

**SEASON & CROP REPORT**  
**OF**  
**ANDHRA PRADESH**

*For the Agricultural Year 1985-86*  
*Fasli 1395*

—:O:—

ISSUED BY  
**THE BUREAU OF ECONOMICS & STATISTICS**  
**GOVERNMENT OF ANDHRA PRADESH**  
**HYDERABAD**

## **PREFACE**

The present issue of the Season and Crop Report is the 31st in the series brought out annually by the Bureau of Economics & Statistics.

The Report contains detailed information on rainfall, seasonal conditions, land utilisation, area irrigated by different sources, area, production and productivity of all principal crops, agricultural wages, prices in peak marketing period and the index numbers of agricultural production for 1985-86. It also contains information on certain agricultural inputs such as chemical fertilisers, pesticides and credit distributed during the year, as furnished by the concerned departments.

The production of Rice, Jowar, Bajra, Maize, Ragi, Korra, Redgram, Greengram, Blackgram, Horsegram, Chillies, Groundnut, Sesamum, Castor, Cotton, Mesta, Tobacco and Sugarcane is estimated on the basis of the results obtained through Crop Cutting Experiments. For other crops, the production is estimated by taking into account the yield per hectare, obtained through field agency reports.

Hyderabad - A.P.,  
26-8-1988

**S. LAKSHMINARAYANA**  
Director, Bureau of Economics  
and Statistics,  
Hyderabad.

# CONTENTS

<i>Subject</i>	<i>Pages</i>
<b>A. REPORT</b>	
1. Seasonal Conditions	1 - 3
2. Classification of Area-Land Utilisation	3 - 5
3. Area irrigated by different sources	5 - 7
4. Cropping pattern	8 - 10
5. Food- grains-- Production	10 - 12
6. Brief description of area and production of Important crops	12 - 29
7. Index Numbers of Agricultural Production in Andhra Pradesh 1985-86	29 - 35
8. Review on the trends in wholesale prices of Principal Agricultural Commodities in Andhra Pradesh during 1985-86	36 - 39
9. Brief Review on the trends in Retail Prices of Essential Commodities in Andhra Pradesh during 1985-86	39
10. Review on the trends of Agricultural Wages in Andhra Pradesh during 1985-86	39 - 40
11. Gross Value of Agricultural output	40 - 46
<b>B. SUMMARY TABLES (STATE)</b>	
A. Classification of geographical area in A.P. 1981-82 to 1985-86	47 - 48
B. Net area irrigated by Sources in A.P. 1981-82 to 1985-86	49 - 50
C. Crop-wise area irrigated in A.P. 1981-82 to 1985-86	51 - 54
D. Area under crops in A.P. 1981-82 to 1985-86	55 - 62
E. Average yield per Hectare and total out-turn of crops in Andhra Pradesh 1981-82 to 1985-86	63 - 66
F. Average wholesale prices of principal crops in A.P. during peak marketing period for the year 1981-82 to 1985-86	67
G. Average Daily Agricultural Wages in A.P. from July, 1985 to June, 1986	68
<b>C. DETAILED TABLES (DISTRICT-WISE)</b>	
I. Monthly Rainfall in A.P. by Districts during 1985-86	69 - 74
II. Classification of Geographical area in A.P. by Districts 1985-86	75 - 78
III. A. Sources of Water Supply in A.P. by Districts 1985-86	79 - 82
B. Area irrigated by different sources, in A.P. by Districts 1985-86	83 - 101
C. Area of crops irrigated in A.P. by Districts 1985-86	102 - 117
D. Area of crops irrigated by different sources in A.P. by Districts 1985-86	118 - 149
IV. A. Area under food crops in A.P. by Districts 1985-86	150 - 175
B. Area under non-food crops in A.P. by Districts 1985-86	176 - 189
C. Statement showing Details of cropped area in A.P by Districts 1985-86	190 - 191
D. Percentages of area under principal crops in A.P. area sown in each District of A.P. 1985-86	192 - 197
V. A. Yield per hectare of principal crops in A.P. by Districts 1985-86	198 - 213
B. Total out-turn of principal crops in A.P. by Districts 1985-86	214 - 239

## C. DETAILED TABLES (DISTRICT-WISE) - (Contd.)

VI.	A.	Average wholesale prices during peak market period of certain commodities in A.P. for the year 1985-86	240 - 243
	B.	Statement showing average retail prices of certain selected commodities in A.P. during 1985-86	244
	C.	Statement showing the average retail prices of Rice I Sort, II Sort, Jowar (White), Jowar (Yellow), Bajra, Ragi, and salt in A.P.	246 - 259
VII.	A.	Statement Showing the Index number of daily agricultural wages in A.P 1985-86	260 - 261
	B.	Statement Showing the Average Daily agricultural wages in Rupees and paise and the Index Numbers of daily Agricultural wages in A.P for the Months of July 1985 to June 1986	262 - 285
VIII.		Statement showing cumulative Percentage of Sowings and harvest of Crops, 1985-86	286 - 379
IX.	A.	Calendar showing the scheduled dates on which forecast reports on important crops are due with the Government of India and the dates of release of the corresponding All India Reports	380 - 383
	B.	Calendar showing the month-wise forecast reports due to Government of India from States	384 - 385
X.		Glossary of Botanical, English and Telugu names of crops	386 - 387
XI.		State position as compared to All India Area and production of principal crops for 1985-86	388 - 389
XII.	1.	Statement showing Factory - wise quantities of cane crushed, sugar produced, percentage of Recovery and molasses during 1985-86 in A.P	390 - 391
	2.	District-wise performance of Khandasari units and sugar produced during 1985-86	392
	3.	District-wise chemical fertilisers distributed in A.P during 1985-86	393 - 394
	4.	Statement showing area treated with plant protection measures in 1985-86 in A.P.	395
	5.	Statement showing Total area covered with Soil Conservation Programme in A.P. 1985-86	396
	6.	Statement showing District-wise allotment and expenditure under short term loans distributed by the department during 1985-86	397
		Conversion Co-efficients	398

i. Rice 1st Sort and 2nd Sort	39
ii. Jowar (White)	39
iii. Bajra and Ragi	39
iv. Cane Jaggery (1st sort)	39
v. Groundnut and Castor Seed	39
vi. Coconuts	39
25. Index Numbers of :-	
i. Daily Field Labour Wages	39
ii. Daily Wages of Herdsmen	39
iii. Other Agricultural Labour Wages	39
iv. Daily Skilled Labour Wages	39

## SEASON AND CROP CONDITIONS DURING 1985-86

### 1.0 Seasonal Conditions:

The Seasonal conditions during 1985-86 were not satisfactory in the State on account of failure of South-West monsoon, especially in the crucial months of August - September, 1985. The long dry spells which prevailed in the months of July, August and September, 1985 coupled with unusual heavy rains in January and February, 1986 have resulted in considerable fall in foodgrains production. Even the irrigated area under canals declined due to insufficient water levels in major projects.

The average annual rainfall received during 1985-86 was 865 m.m., as against the normal rainfall of 896 m.m., the deficit being 3 percent. Region-wise, while Coastal Andhra recorded excess rainfall of 4 percent over the normal rainfall, Rayalaseema and Telangana regions received deficit rainfall of 7 percent and 9 percent over their respective normals, in that order.

### 1.1 South-West Monsoon Period (June 1985 to September, 1985):

South-West monsoon has set in the State as usual in the second week of June, 1985 but subsequently it became weak after only two or three days. The average rainfall received during the month of June, 1985 was deficient in Nellore and Mahabubnagar districts and was excess in Srikakulam, Guntur, Prakasam, Ranga Reddy, Nizamabad, Nalgonda and Adilabad districts while in the remaining districts the rainfall was almost normal. The State as a whole received an average rainfall of 129 m.m., during June, 1985 as against the normal rainfall of 107 m.m., recording an excess rainfall of 21 percent. Region-wise Coastal Andhra and Telangana regions recorded excess rainfall of 9 percent and 33 percent in that order while the rainfall was deficient by 2 percent in Rayalaseema region over the normal.

Although in the month of July, 1985 the average rainfall received in the State was normal, it was not evenly distributed. While the rainfall was deficient in Karimnagar district excess rainfall was recorded in Vizianagaram, Prakasam, Nellore, Kumool, Cuddapah, Chittoor, Anantapur, Ranga Reddy and Nalgonda districts. The State as a whole received rainfall of 182 m.m., in July, 1985 which is 7 percent more than the normal rainfall of 170 m.m., while the rainfall was excess of normal by 9 percent in Coastal Andhra region and 72 percent in Rayalaseema region, it was deficit by 4 percent in Telangana region.

In the month of August, 1985 the monsoon failed completely and as a result Visakhapatnam, Prakasam, Nellore, Kumool, Anantapur, Cuddapah, Ranga Reddy, Hyderabad, Nizamabad, Medak, Mahabubnagar and Karimnagar districts received deficit and scanty rainfall. The State as a whole received an average rainfall of 128 m.m., as against the normal of 157 m.m., the deficit being 18 percent. Region-wise, the deficit was 39 percent in Rayalaseema and 28 percent in Telangana. However normal rainfall was recorded by Coastal Andhra region as a whole.

The South-West monsoon continued to be weak during the month of September, 1985, resulting in deficit rainfall throughout the State excepting Srikakulam district. The State as a whole received an average rainfall of 78 m.m., as against the normal rainfall of 168 m.m., the deficit being 54 percent. Region-wise the deficit was 38, 52 and 67 percent in Coastal Andhra, Rayalaseema and Telangana respectively.

The Total rainfall received in the entire South-West monsoon period (i.e. June to September, 1985) was 517 m.m., as against the normal rainfall of 602 m.m., showing a deficit of 14 percent. All the three regions viz., Coastal Andhra, Rayalaseema and Telangana received deficit rainfall, the deficit being 7, 14 and 19 percent in that order. Nellore, Anantapur, Cuddapah, Hyderabad, Medak, Mahabubnagar and Karimnagar districts recorded deficient

rainfall during the period. Due to the failure of monsoon in August, 1985 and September, 1985 normal areas could not be sown with Kharif crops and even the crops sown withered away on account of long dry spells prevailed, affecting adversely the crop yields during 1985-86.

## **1.2 North-East Monsoon Period (October, '85 to December, '85):**

The monsoon became active over the State during the month of October, 1985. All the districts in the State received excess rainfall over the normal being Nellore, Chittoor and Nalgonda districts, the deficit in these districts being 63, 28 and 13 percent respectively. The State as a whole received an average rainfall of 152 m.m., as against the normal rainfall of 122 m.m., or an excess of 25 percent. The rainfall received was more than the normal in all the three regions viz., Coastal Andhra 16 percent, Rayalaseema 3 percent and Telangana 61 percent.

During the month of November, 1985 only Nellore and Chittoor districts recorded excess rainfall. While there was no rainfall in Rangareddy, Hyderabad, Nizamabad, Medak, Mahabubnagar, Warangal, Karimnagar and Adilabad districts, it was deficient in Visakhapatnam, Prakasam, Kumool and Anantapur districts. The rainfall was scanty in Srikakulam, Vizianagaram, East Godavari, West Godavari, Krishna, Guntur, Nalgonda and Khammam districts during the month of November, 1985. The State as a whole received an average rainfall of 42 m.m., which was deficit by 37 percent over the normal rainfall of 67 m.m.

In the month of December, 1985 Srikakulam and Vizianagaram districts did not receive rainfall while Kumool and Adilabad districts received deficient rainfall. The rainfall was scanty in Visakhapatnam, Anantapur and Warangal districts. Normal or excess rainfall was received by all the remaining districts. The State as a whole received an average rainfall of 27 m.m., which is 93 percent less than the normal rainfall of 14 m.m.

The total rainfall received by the State during the North-East monsoon period was 221 m.m., i.e. 9 percent more than the normal rainfall of 203 m.m. In the three regions viz., Coastal Andhra, Rayalaseema and Telangana the rainfall received during this season was more than normal by 6, 2 and 9 percent respectively.

## **1.3 Winter Period (January, 1986 to February, 1986):**

During the winter period the State as a whole received an average rainfall of 74 m.m., as against the normal rainfall of 18 m.m. The rainfall was excess in all the three regions and these untimely heavy rains caused damage to the harvested Paddy, Cotton, Pulses and Tender Groundnut crops in several districts. Further due to hail-storm from 9th to 15th February, 1986 in Nizamabad and Adilabad districts Rabi Jowar crop ready for harvest, was adversely affected besides a few heads of Cattle and Goats also perished.

## **1.4 Hot Weather period (March, 1986 - May, 1986):**

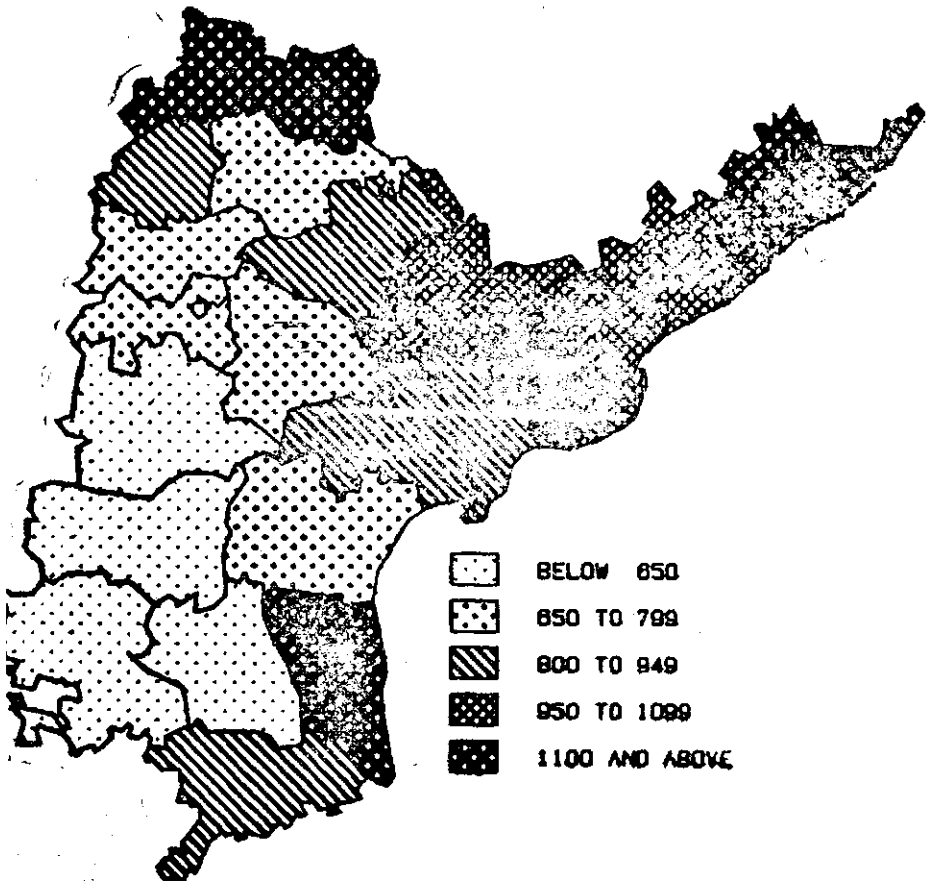

During the hot weather period the State as a whole received an average rainfall of 53 m.m., recording a deficit of 27 percent over the normal rainfall of 73 m.m.

1.5 Maps showing the actual rainfall, the percentage deviation of annual rainfall during 1985-86 and the actual rainfall during the South-West Monsoon period and the percentage deviation of South-West monsoon rainfall from normal, district-wise are given in the pages following:

## **2.0 Classification of Area and Utilisation:**

2.1 The geographical area of the State which is 274.40 lakh hectares, classified according to different type

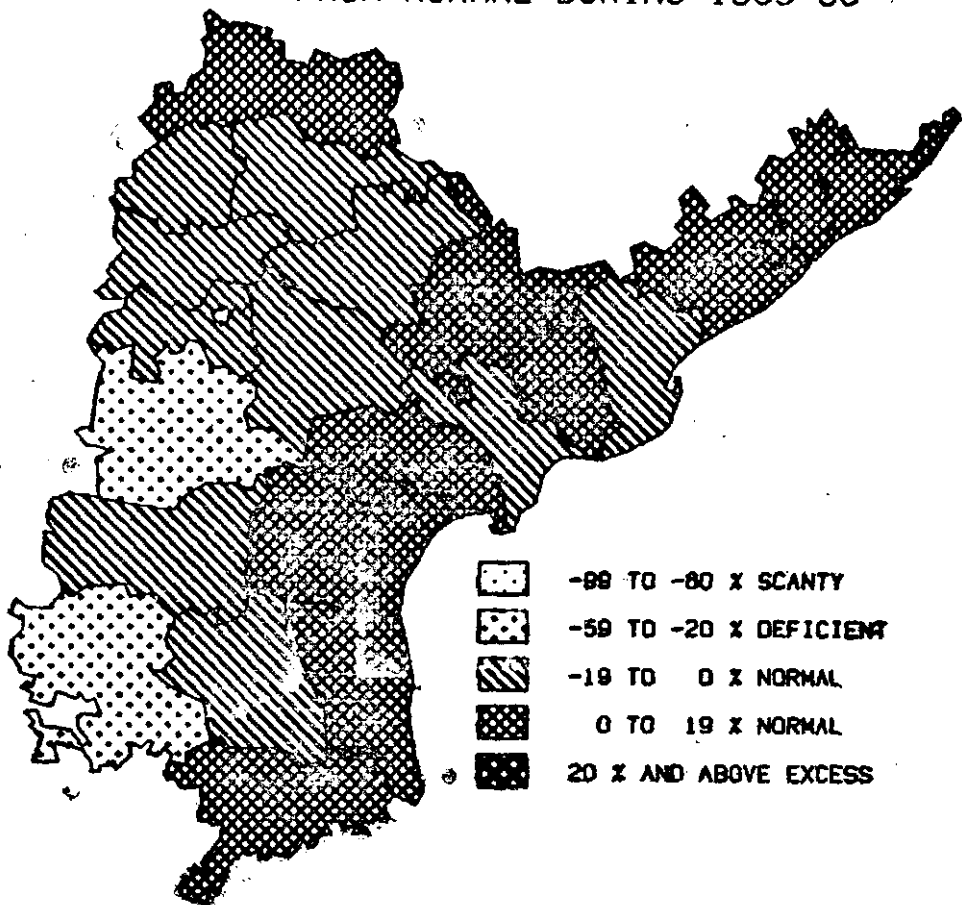

# RAINFALL DURING THE YEAR 1985-86 (In MM)

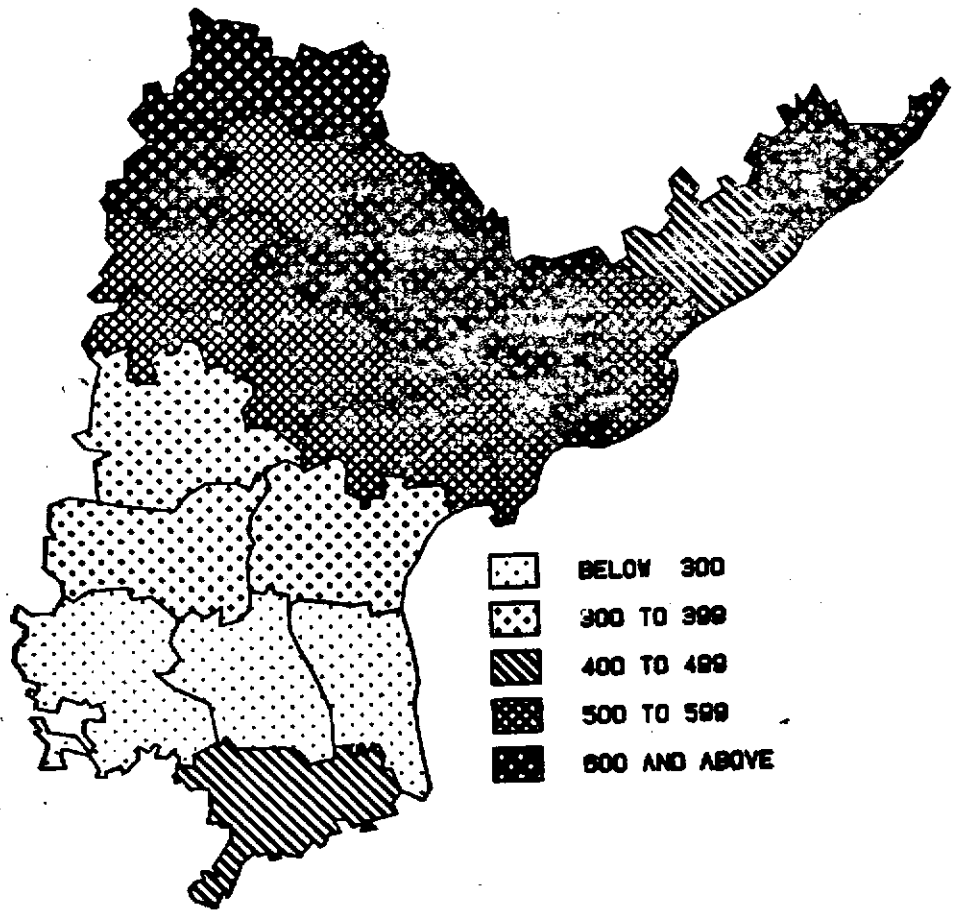

-  BELOW 850
-  850 TO 799
-  800 TO 949
-  950 TO 1099
-  1100 AND ABOVE

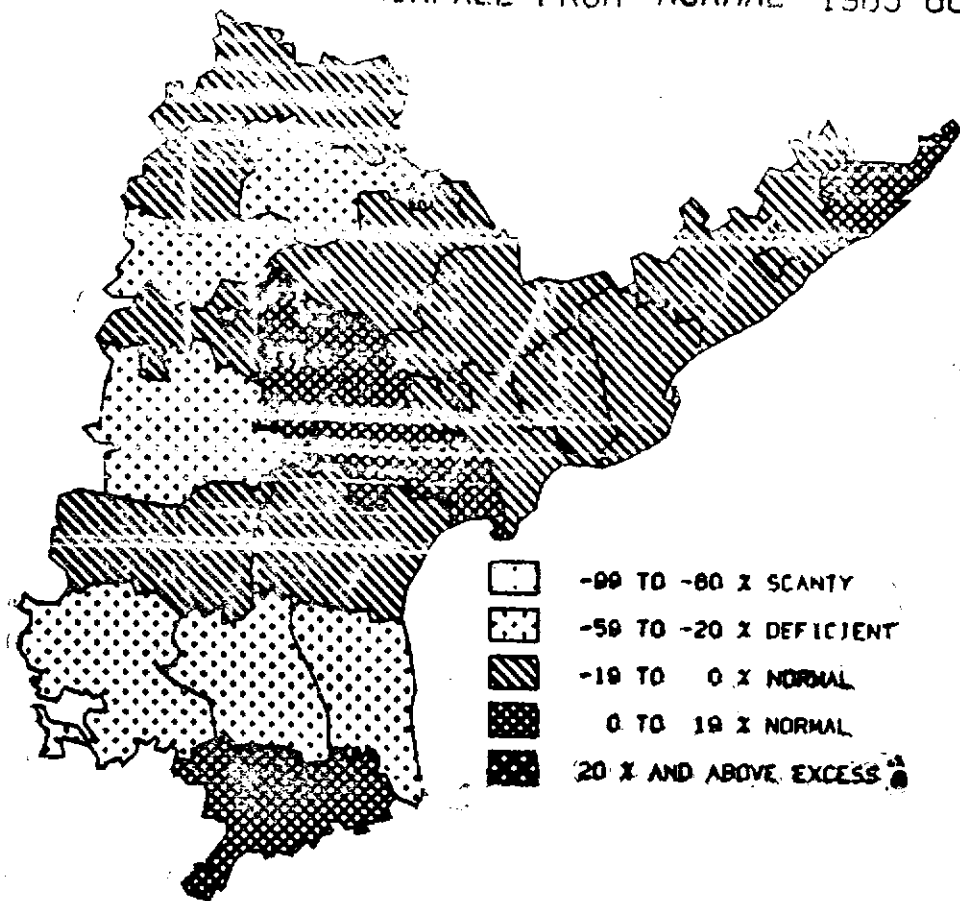

PERCENTAGE DEVIATION OF ANNUAL RAINFALL  
FROM NORMAL DURING 1985-86

RAINFALL IN SOUTH-WEST MONSOON  
DURING 1985-86 (IN MM)

# PERCENTAGE DEVIATION OF SOUTH-WEST MONSOON RAINFALL FROM NORMAL 1985-86

of land use during 1985-86 is presented in the following table.

**TABLE 2.1**  
**Classification of Geographical Area 1985-86**

Sl. No.	Category	1985-86		1984-85	
		Area in lakh Hectares	Percentage to the total Geographical area	Area in lakh hectares	Percentage to the total geographical area
1	2	3	4	5	6
1.	Forests	58.35	21.3	58.35	21.3
2.	Barren and unculturable land	22.69	8.3	22.97	8.4
3.	Land put to Non-Agri. uses.	22.48	8.2	22.36	8.1
4.	Culturable Waste	8.65	3.1	8.70	3.2
5.	Permanent pastures & other grazing lands	8.81	3.2	8.95	3.3
6.	Land under Misc. tree crops and groves not included in net area sown	2.64	1.0	2.71	1.0
7.	Current fallows	31.59	11.5	31.65	11.5
8.	Other fallow lands	14.92	5.4	13.85	5.0
9.	Net Area sown	104.27	38.0	104.86	38.2
10.	Total Geographical area	274.40	100.0	274.40	100.0
11.	Gross Area sown	121.01	44.1	122.12	44.5
12.	Area swon more than once	16.74	6.1	17.26	6.3

2.2 The appended diagram shows the area under different categories of Land use during 1985-86.

2.3 While cultivated land, consisting of net area sown, current fallows and other fallow lands was 150.78 lakh hectares, land not cultivated but available for cultivation (Culturable Waste, permanent pastures and other grazing lands and land under Miscellaneous trees) accounted for 20.10 lakh hectares during 1985-86. Cultivable land, land available for cultivation and land not available for cultivation formed 54.9 percent, 7.3 percent and 37.8 percent of the geographical area in that order during 1985-86. Among the regions, cultivated land formed 53.4 percent in Coastal Andhra, 52.8 percent in Rayalaseema and 57.8 percent in Telangana Region. Land available for cultivation to geographical area was accounted for 8.8 percent, 6.7 percent and 6.5 percent in Coastal Andhra Region, Rayalaseema and Telangana regions respectively. Of the total geographical area, land not available for cultivation was of the order of 37.8 percent, 40.5 percent and 35.7 percent in coastal Andhra, Rayalaseema and Telangana regions respectively.

2.4 Forests with 58.35 lakh hectares accounted for 21.3 percent of the total geographical area in the State. Visakhapatnam, East Godavari, Kurnool, Cuddapah, Chittoor, Mahabubnagar, Warangal, Khammam and Adilabad districts accounted for about 72.0 percent of the total area under forests in 1985-86. The percentage area under

of land use during 1985-86 is presented in the following table.

**TABLE 2.1**  
**Classification of Geographical Area 1985-86**

Sl. No.	Category	1985-86		1984-85	
		Area in lakh Hectares	Percentage to the total Geographical area	Area in lakh hectares	Percentage to the total geographical area
1	2	3	4	5	6
1.	Forests	58.35	21.3	58.35	21.3
2.	Barren and unculturable land	22.69	8.3	22.97	8.4
3.	Land put to Non-Agri. uses.	22.48	8.2	22.36	8.1
4.	Culturable Waste	8.65	3.1	8.70	3.2
5.	Permanent pastures & other grazing lands	8.81	3.2	8.95	3.3
6.	Land under Misc. tree crops and groves not included in net area sown	2.64	1.0	2.71	1.0
7.	Current fallows	31.59	11.5	31.65	11.5
8.	Other fallow lands	14.92	5.4	13.85	5.0
9.	Net Area sown	104.27	38.0	104.86	38.2
10.	Total Geographical area	274.40	100.0	274.40	100.0
11.	Gross Area sown	121.01	44.1	122.12	44.5
12.	Area swon more than once	16.74	6.1	17.26	6.3

2.2 The appended diagram shows the area under different categories of Land use during 1985-86.

2.3 While cultivated land, consisting of net area sown, current fallows and other fallow lands was 150.78 lakh hectares, land not cultivated but available for cultivation (Culturable Waste, permanent pastures and other grazing lands and land under Miscellaneous trees) accounted for 20.10 lakh hectares during 1985-86. Cultivable land, land available for cultivation and land not available for cultivation formed 54.9 percent, 7.3 percent and 37.8 percent of the geographical area in that order during 1985-86. Among the regions, cultivated land formed 53.4 percent in Coastal Andhra, 52.8 percent in Rayalaseema and 57.8 percent in Telangana Region. Land available for cultivation to geographical area was accounted for 8.8 percent, 6.7 percent and 6.5 percent in Coastal Andhra Region, Rayalaseema and Telangana regions respectively. Of the total geographical area, land not available for cultivation was of the order of 37.8 percent, 40.5 percent and 35.7 percent in coastal Andhra, Rayalaseema and Telangana regions respectively.

2.4 Forests with 58.35 lakh hectares accounted for 21.3 percent of the total geographical area in the State. Visakhapatnam, East Godavari, Kurnool, Cuddapah, Chittoor, Mahabubnagar, Warangal, Khammam and Adilabad districts accounted for about 72.0 percent of the total area under forests in 1985-86. The percentage area under

forests to the total geographical area by districts during 1985-86 is indicated in the appended map.

2.5 Of the 274.40 lakh hectares of geographical area, 104.27 lakh hectares of land or about 38.0 percent was the net sown area with various crops during 1985-86. While 39.7 percent of the total geographical area was sown with different crops in Coastal Andhra, about 37.5 percent 36.9 percent of the total area was the net area sown with crops in Rayalaseema and Telangana regions respectively. Due to continuance of adverse seasonal conditions, the net area sown during 1985-86 has further declined to 104.27 lakh hectares from 104.86 lakh hectares in 1984-85, and 114.35 lakh hectares in 1983-84. The net area sown remained constant in Coastal Andhra region compared to 1984-85, the decline in Telangana was marginal i.e. 2 percent, whereas Rayalaseema region showed an increase of about 1.0 percent over 1984-85. The appended map shows the percentage net area sown to total geographical area by districts during 1985-86.

2.6 The intensity of cropping (ratio of gross area sown to net sown area) was 1.16 in 1985-86. This ratio was of the order of 1.30, 1.06 and 1.10 in Coastal Andhra, Rayalaseema and Telangana regions respectively. This ratio was significantly high in East Godavari, West Godavari, Krishna and Guntur districts of Coastal Andhra region, Chittoor of Rayalaseema region and Khammam and Warangal districts of Telangana region.

2.7 Gross area sown during 1985-86 was 121.01 lakh hectares compared to 122.12 lakh hectares in 1984-85 recording a marginal decline of 1.0 percent. While there was decline in gross area sown by 3.4 percent in Telangana region the gross area sown in Coastal Andhra and Rayalaseema regions remained almost constant in 1985-86 compared to 1984-85.

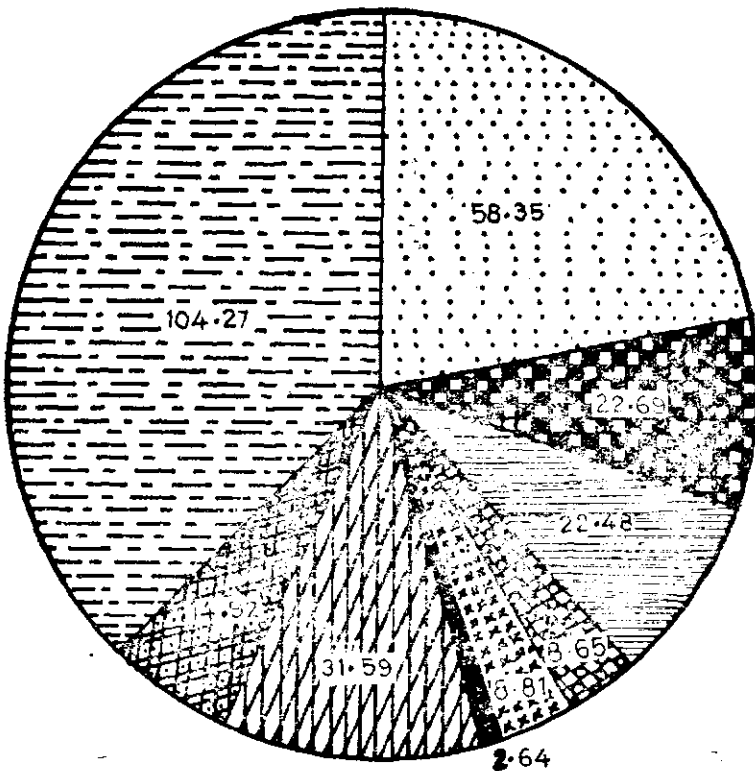

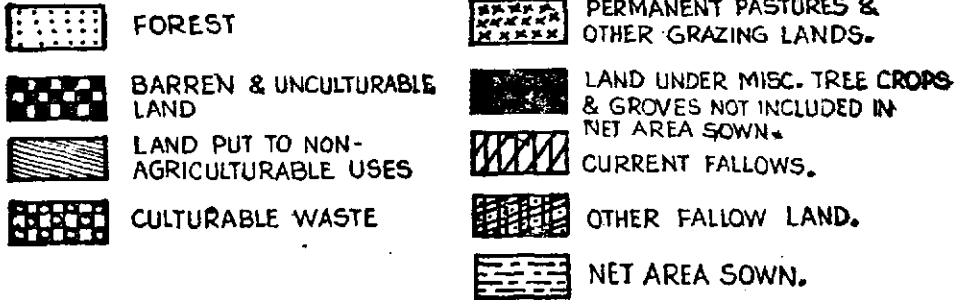

2.8 Of the 16.74 lakh hectares of area sown more than once, 10.98 lakh hectares or 65.7 percent was accounted for by Coastal Andhra Region and 4.35 lakh hectares or 26.0 percent was accounted for by Telangana region, while Rayalaseema region accounted for 1.41 lakh hectares or 8.3 percent only. 1985-86 being second continuous drought year and due to non-availability of sufficient water in irrigation sources the area sown more than once declined by 3.2 percent over 1984-85. The decline was considerable with 16.0 percent in Telangana and 10.2 percent in Rayalaseema regions which are mostly dependent on minor irrigation sources. In Coastal Andhra Region area sown more than once showed an increase of 4.3 percent. The area sown more than once was 16.0 percent of the net area sown in the State during 1985-86. The appended map shows the percentage of area sown more than once to net area sown by districts during 1985-86.

### **3.0 Area Irrigated by different sources.**

3.1 Net Area irrigated by all sources during 1985-86 was 35.38 lakh hectares compared to 35.21 lakh hectares in 1984-85 showing marginal increase of 0.5 percent. The net area irrigated in the State during 1985-86 was 34.0 percent of the net area sown. The following table shows the net irrigated area by different sources and its percentage to total irrigated area during the last two years.

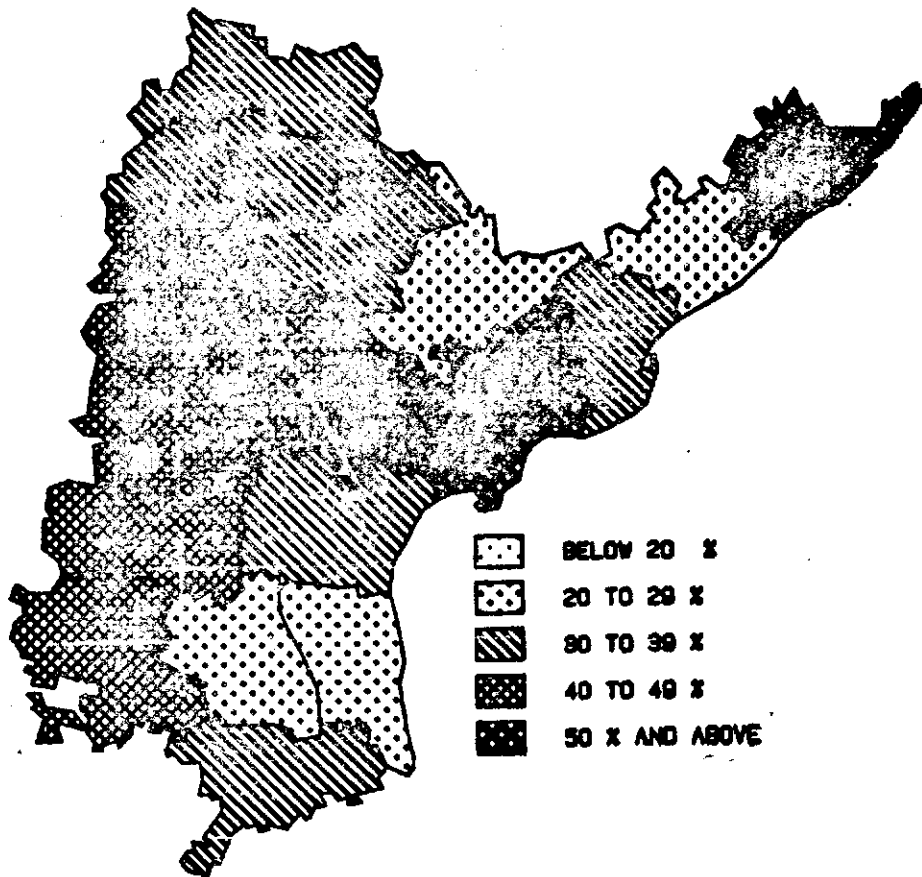

# LAND UTILISATION IN ANDHRA PRADESH 1985-86.

(AREA IN LAKH HECTARES)

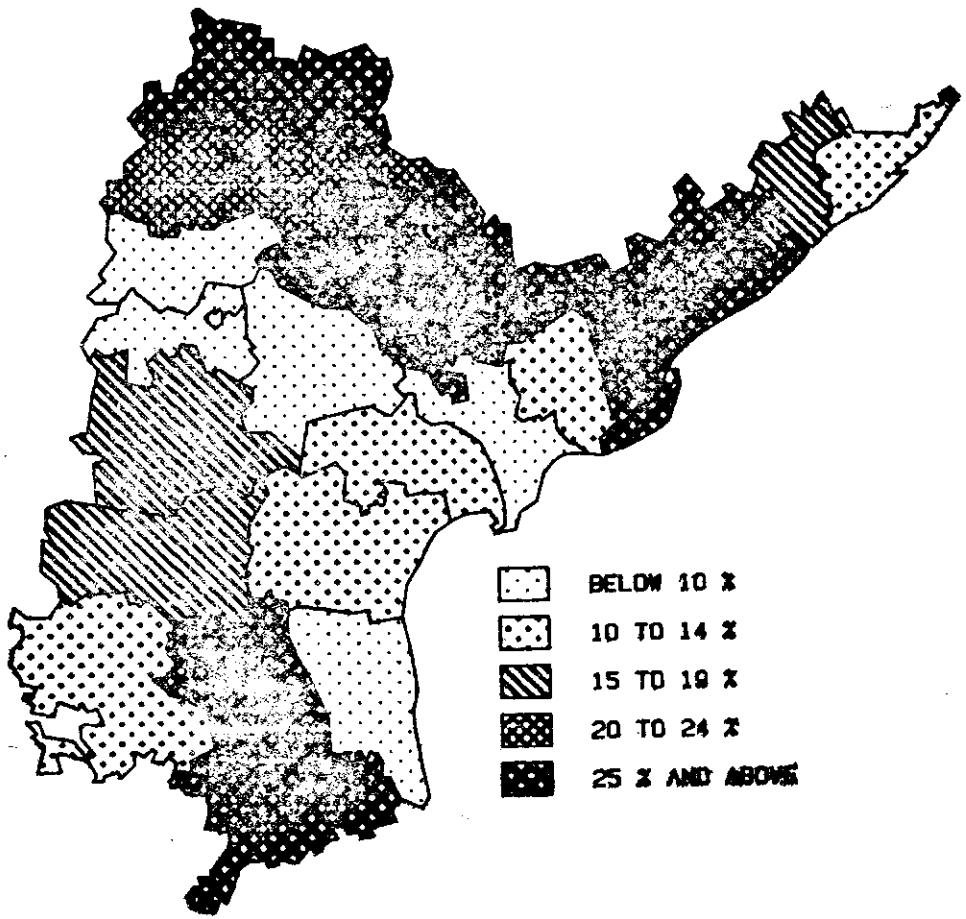

TOTAL GEOGRAPHICAL AREA : 274.40

# PERCENTAGE OF NET AREA SOWN TO GEOGRAPHICAL AREA DURING 1985-86

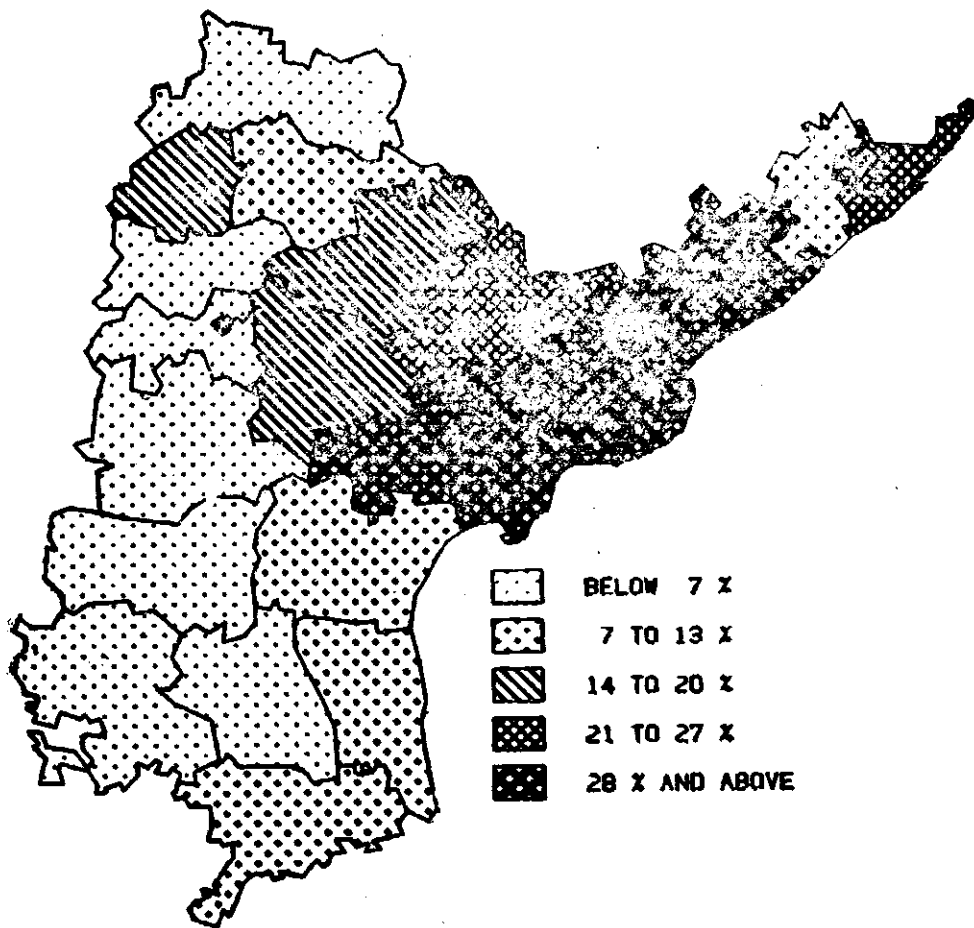

# PERCENTAGE OF FOREST AREA TO GEOGRAPHICAL AREA DURING 1985-86

6.	Area irrigated more than once	7.99	9.46	22.6	26.9
7.	Gross area irrigated	43.37	44.67	-	-

3.2 The appended diagram shows the net area irrigated by sources in the State during 1985-86.

3.3 Area irrigated by Canals declined marginally by about 1.0 percent from 17.94 lakh hectares in 1984-85 to 17.83 lakh hectares in 1985-86, while the decline in respect of other sources was about 3.0 percent in 1985-86 over 1984-85.

3.4 There was however an increase of 1.6 percent and 3.4 percent in the net area irrigated by tanks and other wells respectively in 1985-86 compared to 1984-85.

3.5 Gross Area Irrigated:- Gross Area irrigated by all sources during 1985-86 was 43.37 lakh hectares compared to 44.67 lakh hectares during 1984-85 showing a decline of 3.0 percent. The decline in gross area irrigated in Coastal Andhra Region was marginal being 1.1 percent while it was considerable with 5.8 percent and 5.3 percent in Rayalaseema and Telangana Regions respectively. While the gross area irrigated by canals tanks and other sources declined by 5.4 percent, 1.2 percent and 7.2 percent respectively over 1984-85, gross area irrigated by Tube wells and other wells increased by 5.0 percent and 1.4 percent. The gross area irrigated by tanks declined by 7.0 percent in Telangana while there was marginal increase in Coastal Andhra and Rayalaseema regions. The percentage of gross irrigated area to total cropped area by districts during 1985-86 is shown in the appended map.

3.6 The intensity of irrigation (ratio of gross area irrigated to net area irrigated) was 1.23 for the state during 1985-86. This ratio was of the order of 1.23, 1.20 and 1.21 in Coastal Andhra Rayalaseema and Telangana regions respectively. This ratio was significantly high in East Godavari of Coastal Andhra Region, Chittoor in Rayalaseema Region and Rangareddy and Mahabubnagar districts of Telangana region during 1985-86.

3.7 Area of crops irrigated: The area of crops irrigated in the State during 1985-86 was 43.37 lakh hectares which constituted about 36.0 percent of the total cropped area.

3.8 The following statement shows the percentage of area irrigated under crops to the total irrigated area in the State and the percentage of area irrigated to total area under the crops.

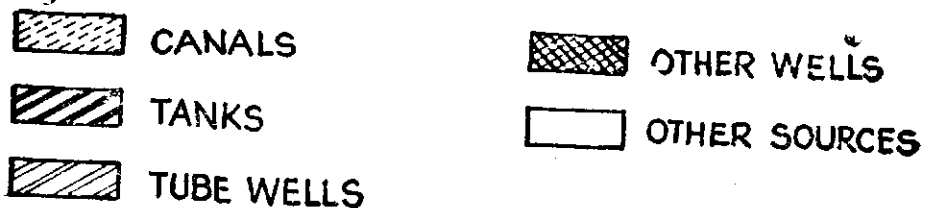

**TABLE - 3.2**

Percentage of Area Irrigated under crops to Total Area irrigated in the State and percentage of Area irrigated to total Area under the crops.

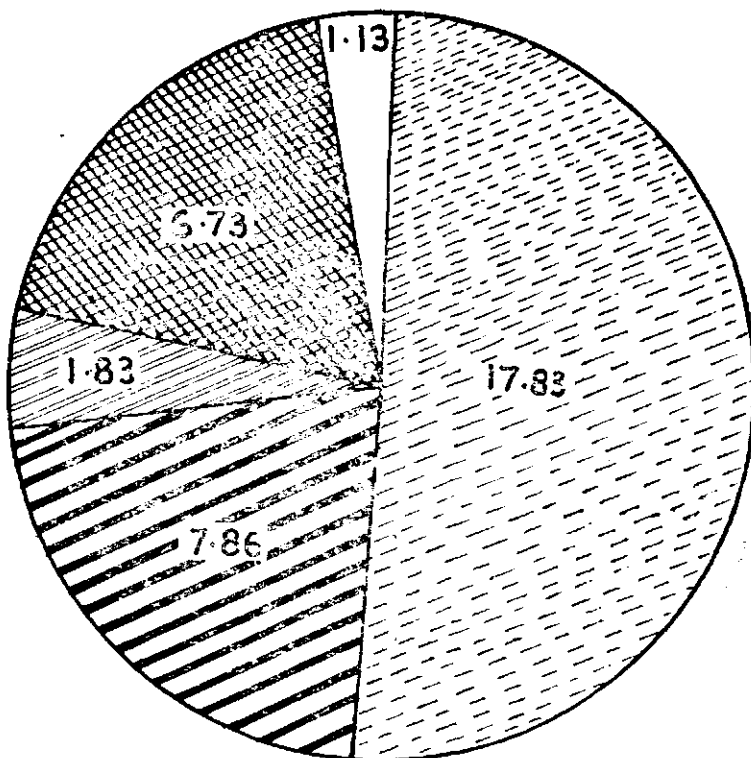

Sl. No.	Crop	Area irrigated lakh hectares	Percentage of the area irrigated to total irrigated area in the State	Percentage of area irrigated to the total area under the crop
1	2	3	4	5
1.	Rice	32.49	74.9	94.1
2.	Ragi	0.66	1.5	31.0
3.	Maize	0.50	1.2	17.4
4.	Other Foodgrain crops	0.69	1.6	1.8
	<b>Total Foodgrains</b>	<b>34.34</b>	<b>79.2</b>	<b>43.9</b>
5.	Chillies	1.22	2.8	60.4
6.	Sugarcane	1.63	3.8	98.8
7.	Turmeric	0.28	0.6	97.0
8.	Other food crops	1.28	2.9	25.3
	<b>Total Food Crops</b>	<b>38.75</b>	<b>89.3</b>	<b>44.4</b>
9.	Cotton	0.85	2.0	13.7
10.	Groundnut	2.83	6.5	17.0
11.	Seasamum	0.22	0.5	14.5
12.	Other non-food crops	0.72	1.7	8.0
	<b>Total non-food crops</b>	<b>4.62</b>	<b>10.7</b>	<b>13.7</b>
	<b>Total food and Non-food crops</b>	<b>43.37</b>	<b>100.0</b>	<b>35.8</b>

3.9 Out of 43.37 lakh hectares of irrigated area about 75.0 percent of the area was accounted for by Rice, Groundnut and Sugarcane accounted for 6.5 and 3.8 percent of the total irrigated area during 1985-86. In the State, 99.0 percent of Sugarcane, 94 percent of Rice and 69 percent of Chillies were under irrigated conditions.

1985-86

( IN LAKH HECTARES )

TOTAL AREA IRRIGATED : 35.38

#### 4.0 Cropping Pattern

4.1 The gross cropped area declined to 121.01 lakh hectares during 1985-86 from 122.12 lakh hectares in 1984-85 showing a marginal decline of 1.0 percent. While the gross cropped area in Telangana Region declined by 3.4 percent in 1985-86 over 1984-85, Coastal Andhra and Rayalaseema regions recorded marginal increase of 1.0 percent and 0.2 percent respectively. The decline in gross cropped area was significant in Rangareddy district i.e., 10.4 percent.

4.2 The following table shows the area under different crops and its percentage to the total cropped area.

TABLE - 4.1

Area under crops and its percentage to total cropped area 1985-86 and 1984-85.

Sl. No.	Crop	1985-86		1984-85

	Total Non-food crops'	33.72	27.9	32.84	26.9
	Total cropped area	121.01	100.0	122.12	100.0

4.3 Of the 121.01 lakh hectares of gross cropped area, 78.27 lakh hectares or 64.7 percent of the area was accounted for by the Foodgrain crops during 1985-86. Rice, Wheat, Jowar, Bajra, Maize, Ragi, Small millets and pulses crops comprise foodgrain crops. Rice and Jowar together accounted for 43.3 percent of the total cropped area in the state during 1985-86.

4.4 The area under total food-grain crops during 1985-86 was 78.27 lakh hectares as against 80.54, lakh hectares recording a decline of 2.9 percent. The total area under foodgrains in 1985-86 was the lowest during the last 5 years. The decline was due to the failure of monsoon during the sowing period. All the three regions in the state recorded decline in area under foodgrain crops in 1985-86 compared to the area under foodgrains in 1984-85, the decline being marginal 0.1 percent in the case of Coastal Andhra Region, While Rayalaseema and Telangana regions recorded a decline of 4.5 percent and 4.8 percent respectively over 1984-85. The area under foodgrains increased in 9 districts during 1985-86 and the increase ranged from 0.1 percent in Krishna district to 10.1 percent in Khammam district. The decline in area under foodgrains was recorded in 14 districts and the decline ranged from 1.1 percent in Vizianagaram district to 17.1 percent in Anantapur district. All foodgrain crops except Redgram, Blackgram and other pulses recorded decline in area in 1985-86 compared to 1984-85.

4.5 The area under foodgrains during Kharif 1985-86 was 54.40 lakhs hectares compared to 54.80 lks in 1984-85 showing a marginal decline of 0.8 percent. This was the least during the last 5 years. Normal areas under dry crops could not be sown due to failure of monsoon and even the area under wet crops including Rice was not covered due to insufficient water in minor irrigation sources and inadequate flow of water in canals. All foodgrain crops except rice, jowar and redgram recorded decline in area during Kharif 1985-86 compared to kharif 1984-85. 13 districts recorded decline in area under kharif foodgrains during 1985-86 over 1984-85 and the decline ranged

from 0.7 percent in Guntur district to 13.2 percent in Anantapur district. In the remaining 9 districts (Hyderabad excluding) there was increase in area under foodgrains in kharif 1985-86, and the increase was maximum in Khammam district i.e. 39.2 percent.

4.6 Area under foodgrain crops during Rabi 1985-86 was 23.87 lakh hectares when compared to 25.74 lakh hectares in 1984-85 showing a decrease of 7.3 percent. While the area under foodgrains during Rabi 1985-86 recorded a decline of 10.4 percent and 14.6 percent respectively in Rayalaseema and Telangana Regions there was a marginal increase of 0.8 percent in Coastal Andhra Region over 1984-85. There was decline in area in 13 districts and it varied from 1.0 percent in Nellore district to 43.0 percent in Cuddapah district. However increase in area was recorded in 9 districts (Hyderabad excluding) and the variation ranged from 0.6 percent in East Godavari to 40.0 percent in Visakhapatnam district. The area under all the foodgrain crops declined except Blackgram and other pulses while there was no change in area under Bajra and other small millets.

4.7 Of the total cropped area of 121.01 lakh hectares, 87.29 lakh hectares or 72.1 percent was under food crops. Besides foodgrain crops, Chillies, Sugarcane, Onions, Vegetables and fruits also constitute foodcrops.

4.8 Fibres, Oilseeds, Tobacco, Dyes, Fodder and Greenmanure crops constitute non-food crops. The area under non-food crops was 33.72 lakh hectares during 1985-86 compared to 32.84 lakh hectares in 1984-85 recording an increase of 27 percent.

**TABLE - 4.2**

**Area and Production under Foodgrains in Andhra Pradesh for the period from 1981-82 to 1985-86**

Sl. No.	Year	Area in lakh Hectares			Production in lakh tonnes		
		Kharif	Rabi	Total	Kharif	Rabi	Total
1	2	3	4	5	6	7	8
1.	1981-82	64.90	27.33	92.23	81.31	32.86	114.17
2.	1982-83	59.72	28.00	87.72	76.08	35.69	111.77
3.	1983-84	63.88	23.33	92.21	81.34	37.48	118.82
4.	1984-85	54.80	25.74	80.54	62.69	33.46	96.15
5.	1985-86	54.40	23.87	78.27	73.63	30.10	103.73

**5.0 Foodgrains Production:**

5.1 The production of foodgrains during 1985-86 was 103.73 lakh tonnes compared to 96.15 lakh tonnes in 1984-85 recording an increase of 7.9 percent. All the three regions viz., Coastal Andhra, Rayalaseema and Telanga recorded increase in production of foodgrains by 14.3 percent, 1.4 percent and 0.5 percent respectively. The production of foodgrains increased in 14 districts ranging from 1.0 percent in Medak district to 60.8 percent in Srikakulam district while the production decreased in 8 districts and the decline ranged from 1.3 percent in Nalgonda

district to 16.7 percent in Rangareddy district. All the foodgrain crops except Wheat, Jowar, Ragi, Maize, Varagu, other small millets and Redgram recorded increase in production during 1985-86. Production of foodgrains crop-wise during 1985-86 and 1984-85 is given in the following Table 5.1.

TABLE - 5.1

Production of foodgrains, crop-wise and its percentage to total foodgrains production during 1985-86 and 1984-85

Sl. Crop No.		1985-86		1984-85	
		Production in lakh tonnes	Percentage to the total foodgrains production	Production in lakh tonnes	Percentage to the total foodgrains production
1	2	3	4	5	6
1.	Rice	76.13	73.4	69.09	71.9
2.	Wheat	0.07	0.1	0.08	0.1
3.	Jowar	11.62	11.2	12.16	12.6
4.	Bajra	2.09	2.0	2.06	2.1
5.	Maize	4.14	4.0	4.33	4.5
6.	Ragi	2.06	2.0	2.16	2.2
7.	Korra	0.97	0.9	0.74	0.8
8.	Varagu	0.18	0.2	0.35	0.4
9.	Samai	0.13	0.1	0.10	0.1
10.	Other Small millets	0.04	--	0.05	0.1
11.	Redgram	0.17	0.2	0.18	0.2
12.	Bengalgram	0.85	0.8	0.56	0.6
13.	Greengram	2.42	2.3	1.73	1.8
14.	Blackgram	2.14	2.1	1.89	2.0
15.	Horsegram	0.64	0.6	0.62	0.6
16.	Cowgram	0.02	--	0.02	--
17.	Other Pulses	0.06	0.1	0.03	--
18.	Total Food grains	103.73	100.0	96.15	100.0

5.2 The production of foodgrain crops during Kharif 1985-86 was 73.63 lakh tonnes as against 62.69 lakh tonnes in 1984-85 showing an increase of 18.2 percent. All the three regions registered increase in foodgrains production by 19.9, 10.7 and 15.2 percent respectively over 1984-85. 17 districts have shown increase in production of foodgrains in 1985-86. The increase was the highest in Khammam district being 115.4 percent. All the foodgrain crops increased in production in 1985-86 except Ragi, Varagu and other small millets over 1984-85.

5.3 The production of foodgrains during Rabi 1985-86 was 30.10 lakh tonnes as against 33.46 lakh tonnes in Rabi 1984-85 showing a decline of about 10.0 percent. Rayalaseema and Telangana regions recorded a decline of 15.0 and 30.6 percent respectively while Coastal Andhra region registered an increase of 3.2 percent in Rabi foodgrains production in 1985-86 over 1984-85. While the increase in production was highest by 66.7 percent in Visakhapatnam district, the decline was highest by 45.2 percent in Nalgonda district. Almost all foodgrains crops except Blackgram and other pulses registered decline in production in Rabi 1985-86.

## 6.0 Brief Description of Area and Production of Important crops.

6.1 The trends in area, production and yield per hectare of principal crops are discussed briefly in the following paras.

### Rice:-

6.2 Rice is the principal foodcrop grown in all the districts of the State. It accounted for 28.5 percent of the total cropped area in the State during 1985-86.

6.3 The area, production and yield per hectare of rice, season-wise for the last 5 years are presented below:

TABLE - 6.1

Area, Production and yield per hectare of Rice 1981-82 to 1985-86.

Sl. No.	Year	Kharif			Rabi			Total		
		Area in lakh hecets.	Production in lakh tonnes	Yield in kgs per hectare	Area in lakh hecets.	Production in lakh tonnes	Yield in kgs per hect.	Area in lakh hecets.	Production in lakh tonnes	Yield in Kgs per hect.
1	2	3	4	5	6	7	8	9	10	11
1.	1985-86	26.60	57.04	2198	7.92	19.09	2483	34.52	76.13	2264
2.	1984-85	25.92	48.58	1916	9.05	20.51	2328	34.97	69.09	2021
3.	1983-84	30.48	62.10	2085	11.15	25.80	2370	41.63	87.90	2161
4.	1982-83	26.91	55.19	2095	9.47	21.53	2329	36.38	76.72	2156
5.	1981-82	28.94	57.48	2029	9.30	21.20	2338	38.24	78.68	2102

6.4 The area under Rice and Jowar from 1976-77 to 1985-86 are depicted in the appended graph

6.5 The area under Rice which was 34.52 lakh hectares during 1985-86 was the lowest in the last 5 years. Compared to 1984-85 the area under rice in 1985-86 declined by 1.3 percent. Coastal Andhra Region registered an increase of 0.7 percent while Rayalaseema and Telangana regions showed a decline of 5.0 and 4.6 percent in that

order. The area under rice declined in 13 districts of the State during 1985-86 compared to 1984-85. Owing to non availability of adequate water supplies in the minor irrigation sources and sub-normal water levels in major projects, area under irrigated rice also decreased.

6.6 The area under Rice during kharif 1985-86 was 26.60 lakh hectares as against 25.92 lakh hectares in 1984-85 indicating an increase of 2.6 percent. All the three regions of the State recorded increase in area during Kharif 1985-86 over 1984-85 the percentage increase being 1.3 percent in coastal Andhra, 1.2 percent in Rayalaseema and 5.6 percent in Telangana.

The area under Rabi Rice was 7.92 lakh hectares during 1985-86 as against 9.05 lakh hectares in Rabi 1984-85 recording a decline of 12.5 percent. All the three regions in the State i.e., Coastal Andhra, Rayalaseema and Telangana contributed to the decline in area the decline being 1.1 percent, 15.0 percent and 40.6 percent respectively. The districts of Visakhapatnam, East Godavari, West Godavari, Nellore, Chittoor, and Khammam have however registered an increase in Rabi Rice area during 1985-86 compared to 1984-85.

6.7 The production of Rice during 1985-86 was 76.13 lakh tonnes as against 69.09 lakh tonnes in 1984-85 showing an increase of 10.2 percent. Although there was a fall in area during the current year, due to increase in yield rate, the production of rice has increased compared to 1984-85. Coastal Andhra and Rayalaseema regions accounted for 25.4 percent and 2.8 percent increase in production whereas Telangana region registered a decline of 4.7 percent in production of rice during 1985-86. 8 districts showed decline in production while in the remaining districts there was increase in production of Rice. Andhra Pradesh ranked sixth in area sharing 8.4 percent of total rice area in India and third in production during 1985-86 as per the revised estimates released by the DESA, Government of India.

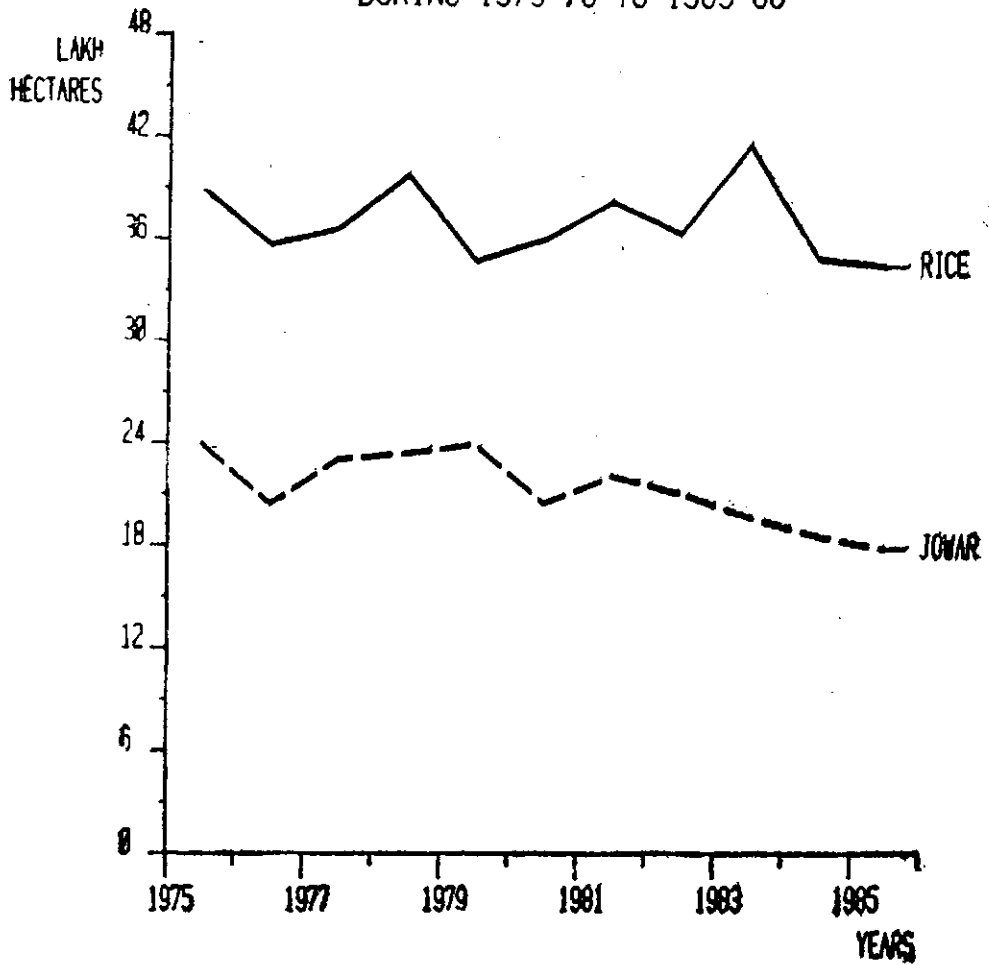

6.8 The production of Rice during Kharif 1985-86 was 57.04 lakh tonnes compared to 48.58 lakh tonnes during the corresponding season of 1984-85 accounting for an increase of 17.4 percent. All the three regions in the State viz, Coastal Andhra, Rayalaseema and Telangana have registered an increase of 21.5 percent, 12.2 percent and 9.0 percent in the production of rice over the previous year in that order. The increase in production was not only due to higher yield rate of rice per hectare during 1985-86 (K) compared to the yield in 1984-85 but also due to increase in area in kharif 1985-86. The production of kharif rice however declined during 1985-86 over 1984-85 in the districts of Visakhapatnam, East Godavari, Anantapur, Rangareddy, Nizamabad, Medak, Mahabubnagar and Karimnagar. In the remaining districts the production of rice showed increasing trend.

6.9 The production of Rice during Rabi 1985-86 declined to 19.09 lakh tonnes from 20.51 lakh tonnes during Rabi 1984-85 or a decline of 6.9 percent. The decline in production was mainly due to fall in area under Rabi rice during 1985-86 over the previous year, though there was increase in yield rate in 1985-86 (Rabi) over 1984-85. The decline in production of Rabi rice in Rayalaseema by 9.3 percent and 45.3 percent in Telangana region was responsible for overall decline of production in the State although Coastal Andhra Region has registered an increase of 6.4 percent. Among all the districts in the State, only East Godavari, West Godavari, Prakasam, Nellore and Chittoor districts have shown increase in rice production during Rabi 1985-86 over 1984-85. The production of Rice and Jowar from 1976-77 to 1985-86 are depict in the appended Graph.

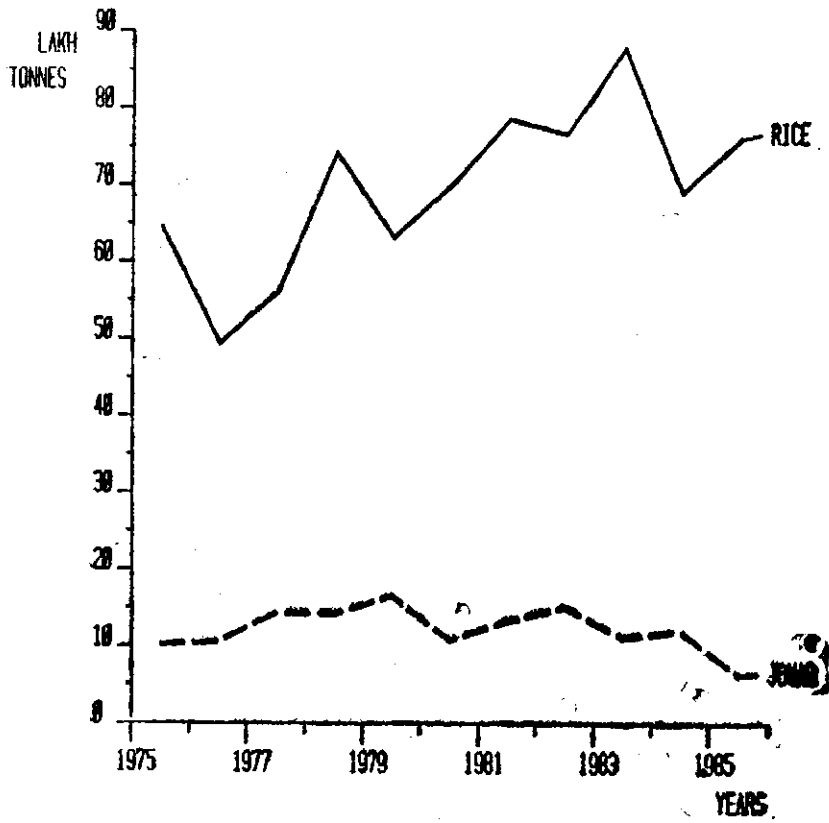

### **JOWAR:**

6.10 Next to rice. Jowar is the principal foodgrain crop in the State sown in both the seasons under rainfed conditions. Of the 17.88 lakh hectares, 12.45 lakh hectares or about 70 percent of the total area under the crop in

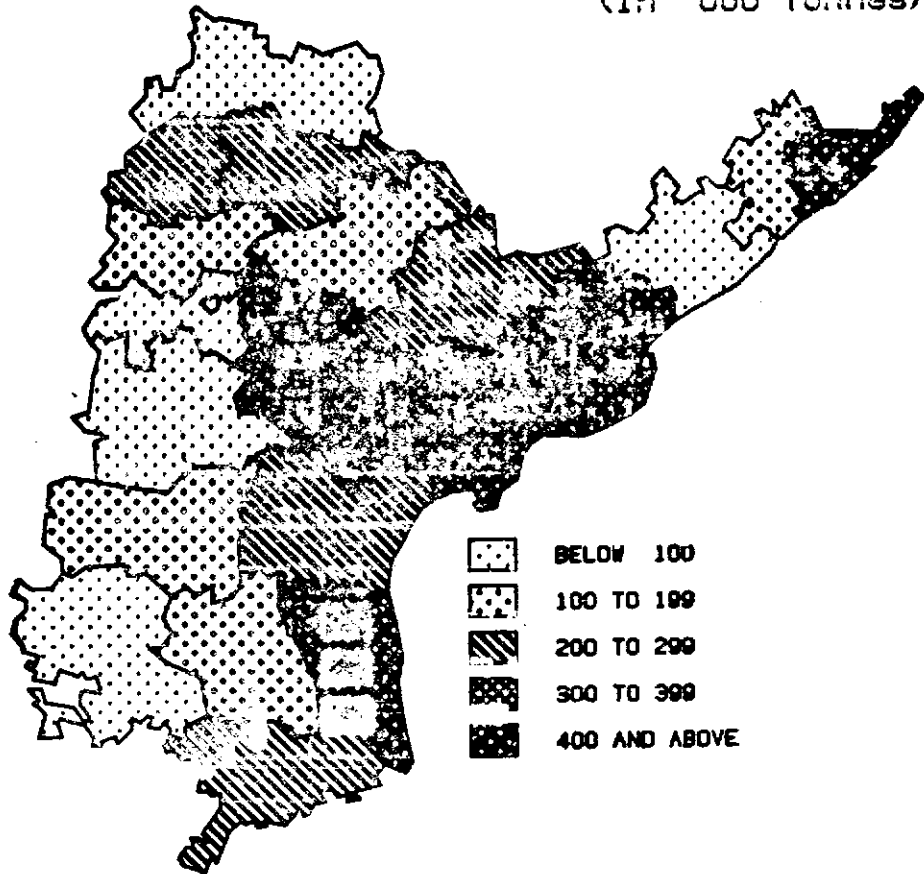

AREA UNDER RICE AND JOWAR IN ANDHRA PRADESH  
DURING 1975-76 TO 1985-86

PRODUCTION OF RICE AND JOWAR IN ANDHRA PRADESH  
DURING 1975-76 TO 1985-86

PRODUCTION OF RICE DURING 1985-86  
(In '000 Tonnes)

the State was accounted for by Telangana Region during 1985-86. Prakasam, Kumool, Rangareddy, Medak, Mahabubnagar, Nalgonda, Warangal, Khammam and Adilabad districts which are important for this crop accounted for more than 82.0 percent of the total area under the crop in the State during 1985-86. A.P. ranked fourth in area and production of Jowar among all the States in India.

6.11 The following table shows the area, production and yield per hectare of Jowar season-wise from 1981-82 to 1985-86.

TABLE - 6.2

## Area, Production and yield per hectare of Jowar, 1981-82 to 1985-86

Sl. No.	Year	Kharif			Rabi			Total		
		Area in lakh hecets.	Production in lakh tonnes	Yield kgs per hectare	Area in lakh hecets.	Production in lakh tonnes	Yield kgs per hect	Area in lakh hecets	production in lakh tonnes	Yield Kgs per hect
1	2	3	4	5	6	7	8	9	10	11
1.	1985-86	8.58	5.24	610	9.30	6.38	686	17.88	11.62	650
2.	1984-85	8.36	4.53	541	10.26	7.63	744	18.62	12.16	653
3.	1983-84	9.76	4.91	503	10.00	6.34	634	19.76	11.25	569
4.	1982-83	10.00	6.37	636	11.17	8.83	791	21.17	15.20	718
5.	1981-82	11.37	6.58	579	10.77	6.76	628	22.14	13.34	602

6.12 Area under Jowar declined to 17.88 lakh hectares during 1985-86 from 18.62 lakh hectares during 1984-85 accounting for about 4.0 percent. The area was the lowest during the last 5 years. All the three regions in the State have recorded decline in area, the decline being 13.1 percent in Coastal Andhra, 0.3 percent in Rayalaseema and 3.6 percent in Telangana regions.

6.13 The area under Kharif Jowar was 8.58 lakh hectares during 1985-86 compared to 8.36 lakh hectares during kharif 1984-85 showing an increase of 2.6 percent. All the three regions accounted for the increase in area. Of the 9 important districts for the crop, 4 districts viz. Prakasam, Medak, Nalgonda, and Khammam showed increase in area under Kharif Jowar while the remaining 5 districts have shown decline in area. The area in Srikakulam, West Godavari and Anantapur districts remained static in 1985-86.

6.14 The area under Rabi Jowar was 9.30 lakh hectares during 1985-86 compared to 10.26 lakh hectares during 1984-85 showing a decrease by 9.4 percent. Region-wise decrease in the area under Rabi jowar was 22.3 percent, 5.6 percent and 8.0 percent in Coastal, Andhra Rayalaseema and Telangana regions in that order. All the districts in the State except Visakhapatnam and Adilabad were responsible for the decline in area in 1985-86 over 1984-85.

6.15 The production of Jowar has declined to 11.62 lakh tonnes during 1985-86 from 12.16 lakh tonnes during 1984-85 showing a decline by 4.5 percent. The decline in area coupled with decline in yield has resulted in the overall decline of production of Jowar in 1985-86 over 1984-85. The production of Jowar during Kharif 1985-86 was 5.24 lakh tonnes compared to 4.53 lakh tonnes during kharif 1984-85 recording an increase of 15.7 percent. The increase in yield rate from 541 kgs per hectare to 610 Kgs/Hect. or by 12.8 percent has contributed to the total increase in Kharif/Jowar production in 1985-86 over 1984-85 though there was marginal increase in area (2.6%). All the three regions in the state have shown increase in production. The yield per hectare increased in Prakasam, Kumool, Rangareddy, Medak, Mahabubnagar, Nalgonda, Warangal, Khammam and Karimnagar districts which are important for the crop.

6.16 The production of jowar was 6.38 lakh tonnes during Rabi 1985-86 compared to 7.63 lakh tonnes during Rabi 1984-85 recording a decline of 16.4 percent. Due to decline in both area and yield during 1985-86 on account of drought, the production of Rabi jowar declined over 1984-85. All the three regions in the State viz., Coastal Andhra, Rayalaseema and Telangana accounted for 15.0 percent, 17.6 percent and 16.0 percent decline in production of Rabi Jowar during 1985-86 over 1984-85. The decline in production was observed in Prakasam, Kumool, Anantapur, Cuddapah, Chittoor, Rangareddy, Nalgonda, Warangal, Khammam and Karimnagar districts.

6.17 The following map shows the production of Jowar district-wise during 1985-86.

## **BAJRA**

6.18 Bajra crop is generally sown under rainfed conditions in the State mostly in Kharif season. The area under the crop during 1985-86 constituted 2.9 per cent of the total cropped area in the State. Visakhapatnam, Prakasam, Anantapur, Kumool, Mahabubnagar and Nalgonda districts which are important for Bajra, accounted for about 75 per cent of the total area under the crop during 1985-86. The area production, and yield are shown in the following table.

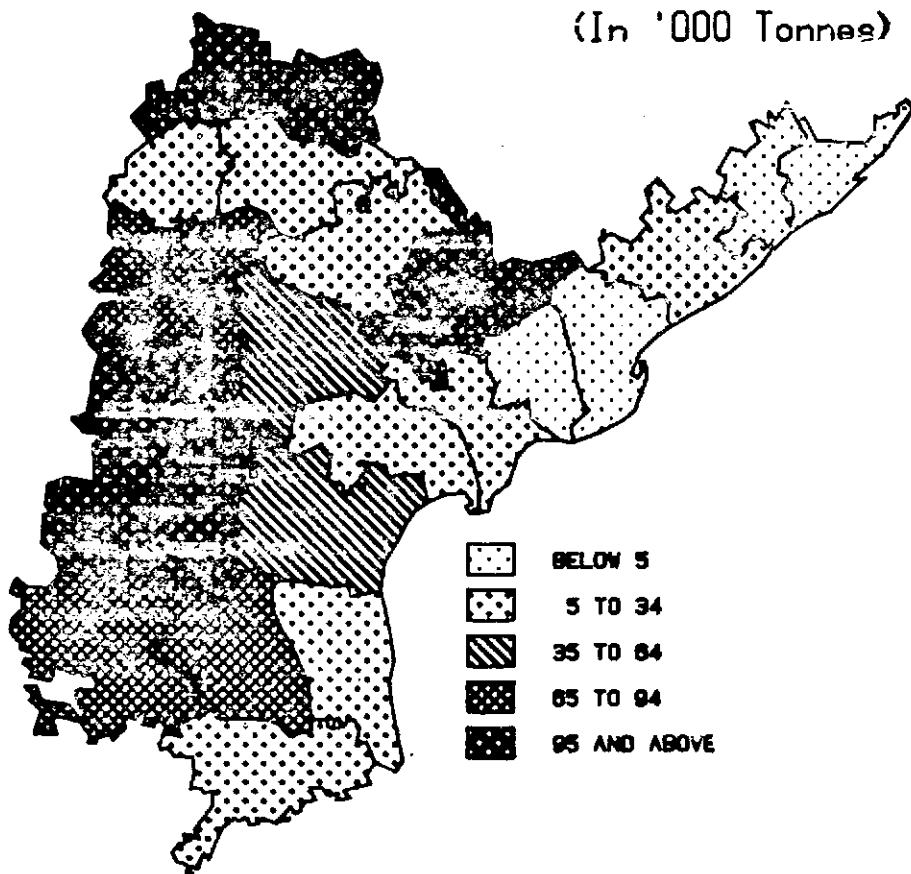

**TABLE - 6.3**

**Area, Production and Yield per hectare of Bajra, 1981-82 to 1985-86**

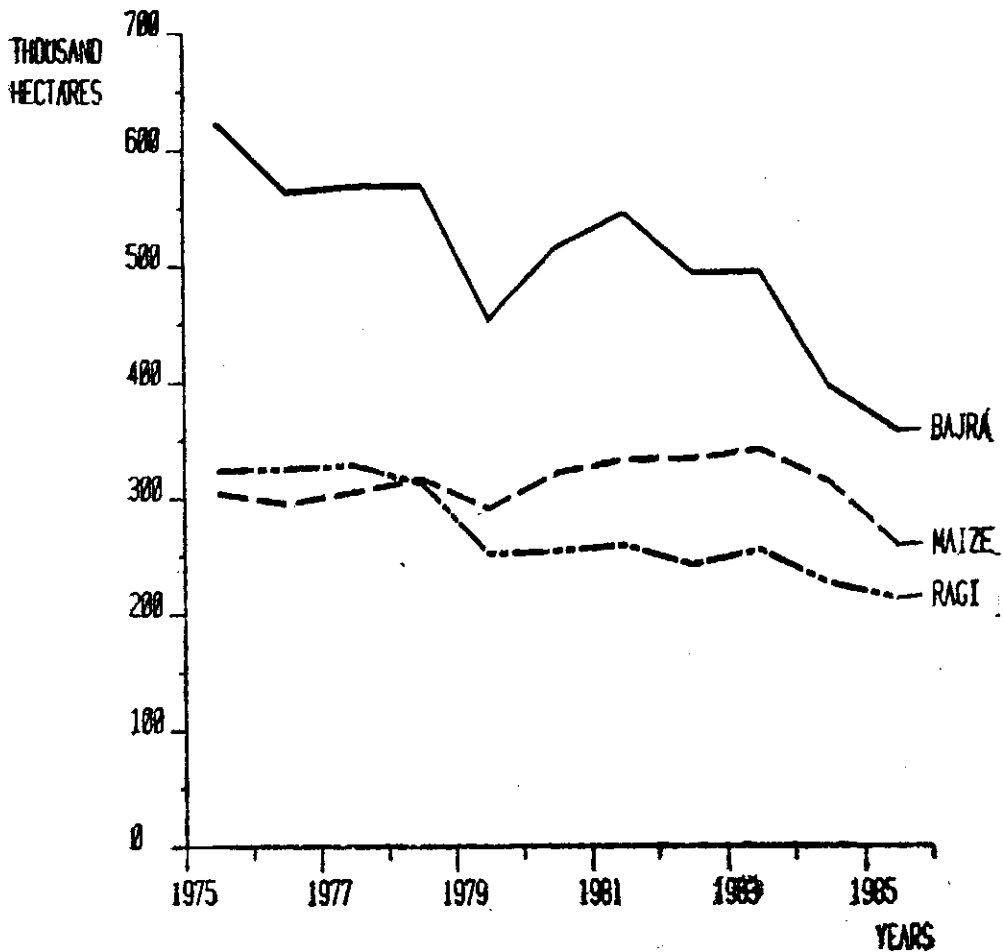

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	3.56	2.09	588
2.	1984-85	3.94	2.06	521
3.	1983-84	4.93	3.61	732
4.	1982-83	4.0	2.60	527
5.	1981-82	5.44	4.44	816

6.19 Area under Bajra was 3.56 lakh hectares in 1985-86 compared to 3.94 lakh hectares in 1984-85 showing a decline of 9.6 percent. The increase in yield per hectare from 521 kgs. to 588 kgs. in 1985-86 contributed for the marginal increase in production to 2.09 lakh tonnes as against 2.06 lakh tonnes in 1984-85, though the area under Bajra was lowest in 1985-86.

PRODUCTION OF JOWAR DURING 1985-86  
(In '000 Tonnes)

AREA UNDER BAJRA MAIZE AND RAGI IN A.P.  
DURING 1975-76 TO 1985-86

**RAGI:**

6.20 Though Ragi crop is sown in both the seasons, kharif crop accounted for 78 per cent of the total area under the crop in 1985-86. Srikakulam, Vizianagaram, Visakhapatnam, Anantapur, Chittoor, and Mahabubnagar districts. together accounted for about 77 percent of the total area under the crop in the State during 1985-86. Area, production and yield per hectare of the crop are shown in the following table.

**TABLE - 6.4**

**Area, Production and yield per hectare of Ragi 1981-82 to 1985-86**

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	2.13	2.06	967
2.	1984-85	2.26	2.16	957
3.	1983-84	2.55	2.63	1029
4.	1982-83	2.42	2.34	965
5.	1981-82	2.59	2.87	1108

6.21 Both the area and production of Ragi were the lowest in 1985-86 during the last 5 years Area under Ragi during 1985-86 declined to 2.13 lakh hectares compared to 2.26 lakh hectares in 1984-85 showing a decline of 5.8 per cent. The yield per hectare however increased to 967 Kgs. during 1985-86 from 957 Kgs in 1984-85 showing an increase by 1.0 percent. The production of Ragi declined to 2.06 lakh Tonnes in 1985-86 from 2.16 Lakh Tonnes in 1984-85 showing a fall of 4.6 per cent.

**MAIZE:**

6.22 Maize crop is mostly grown in Telangana Region which accounted for about 95.5 per cent of the total area under the crop in the State during 1985-86. Nizamabad, Medak, Warangal and Karimnagar districts together accounted for 82.6 per cent of the total area under the crop. The following table shows the area, production and yield per hectare of Maize.

TABLE - 6.5

## Area, Production and yield per hectare of Maize 1981-82 to 1985-86

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	2.88	4.14	1433
2.	1984-85	3.13	4.33	1383
3.	1983-84	3.41	5.22	1531
4.	1982-83	3.33	7.44	2234
5.	1981-82	3.32	6.32	1906

6.23 Both area and production of Maize crop declined to the lowest level in 1985-86 compared to that of the last 5 years. There was of 8.0 per cent decline in area and 4.4 percent decline in production during 1985-86 compared to 1984-85. However, the yield per hectare of Maize increased to 1433 Kgs in 1985-86 from 1383 kgs in 1984-85 recording an increase by 3.6 per cent.

**TOTAL SMALL MILLETS:**

6.24 Korra, Varagu, Samai and other minor millets constitute small Millets. These crops are mainly sown under rainfed conditions and the area under these small millets accounted for 6.0 per cent of the total cropped area in the state during 1985-86. Prakasam, Kumool, Anantapur and Mahabubnagar districts are important for these crops and these districts together accounted for about 79.0 per cent of the total area under the crop in the State during 1985-86. Among the small millets Korra is the important crop accounting for about 66.0 percent of the total area under small millets. Korra is predominantly grown in the districts of Prakasam, Kumool, Anantapur, Cuddapah and Mahabubnagar districts.

6.25 Varagu crop is mainly sown as a mixture with Red gram crop under rainfed conditions. It is mostly sown in Rabi season in the districts of Guntur and Prakasam.

6.26 Samai crop is generally sown as an early dry crop in less fertile soils and is mainly sown mixed with pulses. It is mainly a Kharif crop and is mostly grown in Visakhapatnam, Anantapur, Chittoor and Mahabubnagar districts which together accounted for about 69.0 per cent of the total area under the crop in the State during 1985-86. Apart from this other minor Millets such as Arika and Godulu are also grown in Andhra Pradesh mostly in Prakasam, Kumool and Mahabubnagar districts. The area and production of small millets are shown in the following table.

TABLE - 6.6

## Area and Production of Small Millets 1985-86 and 1984-85

Sl. No.	Year	Area in Lakh Hectares	production in Lakh Tonnes
1	2	3	4
1.	1985-86	3.65	1.32
2.	1984-85	4.02	1.24

6.27 The area under small millets declined by 9.2 per cent from 4.02 lakh hectares in 1984-85 to 3.65 lakh hectares in 1985-86. The yields of all the constituent small millet crops except Varagu increased during 1985-86 compared to 1984-85. Hence, there was increase in production of small millets in 1985-86 to 1.32 lakh tonnes as against 1.24 lakh tonnes in 1984-85 the increase being 6.5 per cent.

**PULSES:**

6.28 Pulses crops comprise of Redgram, Bengalgram, Greengram, Blackgram, Horsegram, Cowgram and other pulses. Of the 6.30 lakh tonnes of total production of pulses during 1985-86, Greengram and Blackgram with a production of 2.42 and 2.14 lakh tonnes respectively accounted for about 72.0 per cent of the total production of pulses.

6.29 Area and production of different pulses crops are shown in the following table:-

TABLE - 6.7

## Area and Production of Pulses 1985-86, 1984-85

Sl. No.	Year	Area in Lakh Hectares	production in Lakh Tonnes
1	2	3	4
1.	1985-86	13.51	6.30
2.	1984-85	13.45	5.03

6.30 Due to slightly better seasonal conditions for raising pulses crops, both area and production of pulses increased during 1985-86 compared to 1984-85. Consequently the production of all pulses has risen to 6.30 lakh tonnes in 1985-86 from 5.03 lakh tonnes in 1984-85 showing an increase by 25.0 per cent.

**BENGALGRAM:**

6.31 Bengalgram is a Rabi crop which is mostly sown during October and November months in the State. The crop is extensively grown in Kurnool, Guntur, Ranga Reddy, Nizamabad and Medak districts and these districts together accounted for nearly 73.0 per cent of the total area under the crop in the State during 1985-86. Area, Production and Yield of Bengalgram are shown in the following table:

**TABLE - 6.8****Area, Production and Yield per Hectare of Bengalgram in 1985-86 and 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	0.49	0.17	354
2.	1984-85	0.52	0.17	331

6.32 On account of the increase in Yield rate of Bengalgram from 331 Kgs/Hectors in 1984-85 to 354 Kgs/Hect. in 1985-86, the production of Bengalgram in 1985-86 remained static at 0.17 lakh tonnes, though there was a decline in area by 3,000 hectares in 1985-86 compared to 1984-85.

**REDGRAM:**

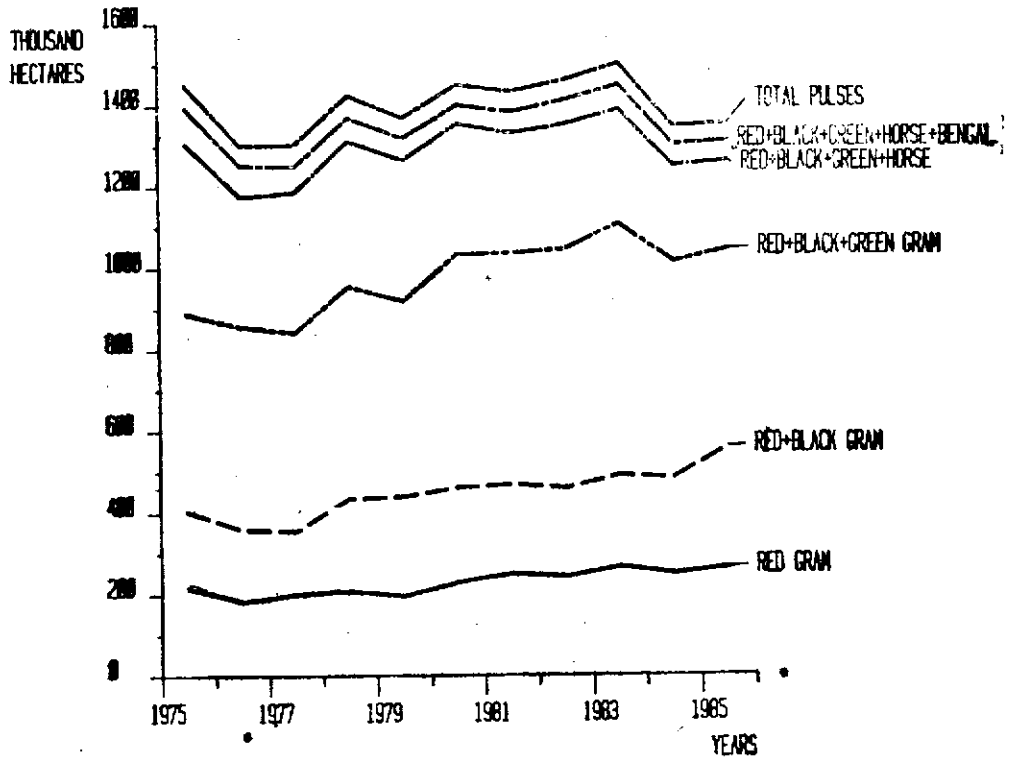

6.33 Redgram is purely a Kharif crop sown in the months of June to August under rainfed conditions. Guntur, Prakasam, Kurnool, Anantapur, Ranga Reddy, Mahabubnagar, Nalgonda, Khammam and Adilabad districts together accounted for about 77.0 per cent of the total area under the crop in the State during 1985-86. The following table shows the area, production and yield per hectare of Redgram during 1985-86 and 1984-85.

**TABLE - 6.9****Area, Production and Yield pe Hectare of Redgram in 1985-86 and 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	2.64	0.85	320
2.	1984-85	2.48	0.56	225

6.34 The overall increase in area, and yield, by 6.4 per cent and 42.2 per cent respectively in 1985-86 over 1984-85, contributed to the increase in production of Redgram by 51.8 per cent in 1985-86 compared to 1984-85.

## AREA UNDER PULSES IN ANDHRA PRADESH DURING 1975-76 TO 1985-86

**GREENGRAM:**

6.35 Greengram crop is grown during both Kharif and Rabi seasons but more extensively in kharif season. The crop is sown as an early kharif crop in May and June and is harvested by August - September. This crop is extensively cultivated in Krishna, Nalgonda, Warangal, Khammam and Karimnagar districts and these districts together accounted for nearly 69.0 per cent of the total area under the crop in the State during 1985-86. The following table shows the area, production and yield per hectare of Greengram in 1985-86 and 1984-85.

**TABLE - 6.10****Area, Yield and Production of Greengram in 1985-86 and 1984-85.**

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	4.84	2.42	496
2.	1984-85	5.28	1.73	328

6.36 Though there was a decline of area under Greengram by about 8.0 per cent in 1985-86 over 1984-85, the production of the crop increased by about 40.0 per cent in 1985-86 due to increase in yield rate by 51.2 per cent compared to 1984-85.

**BLACKGRAM:**

6.37 Blackgram is extensively grown in Rabi season accounting for about 86.0 per cent of the total area under the crop in the State during 1985-86. The crop is extensively grown in Krishna, and Guntur districts and these two districts alone accounted for about 73.0 per cent of the total area under the crop in the State during 1985-86. The following table shows the area, production and yield per hectare of Blackgram during 1985-86 and 1984-85.

**TABLE - 6.11****Area, Yield and Production of Blackgram in 1985-86 and 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	2.94	2.14	729
2.	1984-85	2.35	1.89	806

6.38 The area under Blackgram in 1985-86 increased to 2.94 Lakh Hectares as against 2.35 Lakh Hectares in 1984-85 showing an increase of 25.1 per cent over 1984-85. This increase of area contributed to the increase in

production in 1985-86 by 13.2 per cent though the yield rate decreased by 9.6 percent from 806 Kgs/Hect. in 1984-85 to 729 Kgs/Hects in 1985-86.

### **HORSEGRAM:**

6.40 Horsegram is raised in Kharif season as well as Rabi season. Vizianagaram, Anantapur and Mahabubnagar districts together accounted for nearly 41.0 percent of the total area under the crop in the state during 1985-86. The following table shows the area, production and yield per hectare of horsegram in 1985-86 and 1984-85.

**TABLE - 6.12**

**Area, Production and yield per hectare of Horsegram in 1985-86 and 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	2.17	0.64	298
2.	1984-85	2.37	0.62	258

6.41 The increase in yield rate of horsegram in 1985-86 by 15.5 percent over 1984-85 was responsible for the increase in production by two thousand tonnes in 1985-86 or 3.2 percent, though there was decline in area by 20,000 hectares or 8.4 percent.

### **COWGRAM:**

6.42 Cowgram is raised in both Kharif and Rabi seasons. The crop is mainly sown in Visakhapatnam and Khammam districts. The area production and yield rate of Cowgram is given the table below.

**TABLE - 6.13**

**Area, Production and Yield rate of Cowgram in 1985-86, 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	0.11	0.02	148
2.	1984-85	0.16	0.02	113

6.43 The production of cowgram remained static in 1985-86 compared to 1984-85 on account of the increase in yield rate in 1985-86, despite decrease in area by 31.2 percent.

**OTHER PULSES:**

6.44 Alachanda, Anapa, Masurdal etc., comprise other pulses. Table showing the area, production and yield of other pulses in 1985-86 and 1984-85 is presented below:

**TABLE - 6.14****Area, Production and Yield of Other Pulses in 1985-86, 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	0.32	0.06	177
2.	1984-85	0.29	0.03	110

6.45 On account of increase in area by 10.3 percent and yield rate by 60.9 percent, the production of other pulses got doubled in 1985-86 compared to 1984-85.

**SUGARCANE:**

6.46 Sugarcane is an important commercial crop in the State. It is mostly an irrigated crop. The eksali variety of the crop is sown in February/March and harvested in October/November. The adsali variety which is grown only in Nizamabad district is a long term crop sown in the months of December/January and harvested in February/March of the succeeding year thus standing on ground for about 15 to 16 months. In both the varieties of the crop, a ratoon crop can be taken up after the expiry of the above one year period.

6.47 Of the 1.33 lakh hectares of area under Sugarcane coming up for harvest about 54.9 percent or 0.73 lakh hectares was under Sugarcane planted and 45.1 percent of the area under Sugarcane Ratoon varieties.

6.48 Visakhapatnam, East Godavari, West Godavari, Krishna, Chittoor, Nizamabad and Medak districts together accounted for about 86.0 percent of the total Sugarcane area in the State during 1985-86. The area production and yield per hectare of Sugarcane (Gur) area shown in the following table.

**TABLE - 6.15****Area, Production and Yield per hectare of Sugarcane (Gur) in 1985-86 and 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes (Gur)	Yield in Kgs. per Hect. (Gur)
1	2	3	4	5
1.	1985-86	1.33	9.96	7,483
2.	1984-85	1.38	10.09	7,322

6.49 Though there was a marginal increase of 2.2 percent in yield per hectare of gur in 1985-86 compared to 1984-85, the production of Sugarcane (Gur) declined by 1.3 percent due to decline in area by 3.6 percent in 1985-86 over 1984-85.

#### CHILLIES:

6.50 Chillies is one of the important commercial crops grown in the State. This crop is extensively grown in Krishna, Gunatur, Prakasam, Nellore, Kurnool, Warangal, Khammam and Karimnagar districts and these districts together accounted for about 67.0 percent of the total area under the crop in the State in 1985-86. Andhra Pradesh accounted for 22.3 percent of the total area and 36.8 percent of the total production in the Country during 1985-86. Andhra Pradesh ranked first in area and production of Chillies in 1985-86 among all the States in India as per the revised estimates released by the Directorate of Economics & Statistics, Government of India. The following table shows the area, Production and yield per hectare of Chillies in A.P. during 1985-86 and 1984-85

TABLE - 6.16

Area, Production and Yield per hectare of Chillies in 1985-86 and 1984-85

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	2.02	3.23	1,619
2.	1984-85	1.61	2.54	1,574

6.51 The increase in area by 25.5 percent, and the increase in yield rate by 2.9 percent contributed to the increase in production of Chillies in 1985-86 to 3.23 lakh tonnes as against 2.54 lakh tonnes in 1984-85 (by 27.2%).

#### ONIONS:

6.52 Onion crop is cultivated in both Kharif and Rabi seasons in the State. It is mainly grown in irrigated conditions. It is extensively cultivated in Kumool, Cuddapah and Rangareddy districts and these districts together accounted for nearly 53.0 percent of the total area under the crop in the State during 1985-86.

6.53 The following table shows the area, production and yield in Kgs. per hectare of Onions in 1985-86 and 1984-85.

PRODUCTION OF SUGARCANE (GUR)  
DURING 1985-86 (In '000 Tonnes)

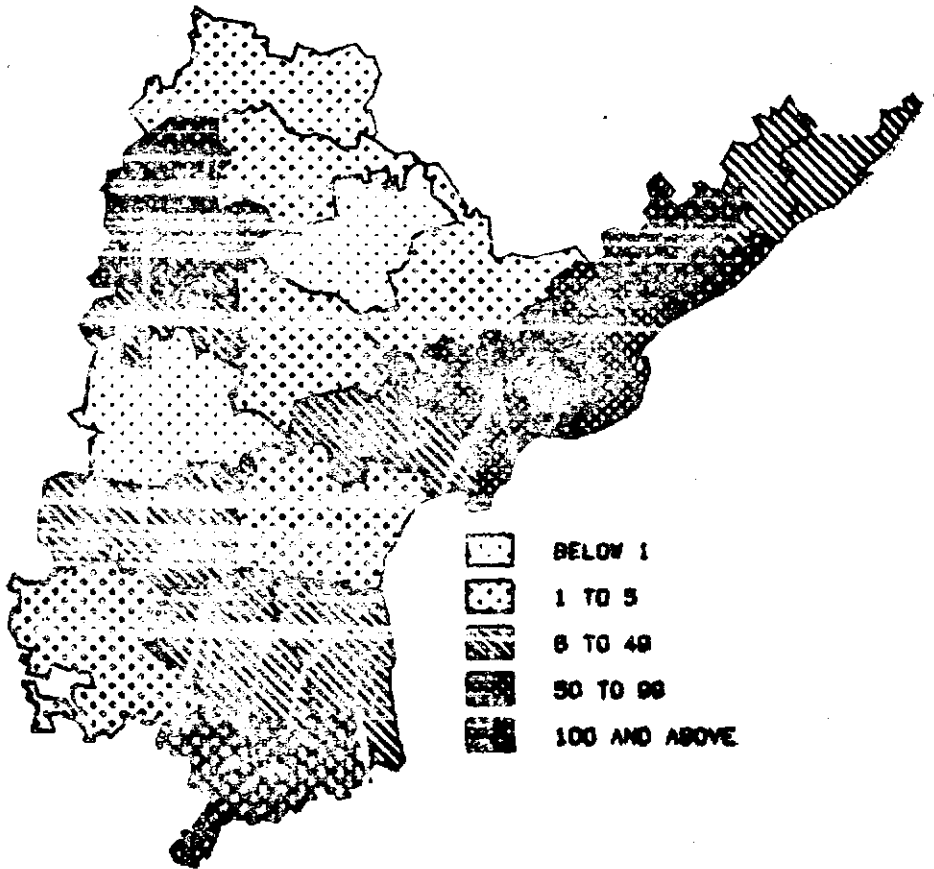

TABLE - 6.17

## Area, Production and Yield in Kgs. per hectare of Onions in 1985-86 and 1984-85

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	0.17	1.68	9,959
2.	1984-85	0.16	1.44	8,593

6.54 On account of increase in yield rate of Onions in 1985-86 to 9959 Kgs./Hect. from 8593 Kgs./Hect. in 1984-85 or about 16.0 percent, the production of Onions increased by about 17.0 percent in 1985-86 over 1984-85 though the increase in area in 1985-86 was not significant.

**GROUNDNUT:-**

6.55 Groundnut is the most important Oilseed crop accounting for 13.8 percent of the total cropped area in the state during 1985-86. Andhra Pradesh accounted for 25.6 percent of the total production of Groundnut in India, and ranked first both in area and production during 1985-86 as per the All India revised estimates released by the Deputy Economic and Statistical Adviser, Government of India.

6.56 It is mostly raised as a rainfed crop during Kharif season and as an irrigated crop in the Rabi season. All Rayalaseema districts and Mahabubnagar district in Telangana Region together accounted for about 75.0 percent of the total area under the crop in the state during 1985-86. Area, production and yield per hectare of groundnut for the last 5 years is given in the following table.

TABLE - 6.18

## Area, Production and Yield per hectare of Groundnut in 1981-82 to 1985-86

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	16.66	13.10	787
2.	1984-85	16.76	12.58	751
3.	1983-84	16.65	17.16	1030
4.	1982-83	15.05	11.33	753
5.	1981-82	14.51	14.37	990

6.57 The area under Groundnut in 1985-86 was 16.66 lakh hectares as against 16.76 lakh hectares in 1984-85 showing a marginal decline of 0.6 percent. The area under Groundnut which increased to 13.96 lakh hectares during Kharif 1985-86 from 13.51 lakh hectares in Kharif 1984-85 or an increase of 3.3 percent, was the highest

during the last 5 years. While the area under Rabi Groundnut in 1985-86 which stood at 2.70 lakh hectares (as against 3.25 lakh hectares in Rabi 1984-85) was the least for the last 5 years. There was significant increase in 1985-86 Kharif area of Groundnut in Rayalaseema Region by 9.3 percent over 1984-85 Kharif, while Coastal Andhra and Telangana Regions recorded a decline in area by 9.4 and 10.5 percent respectively. In Rabi 1985-86 all the three regions registered decline in area over 1984-85 and the overall decline being 17.0 percent in the entire State in Rabi 1985-86 over 1984-85 Rabi.

6.58 The production of Groundnut which was 13.10 lakh Tonnes during 1985-86 increased by 4.1 percent over 1984-85. This increase was due to increase in yield rate in 1985-86 to 787 Kgs. from 751 kgs. in 1984-85 or an increase of 4.8 percent, though there was marginal decrease in area by 0.6 percent.

6.59 The production of Groundnut, district-wise during 1985-86 is shown in the following map.

6.60 The production of Groundnut during Kharif 1985-86 increased to 9.43 lakh tonnes from 8.15 lakh tonnes in 1984-85 or an increase of 15.7 percent. Increase in Kharif Yield rate from 603 Kgs. in 1984-85 to 676 kgs. in Kharif 1985-86 coupled with increase in area were responsible for increase in production. Rayalaseema and Telangana Regions showed increase in production of Kharif Groundnut by about 22.0 percent and 9.8 percent respectively, while Coastal Andhra Region registered a decline of 6.7 percent. All the Rayalaseema districts showed increase in Kharif Groundnut production.

6.61 The increase in production was significant in Cuddapah district which was about 47.0 percent followed by 24.0 percent in Kurnool and 23.0 and 16.1 percent in Chittoor and Anantapur districts. In these 4 districts the yield of Kharif Groundnut also increased, significant being 18.0 percent in Chittoor district.

6.62 The production of Groundnut during Rabi 1985-86 declined to 3.67 lakh tonnes from 4.43 lakh tonnes in 1984-85 or a decline of 17.2 percent. All the three regions and all the 4 important districts of Rayalaseema and also Mahabubnagar district of Telangana Region showed decline in production in Rabi 1985-86 over Rabi 1984-85.

### **SESAMUM:**

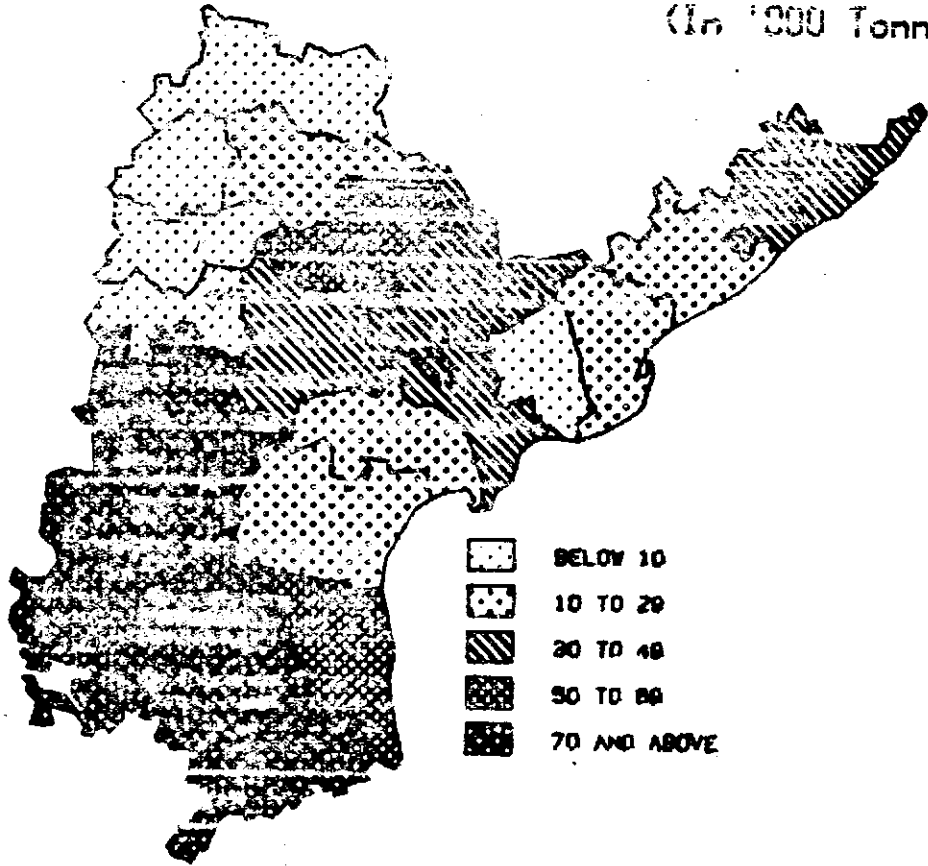

6.63 The Crop is cultivated in both kharif and rabi seasons in the State. The kharif crop is sown in the months of June-July and the rabi crop is sown in October, Visakhapatnam, East Godavari, West Godavari Warangal and Adilabad districts which are important for this crop accounted for about 59.0 percent of the total area under the crop in the State during 1985-86. The area, production and yield per hectare of Sesamum are shown in the following table.

**TABLE - 6.19**

**Area, Production and Yield per Hectare of sesamum, 1985-86 and 1984-85**

Sl.	Year	Area in lakh Lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	1.52	0.32	208
2.	1984-85	1.42	0.25	178

PRODUCTION OF GROUNDNUT DURING 1985-86  
(In '000 Tonnes)

6.64 The increase in area by 7.0 percent and the yield rate by 16.9 percent in 1985-86 over 1984-85 contributed to the increase in production by 28.0 percent in 1985-86.

### CASTOR:

6.65 Castor is one of the important commercial crops raised in the State. Mahabubnagar and Nalgonda districts which are important for the crop accounted for about 76.0 percent of the total area under the crop in the State. Andhra Pradesh ranked first in India in area with a contribution of 46.2 percent of total area in the country and second in production among all the States in the country during 1985-86 as per the revised estimates released by D.E.S.A., Government of India. The area, production and yield per hectare of castor are shown in the following table.

**TABLE - 6.20**

**Area, Production and Yield per Hectare of castor 1985-86 and 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	2.94	0.54	186
2.	1984-85	2.93	0.56	190

6.66 Through the area under castor in 1985-86 marginally increased by 1,000 hectares over 1984-85 the decline in yield by 4 kilograms per hectare in 1985-86 compared to 190 Kgs in 1984-85 contributed to the fall in production of castor in 1985-86 by 2,000 tonnes.

### COCONUT:

6.67 Coconut is a perennial crop raised extensively in Srikakulam, East Godavari and West Godavari districts which together accounted for about 86.0 of the total area under the crop in the State. The following table shows the area, production and yield (Nuts) per hectare of coconut during 1985-86.

**TABLE - 6.21**

**Area, Production and Yield of Coconut in 1985-86 and 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh nuts	Yield in No. of nuts per Hect.
1	2	3	4	5
1.	1985-86	0.474	1961.38	4,134
2.	1984-85	0.471	1945.42	4,134

6.68 Production of coconut is calculated on the basis of yield per hectare obtained through coconut survey conducted by Bureau. Production of coconut increased marginally by 15.96 lakh nuts during 1985-86 over 1984-85.

### **COTTON:**

6.69 Cotton is mostly raised as a kharif crop in the State. However in Krishna district, it is also raised in Rice fallows after the harvest of kharif rice crop. During the kharif season, the crop is raised mainly as a rainfed crop in the traditional areas of Kurnool, Adilabad and a few other districts and as an irrigated crop in the districts of Prakasam, Guntur and Krishna. The yield per hectare of irrigated Cotton is considerably higher than that of rainfed crop. Guntur, Prakasam, Kurnool and Adilabad districts together accounted for about 79.0 percent of the total area under the crop in the State during 1985-86. Area, Production and Yield per hectare of cotton are given in the following table.

**TABLE - 6.22**

**Area, Production and Yield per Hectare of Cotton in 1985-86 and 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh bales of 170 kgs(lint)	Yield in Kgs. per Hect.(in lint)
1	2	3	4	5
1.	1985-86	6.20	7.42	204
2.	1984-85	5.54	9.84	302

6.70 On account of steep fall in the yield per hectare of cotton (lint) from 302 Kgs in 1984-85 to 204 Kgs in 1985-86 or a decline of 32.4 percent the production of cotton in 1985-86 declined to 7.42 lakh bales from 9.84 bales in 1984-85 (24.6%) though there was increase in area under cotton in 1985-86 by about 12.0 percent over 1984-85.

### **MESTA:**

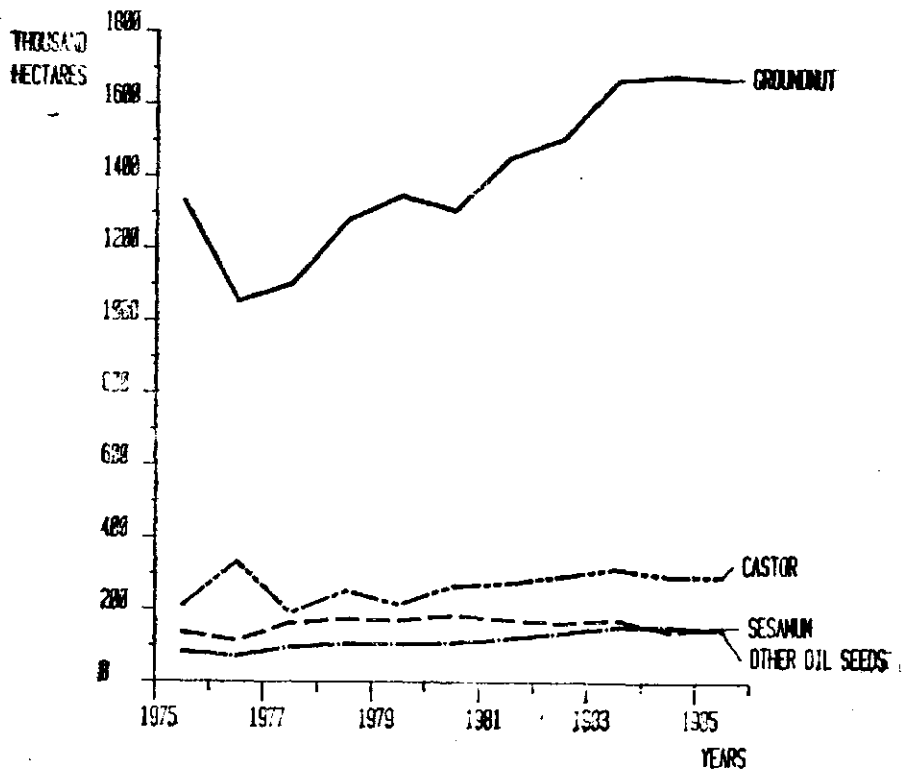

6.71 Mesta crop is mostly confined to Srikakulam and Vizianagaram and these two district together accounted for about 96.0 percent of the total area under the crop in the State during 1985-86. The following table shown the Area, Production and yield per hectare of Mesta in 1985-86 and 1984-85.

**TABLE - 6.23**

**Area, Production and Yield per Hectare of Mesta in 1985-86 and 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh bales of 180 Kgs.	Yield in Kgs. per Hect.
1	2	3	4	5
1.	1985-86	1.02	7.38	1,297
2.	1984-85	0.79	4.90	1,116

# AREA UNDER OIL SEED CROPS IN ANDHRA PRADESH DURING 1975-76 TO 1985-86

6.72 The increase in area by 29.1 percent and the increase in yield by 16.2 percent in 1985-86 over 1984-85 contributed to the increase in production in 1985-86 by about 51 percent compared to 1984-85.

### **TOBACCO:**

6.73 Andhra Pradesh is one of the important states in the Country in cultivation of tobacco. This crop is sown during Rabi season under rainfed conditions. Irrigated tobacco in the lighter soils is also raised in East Godavari, West Godavari, Krishna, Guntur, Prakasam, Nellore, Kurnool and Khammam districts and these districts together accounted for about 91.0 percent of the total area under the crop in the State during 1985-86.

Two varieties of Tobacco viz., Virginia and Natu are grown in Andhra Pradesh. The area, production and yield per hectare of tobacco are shown in the following table.

**TABLE - 6.24**

**Area, Production and Yield per Hectare of Tobacco 1985-86 and 1984-85**

Sl.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
1	2	3	4	5
1.	<u>1985-86</u>			
	Virginia	0.97	0.69	717
	Others	0.52	0.76	1,451
	Total	1.49	1.45	975
2.	<u>1984-85</u>			
	Virginia	1.14	1.00	874
	Others	0.64	0.71	1,110
	Total	1.78	1.71	959

6.74 The area under both the varieties of tobacco decreased in 1985-86 compared to 1984-85, the decline in area under virginia tobacco was 14.9 percent while the area under other varieties declined by 18.7 percent. The total area under tobacco in 1985-86 which was 1.49 lakh hectares compared to 1.78 lakh hectares in 1984-85 showed a decline of 16.3 percent.

6.75 Due to decrease in yield rate of virginia tobacco from 874 kgs/hect in 1984-85 717 kgs/hect in 1985-86 and the decrease in area, in 1985-86, the production of virginia tobacco declined to 0.69 lakh tonnes from 1.14 lakh tonnes in 1984-85.

6.76 However the production of other varieties of tobacco in 1985-86 increased to 0.76 lakh tonnes from 0.71 lakh tonnes in 1984-85 on account of increase in yield rate of other varieties of tobacco from 1110 kgs/hect in 1984-85 to 1451 kgs in 1985-86, though there was a decline in area by 12,000 Hectares. The total production of tobacco

in 1985-86 was 1.45 lakh tonnes as against 1.71 lakh tonnes in 1984-85 or a decline of 15.2 percent. Andhra Pradesh contributed about 38.0 percent of the area and about 33.0 percent of production in India during 1985-86 and ranked first in area and second in production of tobacco among all the States in India as per the revised estimates released by DESA, Government of India for 1985-86.

Area and production of Sugarcane (Gur), Cotton and tobacco crops in Andhra Pradesh from 1975-76 to 1985-86 are shown in the appended graph.

### 7.0 Index Numbers of Agricultural Production in Andhra Pradesh 1985-86

7.1 The Index Numbers of area under crops, agricultural production, Productivity (Yields), net area sown, cropping pattern, cropping intensity and productivity per hectare of net area sown with base triennium ending 1969-70 = 100 are presented in tables 8.1 to 8.5. These index numbers are being worked out with the above base year since 1979-80.

7.2 In this series Index numbers of 22 crops are covered which are divided into two main groups and five subgroups.

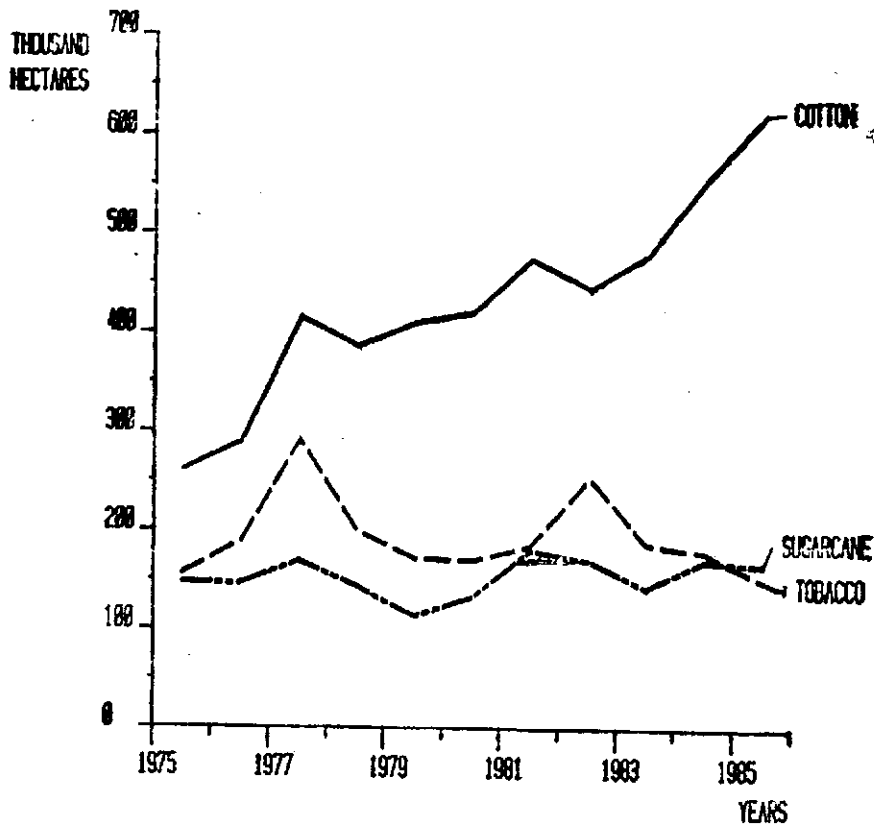

Sl.No.	Main group	Sub-group	Crops covered
1.	Food crops	i) Cereals	Rice, Wheat, Jowar, Bajra, Maize, Ragi and Small Millets.
		ii) Pulses	Bengalgram, Redgram, Blackgram, Horsegram and Other Pulses.
2.	Non-Food crops	i) Oil seeds	Groundnut, Sesamum, Linseed and Castor.
		ii) Fibres	Cotton and Mesta
		ii) Misc. crops	Sugarcane, Tobacco and Chillies.

The above crops constitute nearly 92 percent of the total cropped area in the State.

### 7.3 Index of Area:-

The index numbers of area under all crops declined slightly by 1.0 percent over the previous year. Under the indices of food grains, all the crops have shown decline except Redgram and Black gram which have increased by 6.4 percent and 24.8 percent. Even though the Index of area under Fibres, and miscellaneous crops increased by 14 percent and 8 percent respectively, there is no effect on the Index of all crops due to decline of index of area under food grains by 3 percent and oil seeds by 1 percent. The Index numbers of area under different crops groups for the years 1981-82 to 1985-86 are given below in Table 7.1.

AREA UNDER CASH CROPS IN ANDHRA PRADESH  
DURING 1975-76 TO 1985-86

PRODUCTION OF CASH CROPS IN ANDHRA PRADESH  
DURING 1975-76 TO 1985-86

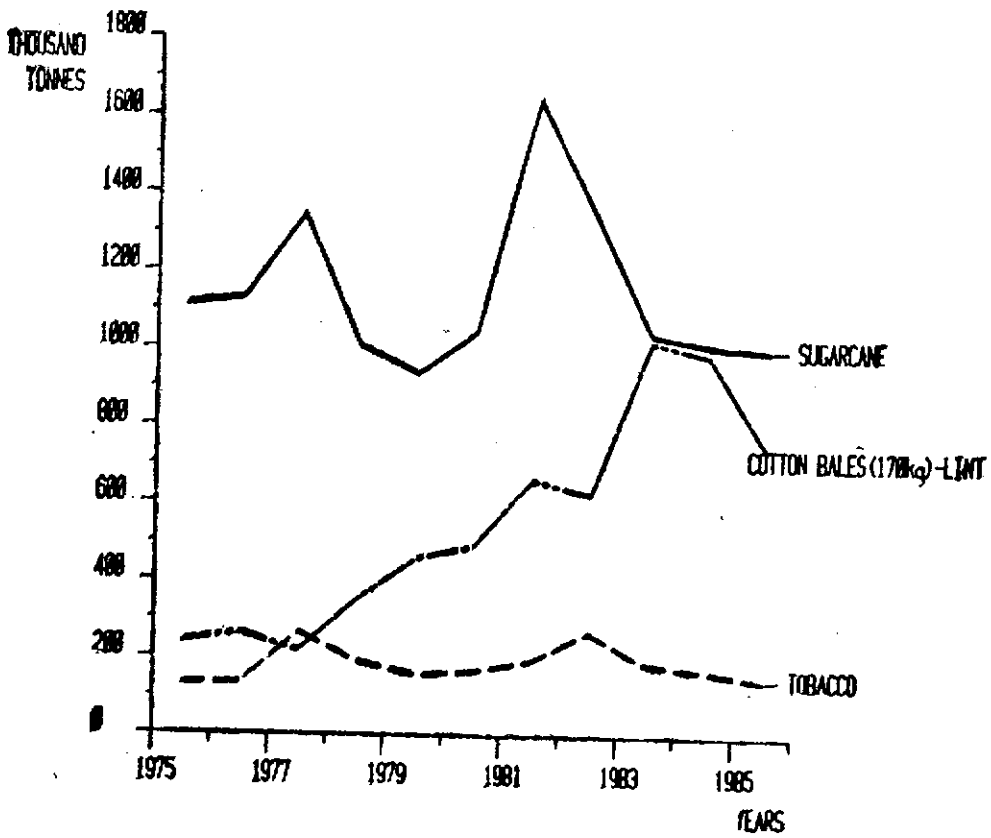

TABLE - 7.1

## Index Numbers of Area of crops

(Base = Triennium ending 1969-70 = 100)

Sl. No.	Crop Group	1981-82	1982-83	1983-84	1984=85	1985-86	% Deviation + or - over 1984-85
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	Cereals	90.0	93.0	98.1	85.3	82.3	-4
2.	Pulses	98.2	101.5	104.3	93.6	93.9	-
3.	Food grains	98.9	94.3	99.1	86.6	84.1	-3
4.	Oil seeds	102.9	106.4	116.8	114.4	114.3	-1
5.	Fibres	141.4	131.1	138.7	157.8	180.1	+14
6.	Miscellaneous	103.7	117.9	95.7	87.9	95.3	+8
7.	Total Non-food	108.5	112.1	115.8	115.5	120.0	+3
8.	All crops	101.2	98.4	103.0	93.3	92.4	-1

## 7.4 Index of Productivity (Yields):-

The Index of productivity of all crops increased by 7.2 percent over previous year due to considerable increase of 10.5 percent in cereals, 20.6 percent in pulses 4.8 percent in oil seeds and 2.2 percent in Misc. crops. The decline of 24.7 percent in fibres group did not have any effect on the Index of all crops. There is a substantial increase in the Index of Redgram, by 42.8 percent greengram by 52.2 percent, other pulses by 19.7 percent. The main reasons for increase in this yield Index of the above crops are due to favourable seasonal conditions during the flowering and fruit formation stage. Almost all the individual crops have registered increase in the yield index during 1985-86 when compared to 1984-85. Even though there is a sufficient decline in the Index of cotton by 32.6 percent, this has not affected the yield Index of all crops. The Index of productivity under different crops groups for the year from 1981-82 to 1985-86 is given below in the table 7.2

TABLE - 7.2

## Index Numbers of Productivity (Yields) for the year 1981-82 to 1985-86

(Base = Triennium ending 1969-70 = 100)

Sl. No.	Crop Group	1981-82	1982-83	1983-84	1984=85	1985-86	% Deviation + or - over 1984-85
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	Cereals	158.3	161.4	159.1	149.0	164.6	+10.5
2.	Pulses	171.0	210.2	192.2	191.0	230.4	+20.6
3.	Food grains	158.8	163.5	160.5	150.9	167.7	+11.1
4.	Oil seeds	128.2	100.0	133.0	99.2	104.0	+4.8
5.	Fibres	276.4	258.4	379.1	326.6	246.0	-24.7
6.	Miscellaneous crops	128.6	128.4	133.3	160.2	163.8	+2.2
7.	Total Non-food crops	131.6	122.1	138.4	141.1	143.4	+1.6
8.	All crops	147.6	145.6	152.0	146.8	157.4	+7.2

## 7.5 Index of Production:

The index number of Agricultural production of all crops registered an increase of 6.1 percent during 1985-86 over the previous year. The production Index of almost all the crops has shown considerable increase during 1985-86 over 1984-85. Substantial increase is observed in the Index of Redgram by 52.1 percent, Black gram by 12.8 percent, greengram by 39.6 percent other pulses by 15.2 percent, sesamum by 25.5 percent and Chillies by 27.6 percent during 1985-86 over 1984-85. Among food grains, the index of production of jowar (4.5%), Maize (4.4%), Ragi (48%), Wheat (6.3%) and Bengalgram (0.4%) has shown decline during this year over previous year, which did not have any effect on the increase in the index of production of all crops. The reason for the over all increase in the index of production is due to increase in the yield index by 7.2 percent over the previous year. The index numbers of production for different Crop Groups for the last 5 years from 1981-82 to 1985-86 are given below in tab i.e. 7.3.

**TABLE - 7.3**  
**Index Numbers of Agricultural Production.**  
 (Base = Triennium ending 1969-70 = 100)

Sl. No.	Crop Group	1981-82	1982-83	1983-84	1984-85	1985-86	% Deviation + or - over 1984-85
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	Cereals	174.9	169.3	185.0	149.3	159.6	+6.9
2.	Pulses	176.7	222.1	214.7	196.3	245.4	+25.0
3.	Food grains	175.0	171.0	186.3	151.4	163.4	+7.9
4.	Oil seeds	136.4	110.0	161.4	119.8	124.8	+4.2
5.	Fibres	440.9	399.5	631.1	603.9	606.3	+0.4
6.	Miscellaneous crops	158.8	173.9	149.5	164.2	168.0	+2.3
7.	Total Non-food crops	163.0	160.3	175.2	167.3	171.0	+2.2
8.	All crops	170.7	167.6	182.3	157.1	166.7	+6.1

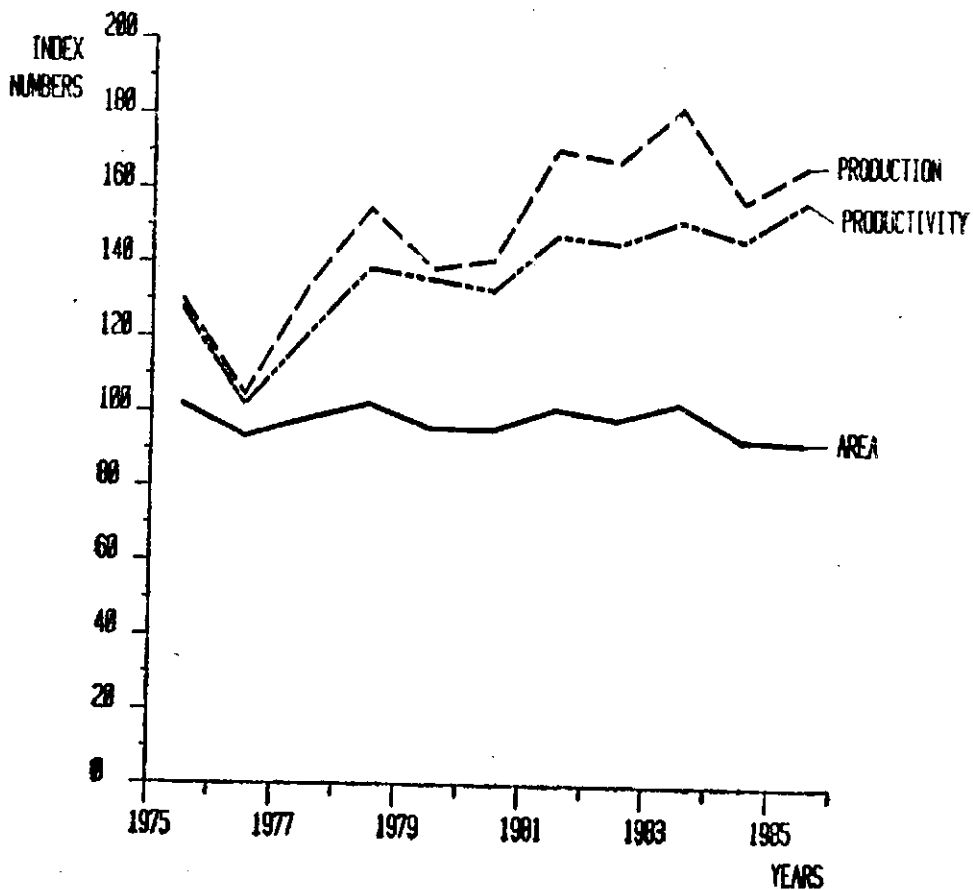

## 7.6 Cereals Sub-group:-

During the year under report the production index of Rice, Bajra, Small Millets under the cereals sub-group has shown an increase by 10.2 percent, 1.8 p.c. and 6.1 percent respectively over the previous year, while the production index of Jowar, Maize, Ragi and Wheat registered a decline by 4.5 percent, 4.4 and 6.3 percent respectively over the previous year.

## 7.7 Pulses Sub-group:-

The Production index of pulses sub-group has registered substantial increase by 25.0 percent during the current year over the previous year due to increase in the index of production of all the individual pulses except Bengalgram which declined slightly by 0.4 percent, Redgram, Blackgram, Greengram, Horsegram and other pulses registered increase in the index of production during this year over previous year by 52.1 percent, 12.8, 39.6, 5.0 and 15.2 percent respectively.

INDEX NUMBERS OF AREA PROD. AND PRODUCTIVITY  
DURING 1975-76 TO 1985-86

### **7.8 Oil Seeds Sub-group:**

The production index of Oil seeds increased during 1985-86 by 4.2 percent over the previous year. Among oil seeds, Groundnut and Sesamum have shown increasing trend in the production index during this year over the previous year. Whereas the production index of Linseed and Castor has shown decreasing trend. The main reasons for increase in the production index of Groundnut and Sesamum are due to increase in the yield index.

### **7.9 Fibres Sub-group:**

The index of production of this sub-group slightly increased this year by 0.4 percent over previous year. The index of production of Cotton substantially declined by 24.5 percent over the previous year while the index of production of Mesta considerably increased by 50.5 percent over the previous year.

### **7.10 Miscellaneous sub-group:**

The index of production of this sub-group has shown an increase by 2.3 percent over the previous year. In this sub-group only Chillies registered fair increase in the Index by 27.6 percent. As regards other two constituent crops viz., Sugarcane and tobacco have shown decline in the index by 1.2 percent and 14.8 percent respectively over the previous year.

### **7.11 Index Numbers of Net area sown:**

The index numbers of NAS declined to 92.6 this year from 93.1 during the previous year showing a decline by 0.5 percent. This is due to the drought conditions prevailing in the State during 1985-86.

### **7.12 Index Numbers of cropping intensity:**

The index number of cropping intensity declined to 102.1 this year from 103.1 during 1984-85 showing a decline by 1.0 percent.

### **7.13 Index No. of cropping pattern:**

The index number of cropping pattern declined this year to 110.5 from 111.4 during the previous year showing a decline of 1.0 percent.

### **7.14 Index of productivity per hectare of Net Area Sown:**

The index of productivity per hectare of Net area sown measures growth of gross value per hectare of Net area sown at base period prices. This index has gone up this year to 161.9 from 150.4 during previous year showing an increase by 7.6 percent. This is due to the increase in productivity of the crops by about 7.2 percent.

The indices of Net Area Sown, cropping intensity, cropping pattern and productivity per hectare of Net area sown are given below in Table No. 7.4.

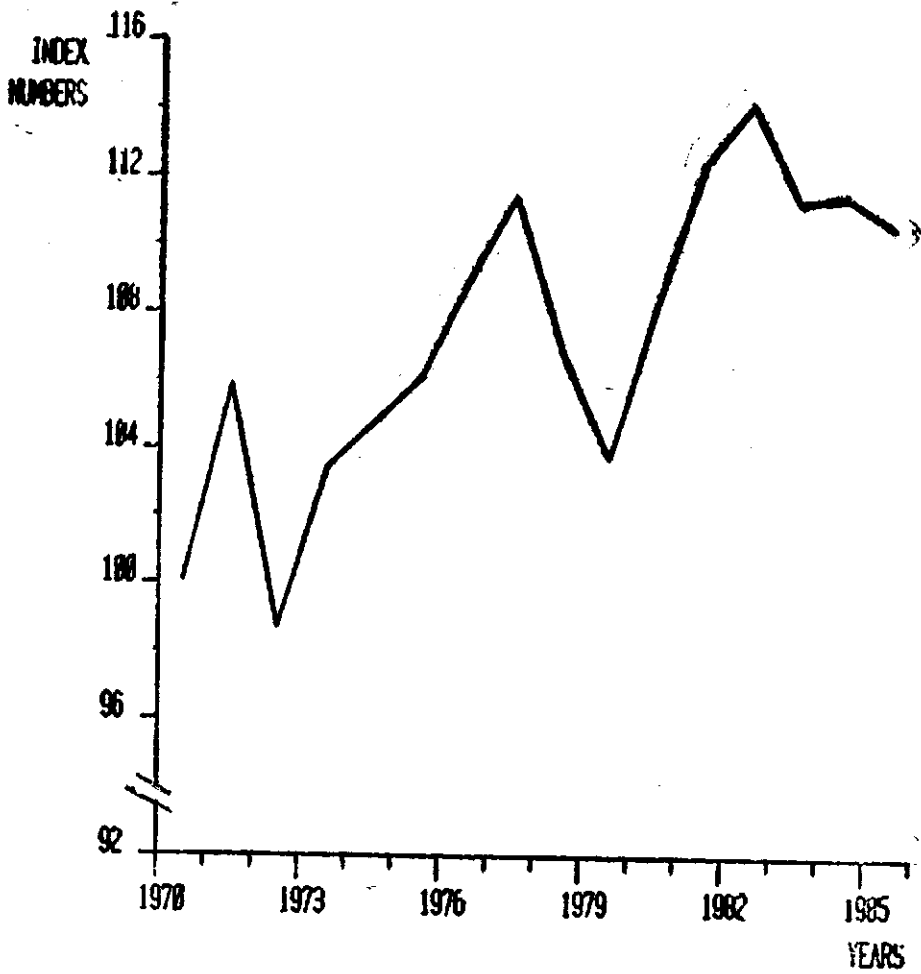

TABLE - 7.4

Index Number of Net Area sown, cropping intensity, cropping pattern and productivity per hectare of Net area sown in A.P. for the years 1981-82 to 1985-86.

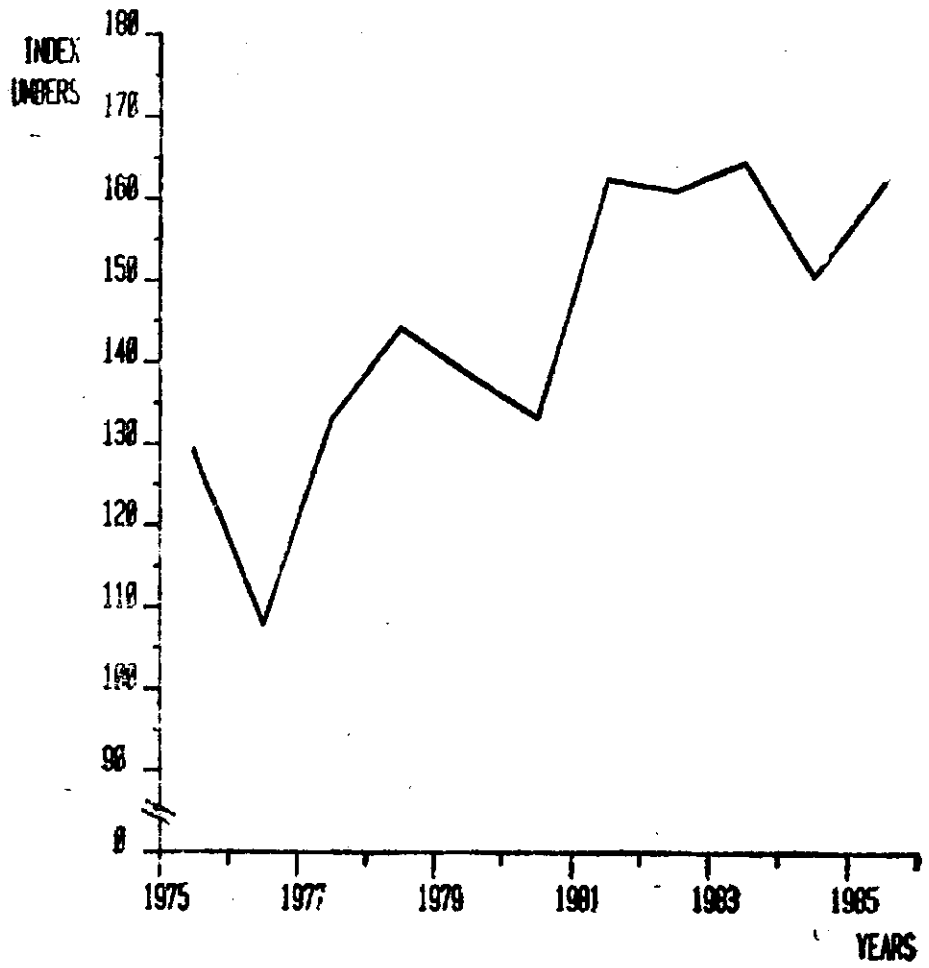

## Index Numbers of

Year	NAS	Cropping intensity	Cropping pattern	Productivity per hect. of NAS
1	2	3	4	5
1981-82	100.5	101.4	112.4	162.3
1982-83	97.9	101.9	114.1	160.9
1983-84	101.5	103.1	111.2	164.4
1984-85	93.1	102.5	111.4	150.4
1985-86	92.6	102.1	110.5	161.9

INDEX NUMBERS OF CROPPING PATTERN IN A.P.  
DURING 1970-71 TO 1985-86

INDEX NUMBERS OF GROSS VALUE PER HECTARE  
OF NET AREA SOWN DURING 1975-76 TO 1985-86

**TABLE**  
**INDEX NUMBERS OF AREA UNDER CROPS, AGRICULTURAL PRODUCTION**

Sl. No.	COMMODITY	A R E A				
		1981-82	1982-83	1983-84	1984-85	1985-86
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1.	Rice	118.0	112.3	128.5	108.0	106.6
2.	Jowar	84.5	80.8	75.4	71.1	68.2
3.	Bajra	92.4	83.6	83.7	67.0	60.5
4.	Maize	140.0	140.7	144.0	132.2	121.9

## REVIEW ON THE TRENDS IN WHOLESALE PRICES OF PRINCIPAL AGRICULTURAL COM-MODITIES DURING THE YEAR 1985-86 IN ANDHRA PRADESH

### GENERAL:

8.1 During the year under review i.e., 1985-86 the state Average wholesale prices of all selected Food Crops except Jowar White Recorded a moderate rise ranging from 4.1 percent (Ragi) to 20.9 percent (Bajra) as compared to these in the preceeding year During the said period Jowar white has however declined by 5.1 percent. The prices of the selected commercial crops showed mixed trends in the selected centres during the year under reference as compared to their prices in the preceeding year. While the prices of Onions at Warangal centre have gone up by 15.5 percent and Jaggery at Chittoor and Nizamabad centres rose by 9.3 and 4.7 percent respectively, there had been a steep fall in the prices of Caster Seed, Coconuts and Chillies by 25.4, 32.8 and 38.6 percent respectively.

The Commodity-wise review of the prices trends is given below.

### I. Food Crops:

8.2 **Rice I Sort:** A Steady increasing trend was observed in the price of Rice I Sort during the year under review. The annual state average price of Rice I Sort for 1985-86 recorded an increase of 9.1 percent over that in the preceeding years 1984-85. From Rs. 304.03 in June 1985, the price has gone up to Rs. 340.32 per Quintal in June 1986, recording an increase of 11.9 percent.

8.3 **Rice II Sort:** The annual state average prices of Rice II sort for 1985-86 rose by 6.6 percent when compared to that of the preceeding year. The increase in the price of Rice II Sort in June 1986 over June 1985 was 7.0%.

8.4 **Jowar White:** The annual state average wholesale prices of Jowar White for 1985-86 over 1984-85 indicated a decline of 5.1%. But the wholesale prices of Jowar White which stood at 178.29 in June 1985 has gone up to Rs. 188.42 (in June 1986) at which level the prices was higher by 5.7% compared to that in June 1985.

8.5 **Bajra:** The annual state average wholesale price of Bajra for 1985-86 rose by 20.9% over 1984-85. The monthly average wholesale price for June 1986 recorded an increase of 21% over June 1985.

8.6 **Ragi:** The annual state average wholesale price of Ragi 1985-86 increased by 4.1% over the preceeding year. The monthly wholesale price of Ragi in June 1986, recorded an increase of 6.4% over June 1985.

### II. Commercial Crops:

8.7 **Cane Jaggery:** The average wholesale prices of Jaggery I Sort (at Chittoor centre) for 1985-86 indicated an increase of 9.3% over that of the preceeding year. The monthly wholesale prices in June 1986 recorded an increase of 5.2% over June 1985.

At the other selected centre i.e., Nizamabad also the annual average wholesale price of Jaggery I sort for 1985-86, was higher by 4.7%, over 1984-85.

The monthly average wholesale prices in June 1986 recorded an increase of 1.0 percent over June 1985.

**8.8 Castor Seed:** The state average wholesale prices of, Castor Seed at Badapalli centre for 1985-86 indicated a steep fall by 25.4 percent over 1984-85. The Monthly wholesale price for June 1986 recorded an increase of 3.8% over June 1985.

**8.9 Coconuts (Per 1000):** The annual average wholesale price of Coconuts for 1985-86 at Kakinada centre declined by 32.8% over 1984-85. The monthly average wholesale price for June 1986 was higher by 8.9% over June 1985.

**8.10 Groundnut Seed:** The annual average wholesale price of Groundnut Seed at Proddutur Centre for 1985-86 recorded a slight fall of 0.4 percent over 1985-86. The monthly wholesale price for June 1986 showed an increase of 28.2 percent over June 1985.

**8.11 Chillies Dry:** The annual wholesale price of Chillies dry for 1985-86 at Guntur centre indicated a steep fall of 38.6 percent over 1984-85. The average wholesale price per quintal which stood at Rs. 1206-25 in June 1985 declined by as much as 47.7 percent to Rs. 631.25 in June 1986.

**8.12 Onions:** The annual average wholesale prices of Onions for 1985-86 at Warangal Centre recorded in increase of 15.5 percent over 1984-85. The monthly average price of Onions for June 1986 declined by 4.7% over June 1985.

#### **BRIEF REVIEW OF THE TRENDS IN RETAIL PRICES OF ESSENTIAL COMMODITIES IN ANDHRA PRADESH DURING THE YEAR 1985-86**

**9.1** During the year 1985-86 the state average retail prices of 6 important commodities recorded an increase over the proceedings year ranging from 1.0 percent in the case of Ragi to 11.9 percent in respect of Bajra. The increase under other commodity was Rice I Sort (10.0 percent) Rice II Sort (9.8 percent) Jowar White (1.5 percent) and Salt (3.7 percent) respectively. The price of Jowar Yellow recorded a decline of 1.1 percent.

#### **10.0 Review on the Trends of Agricultural wages in Andhra Pradesh during 1985-86.**

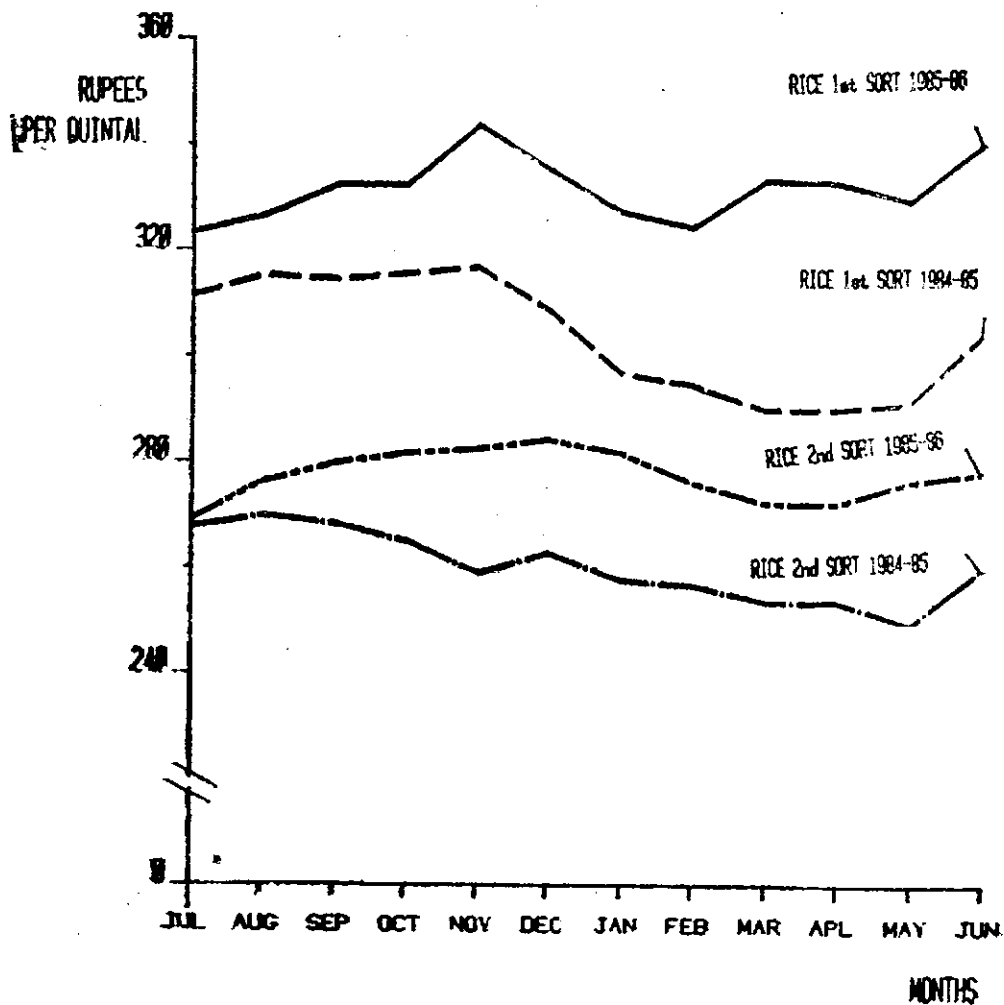

**10.1** In Andhra Pradesh three representative rural centres based on concentration of Agricultural labour in each district were selected for the collection of data on daily wages of Agricultural labour. This data is being collected during the last week of every month regularly in respect of skilled labour and agricultural labour since 1958-59. Agricultural labour is broadly classified into three categories Viz., (1) Field Labour (2) Herdsman and (3) Other Agricultural Labour. Each category is again subdivided into three categories viz Man, Woman and Non-Adult. Field labour includes labourers engaged in ploughing, sowing, reaping, transplanting and harvesting operation of the Crops. Herdsmen are those who collect livestock from different owner houses, feed them on grazing lands and bring them back to owners. Other agricultural labour includes labour engaged in watering fields, load carrying, well digging, removal of silt from wells and embankment work etc.

#### **Base period:**

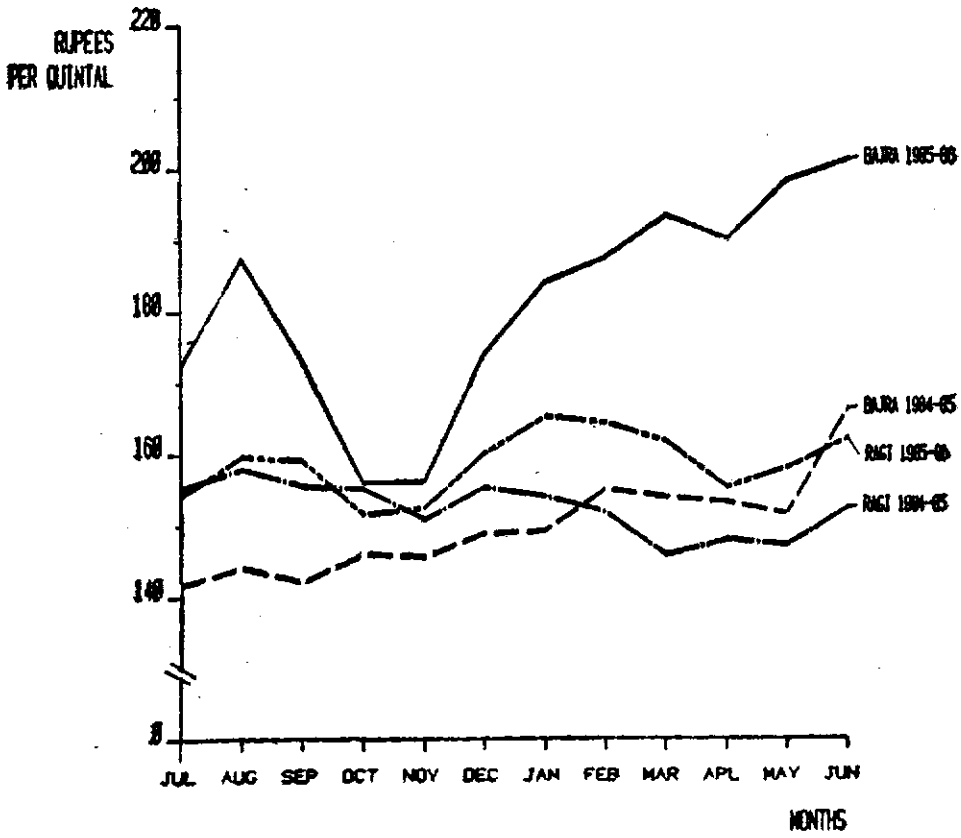

**10.2** The Index number of Agricultural labour is constructed on the basis of details of wages being collected from these centres.

**10.3** The Agricultural year 1980-81 is taken as base year.

10.4 The wages of different categories of labour for a district as a whole is arrived at as a simple arithmetic mean of the wages prevailing at the three selected centres in the district during a particular month. The wages of each Category of agricultural labour for the state as a whole are arrived at as a simple arithmetic mean of the district wages. The base year wages for the state are arrived at as the simple average of monthly wages of all the 12 months of the year 1980-81

10.5 The wage relatives for each category of labour are expressed as a percentage ratio of the current wages to the base year wages. The index number of wages of skilled labour is worked out as the average of wage relatives of Carpenters, Blacksmith and Cobblers. The simple average of wage relatives of different categories of agricultural labour is taken as the index numbers of agricultural wages for that month.

#### **Skilled Labour:**

10.6 **Carpenters:** The index numbers of Wages for carpenters increased from 186.9 points in July 85 to 206.5 points in June 86 showing a rise of 19.6 points.

10.7 **Blacksmith:** The index number of wages paid to Blacksmiths also recorded rise from 180.6 points in July 85 to 201.8 points in June 86.

10.8 **Cobblers:** The index number of wages paid to this category fluctuated from month to month and the annual average was 190.5 points.

#### **11.0 Gross value of Agricultural Output.**

11.1 The Gross value of Agricultural Commodities in Andhra Pradesh during the year 1985-86 is estimated at Rs. 1999.10 crores at Constant (1970-71) prices and Rs. 5470.89 crores at current prices as against Rs. 1909.05 crores and Rs. 5311.62 crores respectively in 1984-85. The value of food crops alone accounted for Rs. 3922.13 Crores during 1985-86 at current prices as against Rs. 3642.67 crores in 1984-85.

11.2 The value of different products is estimated on the average wholesale peak market period prices. The Output and value of different Commodities including by products both at current and constant (1970-71) prices for the year 1985-86 and 1984-85 are given in the following table.

	10. Minor millets	Final	May 20
	11. Wheat	Final	May 25
	12. Onions	Final	May 15
	13. Groundnut (Rabi)	Final	May 31

GLOSSARY OF BOTANICAL, ENGLISH AND TELUGU NAMES OF CROPS

Botanical	English	Telugu
(1)	(2)	(3)
<b>CEREALS</b>		
<i>Oryza Sativa</i>	Paddy	Vadlu
<i>Triticum Species</i>	Wheat	Godhumalu
<i>Sorghum Vulgare</i>	Jowar	Jornalu
<i>Pennisetum Typhoide</i>	Bajra	Sajja or Ganti
<i>Hordeum Velgare</i>	Barley	Barley
<i>Zea Mays</i>	Maize	Mokkajonnalu
<i>Eleusine Coracana</i>	Ragi	Ragi and Chodi
<i>Setaria Italica</i>	Korra (Italian Millet)	Korralu
<i>Paspalum Serobiculatum</i>	Varagu	Arikelu
<i>Panicum Miliare</i>	Samali	Samulu
<i>Panicum Milliaccum</i>	Common Millet	Varigalu
<b>PULSES</b>		
<i>Cicer Arietinum</i>	Bengalgram	Shanagalu
<i>Phaseolus Aureus</i>	Greengram	Pesarlu
<i>Cajanus Cajan</i>	Redgram	Kandulu
<i>Phaseolus Mungo</i>	Blackgram	Minumulu
<i>Dolichose Biflorus</i>	Horsegram	Ulavalu
<i>Phaseolus acdonitifolius</i>	Dewgram	Mittikalu or Kumkumpesalu
<i>Dolichos Lablab</i>	Fieldbean	Anumulu
<i>Vignacatjang</i>	Cowgram cowpea	Alasandulu or Bobbarlu
<b>SUGAR</b>		
<i>Saccharum Officinatum</i>	Sugarcane	Cheruku
<i>Borassus Flabellifer</i>	Palmyra	Thati
<i>Phoenix Sylvestris</i>	Date Palm	Kharjuraru
<b>CONDIMENTS AND SPICES</b>		
<i>Areca Catichu</i>	Betelnuts	Vakgalu or Pokalu
<i>Cadsicum Annum</i>	Chillies	Mirapakayalu
<i>Zingiber Officinale</i>	Ginger	Allam
<i>Cureuma Longa</i>	Turmeric	Pasupu
<i>Allium Sativum</i>	Garlic	Tellagadda or Velluli
<i>Coriandrum Sativum</i>	Coriander	Dhaniyalu or Kottumeri
<i>Tamarindus Indica</i>	Tamarind	Chintapandu
<b>FRUITS AND VEGETABLES</b>		
<i>Musa Sapientum</i>	Bananas	Aratipandu
<i>Vitis Vinifera</i>	Grapes	Draksha
<i>Magnifera indica</i>	Mangoes	Mamidi
