4 and that of Scheduled Tribes 13.2 at state level. The details are given in the Appendix No.6.

The district-wise position of Institutions is given in Appendix No.1.

(b) ENROLMENT :

15. The total enrolment in all recognised Educational Institutions in the State increased from 75.61 lakhs in 1977-78 to 100.44 lakhs in 1981-82. Among the districts Darjeeling had the maximum 43.4 percentage of Girls enrolment to Total enrolment whereas Purulia had the minimum (29.1) in 1981-82. Out of 16 districts there were ten districts in which percentage of girls enrolment was below to that of state percentage. Details are shown in Appendix No.4.

(c) EXTENT OF COVERAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES :

17. The extent of coverage of Scheduled Castes/Scheduled Tribes or the co-efficient of equality is defined as :-

$$I = \frac{\text{Percentage of Enrolment of Scheduled Castes/Scheduled Tribes to Total enrolment}}{\frac{\text{Percentage of population of Scheduled Castes/Scheduled Tribes to Total population}}{100}} \times 100$$

18. In West Bengal in 1981-82 the percentage of Scheduled Castes and Scheduled Tribes students to total number of students was 14.5% (15.1% for boys and 13.5% for girls) and 3.4% (4% for boys and 2.4% for girls) respectively. The percentage for Scheduled Castes and Scheduled Tribes population to total population was estimated to be 22.0% and 5.6%

respectively. Therefore the extent of coverage or co-efficient of equality at state level works out to be 65.9% and 59.0% respectively. In case of Scheduled Caste students the highest extent of coverage was ⁱⁿ Cooch Behar (105.4) and the lowest in Burdwan (37.1). There are six districts which reported extent of coverage less than that at State level. On the other hand extent of coverage varied from 140.3% in Murshidabad to 22.6% in Burdwan in case of Scheduled Tribes students. There are five districts which reported extent of coverage below to that at State level District-wise position for Scheduled Castes and Scheduled Tribes students can be seen from Appendix 7 and 8 respectively.
