SEASON & CROP REPORT

**1987-88
1397 FASLI**

**BUREAU OF ECONOMICS & STATISTICS
GOVERNMENT OF ANDHRA PRADESH
HYDERABAD - 500 004.**

PREFACE

The present issue of Season and Crop Report for 1987-88 is the 32nd in the series brought out annually by the Bureau of Economics and Statistics.

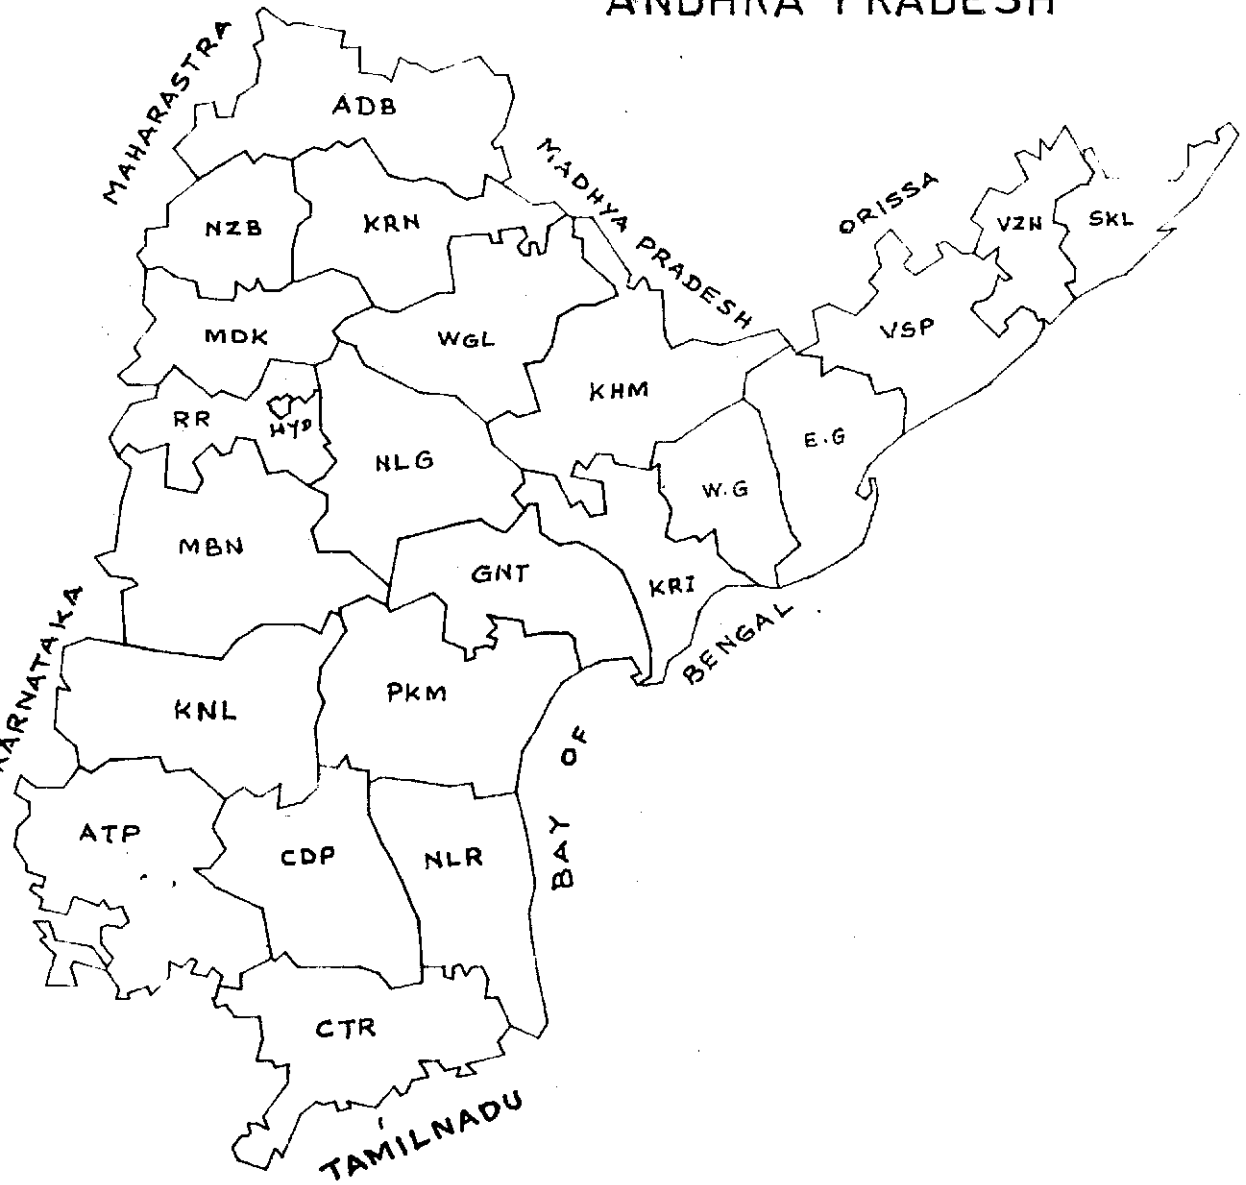

The report contains detailed information on rainfall, Seasonal Conditions, land utilisation, area irrigated by different Sources, area, production and productivity of all principal crops, agricultural wages, prices in peak marketing period and the Index numbers of agricultural production for two years i.e., 1986-87 and 1987-88. In this report an attempt has been made to compare the area, yield and production of various crops of 1986-87 and 1987-88 with the normal (i.e. average of preceding 5 years) as also the previous year as far as possible. The data for both the years of 1986-87 and 1987-88 is given side by side in all the tables except a few. It also contains information on certain agricultural inputs such as Chemical fertilisers, pesticides and credit distributed during the year as furnished by the concerned departments.

The production of Rice, Jowar, Bajra, Maize, Ragi, Korra, Redgram, Greengram, Blackgram, Horsegram, Chillies, Groundnut, Sesamum, Castor, Cotton, Mesta, Tobacco and Sugarcane is estimated on the basis of the results obtained through crop cutting experiments. For other crops the production is estimated by taking into account the yields per hectare obtained through field agency reports.

Hyderabad,
Dated. 23.6.1989.

S. LAKSHMINARAYANA,
Director.
Bureau of Economics & Statistics
Govt. of A.P., Hyderabad.

CONTENTS

Subject	Pages
A. REPORT	
1. Seasonal Conditions	1-12
2. Classification of Area-Land Utilisation	12-14
3. Area Irrigated by different sources	15-29
4. Cropping pattern	29-33
5. Food-grains-Production	33-35
6. Brief description of area and production of Important crops	35-74
7. Index Numbers of Agricultural Production in Andhra Pradesh, 1987-88	74-92
8. Review on the trends in wholesale prices of Principal Agricultural Commodities in Andhra Pradesh during 1987-88	93-94
9. Brief Review on the trends in Retail Prices of Essential Commodities in Andhra Pradesh during 1987-88	94
10. Review on the trends of Agricultural Wages in Andhra Pradesh during 1987-88	94-117
11. Gross Value of Agricultural output	118-122
B. SUMMARY TABLES (STATE)	
A. Classification of Geographical Area in A.P. 1983-84 to 1987-88	123-124
B. Net Area Irrigated by Sources in A.P. 1983-84 to 1987-88	124-125
C. Crop-wise area irrigated in A.P. 1983-84 to 1987-88	126-128
D. Area under crops in A.P. 1983-84 to 1987-88	129-133
E1 Average yield per Hectare of crops in A.P. 1983-84 to 1987-88	134-135
E2 Total out-turn of crops in A.P. 1983-84 to 1987-88	136-137
F. Average Whole sale prices of principal crops in A.P. during peak marketing period from 1983-84 to 1987-88	138
G. Average Daily Agricultural Wages in A.P from July 1987 to June 1988	139
C. DETAILED TABLES (DISTRICT-WISE)	
I. Monthly Rainfall in A.P. during 1986-87 and 1987-88	140-148
I. Classification of Geographical Area in A.P. by districts, 1986-87	149-151
1987-88	152-155
II A. Sources of Water supply in A.P. by districts	
1986-87	156-159
1987-88	160-163
B. Area Irrigated by different Sources in A.P. by districts, 1986-87	164-177
1987-88	178-193

Subject	Pages
C. Area of crops irrigated in A.P. by districts, 1986-87 and 1987-88	194-229
D. Area of crops Irrigated by different sources in A.P. by districts, 1986-87 1987-88	230-261 262-293
IV. A. Area under food crops in A.P. by districts 1986-87 and 1987-88	294-343
B. Area under Non-food crops in A.P. by districts, 1986-87 and 1987-88	344-375
C. Statement showing the details of cropped area in A.P. by districts 1986-87 and 1987-88	376-381
D. Percentage of area under principal crops in A.P. to total area sown in each district of A.P. 1986-87 and 1987-88	382-391
V. A. Yield per hectare of principal crops in A.P. by districts, 1986-87 and 1987-88	392-419
B. Total out-turn of principal crops in A.P. by districts, 1986-87 and 1987-88	420-481
VI. A. Average Wholesale prices during peak market period of certain Commodities in A.P. for the year 1987-88	482-485
B. Statement showing the Average Retail prices of certain selected Commodities in A.P. during 1987-88	486-487
C. Statement showing the average Retail prices of Rice I sort, II sort, Jowar (White), Jowar (Yellow), Bajra Ragi, and Salt in A.P. 1987-88 and 1986-87	488-515
VII. A. Statement showing the Index Numbers of Daily Agricultural Wages in A.P. 1987-88 1986-87	516-517 518-519
B. Statement showing the Average Daily agricultural wages in Rupees and Paise and the Index numbers of Daily agricultural wages in A.P. for the months of July 1986 to June 1988	520-567
VIII. Statement showing cumulative percentage of sowings and harvest of crops 1987-88	568-673
A. Farm Harvest prices (Weighted) of the principal Agricultural Commodities in A.P. for the year 1986-87 & 1987-88.	674-675

SEASON AND CROP CONDITIONS DURING 1987-88

1.0 Seasonal Conditions:

The seasonal conditions during 1987-88 were not satisfactory in the State on account of failure of South-West monsoon especially in the months of June and July, 1987. Drought conditions prevailed in the State for the fourth year in succession.

The average annual rainfall received during the year 1987-88 was 954 m.m. as against the normal rainfall of 896 m.m. the excess being a marginal of 6 per cent. All the three regions recorded excess rainfall over their respective normals. Among the districts, Visakhapatnam and Prakasam in Coastal Andhra Region, Kurnool and Anantapur in Rayalseema Region and Rangareddy and Hyderabad in Telangana Region recorded excess rainfall while the remaining 17 districts of the three regions received normal rainfall. Though the annual rainfall received by the State during 1987-88 showed an excess of 6 per cent over the normal rainfall, but was deficient by 21 per cent during South-West Monsoon period. It was untimely, not wide-spread but the excess was only due to the cyclonic rains received in November, 1987.

1.1 South-West Monsoon:

The State normally receives 67 per cent of the annual rainfall during the South-West monsoon. But the rainfall received by the State during the South-West monsoon period accounted for only 50 per cent of the total rainfall received in the year 1987-88.

During the South-West Monsoon period of June-September, 1987, the average rainfall received by the State was 475 m.m. as against the normal rainfall of 602 m.m. registering a deficit of 21 per cent. Region-wise, the deficit in rainfall was 29 per cent, in Coastal Andhra, 10 per cent in Rayalaseema and 18 per cent in Telangana.

The South-West monsoon had set in intime during the second week of June, 1987 giving hopes of a good agricultural production initially but became weak subsequently resulting in deficient rainfall during June, 1987. The overall deficit for the State during June, 1987 was 20 per cent i.e., as against the normal rainfall of 107 m.m. the average rainfall received was 86 m.m. Region-wise, the rainfall received during the month of June, 1987 was deficient in Coastal Andhra and was normal in Rayalaseema and Telangana. Barring the 4 districts of Prakasam, Nellore, Anantapur and Rangareddy, which were in receipt of excess rainfall, the remaining 19 districts received either normal or deficient rainfall. Kurnool, Cuddapah, Chittoor, Nizamabad, Medak, Warangal and Adilabad districts received normal rainfall while it was deficient in Srikakulam, Vizianagaram, visakhapatnam, East Godavari, West Godavari, Krishna, Guntur, Hyderabad, Mahabubnagar, Nalgonda, Khammam and Karimnagar districts. As the rainfall was inadequate and not wide-spread commencement of Kharif dry sowings were delayed.

In the month of July, 1987 also the behaviour of monsoon continued to be erratic. During July, 1987 the State received an average rainfall of 137 m.m. as against the normal rainfall of 170 m.m. the shortfall being 19 per cent. Region-wise, the rainfall

recorded was deficient in Coastal Andhra (-41 per cent) scanty in Rayalaseema (-68 per cent) and normal in Telangana. The rainfall received was scanty in Prakasam, Kurnool, Anantapur and Cuddapah districts while it was deficient in Srikakulam, Vizianagaram, Visakhapatnam, East Godavari, West Godavari, Krishna, Guntur, Nellore, Chittoor, Mahabubnagar and Adilabad districts. Only Rangareddy and Warangal districts received excess rainfall and it was normal in Hyderabad, Nizamabad, Medak, Nalgonda, Khammam and Karimnagar districts. On account of the inadequate rainfall received from the commencement of monsoon, kharif dry sowings were not covered in normal extents and the crops sown were also affected.

The receipt position of rainfall improved slightly in the State during the month of August, 1987. As against the normal rainfall of 157 m.m. the average rainfall received was 175 m.m. which was 11 per cent above the normal. The rainfall received in Coastal Andhra and Telangana Regions was normal while it was excess in Rayalaseema Region. In the month of August, 1987 only Srikakulam, Vizianagaram and Medak districts received deficient rainfall while it was excess in Visakhapatnam, Prakasam, Nellore, Kurnool, Anantapur, Cuddapah, Chittoor, Hyderabad and Nizamabad districts and normal in East Godavari, West Godavari, Krishna, Guntur, Rangareddy, Mahabubnagar, Nalgonda, Warangal, Khammam, Karimnagar and Adilabad districts. Paddy transplantations were completed in the delta areas of East Godavari, West Godavari and Krishna districts but could not be completed in the remaining districts for want of adequate water in the irrigation sources. The condition of standing Kharif dry crops was not satisfactory as there were prolonged dry-spells in July and August, 1987.

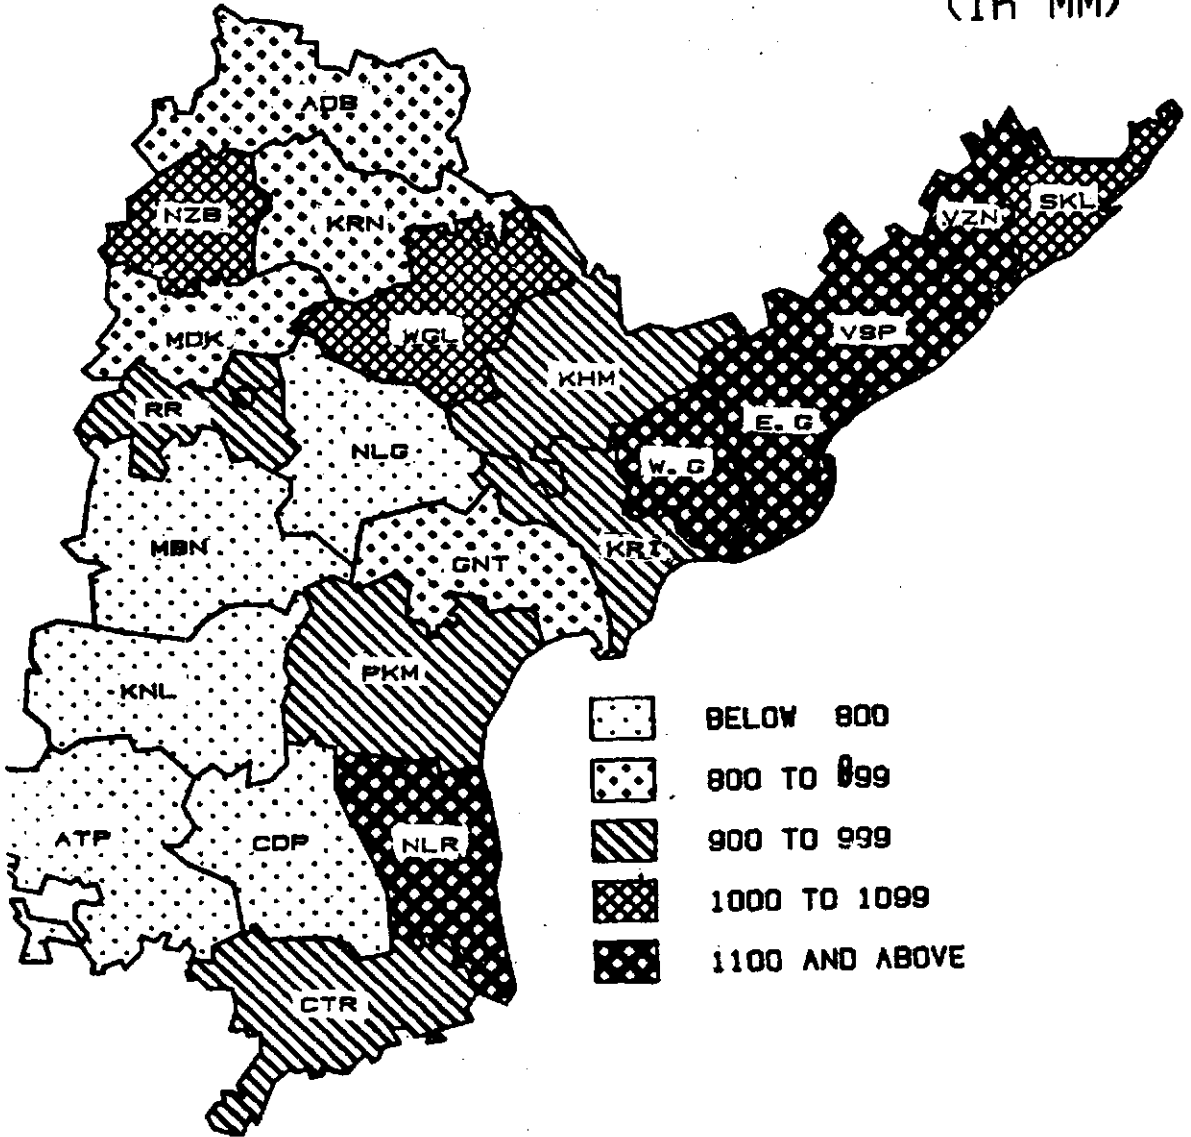

The monsoon failed miserably during the month of September, 1987. All the 23 districts recorded deficit rainfall during the month. The State as a whole received an average rainfall of 77 m.m. as against the normal rainfall of 168 m.m. recording a deficit of 54 per cent. Region-wise the deficit was 43 per cent in Coastal Andhra, 38 per cent in Rayalaseema and 67 per cent in Telangana. Srikakulam, Prakasam, Hyderabad, Nizamabad, Medak, Nalgonda, Karimnagar and Adilabad districts received scanty rainfall while the rainfall received was deficient in the remaining 15 districts. The condition of standing Wet and Dry crops was not satisfactory due to inadequate water supply, dry spells and pest attack in Srikakulam, Vizianagaram, Prakasam, Kurnool, Chittoor, Rangareddy, Karimnagar and under Nagarjunasagar Project Canals in Guntur and Nalgonda districts. The condition of crops was also not satisfactory in Nellore, Hyderabad, Nizamabad, Medak, Mahabubnagar, Khammam and Adilabad districts. However, the condition of crops was satisfactory in East Godavari, West Godavari, Krishna and Warangal districts and to some extent the crops revived in Visakhapatnam, Anantapur and Cuddapah districts.

1.2 North-East Monsoon:

Normally, during North-East Monsoon period, Chittoor, Nellore Eastern parts of Cuddapah and Southern parts of Prakasam districts receive considerable rainfall. The North-East monsoon (October to December, 1987) during 1987-88 was vigorous throughout the State and the average rainfall received was 390 m.m. as against the normal North-East monsoon rainfall of 203 m.m. recording an excess of 92 per cent. Region-wise, the excess was 73 per cent in Coastal Andhra, 63 per cent in Rayalaseema and 179 per cent in Telangana.

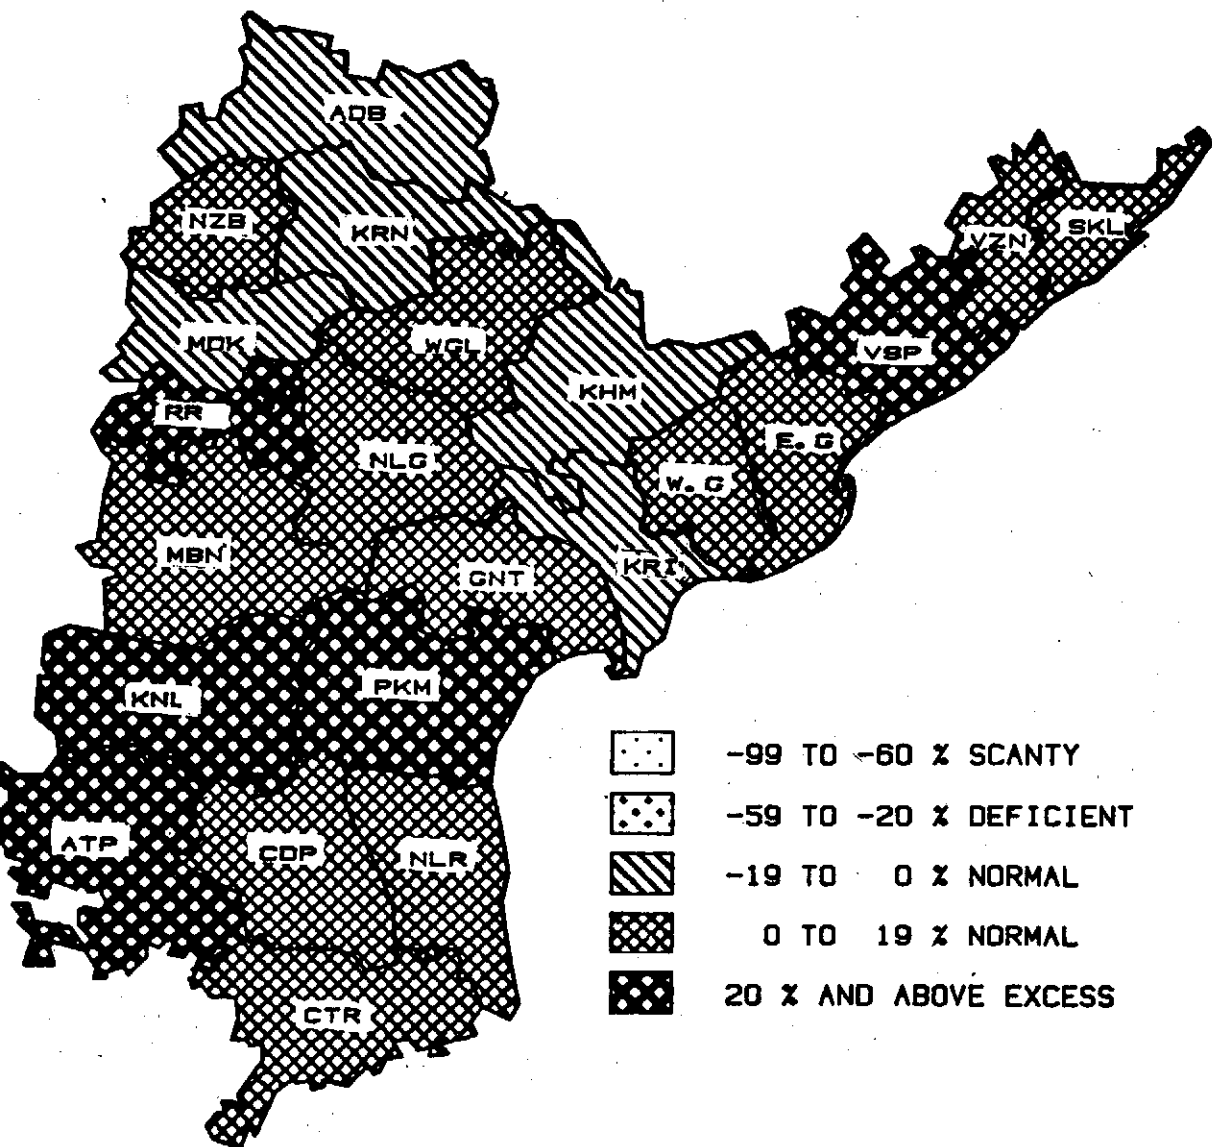

MAP-1.1

RAINFALL DURING THE YEAR 1987-88 (In MM)

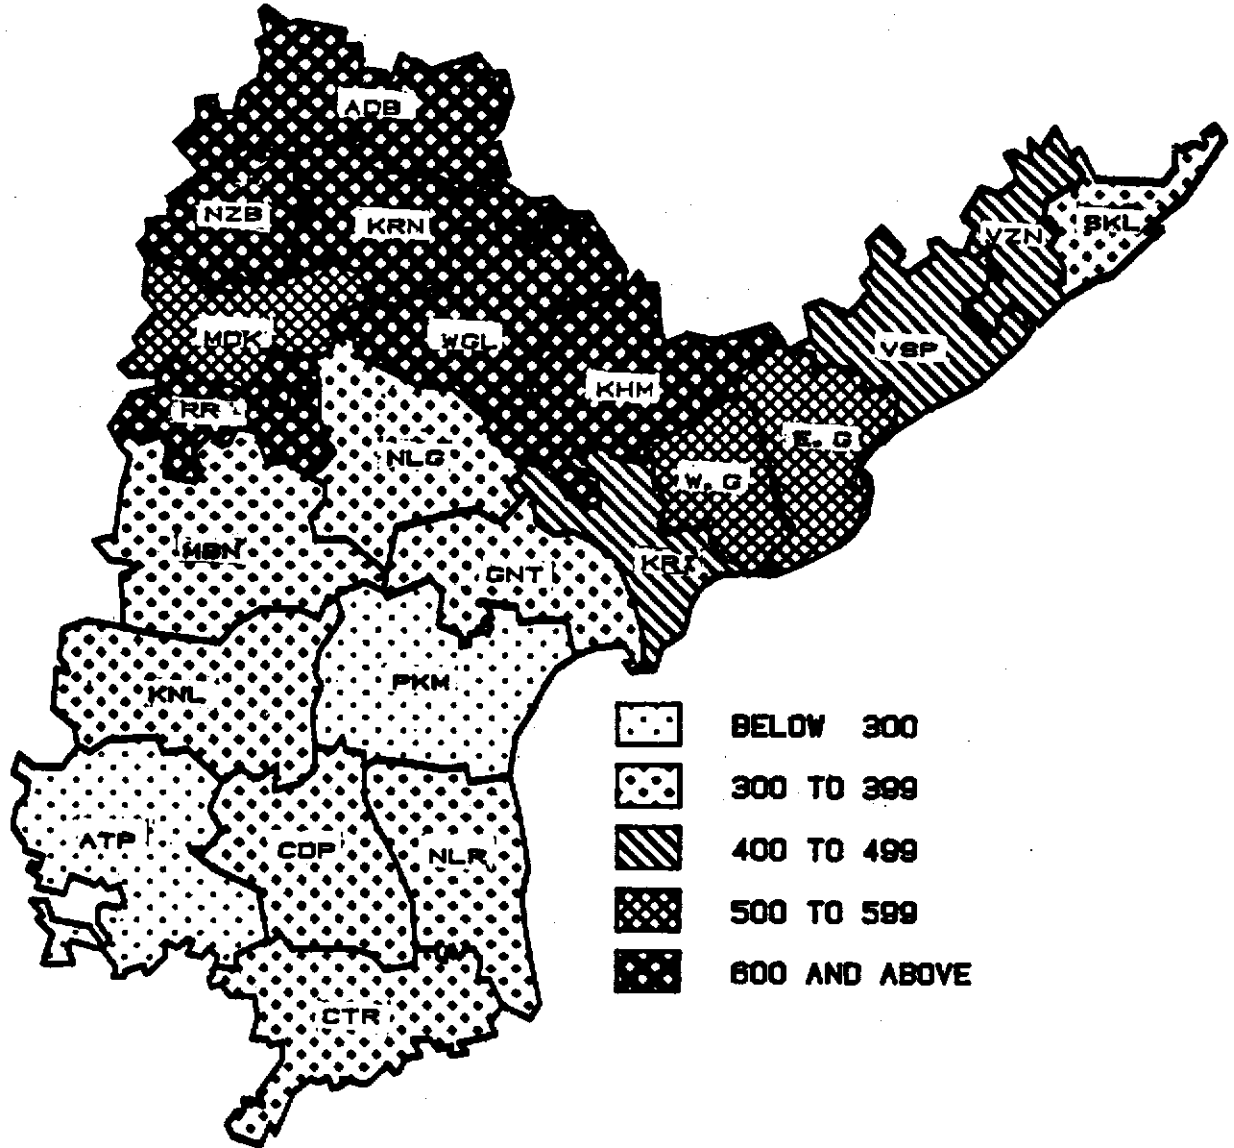

MAP_1.2

PERCENTAGE DEVIATION OF ANNUAL RAINFALL
FROM NORMAL DURING 1987-88

MAP- 1-3

RAINFALL IN SOUTH-WEST MONSOON
DURING 1987-88 (In MM)

In the month of October, 1987 depression was formed in the Bay of Bengal and under its influence all the districts received excess rainfall except Nellore and Khammam districts, where the rainfall received was normal. These wide-spread rains had brightened the prospects of Rabi cultivation but caused damage to standing Cotton crop in the mandals of Ongole Revenue Division in Prakasam district and to Paddy crop in parts of Kurnool district. In the month, the State as a whole received an average rainfall of 181 m.m. as against the normal rainfall of 122 m.m. or an excess of 48 per cent. Region-wise, the excess was 38 per cent in Coastal Andhra and 65 per cent each in Rayalaseema and Telangana. Due to excess rainfall received in October, 1987 the condition of standing crops, drinking water and fodder position improved in the State.

In the month of November, 1987 there were two spells of Cyclonic rains i.e., from (i) 3-11-1987 to 5-11-1987 and (ii) 11-11-1987 to 14-11-1987. Srikakulam, Vizianagaram, Visakhapatnam, East Godavari, West Godavari, Krishna, Guntur, Prakasam, Nellore, Kurnool, Cuddapah and Mahabubnagar districts were affected during these two spells and Nalgonda district was affected only during 3-11-1987 to 5-11-1987 cyclonic rains. Except Anantapur and Chittoor districts all the remaining 21 districts received excess rainfall during the month. The excess Rainfall ranged from 31 per cent in Cuddapah to 1087 per cent in Mahabubnagar district. The rainfall received was however normal in Anantapur and Chittoor districts. In this month the State as a whole received an average rainfall of 183 m.m. as against the normal rainfall of 67 m.m., the excess was 173 per cent. All the three regions, Coastal Andhra Rayalaseema and Telangana received excess rainfall of 130 per cent 26 per cent and 810 per cent in that order. As a result of these unprecedented heavy rains, standing crops were damaged, irrigation sources were breached and there was loss to human lives and property especially in the districts of Nellore, Prakasam and Guntur.

During the month of December, 1987 also East Godavari, West Godavari, Krishna, Guntur, Prakasam and Nellore in Coastal Andhra Region, all the four districts of Rayalaseema Region and Rangareddy district in Telangana Region received excess rainfall. In the remaining districts the rainfall received was either scanty or no rainfall at all. The state as a whole received an average rainfall of 26 m.m. as against the normal rainfall of 14 m.m. the excess being 86 per cent. Due to the excess rainfall received, Paddy crop harvested and lying in the fields was damaged slightly in Guntur district but in general the rains were helpful to the standing Rabi crops in all the districts.

1.3 Winter Period:

The total rainfall received during the two months of winter period i.e., January, 1988 and February, 1988 was 10 m.m. as against the normal rainfall of 18 m.m. showing a deficit of 44 per cent. There was hail-storm on 21-2-1988 and 22-2-1988 in Rangareddy District, on 21-2-1988 in Hyderabad district and on 15-2-1988 and 22-2-1988 in Warangal district due to which standing crops were damaged, mud and thatched houses collapsed and a few heads of cattle perished.

1.4 Hot - Weather Period :

During the 3 months of Hot-Weather period March-May, 1988 the State as a whole received an average rainfall of 79 m.m. as against the normal rainfall of 73 m.m., the excess was 8 per cent. In the month of April, 1988 there was hail-storm, twice in a few villages of duvvur Mandal i.e., on 15-4-1988 and 17-4-1988 and on 21-4-1988 in two villages of O.D. Palli Mandal in Cuddapah district. Hail-storm also occurred in 3 Mandals of Rangareddy District between 17-4-1988 and 22-4-1988 and in 11 mandals of Medak district from 16-4-1988 to 21-4-1988. These hail-storms caused damage to standing Paddy crop and to houses. In the month of May, 1988 on 15-5-1988 heavy winds blew followed by rainfall in Rajampet area of Cuddapah district causing slight damage to the standing Banana crop and Betel Orchards.

1.5 Maps showing the actual rainfall, the percentage deviation of annual rainfall from normal during 1987-88 and the actual rainfall during the South West Monsoon period and the percentage deviation of South West Monsoon rainfall from normal, district-wise are given in the maps 1.1, 1.2, 1.3 and 1.4.

2.0. Classification of Area and Utilisation.

2.1. The geographical area of the State which is 274.40 Lakh hectares; classified according to different types of land use during 1987-88 and 1986-87 is presented in the following table.

TABLE - 2.1
CLASSIFICATION OF GEOGRAPHICAL AREA 1987-88 & 1986-87.

Sl. No.	Category	Average of Preceding 5 years (from 1982-83 to 1986-87)		1987-88		1986-87	
		Area in lakh Hect.	% to the total geographical area	Area in lakh Hect.	% to the total geographical area	Area in lakh Hect.	% to the total geographical area
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	Forest	59.76	21.8	58.36	21.3	58.36	21.3
2.	Barren and Uncultivable Land	22.86	8.3	22.68	8.3	22.68	8.3
3.	Land put to Non-Agricultural uses	22.35	8.1	22.60	8.2	22.60	8.2
4.	Culturable Waste	8.79	3.2	8.64	3.1	8.64	3.1
5.	Permanent Pastures and other grazing lands	8.92	3.3	8.81	3.2	8.81	3.2
6.	Land under Misc. crops and groves not included in net area sown.	2.69	1.0	2.64	1.0	2.64	1.0

(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
7. Current fallows		27.73	10.1	31.41	11.4	35.23	12.8
8. Other fallow lands		14.44	5.3	14.51	5.3	14.96	5.5
9. Net area sown		106.86	38.9	104.74	38.2	100.47	36.6
10. Total Geographical Area :		274.40	100.0	274.40	100.0	274.40	100.0
11. Gross area sown :		124.33	45.3	121.55	44.3	116.93	42.6
12. Area sown more than once :		17.47	6.4	16.81	6.1	16.46	6.0

2.2. The appended diagram 2.1 shows the area under different categories of land use during 1987-88.

2.3. Of the total geographical area of 274.40 lakh hectares "cultivated land" consisting of Net area sown, current fallows and other fallow lands was 150.66 lakh hectares or 54.9 percent. Land not cultivated but available for cultivation (Culturable Waste, permanent pastures and other grazing lands and miscellaneous tree crops and groves not included in net area sown) was 20.09 lakh hectares or 7.3 percent and land not available for cultivation (forests, Barren and unculturable land, and Land put to non-Agricultural uses) was 103.64 lakh hectares or 37.8 percent of the total geographical area during 1987-88. Cultivated land formed 53.5 percent in Coastal Andhra, 52.3 percent in Rayalaseema and 57.6 percent in Telangana Region. Land available for cultivation to geographical area accounted for 8.7 percent, 6.7 percent and 6.6 percent in Coastal Andhra, Rayalaseema and Telangana regions respectively during 1987-88. Land not available for cultivation was of the order of 37.8, 41.0 and 35.8 percent in Coastal Andhra, Rayalaseema and Telangana regions respectively.

2.4 Forests with 58.36 lakh hectares accounted for more than 21 percent of the total geographical area. Visakhapatnam, East Godavari, Kurnool, Cuddapah, Chittoor, Mahabubnagar, Warangal, Khammam, and Adilabad districts together accounted for about 72.0 percent of the total area under forests in the State during 1987-88. The percentage of area under forests to geographical area of the districts ranged from 6.0 percent in Nalgonda district to 47.9 percent in Khammam district. The map 2.3 shows the percentage area under forests to total geographical area by districts during 1987-88.

While noticeable variations were not observed in other categories of land use, area under land put to Non-Agricultural uses increased to 22.60 lakh hectares during 1987-88 showing an increase of 1.1 percent compared to the average of preceding five years. This increase was attributable to land acquisition for housing programme, Industrial activities and new irrigation projects taken up in the State. Area under current fallows during 1987-88 increased to 31.41 lakh hectares from the normal area (average of preceding 5 years) of 27.73 lakh hectares registering an increase of 13.3 percent. This increase was attributable to successive drought conditions that prevailed in the State from 1984-85 onwards. Compared to 1986-87 the area under current fallows decreased from 35.23 lakh hectares in 1986-87 to 31.41

lakh hectares in 1987-88, due to better seasonal conditions in 1987-88.

2.5. Of the 274.40 lakh hectares of total geographical area, 38.2 percent or 104.74 lakh hectares was accounted for by Net area sown during 1987-88, as against 38.9 percent or 106.86 lakh hectares of average of preceding five years and 100.47 lakh hectares or 36.6 percent in 1986-87. The percentage of net area sown to the geographical area was more in Rayalaseema region (39.2) when compared to the other two regions of the State viz., Coastal Andhra (37.1) and Telangana (38.4). The decline in Net area sown during 1987-88 compared to the average of preceding five years was 2.0 percent. However compared to 1986-87, net area sown in 1987-88 increased by 4.3 percent. The appended map. 2.2 shows the percentage of net area sown to geographical area by districts during 1987-88.

2.6. Gross area sown during 1987-88 increased to 121.55 lakh hectares from 116.93 lakh hectares in 1986-87. Compared to 124.33 lakh hectares of normal gross area sown, the gross area sown in 1987-88 recorded a decline by 2.3 percent. While there was increase in gross area sown by 2.8 percent in Rayalaseema when compared to normal gross area, there was a decrease in Coastal Andhra and Telangana regions by 5.1 and 2.1 percent respectively during 1987-88. This decline in both Coastal Andhra and Telangana regions was attributed to severe drought conditions that prevailed during 1987-88 in these two regions of the State.

2.7. The area sown more than once accounted for 16.0 percent to the Net Area sown in the State during 1987-88. Of the 16.81 lakh hectares of area sown more than once, 11.63 lakh hectares or 69.2 percent was accounted for by Coastal Andhra, 1.33 lakh hectares or 7.9 percent by Rayalaseema and 3.85 lakh hectares or 22.9 percent was accounted for by Telangana region. the percentage of area sown more than once to net area sown was 33.9 percent in Coastal Andhra, 5.1 percent in Rayalaseema and 8.7 percent in Telangana region during 1987-88.

2.8. The intensity of cropping (Ratio of gross area sown to Net area sown) was 1.16 in 1987-88. Region wise, the intensity of cropping was of the order of 1.33, in Coastal Andhra, 1.05 in Rayalaseema and 1.09 in Telangana regions during 1987-88. This ratio was significantly high in East Godavari, West Godavari, Krishna and Guntur districts of Coastal Andhra region, Chittoor of Rayalaseema region and Nizamabad, Warangal and Karimnagar districts of Telangana region.

2.9. In the State as a whole area sown more than once during 1987-88 increased to 16.81 lakh hectares from 16.46 lakh hectares in 1986-87. While the area sown more than once in Rayalaseema and Telangana Regions in 1987-88 increased by 23.2 and 17.4 percent respectively compared to 1986-87, Coastal Andhra Region registered decrease by 4.0 percent.

The map 2.4 shows the percentage of area sown more than once to net area sown in Andhra Pradesh during 1987-88.

3.0 Area Irrigated by different sources :

3.1. Net Area Irrigated by all sources during 1987-88 was 33.69 lakh hectares which constituted 32.2 percent of the net area sown of 104.74 lakh hectares. Compared to the average net area irrigated during the preceding 5 years, the decline during 1987-88 was of the order of 6.5 percent. The following table shows the net area irrigated by different sources and its percentage to the total irrigated area. The net area irrigated by canals constituted 47.3 percent of the total net area irrigated during 1987-88.

TABLE 3.1
DISTRIBUTION OF NET AREA IRRIGATED BY SOURCES
1987 - 88 AND 1986 - 87.

Sl. No.	Source	Average of preceding 5 years.		Net area irrigated in lakh hectares.		Percentage to total net area irrigated.	
		Net area Irrigated in lakh hectares	Percent- age to total net area irri- gated.	1987-88	1986-87	1987-88	1986-87
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	Canals	17.88	49.6	15.94	17.80	47.3	50.1
2.	Tanks	8.55	23.7	6.63	7.76	19.7	21.9
3.	Tube Wells	1.81	5.0	2.30	1.93	6.8	5.5
4.	Dug Wells	6.70	18.6	7.61	6.90	22.6	19.4
5.	Other Sources	1.09	3.1	1.21	1.11	3.6	3.1
	Total Net area irri- gated.	36.03	100.0	33.69	35.50	100.0	100.0
6.	Area irriga- ted more than once	9.46	26.3	9.29	8.10	27.6	22.8
7.	Gross area irrigated	45.49	—	42.98	43.60	—	—

3.2. The appended diagram 2.5 shows the net area irrigated by different sources in the State during 1987-88.

3.3. While there was decline in net area irrigated in Coastal Andhra region by 14.8 percent during 1987-88 the net area irrigated in Rayalaseema and Telangana regions increased by 14.3 and 7.7 percent respectively over 1986-87. The percentage of 'Net Area Irrigated' to 'Net Area Sown' was of the order of 53.1 percent, 18.0 percent and 24.3 percent in Coastal Andhra, Rayalaseema and Telangana regions respectively during 1987-88.

3.4. Out of 33.69 lakh Hectares of net area irrigated, 18.24 lakhs hectares or 54.1 percent was accounted for by Coastal Andhra Region alone.

3.5. Net area irrigated by tanks decreased to 6.63 lakh hectares from 7.76 lakh hectares during 1986-87 showing 14.6 percent decline. This area of 6.63 lakh hectares under tank irrigation was the least during the last five years which was due to insufficient supplies of water to tanks. Like-wise the net area irrigated by Canals also decreased to 15.94 lakh hectares during 1987-88 from 17.80 lakh hectares during 1986-87 showing a decline of 10.5 percent. However when compared with normal, the net area irrigated by Tube wells, other wells and other sources increased by 27.1, 13.6 and 12.0 percent respectively. The increase in the net area irrigated in the above three sources was attributable to well sinking programmes taken up by the Government in a massive way under IRDP, R.L.E.G.P. etc.,

3.6. Gross Area Irrigated :

Gross area irrigated by all sources was 42.98 lakh hectares during 1987-88 compared to 43.60 lakh hectares during 1986-87 showing a decline of 1.4 percent. Gross area irrigated decreased by 5.5 percent over the normal area, during 1987-88. While gross area irrigated decreased in Coastal Andhra Region by 11.8 percent over 1986-87, there was increase in gross area irrigated by 17.1 percent and 14.3 percent respectively in Rayalaseema and Telangana regions.

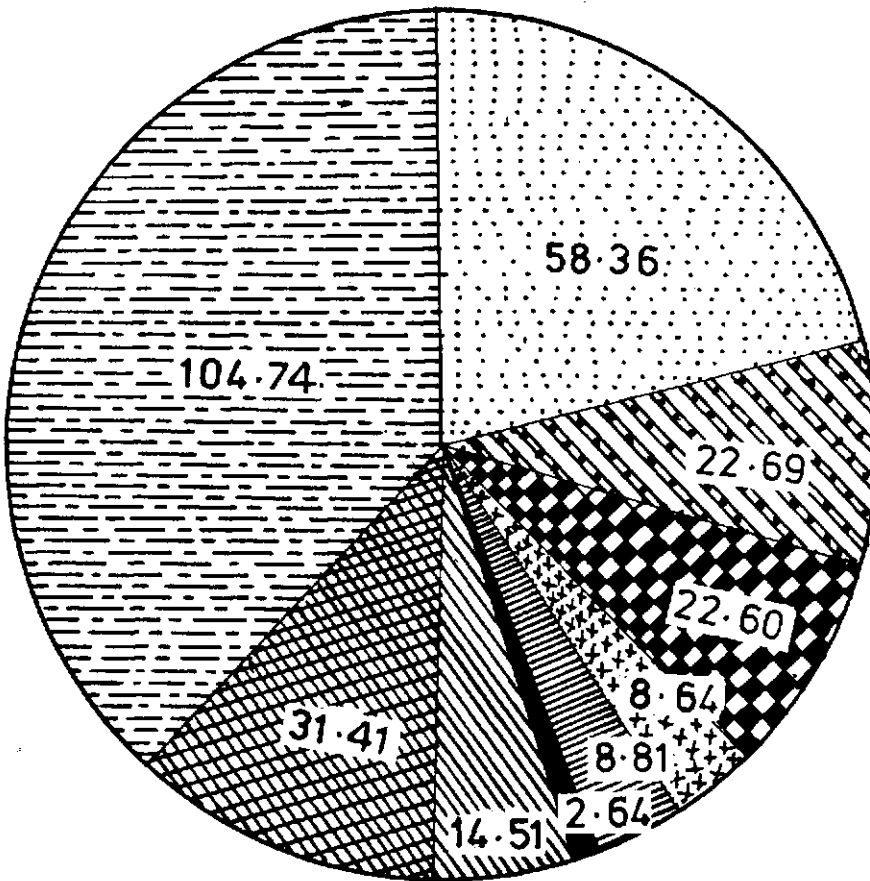

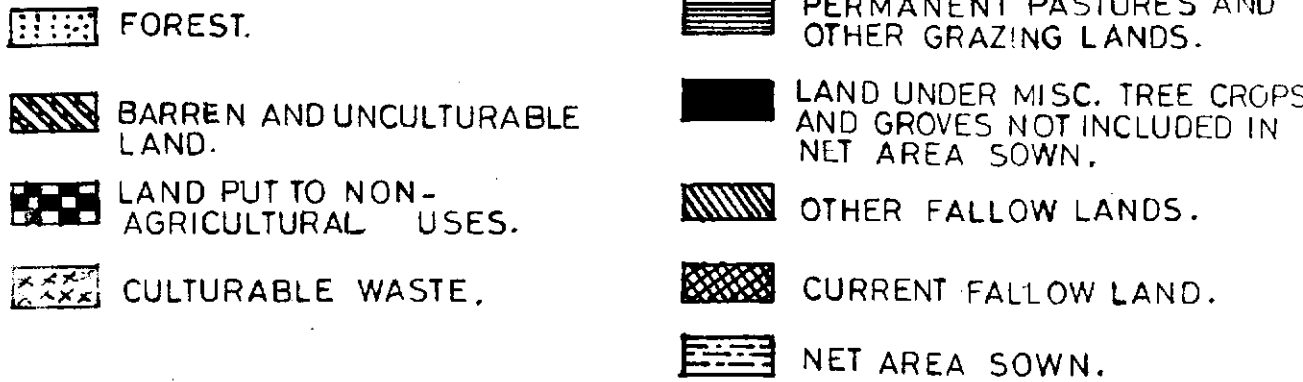

3.7. The intensity of irrigation (Ratio of gross area irrigated to net area irrigated) was 1.28 for the State during 1987-88, compared to 1.26 during the preceding 5 years. The ratio was of the order of 1.30, 1.22 and 1.26 in Coastal Andhra, Rayalaseema and Telangana regions respectively during 1987-88. The ratio was significantly high in East Godavari district of Coastal Andhra Region (1.72), Chittoor district in Rayalaseema Region (1.30) and Karimangar in Telangana Region (1.27) during 1987-88.

The percentage of gross area irrigated to gross area sown by districts during 1987-88 is shown in the map 2.6.

3.8. The following table shows the percentage of area irrigated under the crops to the total irrigated area in the State and the percentage of area irrigated to total area under the crop.

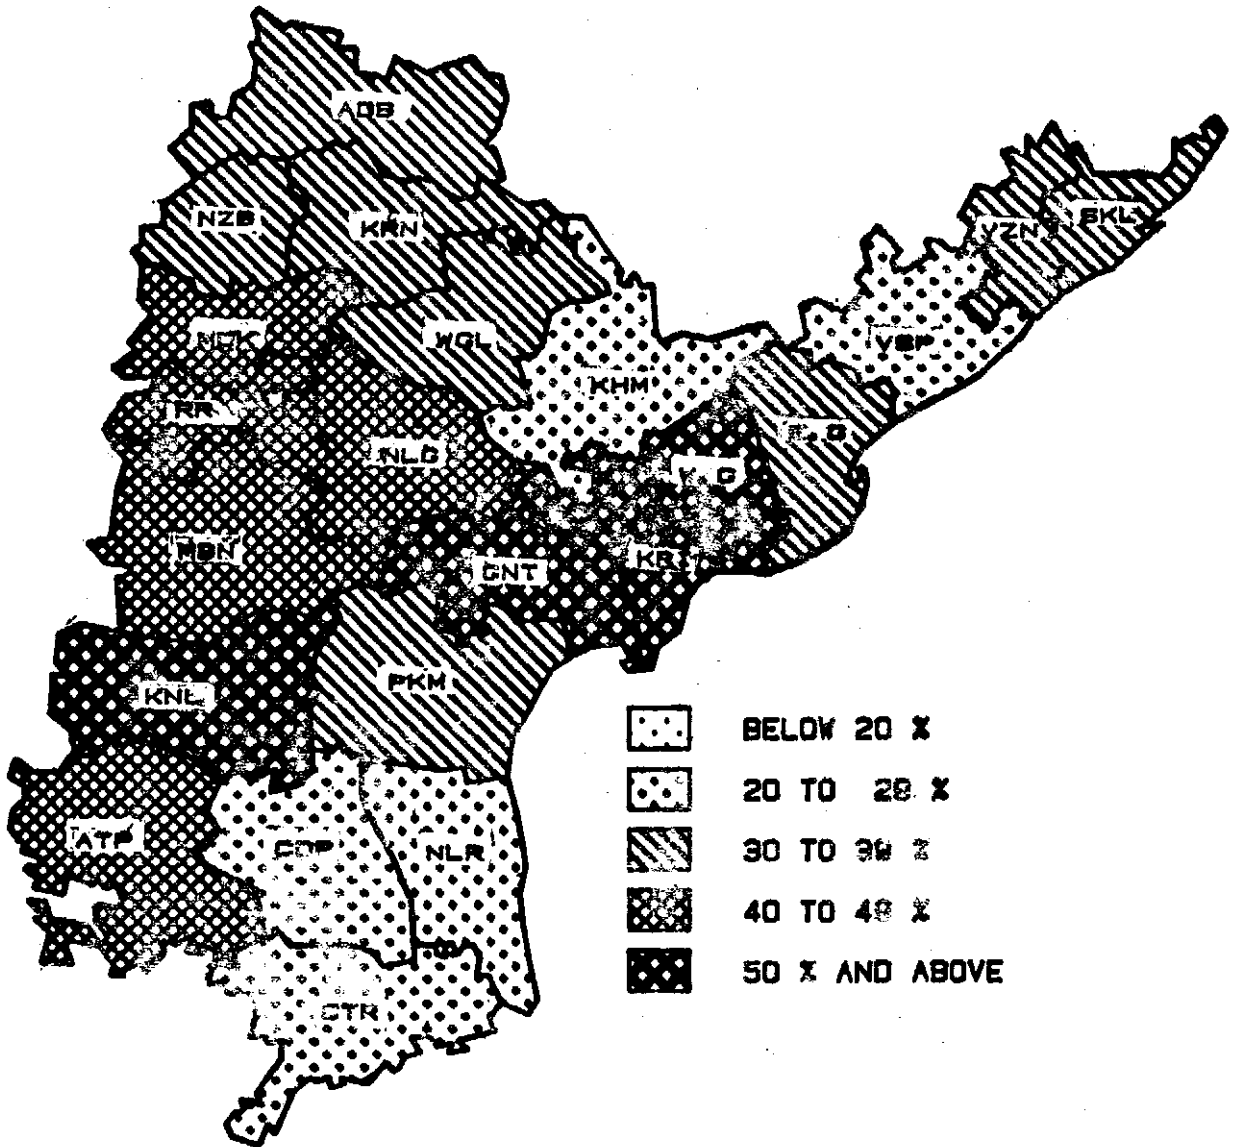

LAND UTILISATION IN ANDHRA PRADESH 1987-88

	(Gross area irrigated)									

3.9. Of the 42.98 lakh hectares of gross irrigated area, 71.4 per cent of the irrigated area was accounted for by Rice. Groundnut and Sugarcane accounted for 9.5 and 4.1 per cent of the total area irrigated during 1987-88 respectively. All over the State 95.7 per cent of Rice, 99.4 per cent of Sugarcane and 56.0 per cent of Chillies were under irrigated conditions.

4.0. Cropping Pattern:

4.1. The gross cropped area increased to 121.55 lakh hectares during 1987-88 from 116.93 lakh hectares during 1986-87 showing an increase of 4.0 per cent. When compared with the normal gross area of 124.33 lakh hectares, the decrease was 2.3 per cent in

gross cropped area during 1987-88. While Coastal Andhra region registered decrease in gross cropped area by 6.8 percent, the regions of Rayalaseema and Telangana have shown increasing trend in the Gross Cropped area by 13.3 and 11.0 per cent respectively during 1987-88 over 1986-87. All the districts in Coastal Andhra Region except East Godavari and Nellore have registered decrease in gross cropped area during 1987-88. All the four districts in Rayalaseema, and all the ten districts in Telangana Region except Nizamabad and Adilabad, have registered increase in gross cropped area during 1987-88 over 1986-87. The increase ranged from 6.8 per cent in Nalgonda district to 25.0 per cent in Mahabubnagar district during 1987-88 over 1986-87.

4.2. The following table shows the area under different crops and their percentage to the total cropped area during 1986-87 and 1987-88.

Table 4.1

Area Under Crops and its percentage to the total cropped area 1987-88 and 1986-87

Sl. No.	Crop	Average of Preceding 5 years		1987-88		1986-87	
		Area in Lakh hectares	Percentage share in total cropped area	Area in lakh hectares	Percentage share in total cropped area	Area in lakh hectares	Percentage share in total cropped area

29. Castor		2.94	2.4	3.10	2.6	2.73	2.3
30. Other Oil seeds		1.10	0.9	2.09	1.6	1.46	1.3
Total Oil seeds		22.29	17.9	26.46	21.7	22.15	18.9
31. Tobacco		1.83	1.5	1.07	0.9	1.46	1.3
32. Fodder crops		1.53	1.2	1.33	1.1	1.57	1.3
33. Other Non-food crops		1.49	1.2	1.67	1.4	1.55	1.3
Total Non-food crops		32.15	25.9	36.27	29.8	30.84	26.3
Total cropped area		124.34	100.0	121.55	100.0	116.93	100.0

4.3. Out of 121.55 lakh hectares of total cropped area during 1987-88, 75.68 lakh hectares or 62.3 per cent was accounted for by foodgrain crops. Rice, Wheat, Jowar, Bajra, Maize, Ragi, Korra, Varagu, Samai other small millets and pulses comprise foodgrain crops. Rice and Jowar together accounted for 40.6 per cent of the total cropped area in the State during 1987-88.

4.4. The total area under foodgrain crops during 1987-88 was 75.68 lakh hectares as against 83.17 lakh hectares being the normal area and 77.05 lakh hectares during 1986-87 showing 7.0 percent decline and it was the least during the last five years. The decline was due to failure of South West Monsoon during the sowing period and insufficient water levels in irrigation sources. While Coastal Andhra region registered decrease in area under foodgrains by 13.0 per cent, Rayalaseema and Telangana regions have registered increase in area under foodgrains by 3.5 and 9.1 per cent respectively when compared to 1986-87. All the districts except East Godavari and Nellore in Coastal Andhra region have registered decline in area under foodgrains during 1987-88 over 1986-87. The decline in area ranged from 4.6 per cent in West Godavari district to 54.3 percent in Srikakulam district. In Rayalaseema and Telangana regions all the districts except Anantapur, Nizamabad and Adilabad districts registered increase in area under foodgrains during 1987-88. The increase in area ranged

from 0.6 percent in Cuddapah district to 26.5 percent in Mahabubnagar district. All the foodgrain crops except jowar, varagu, Redgram, Blackgram, Horsegram and cowgram have registered decline in area during 1987-88 over 1986-87.

4.5 The area under foodgrains during Kharif 1987-88 was 50.63 lakh hectares as against 53.68 lakh hectares in 1986-87 showing a decrease of 5.7 percent over 1986-87 and this area was the least during the last five years. When compared with the normal area of 57.30 lakh hectares the decline in area under foodgrains during Kharif 1987-88 was 11.6 percent. Normal areas under dry crops could not be sown due to failure of South West monsoon and even the area under wet crops including rice could not be covered due to insufficient water available in minor irrigation sources and inadequate flow of water in canals. All the foodgrain crops except jowar, varagu, Redgram, Greengram and Horsegram have registered decline in area during Kharif 1987-88 over 1986-87. While the area under Kharif foodgrains recorded increase in Rayalaseema and Telangana Regions by 6.6 and 5.7 percent respectively, Coastal Andhra Region registered decline in Kharif foodgrains area by 22.0 percent. All the districts except Nellore, Kurnool, Ananthapur, Chittoor, Rangareddy, Medak, Mahabubnagar, Warangal, and Karimnagar have registered decline in area under foodgrains during Kharif 1987-88 over 1986-87.

4.6 Area under foodgrain crops during rabi 1987-88 was 25.05 lakh hectares compared to 23.37 lakh hectares in Rabi 1986-87 showing an increase of 7.2 percent over 1986-87. Compared to the normal Rabi area of 25.86 lakh hectares, the decline was only 3.1 percent. Coastal Andhra and Telangana regions have recorded increase in Rabi area during 1987-88 over 1986-87 by 2.2 percent and 19.3 percent respectively. Rayalaseema region has shown decline by 3.9 percent. All the districts in the State except Nellore, Kurnool and Anantapur registered increase in foodgrains area in Rabi 1987-88 over 1986-87. The area under foodgrains increased during Rabi 1987-88 in respect of Rice, Jowar, Maize, blackgram and Horsegram, compared to 1986-87.

4.7 Out of 121.55 lakh hectares of total cropped area, 85.28, lakh hectares or 70.2 percent was under food crops. Besides foodgrain crops, Chillies, Sugarcane, Onions, Vegetables and fruits constitute food crops.

The table below shows the area and production under food grains in Andhra Pradesh from 1983-84 to 1987-88 as also the average of preceding 5 years.

TABLE 4.2

**AREA AND PRODUCTION UNDER FOOD GRAINS IN ANDHRA PRADESH
FOR THE PERIOD FROM 1983-84 TO 1987-88**

Sl. No.	YEAR	Area in lakh hectares.			Production in Lakh tonnes		
		Kharif	Rabi	Total	Kharif	Rabi	Total
1.	1983-84	63.89	28.31	92.20	81.34	37.48	118.82
2.	1984-85	54.80	25.74	80.54	62.69	33.46	96.15
3.	1985-86	54.40	23.87	78.27	73.63	33.10	103.73
4.	1986-87	53.68	23.37	77.05	61.17	30.46	91.63
5.	1987-88	50.63	25.05	75.68	63.76	35.24	99.00
6.	Average of preceding 5 years. (1982-83 to 1986-87)	57.30	25.86	83.16	70.98	33.44	104.42

4.8. Fibres, Oil Seeds, Tobacco, Dyes, Fodder and green manure crops constitutes non-food crops, The area under Non-food crops was 36.27 lakh hectares during 1987-88 compared to 30.84 lakh hectares during 1986-87 recording an increase of 17.6 per cent, Compared to the average of preceding 5 years, there was increase in area under non food crops by 12.8 percent.

5.0 Foodgrain Production :

5.1. The production of foodgrains during 1987-88 was 99.00 lakh tonnes. Compared to the record production of 118.82 lakh tonnes during 1983-84 and normal production of 104.42 tonnes the production of foodgrains during 1987-88 recorded a decline by 16.7 and 5.2 percent respectively. While Rayalaseema and Telangana regions have recorded increase in foodgrain production during 1987-88 over 1986-87 by 30.1 percent and 26.3 percent respectively, Coastal Andhra Region registered decline in production of foodgrains by 5.4 percent over 1986-87. The production of foodgrains increased in all the districts in the state, except Srikakulam, Vizianagaram, Visakhapatnam, Krishna, Guntur, Prakasam, Nalgonda, and Adilabad during 1987-88 over 1986-87.

5.2. The production of foodgrains during Kharif 1987-88 was 63.76 lakh tonnes when compared to 61.17 lakh tonnes during 1986-87 showing increase by 4.3 percent. When compared to the average production of preceding 5 years of 70.98 lakh tonnes there was decrease by 10.2 percent. While Coastal Andhra region recorded decline in production by 8.3 percent, Rayalaseema and Telangana regions have registered increase by 23.0 and 17.9 percent respectively over 1986-87. All the districts except

Srikakulam, Vizianagaram, Visakhapatnam, Krishna, Guntur, Prakasam, Nalgonda and Adilabad have registered increase in Kharif 1987-88 production over 1986-87.

5.3. All the foodgrain crops in the State except Bajra, Ragi, other small millets, Redgram, and Horsegram have registered increase in production during 1987-88.

5.4. The production of foodgrains during Rabi 1987-88 was of the order of 35.24 lakh tonnes compared to 30.46 lakh tonnes during Rabi 1986-87 and 33.44 lakh tonnes being the average of preceding 5 years, the increase being 15.7 and 5.4 percent respectively. Prakasam, Nellore and all the districts in Rayalaseema and Telangana have registered increase in foodgrain production during Rabi 1987-88 over 1986-87.

Production of Foodgrains crop-wise during 1987-88 and 1986-87 are given in the following table together with the average of preceding 5 years.

TABLE 5.1

Production of Foodgrains crop-wise and its percentage to total food-grains production during 1987-88 & 1986-87

Sl. No.	Name of the crop	Average of Preceding 5 years		1987-88		1986-87	
		Production in lakh tonnes	% to total foodgrain production	Production in Lakh tonnes	% to total food grain production	Production in lakh tonnes	% to total food grain Production

6.0. Brief description of area and production of important crops.

6.1. The trends in the area, production and yield per hectare of principal crops are discussed briefly in the following paragraphs.

RICE :

6.2. Rice is the staple principal food crop grown in all the districts of the State in both the seasons. It accounted for 26.4 percent of the total cropped area in the State and 71.6 of the total foodgrain production during 1987-88.

6.3. The area, production and yield per hectare of Rice (season-wise) for the last five years are presented in the following Table.

TABLE - 6.1

Area, Production and Yield per Hectare of Rice from 1983-84 to 1987-88.

Sl. No.	Year	Kharif			Rabi			Total		
		Area in lakh Hects.	Production in lakh tonnes	Yield in Kgs/Hect.	Area in lakh Hects.	Production in lakh tonnes	Yield in Kgs/Hect.	Area in lakh Hects.	Production in lakh tonnes	Yield in Kgs/Hect.
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1.	1987-88	22.34	46.69	2132	9.73	24.18	2551	32.07	70.87	2258
2.	1986-87	26.25	45.87	1786	8.34	20.04	2473	34.59	65.91	1951

(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
3.	1985-86	26.60	57.04	2198	7.92	19.09	2483	34.52	76.13	2264
4.	1984-85	25.92	48.58	1916	9.05	20.51	2328	34.97	69.09	2021
5.	1983-84	30.48	62.10	2085	11.15	25.80	2370	41.63	87.90	2161
6.	Average of prece- ding five years (1982-83 to to 86-87)	27.23	53.75	2016	9.19	21.39	2397	36.42	75.15	2111

6.4. The area under Rice and Jowar from 1977-78 to 1987-88 are depicted in the graph No. 2.7

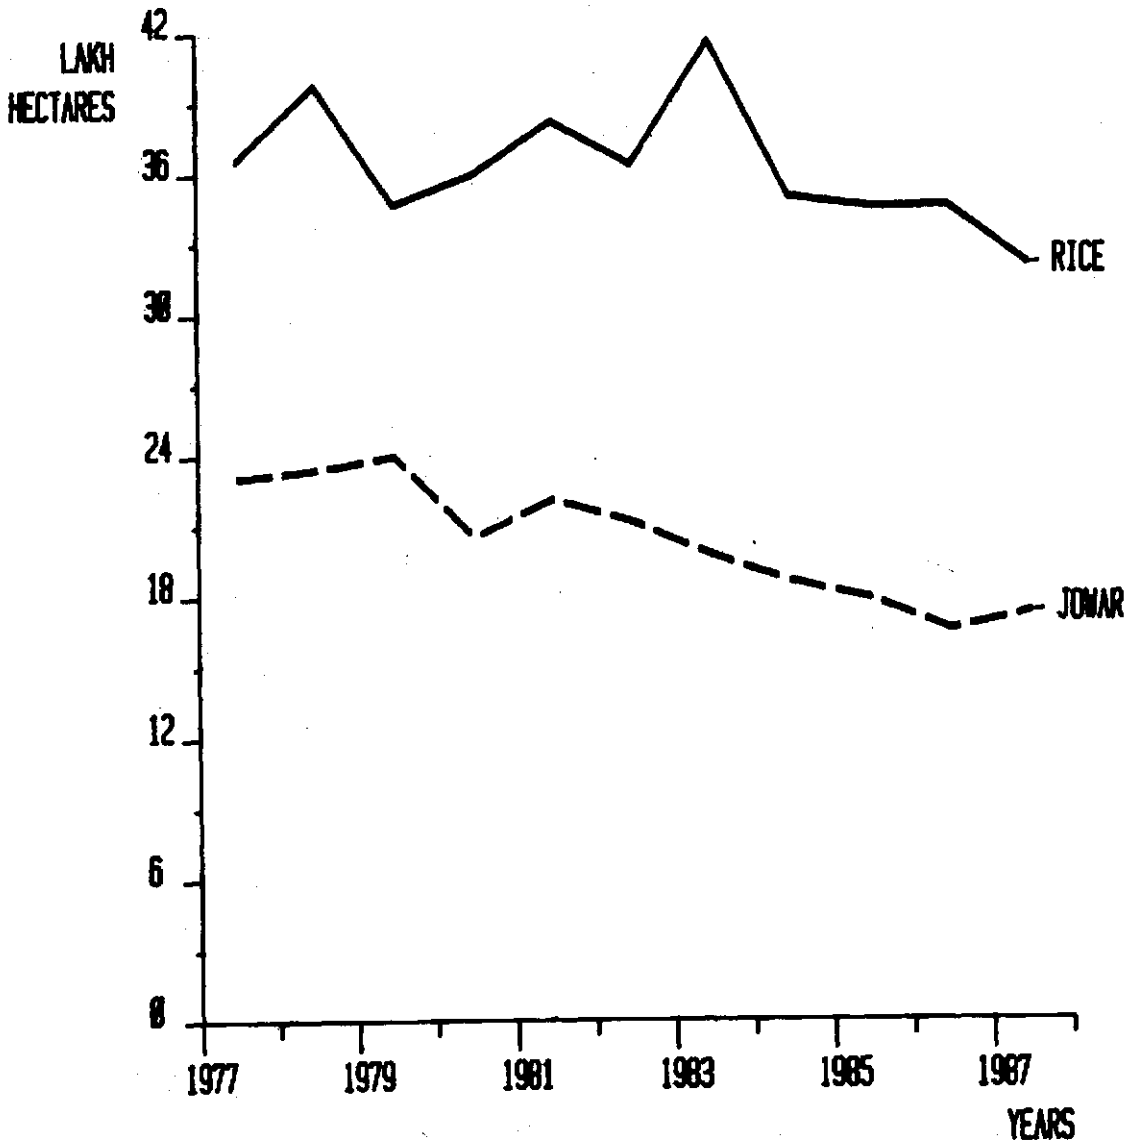

6.5. The area under Rice with 32.07 lakh hectares in 1987-88 was the least during last five years. The area under Rice declined when compared to the average area of preceding five years by 11.9 percent. It also declined when compared to 1986-87, by 8.3 percent. While there was a decrease in area under Rice in Coastal Andhra by 17.5 percent, compared to 1986-87, the area under Rice increased in Rayalaseema and Telangana regions by 26.4 and 11.8 percent respectively. All the districts in Coastal Andhra, except Nellore have registered decrease in area under Rice. All the four districts of Rayalaseema and all the districts of Telangana Region except Khammam, Nizamabad and Adilabad registered increase in area under Rice during 1987-88 over 1986-87.

6.6. The area under Rice during Kharif 1987-88 with 22.34 lakh hectares was the least during the last five years. Compared with the average area of preceding five years (27.23 lakh hectares), the area under Rice in 1987-88 declined by 18.0 percent. Compared to 1986-87 the decline was 14.9 percent. The highest area of 30.48 lakh hectares was recorded during 1983-84. Coastal Andhra and Telangana regions have registered decrease in area under Rice during Kharif 1987-88 over 1986-87 by 18.9 and 0.8 percent respectively. Rayalaseema Region recorded 23.5 percent increase over 1986-87. The area under Rice during Kharif 1987-88 decreased in all the districts of Coastal Andhra region except Nellore. All the four Rayalaseema districts have recorded increase except Anantapur where the area remained constant. As regards Telangana region, the districts of Rangareddy, Medak, Mahabubnagar, Warangal and Karimnagar, have shown upward trend in the area under Rice during Kharif 1987-88 over 1986-87.

6.7. The area under Rabi, Rice with 9.73 lakh hectares was the second highest during the last five years after 11.15 lakh hectares attained in 1983-84. However when compared with the Rabi area of 1986-87 and the average of preceding five years there was increase by 16.7 and 5.9 percent respectively. The area under

GRAPH - 2.7

AREA UNDER RICE AND JOWAR IN ANDHRA PRADESH

Rabi, Rice increased in all the districts of the State during 1987-88 over 1986-87 except Nellore and East Godavari districts. In Visakhapatnam and Kurnool districts the area remained the same.

6.8. The production of Rice during kharif 1987-88 was 46.69 lakh tonnes which was the second least production during the last five years after 45.87 lakh tonnes obtained in 1986-87. Compared to the average of preceding five years (53.75 lakh tonnes) there was a decline in production by 13.1 percent and when compared to the production of 1986-87 Kharif (45.87 lakh tonnes) the increase in production was 1.8 percent during Kharif 1987-88. Graph 2.8 showing the production of Rice and Jowar from 1977-78 to 1987-88 is given.

6.9. Eventhough there was a decline of 14.9 percent in area under Rice during kharif 1987-88 over 1986-87, the production increased due to increase in yield to 2132 Kgs per hectare from 1786 Kgs per hectare in 1986-87. Coastal Andhra Registered decline by 5.3 percent in Kharif Rice production while Rayalaseema and Telangana regions have shown increase in Rice production by 26.9 and 12.6 percent respectively over 1986-87.

6.10. All the districts except Srikakulam, Vizianagaram, Visakhapatnam, Krishna, Guntur, Prakasam, Nalgonda, Khammam and Adilabad have registered increase in Kharif Rice production during 1987-88 over 1986-87.

6.11. The yield per hectare of Rice increased to 2258 Kgs per hectare in 1987-88 from 1951 Kgs per hectare in 1986-87 and the average of preceding five years being 2111 Kgs. This yield of 2258 Kgs per hectare in 1987-88 was the second highest yield after 2264 Kgs per hectare obtained in 1985-86 during the last five years. The yield per hectare of Rice increased in all the districts in the State except Srikakulam, Vizianagaram, Visakhapatnam, Krishna, Guntur, Prakasam, Nellore, Cuddapah, Nalgonda, Karimnagar and Adilabad during 1987-88 over 1986-87. The reasons for increase in yields was attributable to better seasonal conditions that prevailed during 1987-88 compared to 1986-87 in these districts.

6.12. The production of Rice during Rabi 1987-88 with 24.18 lakh tonnes was the second highest production during the last five years after the record production of 25.80 lakh tonnes achieved during 1983-84. The increase in area coupled with increase in yield contributed to the increase in production during Rabi 1987-88. Increase in production during Rabi 1987-88 over 1986-87 was of the order of 20.7 percent. when compared to the average production of preceding 5 years the production of Rice during Rabi 1987-88 increased by 13.0 percent. Region-wise, Coastal Andhra Rayalaseema and Telangana have registered increase in Rabi Rice production during 1987-88 over 1986-87 by 0.4, 87.0 and 122.3

percent respectively. All the districts except East Godavari, West Godavari, Krishna, have registered increase in Rabi Rice production during 1987-88 over 1986-87. The production remained unchanged in Hyderabad and Adilabad districts. The yield of Rabi Rice increased to 2551 Kgs in 1987-88 from 2473 Kgs in 1986-87 showing 3.2 percent increase. This yield of 2551 Kgs per hectare was the highest yield obtained so far in the State. The production of Rice during 1987-88 district-wise is shown in the map. 2.9.

JOWAR :

6.13. Next to Rice, Jowar is the principal food-grain crop in the State sown both in Kharif and Rabi seasons under rainfed conditions. The area under Jowar rose to 17.30 lakh hectares during 1987-88 from 16.56 lakh hectares during 1986-87 showing an increase of 4.5 percent. Of the 17.30 lakh hectares area under Jowar, 12.12 lakh hectares or 70.1 percent of the total area was accounted for by Telangana Region only. Prakasam, Kurnool, Rangareddy, Medak, Mahabubnagar, Nalgonda, Warangal, Khammam and Adilabad districts together accounted for about 82.4 percent of the total area under Jowar in 1987-88. Andhra Pradesh ranked fourth in area under Jowar among all the States in India as per the final forecast reports released by the Economic and Statistical Adviser to Government of India.

6.14. The following table shows the area, Production and yield per hectare of Jowar from 1983-84 to 1987-88.

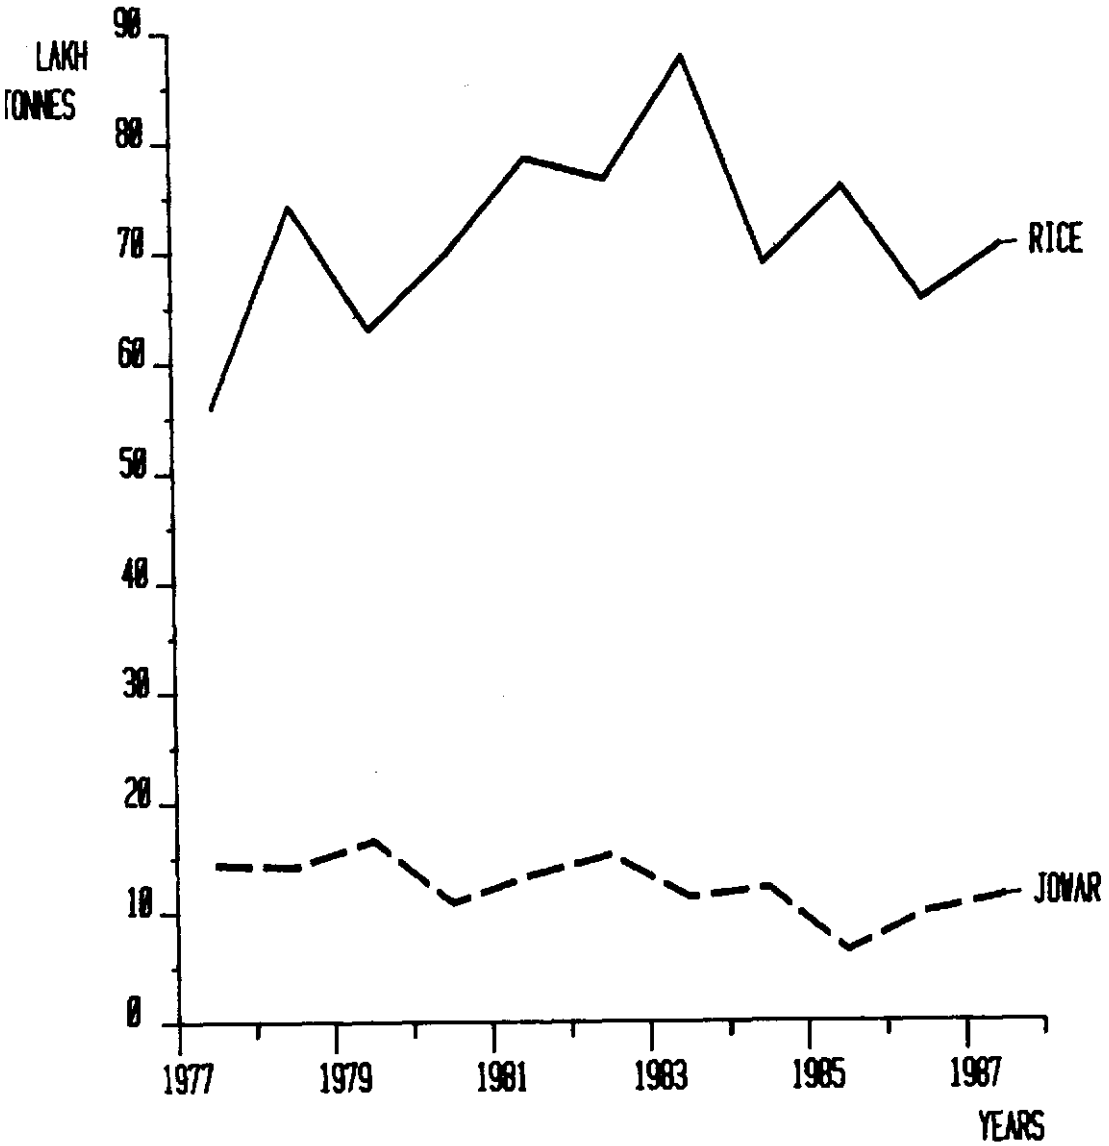

TABLE - 6.2

Area, Production and Yield per hectare of Jowar
from 1983-84 to 1987-88.

Sl. No.	Year	Kharif			Rabi			Total		
		Area in lakh hect.	Production in lakh Tonnes	Yield in Kgs/Hect.	Area in lakh Hect.	Production in lakh Tonnes	Yield in Kgs/Hect.	Area in lakh Hect.	Production in lakh Tonnes	Yield in Kgs/Hect.

GRAPH - 2-8

PRODUCTION OF RICE AND JOWAR IN ANDHRA PRADESH

MAP-2.9

PRODUCTION OF RICE DURING 1987-88
(In '000 Tonnes)

6.15. The area under Jowar was decreasing since 1983-84 to 1986-87. But during the year 1987-88 it rose to 17.30 lakh hectares from 16.56 lakh hectares during 1986-87 recording 4.5 percent increase. This area was the second lowest during the last 5 years after 16.56 lakhs in 1986-87.

6.16. The area under Kharif Jowar increased to 9.28 lakh hectares during 1987-88 from 8.62 lakh hectares during 1986-87 showing an increase of 7.7 percent. Compared to the average of preceding five years there was increase by 2.4 percent.

6.17. The area under Rabi Jowar increased to 8.02 lakh hectares during 1987-88 from 7.94 lakh hectares in 1986-87 showing a marginal increase of 1.0 percent. When compared to the average area of preceding five years (9.73 lakh hectares), there was decrease by 17.6 percent.

6.18. The production of Jowar during 1987-88 was of the order of 11.46 lakh tonnes as against 9.94 lakh tonnes during 1986-87 recording an increase by 15.3 percent. When compared to the average production of preceding five years (12.03 lakh tonnes) the production during 1987-88 decreased by 4.7 percent. All the districts except Vizianagaram, Visakhapatnam, Guntur, Prakasam, Anantapur, Cuddapah, Chittoor, Rangareddy, Nalgonda and Karimnagar have recorded increase in production of Jowar during 1987-88 over 1986-87. In the districts of Srikakulam, East Godavari and Nellore, the production remained the same.

6.19. The production of Jowar during Kharif 1987-88 with 5.99 tonnes was the highest during the last five years. When compared to 1986-87 there was an increase in Kharif Jowar production by 22.5 percent. Like-wise the production of Rabi Jowar also increased to 5.47 lakh tonnes during 1987-88 from 5.05 lakh tonnes during 1986-87 showing an increase of 8.3 percent, in 1987-88 over 1986-87.

6.20. The increase in area in both the Kharif and Rabi Seasons coupled with increase in yield per hectare in both the seasons resulted in increase in production of Jowar during 1987-88 over 1986-87. The yield per hectare of Jowar rose to 662 Kgs in 1987-88 from 600 Kgs in 1986-87.

6.21. The Map 3.0 shows the production of Jowar district-wise during 1987-88.

BAJRA :

6.22. Bajra crop is generally sown under rainfed conditions in the State mostly in Kharif season. The area under the crop constituted 2.6 percent of the total cropped area during 1987-88. Visakhapatnam, Prakasam, Anantapur, Kurnool, Mahabubnagar and

Nalgonda districts which are important for this crop accounted for nearly 77.0 per cent of the total area under the crop in the State during 1987-88. The area, production and yield per hectare of Bajra from 1983-84 to 1987-88 as also normals are given in the following Table.

TABLE - 6.3

Area, Production and Yield per hectare of Bajra
from 1983-84 to 1987-88.

Sl. No.	Year	Area in lakh hectares	Production in lakh tonnes	Yield in Kgs./ hectare
(1)	(2)	(3)	(4)	(5)
1.	1987-88	3.12	1.56	500
2.	1986-87	3.36	1.96	583
3.	1985-86	3.56	2.09	588
4.	1984-85	3.94	2.06	521
5.	1983-84	4.93	3.61	732
6.	Average of preceding 5 years. (1982-83 to 1986-87)	4.14	2.46	590

6.23. The area, yield and production of Bajra during 1987-88 with 3.12 lakh hectares, 500 Kgs. per hectare and 1.56 lakh tonnes respectively were the lowest during the last five years and showing a perceptible declining trend. Compared to the average of preceding five years, area, yield and production declined by 24.6, 15.3 and 36.6 per cent respectively. The decline in area coupled with decline in yield resulted in decline in production of Bajra during 1987-88.

Ragi:

6.24. Though Ragi crop is sown in both the seasons, Kharif crop accounted for about 75.7 per cent of the total area under the crop in the State during 1987-88, Srikakulam, Vizianaagaram, Visakhaapatnam, Anantapur, Chittoor and Mahabubnagar districts together accounted for nearly 88.0 per cent of the total area under the crop during 1987-88. Area, Production and Yield per hectare of Ragi from 1983-84 to 1987-88 are given below in Table-6.4.

MAP_3.0

PRODUCTION OF JOWAR DURING 1987-88 (In '000 Tonnes)

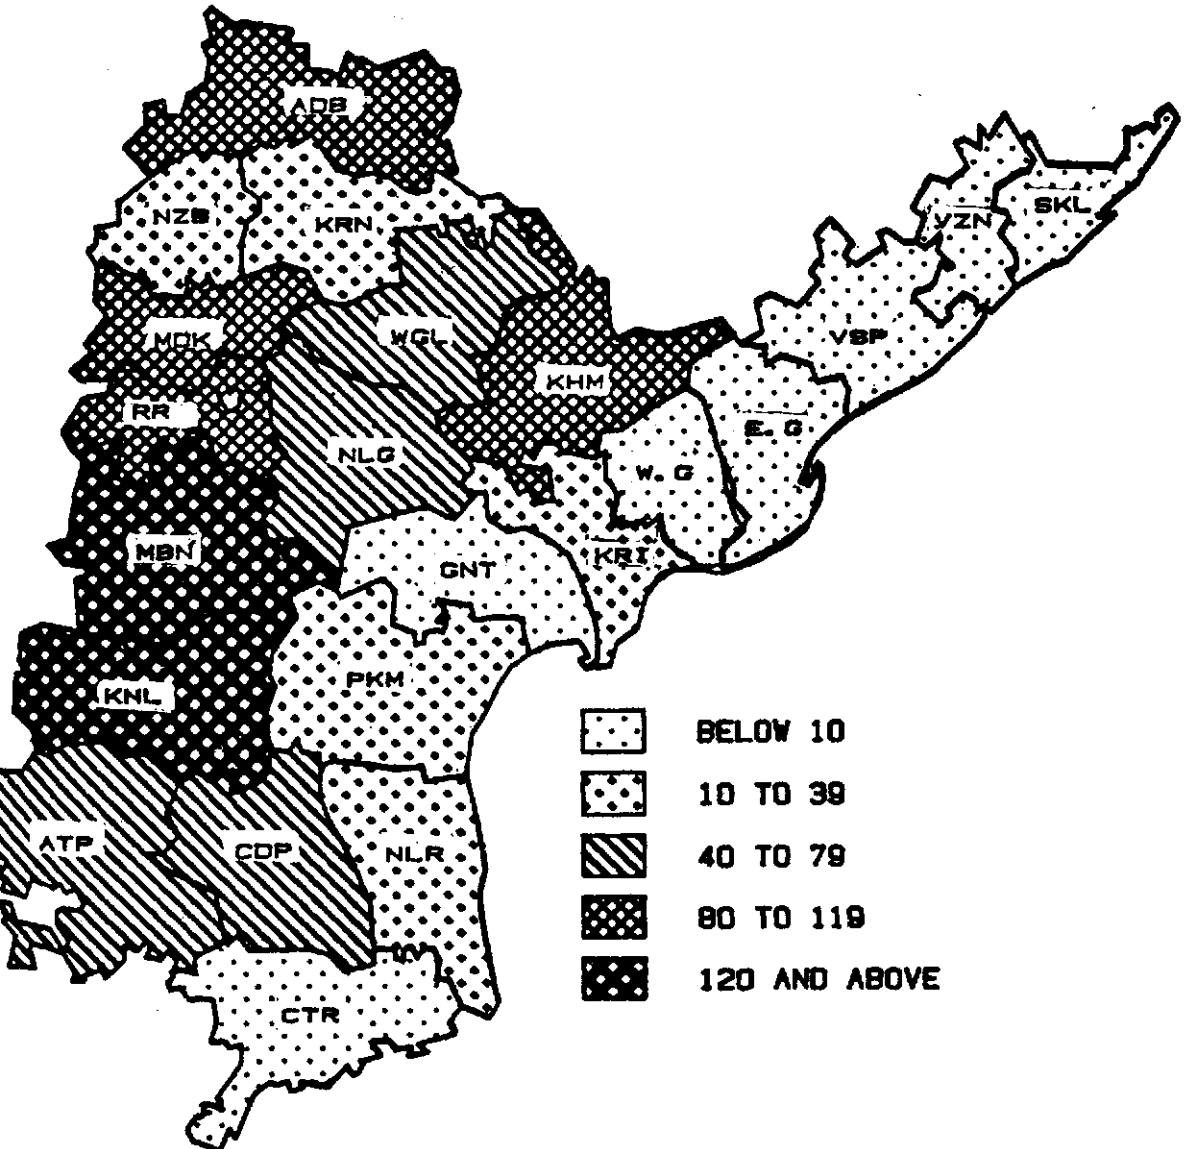

Table - 6.4

Area, Production and Yield per hectare of Ragi
from 1983-84 to 1987-88.

Sl. No.	Year	Area in lakh Hectares	Production in lakh tonnes	Yield in Kgs. per Hectare
(1)	(2)	(3)	(4)	(5)
1.	1987-88	1.73	1.69	976
2.	1986-87	1.83	1.82	998
3.	1985-86	2.13	2.06	967
4.	1984-85	2.26	2.16	957
5.	1983-84	2.25	2.63	1029
6.	Average of preceding 5 years. (1982-83 to 1986-87)	2.24	2.20	983

6.25. The area under Ragi during 1987-88 declined to 1.73 lakh hectares from 1.83 lakh hectares in 1986-87 showing 5.5 per cent decrease. And this area was the lowest during the last five years. Like-wise the production had also gone down to 1.69 lakh tonnes in 1987-88 from 1.82 lakh tonnes during 1986-87 showing decrease by 7.1 per cent. The decrease in production was mainly due to decrease in both area and yield of the crop during 1987-88. When compared to area and production of preceding five years there was a decline by 22.8 per cent and 23.2 per cent respectively. The main reasons for decrease in Area, Production and Yield of Ragi crop was due to deficit rainfall during South West monsoon period as this crop is predominantly a rainfed crop.

Maize:

6.26. Maize crop is mostly grown in Telangana region which accounted for about 95.3 per cent of the total area under the crop in the State during 1987-88. Nizamabad, Medak, Warangal, Karimnagar districts together accounted for 83.6 per cent of the total area under the crop in the State. The area, production and yield per hectare from 1983-84 to 1987-88 are given in the following Table.

J.1817-8

Table - 6.5

Area, Production and Yield per hectare of Maize
from 1983-84 to 1987-88.

Sl. No.	Year	Area in lakh Hectares	Production in lakh tonnes	Yield in Kgs. per Hectare
(1)	(2)	(3)	(4)	(5)
1.	1987-88	3.03	5.33	1756
2.	1986-87	3.08	4.60	1494
3.	1985-86	2.88	4.14	1433
4.	1984-85	3.13	4.33	1383
5.	1983-84	3.41	5.22	1531
6.	Average of preceding 5 years. (1982-83 to 1986-87)	3.17	5.15	1616

6.27. The increase in yield per hectare of Maize during 1987-88 to 1756 Kgs. from 1494 Kgs. in 1986-87 was responsible for the increase in production to 5.33 lakh tonnes in 1987-88 from 4.60 lakh tonnes in 1986-87 (showing 15.9 per cent increase) even-though there was a marginal decrease of 5000 hectares in area under the crop during 1987-88 over 1986-87. When compared to the average area of preceding five years, the area in 1987-88 decreased by 4.4 per cent whereas the yield and production increased by 8.7 and 3.5 per cent respectively.

6.28. Area under Bajra, Maize and Ragi for the years 1977-78 to 1987-88 are depicted in the graph 3.1

Total Small Millets:

6.29. Korra, Varagu, Samai and other small millets are referred to as small millets. These crops are mainly sown under rainfed conditions, and the area under these small millets accounted for 2.7 per cent of the total cropped area in the State during 1987-88. Prakasam, Kurnool, Anantapur and Mahabubnagar districts are important for these crops and the above districts together accounted for about 81.2 per cent of the total crop in the State during 1987-88.

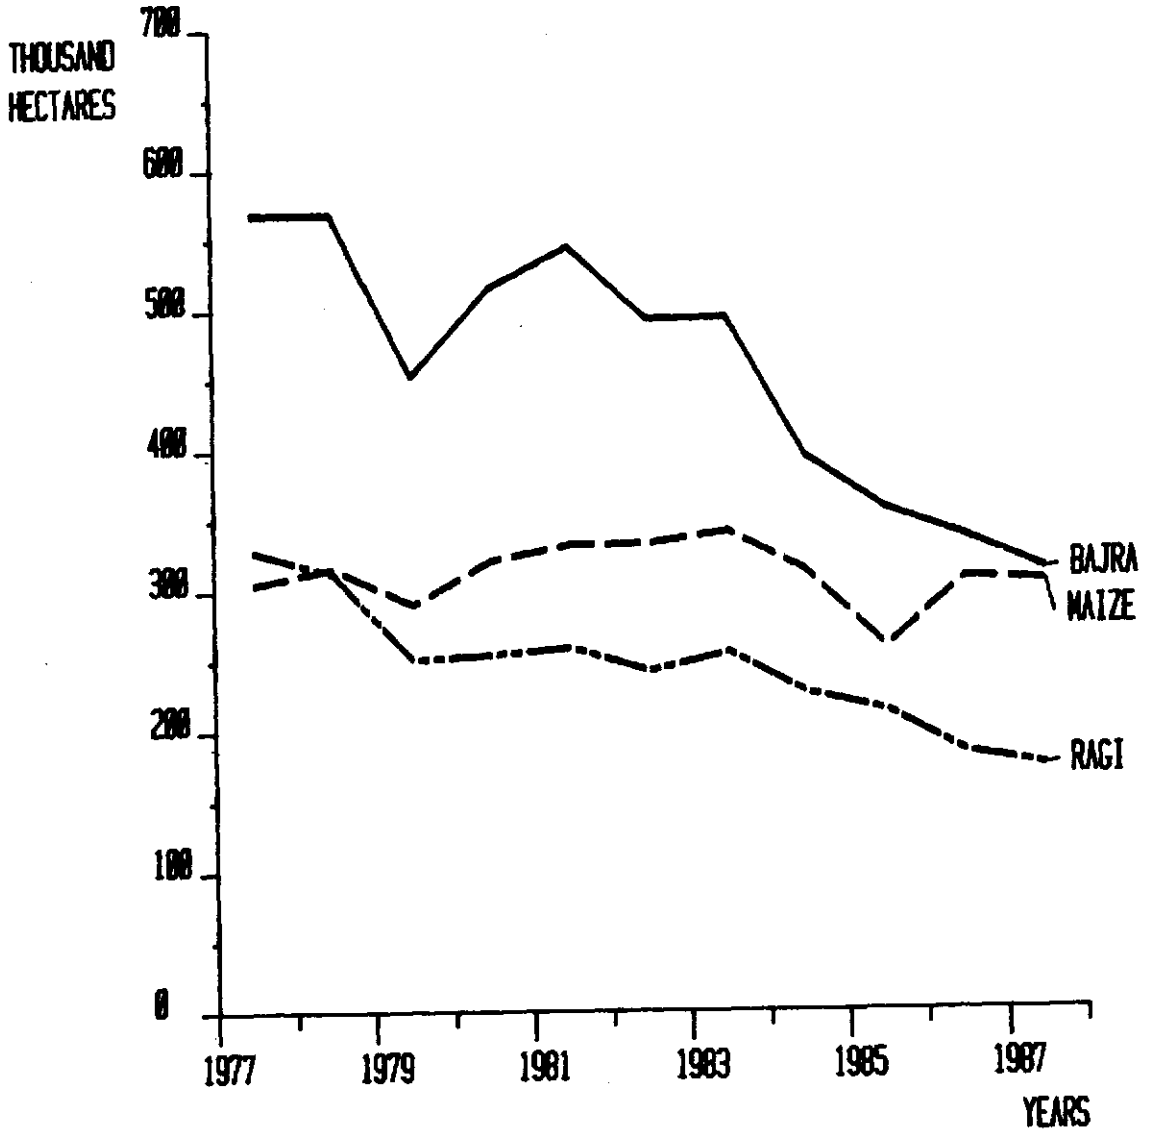

6.30. Among small Millets Korra is the important crop accounting for about 70.6 per cent of the total area under small millets. Korra is predominantly grown in Kurnool and Anantapur districts.

6.31. Varagu crop is mainly sown as mixture crop with Redgram under rainfed conditions. It is mostly sown in Rabi season in Guntur and Prakasam districts.

6.32. Samai crop is generally sown as an early dry crop in less fertile soils and is mainly sown mixed with pulses. It is a Kharif crop and is mostly grown in Visakhapatnam, Anantapur,

GRAPH - 3.1

AREA UNDER BAJRA RAGI AND MAIZE IN ANDHRA PRADESH

Chittoor and Mahabubnagar districts which together accounted for about 71.1 percent of the total area under the crop during 1987-88. Besides, other small millets, crops, such as Arika, and Godulu are also grown in Andhra Pradesh mostly in Prakasam and Mahabubnagar districts.

Pulses:

6.33. Pulses crops comprise of Redgram, Bengalgram, Greengram, Blackgram, Horsegram, Cowgram and other pulses. Of the 6.57 lakh tonnes of total production of pulses during 1987-88, Greengram and Blackgram accounted for 2.28 and 3.02 lakh tonnes respectively. Area and Production of total pulses are shown in the following Table from 1983-84 to 1987-88.

Table - 6.6

Area, and Production of Pulses from 1983-84 to 1987-88.

Sl. No.	Year	Area in lakh hectares	Production in lakh tonnes
(1)	(2)	(3)	(4)
1.	1987-88	15.09	6.57
2.	1986-87	14.22	6.16
3.	1985-86	13.51	6.30
4.	1984-85	13.45	5.03
5.	1983-84	14.99	5.65
6.	Average of preceding 5 years (1982-83 to 1986-87)	14.15	5.80

6.34. The area under pulses increased to 15.09 lakh hectares during 1987-88 from 14.22 lakh hectares during 1986-87 showing an increase by 6.1 percent due to diversion of area to pulses from other crops. The production of pulses had also increased to 6.57 lakh tonnes during 1987-88 from 6.16 lakh tonnes during 1986-87 showing an increase by 6.6 percent. The production of pulses increased on account of increase in production of Bengalgram, Greengram, Cowgram, and other pulses during 1987-88, even though there was a decline in production of Redgram, Blackgram and Horsegram. When compared to the average of preceding five years both area and production of pulses increased during 1987-88 by 6.1 and 6.7 percent respectively. Area under pulses for the years 1977-88 to 1987-88 are depicted in Graph 3.2.

Redgram:

6.35. Redgram is purely a Kharif crop sown in the months of June to August under rainfed conditions. Guntur, Prakasam, Kurnool, Anantapur, Rangareddy, Mahabubnagar, Nalgonda, Khammam and Adilabad

districts are important for this crop and these districts together accounted for about 76.4 percent of the total area under the crop in the state during 1987-88. The area, production and Yield per hectare is given below from 1983-84 to 1987-88.

TABLE - 6.7

Area, Production and Yield per hectare of Redgram
from 1983-84 to 1987-88.

Sl. No.	Year	Area in Lakh Hects.	Production in Lakh Tonnes.	Yield in Kgs/Hect.
(1)	(2)	(3)	(4)	(5)
1.	1987-88	3.38	0.45	135
2.	1986-87	2.75	0.80	289
3.	1985-86	2.67	0.85	320
4.	1984-85	2.48	0.56	225
5.	1983-84	2.65	0.74	278
6.	Average of preceding 5 years.	2.59	0.68	260
	(1982-83 to 1986-87)			

6.36 The area under Redgram with 3.38 lakh hectares in 1987-88 was the highest during the last five years. Production of Redgram decreased to 0.45 lakh tonnes during 1987-88 from 0.80 lakhs tonnes during 1986-87 the decline being 43.7 percent. This production of 0.45 lakh tonnes was the lowest during the last five years. The decrease in production was mainly due to decline in yield of the crop to 135 Kgs. from 289 Kgs the decrease being 53.3 percent. The decline in yield was due to excessive rains in the North-East monsoon period when the crop was in flowering stage. When compared to the Normal, the area increased by 30.5 percent whereas the production and yield decreased by 33.8 and 48.1 percent respectively.

Greengram :

6.37 Greengram crop is sown in both the seasons but more extensively in kharif seasons. The crop is sown as an early Kharif crop in May or June and is harvested by August-September. This crop is extensively cultivated in Krishna, Nalgonda, Warangal, Khammam, Karimnagar and Adilabad districts and these districts together accounted for nearly 75.5 percent of the total area under the crop in the State during 1987-88. The area, production and yield per hectare of Greengram is given in the following Table from 1983-84 to 1987-88.

GRAPH - 3.2

ANDHRA PRADESH
AREA UNDER PULSES DURING 1977-78 TO 1987-88
('000 HECT.)

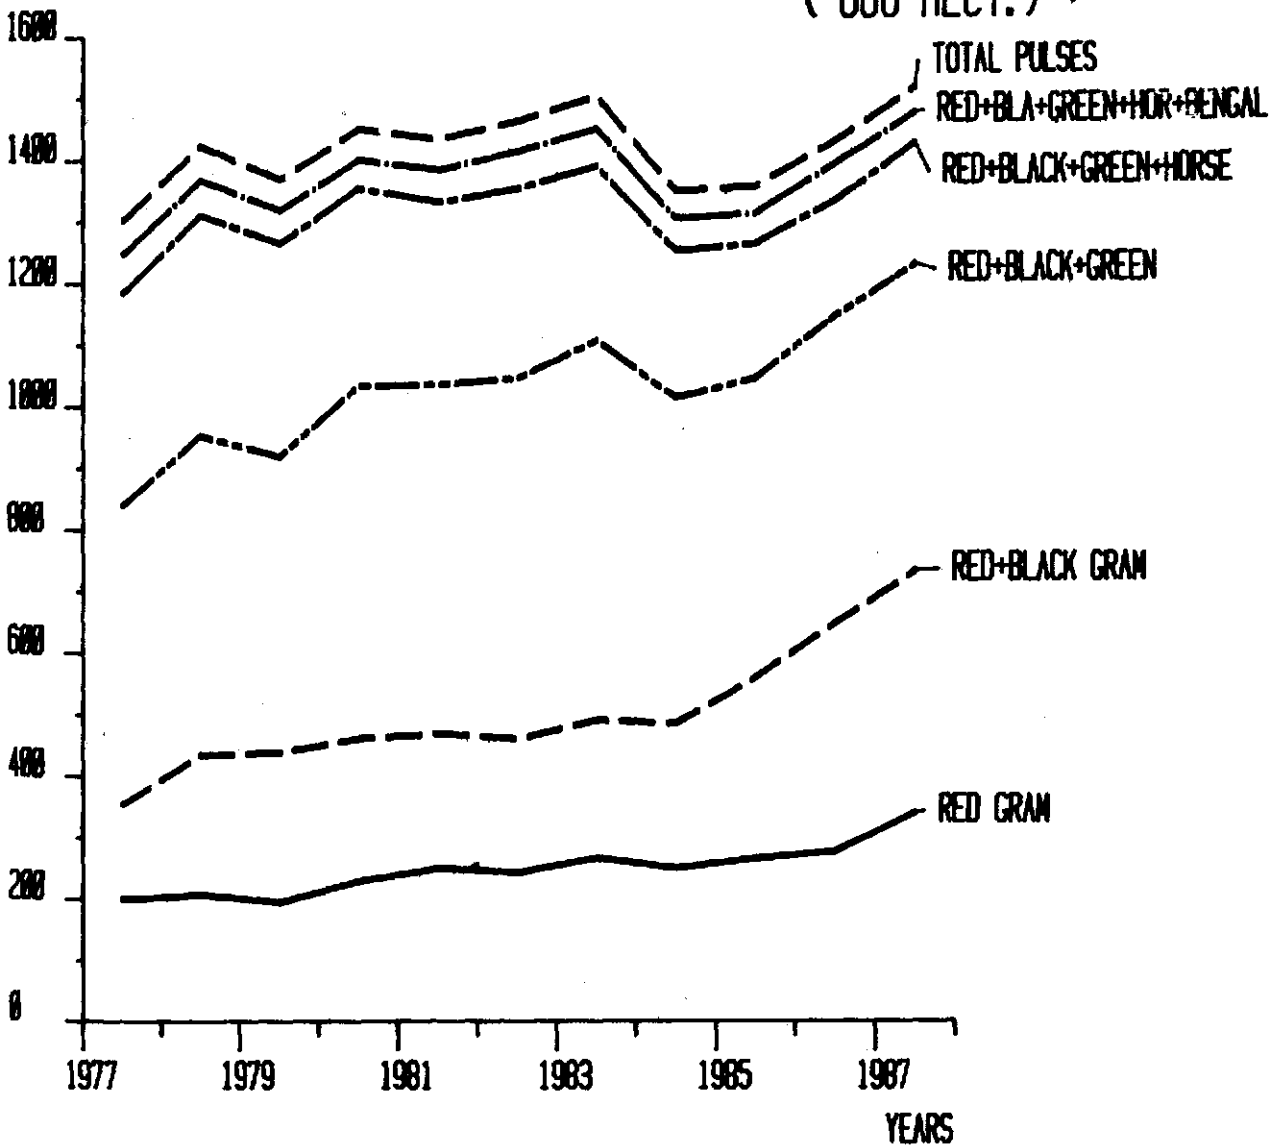

TABLE - 6.8

Area, Production and Yield per hectare of Greengram
from 1983-84 to 1987-88.

Sl. No.	Year	Area in Lakh Hects.	Production in Lakh Tonnes.	Yield in Kgs/Hect.
(1)	(2)	(3)	(4)	(5)
1.	1987-88	4.95	2.28	460
2.	1986-87	4.96	1.49	271
3.	1985-86	4.84	2.42	496
4.	1984-85	5.28	1.73	328
5.	1983-84	6.15	2.45	398
6.	Average of Preceding 5 years (1982-83 to 1986-87)	5.42	2.19	396

6.38 Eventhough the area under Greengram in 1987-88 decreased marginally when compared to 1986-87, the production has increased to 2.28 lakhs tonnes from 1.49 lakh tonnes in 1986-87 due to substantial increase in yield of the crop from 271 Kgs per hectare, the increase being 70.0 percent. When compared to the average of preceding five years, the area declined by 8.7 percent whereas the production and yield increased by 4.1 and 16.2 percent respectively.

Blackgram :

6.39 Blackgram is sown more extensively in Rabi season accounting for about 85.9 percent of the total area during 1987-88. The crop is extensively grown in Krishna and Guntur districts in Rice fallows which together accounted for about 67.5 percent of the total area during 1987-88. The following table shows area, Production and yield per hectare of Blackgram for the last five years.

TABLE - 6.9

Area, Production and yield per hectare of Blackgram
from 1983-84 to 1987-88

Sl. No.	Year	Area in Lakh Hects.	Production in Lakh Tonnes.	Yield per Hect. in Kgs.
(1)	(2)	(3)	(4)	(5)
1.	1987-88	3.91	3.02	771
2.	1986-87	3.70	3.04	822
3.	1985-86	2.94	2.14	729
4.	1984-85	2.35	1.90	806
5.	1983-84	2.24	1.31	588
6.	Average of preceding five years (1982-83 to 1986-87)	2.68	1.93	705

6.40 The area, under Blackgram with 3.91 lakh hectares was the highest during the last five years. When compared to the average of preceding five years, the area increased by 45.8 per cent. Due to decrease in yield per hectare from 822 Kgs. per hectare in 1986-87 to 771 Kgs. per hectare in 1987-88, the production of Blackgram in 1987-88 marginally decreased inspite of increase in area under the crop.

Horsegram :

6.41 Horsegram is raised in both Kharif and Rabi seasons. Vizianagaram, Ananthapur and Mahabubnagar districts together accounted for about 43.8 percent of the total area under the Crop during 1987-88. The following table shows the area, production and yield per hectare for the last five years.

TABLE - 6.10

Area, Production and Yield per hectare of Horsegram
from 1983-84 to 1987-88

Sl. No.	Year	Area in Lakh Hects.	Production in Lakh Tonnes.	Yield per Hect. in Kgs.
(1)	(2)	(3)	(4)	(5)
1.	1987-88	1.96	0.53	269
2.	1986-87	1.86	0.62	334
3.	1985-86	2.17	0.64	298
4.	1984-85	2.27	0.62	258
5.	1983-84	2.82	0.82	290
6.	Average of preceding five years (1982-83 to 1986-87)	2.46	0.73	289

6.42 The area under Horsegram decreased to 1.96 lakh hectares in 1987-88 from 1.86 lakh hectares in 1986-87 showing decline by 5.3 percent.

The production of Horsegram with 0.53 lakh tonnes in 1987-88 was the least during the last five years. The decline in production was mainly due to decline in yield of the crop from 334 Kgs. per hectare in 1986-87 to 269 Kgs. per hectare in 1987-88, the decline being 19.5. percent.

Sugarcane :

6.43 Sugarcane is an important commercial crop in the state. It is mainly an irrigated crop. The Eksali variety of the crop is sown in February/March and is harvested in October/November. Adasali variety which is grown in only Nizamabad district is a long duration crop sown in the months of December/January and

harvested in February/March of the succeeding year. In both the varieties, a Ratoon crop can be taken after expiry of one year period. Of the 1.43 lakh hectares under Sugarcane in 1987-88 (Coming up for harvest), about 51.1 percent or 0.73 lakh hectares was under planted and 48.9 percent or 0.70 lakh hectares was under Sugarcane Ratoon. Visakhapatnam, East Godavari, West Godavari, Krishna, Chittoor, Nizamabad and Medak districts together accounted for about 85.3 percent of the total area under the crop in the state during 1987-88. The area, production and yield per hectare of Sugarcane (Gur) are shown in the table given below from 1983-84 to 1987-88.

TABLE - 6.11

Area, Production and Yield of Sugarcane (Gur)
from 1983-84 to 1987-88:

Sl. No.	Year	Area coming up for harvest in Lakh Hect.	Production (Gur) in Lakh Tonnes	Yield in Kgs. per Hect. (Gur)
(1)	(2)	(3)	(4)	(5)
1.	1987-88	1.43	9.89	6,902
2.	1986-87	1.38	8.34	5,754
3.	1985-86	1.33	9.96	7,483
4.	1984-85	1.38	10.09	7,322
5.	1983-84	1.42	10.37	7,332
6.	Average of preceding 5 years (1982-83 - 1986-87)	1.44	10.44	7,077

6.44 The Area under Sugarcane (coming up for harvest) increased to 1.43 lakh hectares in 1987-88 from 1.38 lakh hectares during 1986-87 showing 3.6 percent increase and this area was the highest during the last five years. Due to increase in Yield to 6,902 Kgs. per hectare in 1987-88 from 5,754 Kgs. in 1986-87, the production of Sugarcane (Gur) also increased to 9.89 lakh Tonnes in 1987-88 from 8.34 lakh Tonnes in 1986-87 showing 18.5 percent increase. The increase in area coupled with increase in yield was responsible for increase in production during 1987-88 over 1986-87.

6.45 Map 3.3 showing district wise production of Sugarcane (Gur) for 1987-88 is appended.

Chillies :

6.46 Chillies is one of the important commercial crops grown in the State, Andhra Pradesh accounted for about 21.9 percent of the total area and 45.4 percent of the total production of Chillies in the country during 1987-88. Andhra Pradesh ranked first both in area and production of Chillies during 1987-88 as per the

final forecast reports released by the Economic and Statistical Adviser to Government of India. Area, Production and Yield per hectare of Chillies is given in the following table for the last five years.

TABLE - 6.12

Area, Production and Yield per Hectare of Chillies
from 1983-84 to 1987-88:

Sl. No.	Year	Area in Lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hect.
(1)	(2)	(3)	(4)	(5)
1.	1987-88	1.70	2.51	1475
2.	1986-87	1.91	2.79	1462
3.	1985-86	2.02	3.23	1619
4.	1984-85	1.61	2.54	1574
5.	1983-84	1.61	1.80	1117
6.	Average of preceding five years (1982-83 to 1986-87)	1.79	2.45	1366

6.47 The area under Chillies decreased to 1.70 lakh hectares during 1987-88 from 1.91 lakh hectares during 1986-87 showing 11.0 percent decrease. Production of Chillies in 1987-88 decreased due to decrease in area though the yield per hectare of Chillies increased to 1475 Kgs. from 1462 Kgs. per hectare in 1986-87. When compared with normals, the area decreased by 5.1 percent whereas the production and yield increased by 2.4 and 7.9 percent respectively during 1987-88.

Onions :

6.48 Onion crop is cultivated in both Kharif and Rabi seasons in the State mainly under irrigated conditions. It is extensively cultivated in Kurnool, Cuddapah and Rangareddy districts and these districts together accounted for about 50.4 percent of the total area under the crop in the State during 1987-88.

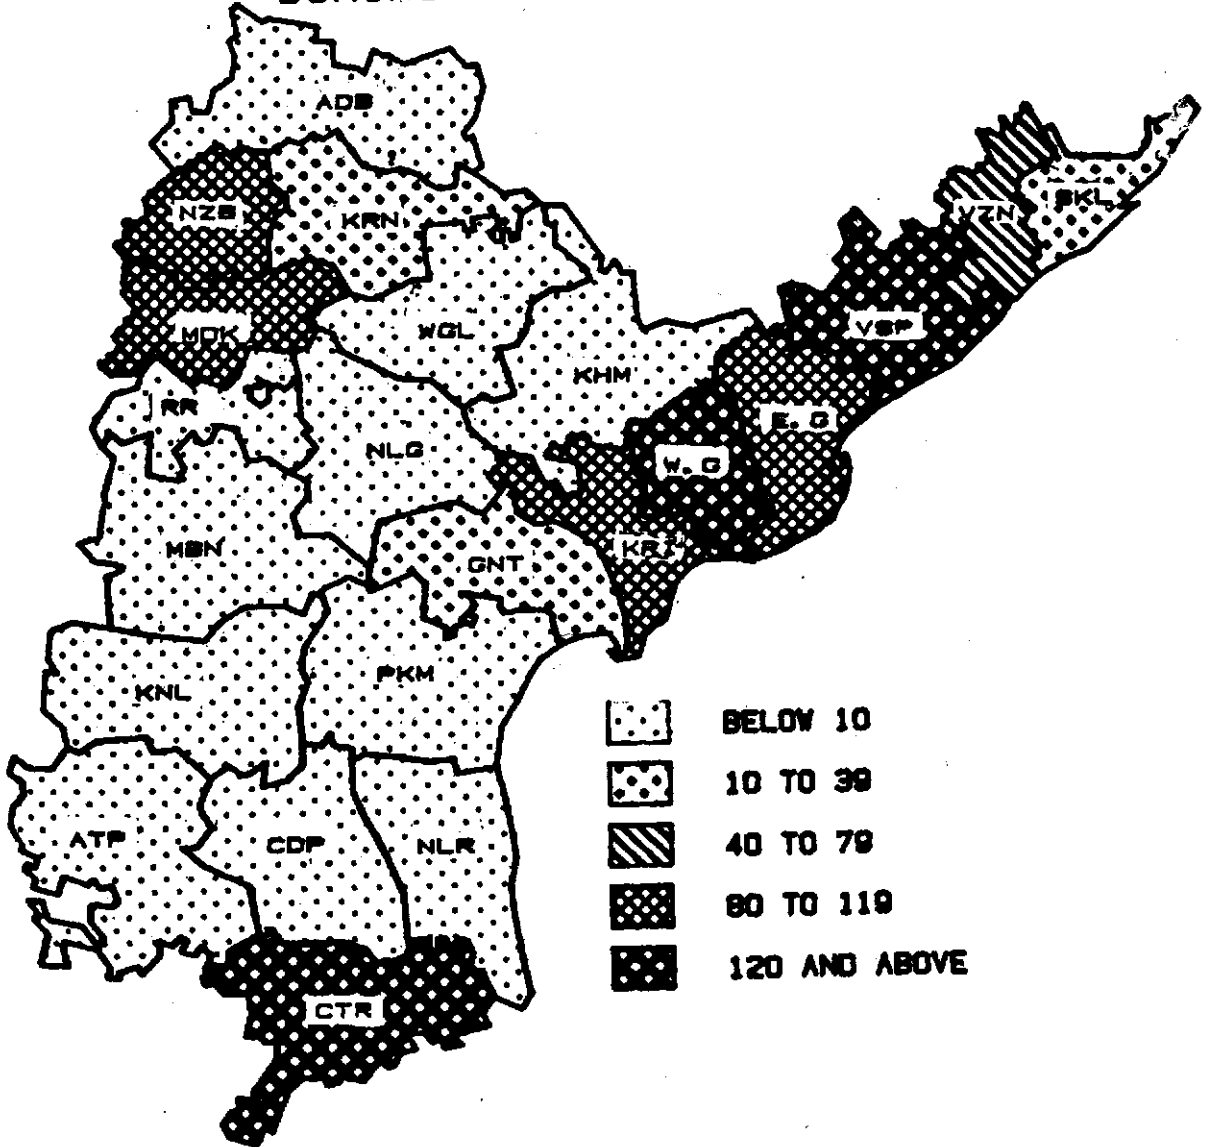

TABLE - 6.13

Area, Production and Yield per Hectare of Onions
from 1983-84 to 1987-88:

Sl. No.	Year	Area in Lakh Hect.	Production in lakh Tonnes	Yield in Kgs/ Hect.
(1)	(2)	(3)	(4)	(5)
1.	1987-88	0.19	1.42	7478
2.	1986-87	0.18	1.74	9732

MAP-3-3

PRODUCTION OF SUGARCANE (GUR)
DURING 1987-88 (In '000 Tonnes)

(1)	(2)	(3)	(4)	(5)
3.	1985-86	0.17	1.68	9959
4.	1984-85	0.16	1.44	8593
5.	1983-84	0.18	1.63	8966
6.	Average of preceding 5 years (1982-83 to 1986-87)	0.17	1.57	9098

6.49 The area under Onions increased to 0.19 lakh hectares from the normal of 0.17 lakh hectares. Right from 1984-85 there has been an increasing trend in area under Onions. Even though there was increase in area, the production decreased by 9.6 per cent, on account of decrease in yield per hectare to 7478 Kgs from 9732 Kgs per hectare in 1986-87.

GROUNDNUT:

6.50 Groundnut is the most important Oil seed crop accounting for about 15.7 percent of the total cropped area in the State. Andhra Pradesh accounted for about 28.4 percent of the Total Area and 33.6 percent of the total production of Groundnut in India and ranked first both in area and production of Groundnut in the country during 1987-88 as per the final Forecaster reports released by the Economic and Statistical Advisor Government of India. Groundnut crop is mostly raised as a rainfed crop during Kharif and as an irrigated crop in Rabi season. All the four districts of Rayalaseema and Mahabubnagar district in Telangana region together accounted for about 69.3 percent of the total area under the crop in the State during 1987-88. Area, production and Yield per hectare of Groundnut from 1983-84 to 1987-88 is given in the following table.

TABLE: 6.14

Area, Production and Yield per hectare of Groundnut from 1983-84 to 1987-88:

Sl. No.	Year	Area in Lakh Hectares	Production in Lakh Tonnes	Yield in Kgs/Hect.
(1)	(2)	(3)	(4)	(5)
1.	1987-88	19.11	10.06	997
2.	1986-87	15.71	13.08	833
3.	1985-86	16.66	13.10	787
4.	1984-85	16.76	12.58	751
5.	1983-84	16.65	17.16	1030
6.	Average of preceding 5 years (1982-83 to 1986-87)	16.17	13.45	831

6.51 The area under Groundnut increased to 19.11 lakh hectares during 1987-88 from 15.71 lakh hectares during 1986-87 and more than normal by 18.2 percent. The area under Groundnut during 1987-88 was the record highest area since the formation of Andhra Pradesh State 31 years ago. The area under Groundnut increased to 15.05 lakh hectares during Kharif 1987-88 from 12.99 lakh hectares during 1986-87 which in itself was a record showing increase by 15.9 percent. The area under Rabi also increased to 4.06 lakh hectares from 2.72 lakh hectares showing 49.3 percent increase. The overall increase in area under this crop was due to receipt of adequate rainfall at the time of sowing in kharif season and very favourable seasonal conditions, in the Rabi season. The area during Kharif season decreased in Coastal Andhra Over 1986-87, but it increased both in Rayalaseema and Telangana Regions. During Rabi season all the three regions of the State have recorded increase in area over 1986-87, the increase being 59.3, 38.1 and 49.5 percent respectively in coastal Andhra, Rayalaseema and Telangana Regions.

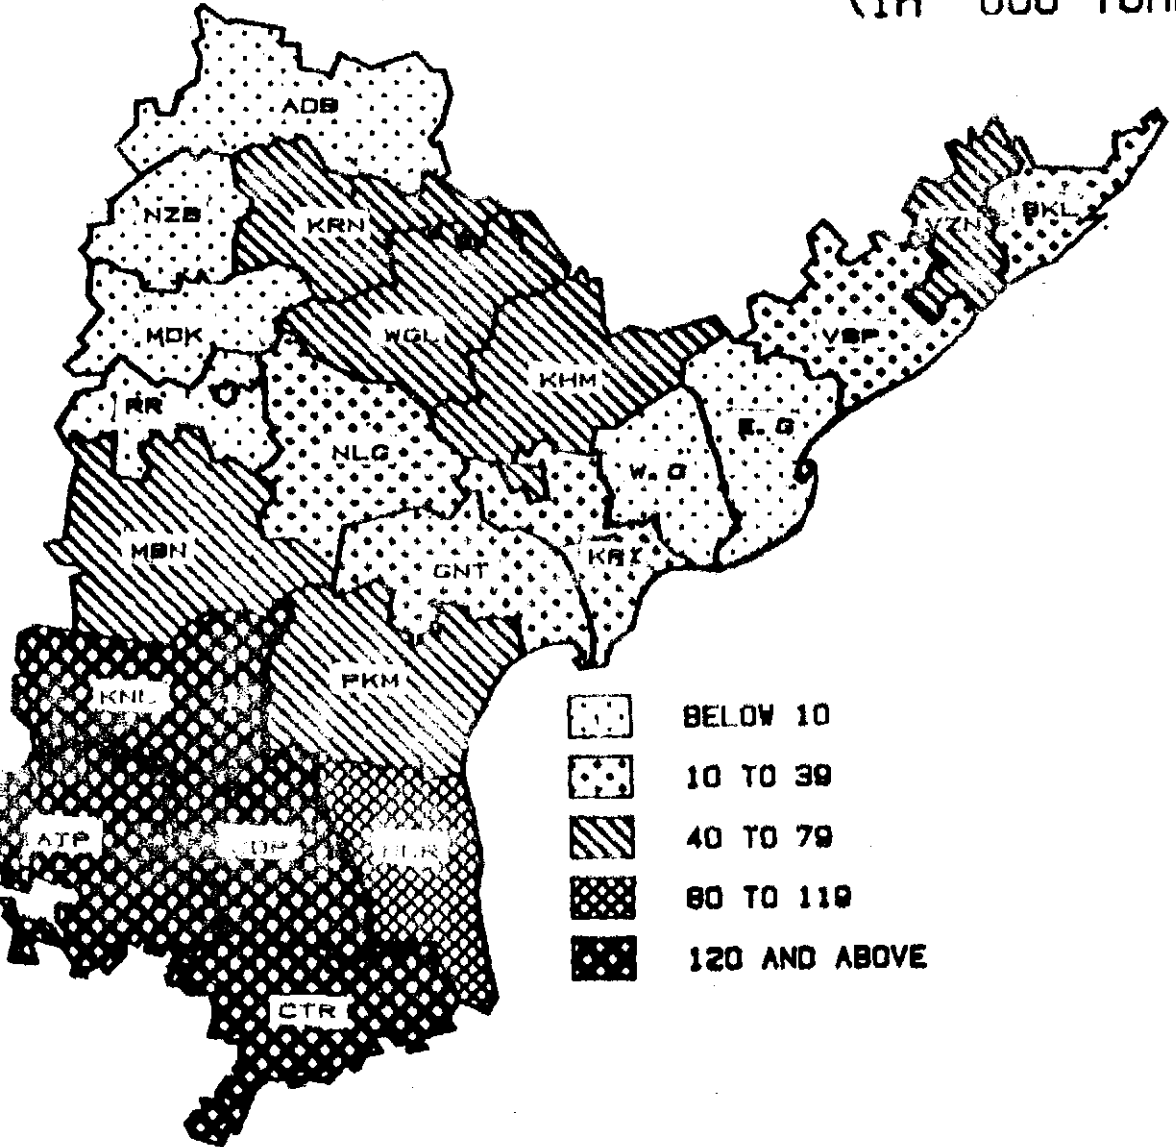

6.52 The Production of Groundnut increase to 19.06 lakh Tonnes during 1987-88 from 13.08 lakh tonnes during 1986-87 and this was the record highest production for the last 31 years. Increase in area coupled with increase in yield to 997 Kgs per hectare in 1987-88 from 833 Kgs in 1986-87, was responsible for the unprecedented increase in production of Groundnut during 1987-88. Compared to the average of preceding five years, the production increased by 41.7 percent during 1987-88.

6.53 The production of Kharif Groundnut during 1987-88 increased to 13.52 lakh Tonnes from 9.20 lakh Tonnes during 1986-87 showing 47.0 percent increase. While there was decrease in production in Coastal Andhra Region by 21.2 percent, the production increased both in Rayalaseema and Telangana regions by 62.9 and 54.4 percent respectively, during Kharif 1987-88 over 1986-87. Substantial increase in area under the crop during kharif 1987-88 coupled with increase in productivity resulted in increase in production during kharif 1987-88. The districts of Visakhapatnam, Krishna, Prakasam, all the four districts of Rayalaseema, Mahabubnagar, Warangal and Karimnagar have registered increase in production of Groundnut during Kharif 1987-88. In other districts the production either declined or remained constant.

6.54 The production of Groundnut during Rabi 1987-88 increased to 5.54 lakh Tonnes from 3.88 lakh tonnes during 1986-87 showing 42.8 percent increase. The districts of Krishna, Guntur, Prakasam, Nellore, all the four districts of Rayalaseema, Mahabubnagar, Warangal, Khammam and Karimnagar have recorded increase in production of Groundnut over 1986-87. The remaining districts have recorded decline. The production of Groundnut district-wise during 1987-88 is given in Map 3.4

MAP-3.4

PRODUCTION OF GROUNDNUT DURING 1987-88
(In '000 Tonnes)

Sesamum:

6.55. This crop is cultivated in both kharif and Rabi seasons in the State. The Kharif crop is sown in the months of June and July and the Rabi crop is sown in October. Vizianagaram, Visakhapatnam, East Godavari, West Godavari, Prakasam, Warangal and Adilabad districts which are important for the crop accounted for 73.1 percent of the total crop in the State during 1987-88.

6.56. The area, production and yield per hectare of Sesamum for the last 5 years is shown in the following table:-

Table 6.15

Area, Production and Yield per Hectare of Sesamum
from 1983-84 to 1987-88.

Sl. No.	Year	Area in lakh Hectares	Production in lakh Tonnes	Yield in Kgs. per Hectare
(1)	(2)	(3)	(4)	(5)
1.	1987-88	1.67	0.23	133
2.	1986-87	1.77	0.31	176
3.	1985-86	1.52	0.32	208
4.	1984-85	1.42	0.25	178
5.	1983-84	1.74	0.27	155
6.	Average of preceding 5 years (1982-83 to 1986-87)	1.62	0.28	175

6.57. The area under Sesamum with 1.67 lakh hectares in 1987-88 was the third highest area during the last five years. The area decreased by 5.7 percent over 1986-87. The production of Sesamum with 0.23 lakh tonnes during 1987-88 was the lowest during the last five years. The main reasons attributed for low production were decrease in both area and yield to 133 Kgs. per hectare in 1987-88 from 176 Kgs. during 1986-87. The yield obtained in 1987-88 was also the lowest during the last five years.

Castor:

6.58. Castor is another important commercial crop raised during Kharif season in the state. Mahabubnagar and Nalgonda districts which are important for this crop together accounted for 74.6 per cent of the total area under the crop in the State. The area, production and yield increased during 1987-88 when compared to area, production and yield during 1986-87 and also the average of preceding five years. The area with 3.11 lakh hectares, production with 0.72 lakh tonnes and the yield per hectare with 233 Kgs during 1987-88 was the highest during the last five years. The increase in area coupled with increase in yield resulted in the increase in production in 1987-88 over 1986-87.

Coconut:

6.59 Coconut is a perinnial crop extensively raised in Srikakulam, East Godavari, West Godavari and Chittoor districts which together accounted for 88.5 percent of the total area under the crop in the state during 1987-88. The following table shows the area, production and yield per hectare of Coconut during, 1986-87 and 1987-88.

Table No. 6.16

Area , Production and Yield per Hectare of Coconut during 1986-87 and 1987-88.

Sl. No.	Year	Area in Lakh Hects.	Production in Lakh Nuts	Yield in No. of nuts Per Hect.
(1)	(2)	(3)	(4)	(5)
1.	1987-88	0.49	4,802.81	9,840
2.	1986-87	0.48	1,988.50	4,134

6.60 The production of cocunut is calculated on the basis of preliminary yield results of the survey being conducted under "Fruits and Vegetables Survey" from the field agency. The yield per hectare rose to 9,840 nuts per hectare during 1987-88 from 4,134 in 1986-87 which was being adopted hither to based on Coconut survey conducted between 1962 and 1971. Due to increase in Area, and revision of yeild rates during 1987-88 the production of coconuts increased from 1988.50 lakh nuts to 4802.81 lakh nuts during 1987-88.

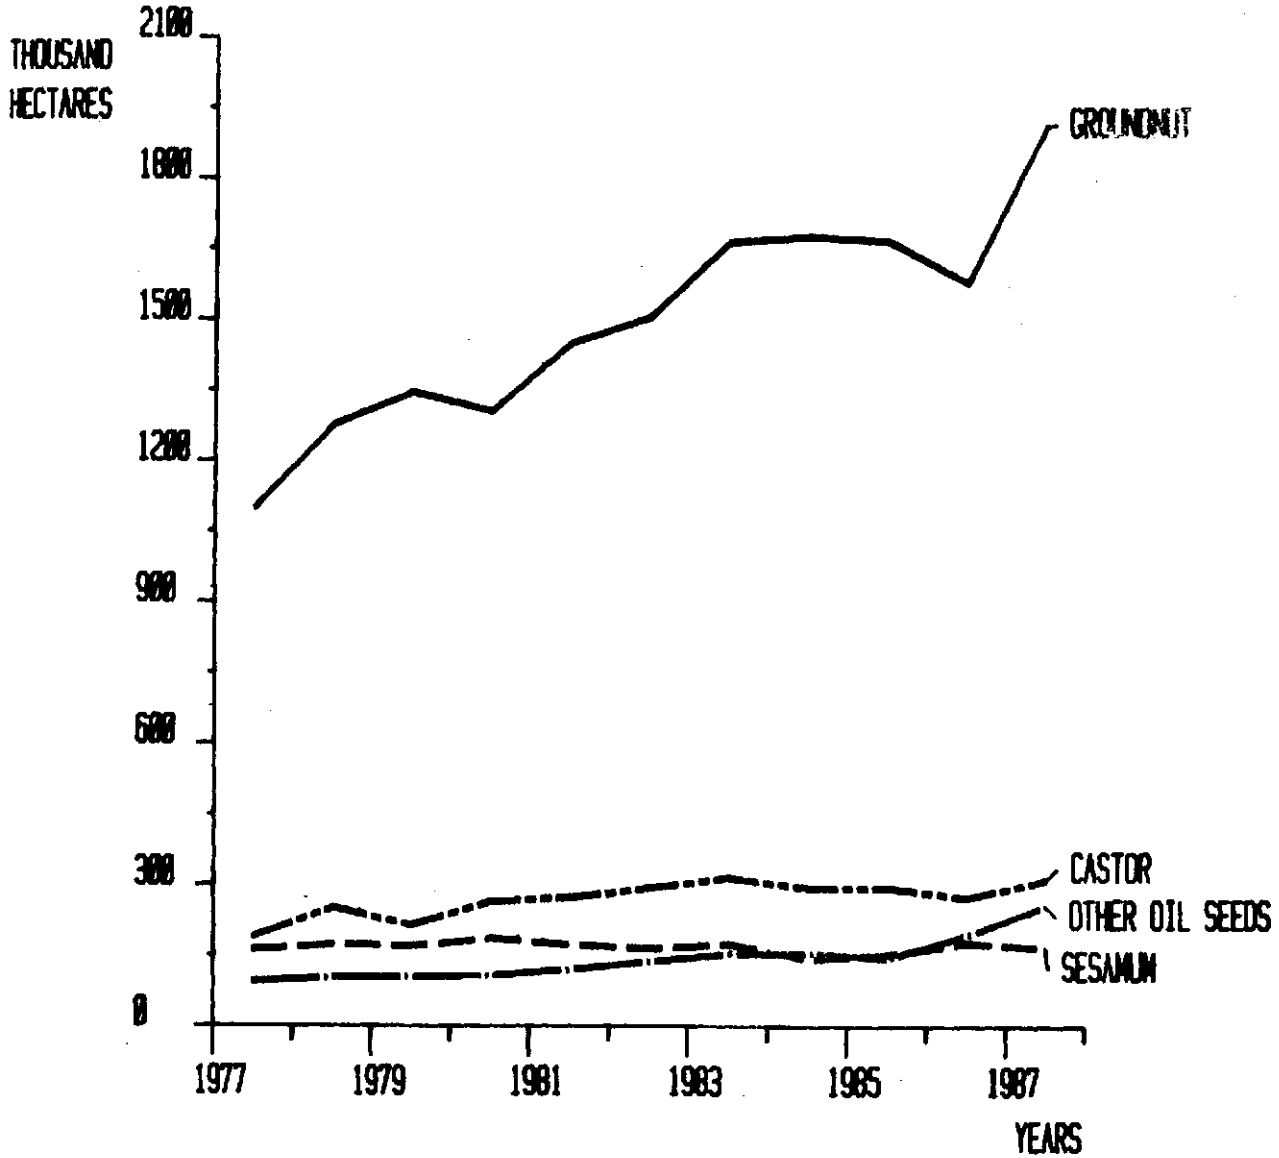

6.61 The area under various oilseed crops in Andhra Pradesh from 1977-78 to 1987-88 is shown in the graph 3.5.

Cotton:

6.62 Cotton is mostly raised as a Kharif crop in the State. However, in Krishna district it is also raised in Rice follows after the harvest of Rice Crop. During the Kharif season the crop is mainly raised as a rainfed crop in traditional areas of Kurnool, Adilabad and in a few other districts, and as an irrigated crop in the districts of Prakasam, Guntur and Krishna. Guntur, Prakasam, Kurnool and Adilabad districts together accounted for 76.7 percent of the total area under the crop in the State during 1987-88. Area, production and yield per hectare of Cotton for the last five years is given below:-

GRAPH - 3.5

AREA UNDER OIL SEED CROPS IN ANDHRA PRADESH

71
Table-6.17Area production and yield per Hectare of
Cotton from 1983-84 to 1987-88.

Sl. No.	Year	Area in Lakh Hects.	Production in Lakh bales of 170 Kgs. each	Yield of Cotton in lint in Kgs. per Hect.
(1)	(2)	(3)	(4)	(5)
1.	1987-88	5.74	5.37	159
2.	1986-87	4.11	6.09	252
3.	1985-86	6.20	7.42	204
4.	1984-85	5.54	9.84	302
5.	1983-84	4.77	10.19	362
6.	Average of preceding 5 years (1982-83 to 1986-87)	5.01	7.96	272

6.63 The area under Cotton increased to 5.74 lakh hectares during 1987-88 from 4.11 lakh hectares in 1986-87 showing 39.7 percent increase. When compared to average of preceding 5 years also the area increased by 14.6 percent. But the production of Cotton has gone down during 1987-88 to 5.37 lakh bales from 6.09 lakh bales in 1986-87. The reason for decrease in production was mainly due to decrease in yield per hectare to 159 Kgs lint from 252 Kgs lint in 1986-87. When compared to the average of Preceding 5 years both production and yield decreased during 1987-88. The districts of Guntur, Prakasam, Kurnool, and Warangal have recorded decline in production of Cotton and this decline is ranging from 36.9 percent in Guntr to 1.2 percent in Warangal. The districts of Krishna, Mahabubnagar, Khammam, Karimnagar and Adilabad have recorded increase in production during 1987-88 over 1986-87.

Mesta:

6.64 Mesta crop is mostly confined to Srikakulam and Vizianagaram districts which together accounted for about 97.1 percent of the total area under the crop in the State during 1987-88. The following table shows area, production and yield per hectare of Mesta from 1983-84 to 1987-88.

Table - 6.18.

Area, Production and Yield per Hectare of Mesta
from 1983-84 to 1987-88

Sl. No.	Year	Area in Lakh Hect.	Production in Lakh Bales of 180 Kgs.	Yield in Kgs. Per Hect.
(1)	(2)	(3)	(4)	(5)
1.	1987-88	0.68	2.88	758
2.	1986-87	0.74	5.41	1,313
3.	1985-86	1.02	7.38	1,297
4.	1984-85	0.79	4.90	1,116
5.	1983-84	0.78	5.82	1,332
6.	Average of Preceding 5 years (1982-83 to 1986-87)	0.83	5.73	1,235

6.65 Area under Mesta during 1987-88 with 0.68 lakh hectares was the lowest during the last five years. The production of Mesta with 2.88 lakh bales during 1987-88 recorded decrease over 1986-87 by 53.2 percent and 50.3 percent over normal. The yield per hectare also declined to 758 Kgs in 1987-88 from 1,313 Kgs in 1986-87 showing 57.7 percent decrease. When compared to normal the yield in 1987-88 declined by 61.4 percent. The severe drought conditions that prevailed in Srikakulam and Vizianagaram districts during the Kharif season of 1987-88 were responsible for decrease in area and production of Mesta in 1987-88.

Tobacco

6.66 Andhra Pradesh is one of the important states in the country in cultivation of Tobacco. This crop is sown during Rabi season mostly under rainfed conditions. East Godavari, West Godavari, Krishna, Guntur, Prakasam, Nellore, Kurnool, Mahabubnagar and Khammam which are important for this crop accounted for about 91.0 percent of the total area under Tobacco in the State during 1987-88. Irrigated Tobacco in the lighter soils is also raised in East Godavari, West Godavari, Krishna, Prakasam and Khammam districts. Out of the total area of 1.07 lakh hectares 0.37 lakh hectares was irrigated crop. The districts of East Godavari, West Godavari, Krishna, Prakasam, and Khammam accounted for 89.0 percent of the irrigated area under the crop during 1987-88.

6.67 Two varieties of Tobacco viz., Virginia and Natu are grown in Andhra Pradesh. Andhra Pradesh accounted for 37.2 percent of the area and contributed about 33.4 percent of the production in India during 1987-88 and ranked first in area and second in production of Tobacco among all the states in the country as per the final forecast estimates released by the Economic and Statistical Advisor to Government of India. The area, production and yield, per hectare of Tobacco are shown in the following table for the last five years.

Table - 6.19

Area, Production and Yield per Hectare of Tobacco
from 1983-84 to 1987-88.

Sl. No.	Year	Area in Lakh Hects.	Production in Lakh Tonnes	Yield in Kgs. per Hect.
(1)	(2)	(3)	(4)	(5)
1.	<u>1987-88</u>			
	Virginia	0.63	0.50	798
	Others	0.44	0.55	1,235
	Total	1.07	1.05	977
2.	<u>1986-87</u>			
	Virginia	1.00	1.00	996
	Others	0.46	0.52	1,129
	Total	1.46	1.52	1,038
3.	<u>1985-86</u>			
	Virginia	0.97	0.69	712
	Others	0.52	0.76	1,451
	Total	1.49	1.45	975
4.	<u>1984-85</u>			
	Virginia	1.14	1.00	874
	Others	0.64	0.71	1,110
	Total	1.78	1.71	959
5.	<u>1983-84</u>			
	Virginia	1.36	1.20	881
	Others	0.50	0.65	1,301
	Total	1.86	1.85	994

(1)	(2)	(3)	(4)	(5)
6. Average of Preceding 5 years. (1982-83 to 1986-87)				
virginia	1.26	1.13	887	
Others	0.56	0.71	1,263	
Total:	1.82	1.84	1,006	

6.68 The area under Virginia and other varieties of Tobacco decreased to 0.63 and 0.44 lakh hectares respectively in 1987-88 from 1.00 and 0.46 lakh hectares during 1986-87. Consequently the area under total Tobacco decreased to 1.07 lakh hectares in 1987-88 from 1.46 lakhs hectares during 1986-87, showing decline by 26.8 percent. Compared to the average of preceding five years, the area and production of Tobacco in 1987-88 declined by 41.3 and 43.0 percent respectively. While the yield per hectare of Virginia Tobacco decreased to 798 Kgs. in 1987-88 from 996 Kgs. in 1986-87, the yield of other varieties of Tobacco increased to 1235 Kgs. from 1129 Kgs. during 1986-87 showing an increase by 9.3 percent. The production of other varieties of Tobacco increased to 0.55 lakh Tonnes in 1987-88 from 0.52 lakh Tonnes in 1986-87 showing an increase by 5.7 percent. The over-all decrease in production of Tobacco during 1987-88 was due to decrease in yield of Tobacco to 977 Kgs. from 1038 Kgs. in 1986-87 and the total area from 1.46 lakh hectares in 1986-87 to 1.07 lakh hectares in 1987-88.

6.69 Graphs 3.6 and 3.7 showing the area, and production of Sugarcane (Gur), Cotton and Tobacco crops in Andhra Pradesh from 1977-78 to 1987-88 are given in this report.

7.0 Index Numbers of Agricultural Production in Andhra Pradesh 1987-88

7.1 The Index Numbers of Area under crops, Agricultural production, Productivity (yields), Net area sown, Cropping pattern, Cropping intensity and productivity per hectare of net area sown with base Triennium ending 1969-70=100 are presented in Tables 7.1 to 7.5.

7.2 In this series of Index Numbers, 22 crops are covered which are divided into two main groups and five sub-groups as shown below.

Sl.No.	Main Group	Sub-group.	Crops covered
(1)	(2)	(3)	(4)
1.	Food Crops	i. Cereals	Rice, Wheat, Jowar, Bajra, Maize, Ragi, and Small Millets.
		ii. Pulses	Bengalgram, Redgram, Blackgram, Greengram, Horsegram and other pulses.
2.	Non-Food Crops	i. Oil Seeds	Groundnut, Sesamun, Linseed and Castor.
		ii. Fibres	Cotton and Mesta
		iii. Miscellaneous Crops	Sugarcane, Tobacco and Chillies.

The area under the above 22 crops constituted nearly 91 percent of the total cropped area in the State during 1987-88.

7.3 Index of Area:-

The Index numbers of area under all crops for 1987-88 increased by 3.2 percent over the previous year. Under the indices of Area of foodgrains which declined by 1.8 percent, the crops like Jowar, Redgram, Blackgram, Horsegram, and other pulses have shown an increase of 4.4, 22.6, 5.7, 5.7 and 11.1 percent respectively, While the other crops like Rice, Bajra, Maize, Ragi, Small-Millets, Wheat, Bengalgram and Greengram have shown a decline of 7.4, 7.4, 1.2, 4.9, 1.5, 19.5, 17.5 and 0.2 percent respectively.

Even though the Index of area under pulses group increased by 6.1 percent, Oilseeds by 1.6 percent and fibres by 32.5 percent, it had no effect on the index of all crops due to decline in the index of area under other groups Viz. Cereals by 3.5% and Miscellaneous crops by 10.2 percent.

The Index Numbers of area under different Crop groups for the years 1983-84 to 1987-88 are given below in Table 7.1.

TABLE-7.1

INDEX NUMBERS OF AREA OF CROPS, 1983-84 to 1987-88.

(Base Triennium ending 1969-70 =100)

S.NO.	Crop Group	1983-84	1984-85	1985-86	1986-87	1987-88	% deviation over 1986-87 (+ or -)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	Cereals	98.1	85.3	82.3	79.8	77.0	-3.5
2.	Pulses	104.3	93.6	93.9	99.0	105.0	+6.1
3.	Food Grains	99.1	86.6	84.1	82.8	81.3	-1.8
4.	Oil Seeds	116.8	114.4	114.3	109.3	129.0	+18.0
5.	Fibres	138.7	157.8	180.1	120.9	160.2	+32.5
6.	Miscellaneous Crops	95.7	87.9	95.3	93.3	83.8	-10.2
7.	Total Non-food Crops	115.8	115.5	120.0	107.9	124.7	+15.6
8.	All Crops	103.0	93.3	92.4	88.6	91.4	+3.2

7.4 Index of Productivity (Yields):

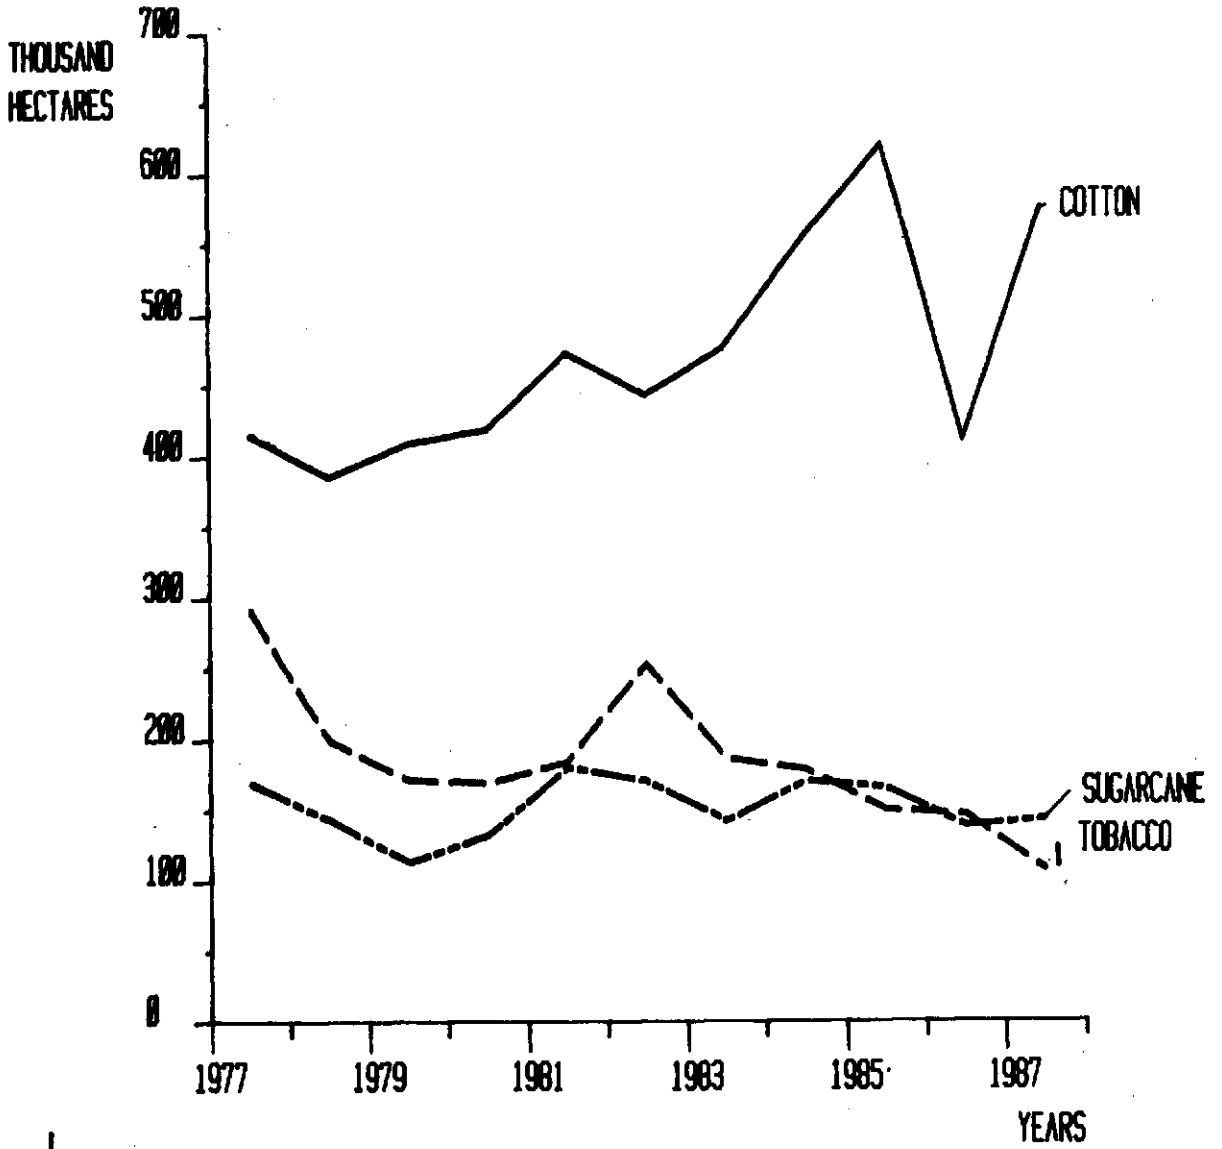

The Index of productivity (Yields) of all crops increased by 8.5 percent during 1987-88. When compared to the previous year due to considerable increase in the indices of productivity in respect of Cereals & Millets by 14.7 percent and oil seeds by 19.1 percent. The indices of pulses, fibres and miscellaneous crops decreased by 2.1, 33.8 and 3.3 percent respectively.

The indices of productivity of major crops like Rice, Jowar, Maize, Greengram, Groundnut, Castor, Sugarcane and Chillies have increased by 15.9, 10.3, 17.5, 53.1, 19.7, 32.8, 13.1 and 0.9 percent respectively which resulted in the increase of index of productivity of all crops by 8.5 percent in 1987-88 compared to 1986-87, though the indices of crops like Bajra, Ragi, Redgram, Blackgram, Horsegram, Sesamum, Cotton, Mesta and Tobacco decreased by 14.2, 2.2, 53.4, 6.2, 19.5, 24.1, 26.9, 42.5 and 5.3, percent respectively compared to the previous year.

The Index Numbers of productivity (Yields) under different crop groups for the years 1983-84 to 1987-88 are given in Table 7.2.

TABLE - 7.2

INDEX NUMBERS OF PRODUCTIVITY (YIELDS), 1983-84 TO 1987-88

(Base: Triennium ending 1969-70=100)

S.No.	Crop Group	1983-84	1984-85	1985-86	1986-87	1987-88	% Deviation over 1986-87 (+ or -)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	Cereals	159.1	149.0	164.6	144.8	166.1	+14.7
2.	Pulses	192.2	191.0	230.4	212.9	208.5	-2.1
3.	Food Grains	160.5	150.9	167.7	148.3	168.6	+13.7
4.	Oil Seeds	133.0	99.2	104.0	108.8	129.6	+19.1
5.	Fibres	379.1	326.0	246.0	282.9	187.2	-33.8
6.	Miscellaneous Crops	133.3	160.2	163.8	146.1	141.3	- 3.3
7.	Total Non-Food Crops	138.4	141.1	143.4	135.0	137.4	+ 1.8
8.	All Crops	152.0	146.8	157.4	142.7	154.8	+ 8.5

7.5 INDEX OF PRODUCTION:

The Index Numbers of Agricultural Production of all Crops registered an increase of 6.6 percent during 1987-88. When Compared to the previous year. The production indices of all the major crops like Rice, Jowar, Maize, Small-Milletts, Wheat, Greengram, Groundnut, Castor and Sugarcane registered increase during 1987-88 compared to 1986-87 by 7.5, 15.2, 16.1, 24.1, 2.9, 52.8, 45.7, 51.1, and 18.7 percent resulting in increase in the production index of all crops by 6.6 percent, though the indices of production of crops like Bajra, Ragi, Redgram, Blackgram, Horsegram, Sesamum, Linseed, Cotton, Mesta, Tobacco and Chillies decreased by 20.4, 7.1, 42.8, 1.0, 15.0, 28.5, 13.6, 11.9, 46.9, 30.9 and 9.9 percent respectively compared to the previous year.

The Index Numbers of production for different crop groups for the years 1983-84 to 1987-88 are given in Table 7.3

TABLE - 7.3

INDEX NUMBERS OF AGRICULTURAL PRODUCTION, 1983-84 to 1987-88

(Base: Triennium ending 1969-70 = 100)

S.No.	Crop group	1983-84	1984-85	1985-86	1986-87	1987-88	%Deviation over 1986-87 (+ or -)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	Cereals	185.0	149.3	159.6	139.3	150.4	+ 8.0
2.	Pulses	214.7	196.3	245.4	241.2	257.8	+ 6.9
3.	Food Grains	186.3	151.4	163.4	143.8	155.1	+ 7.9
4.	Oil Seeds	161.4	119.8	124.8	124.4	177.9	+43.0
5.	Fibres	631.1	603.9	606.3	393.1	331.1	-15.8
6.	Miscellaneous Crops	149.5	164.2	168.0	158.6	142.0	-10.5
7.	Total Non-food Crops	175.2	167.3	171.1	156.4	163.6	+ 4.6
8.	All Crops	182.3	157.1	166.7	148.3	158.1	+ 6.6

7.6 Cereals Sub-Group

During the year 1987-88 the production Index of all the crops under cereals subgroup except Bajra and Ragi have increased when compared to the previous year. The production index of Bajra and Ragi declined by 20.4 and 7.1 percent respectively.

7.7 Pulses Sub-group:

Production index of pulses sub-group for the year 1987-88 has increased by 6.9 percent over the previous year. Index of Bengalgram, Greengram and other pulses have increased by 25.5, 52.8 and 54.5 percent respectively. The remaining individual pulses have registered a decline in the index ranging from 1.0 percent in respect of Blackgram to 42.8 percent in respect of Redgram.

7.8 Oil Seeds Sub-group:

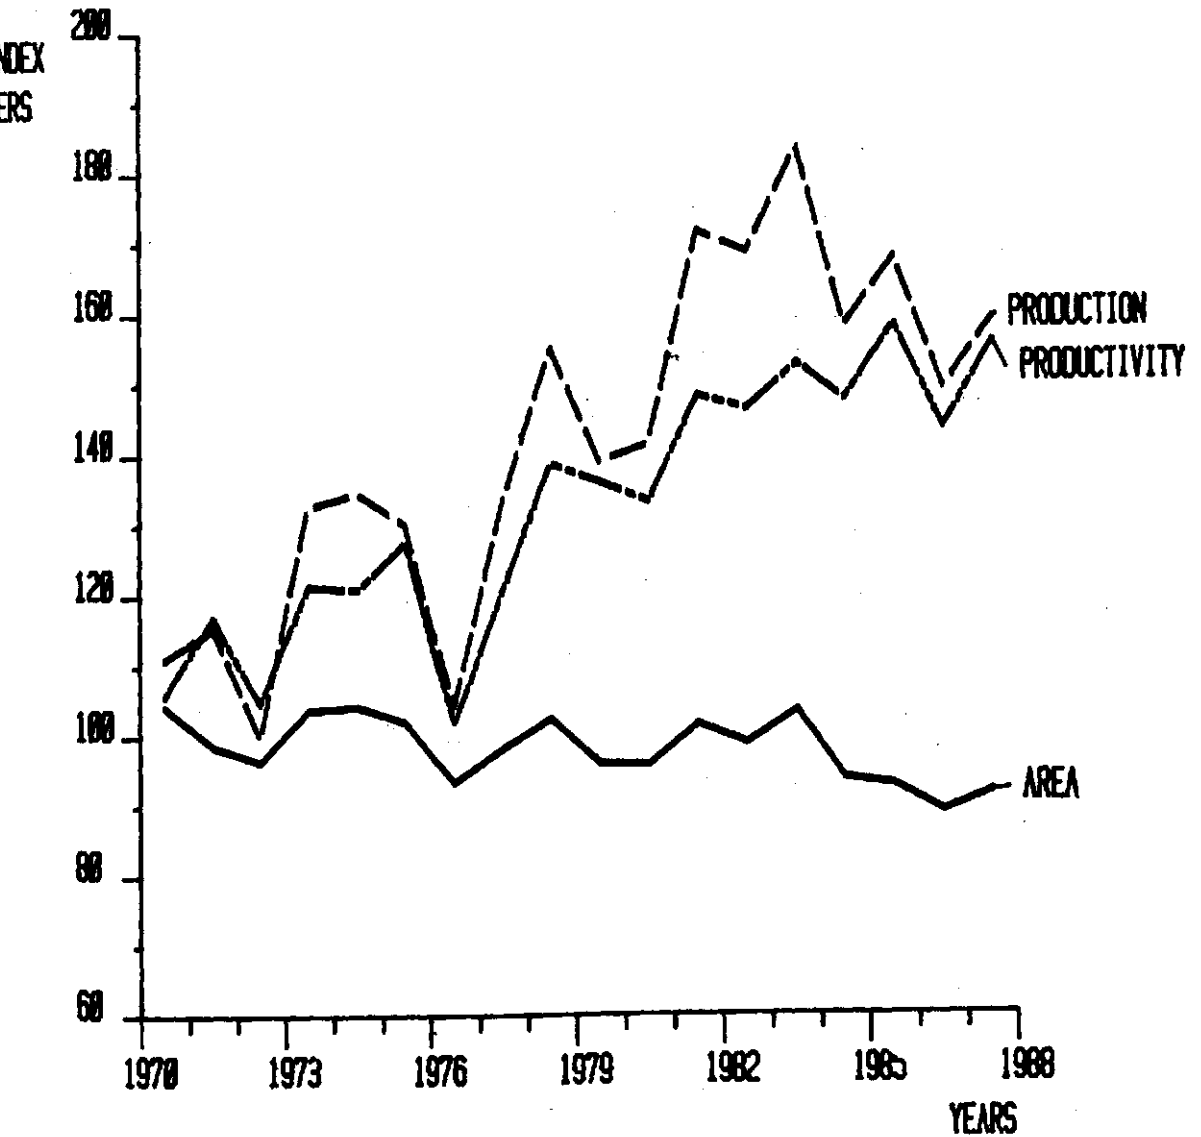

During the year 1987-88 the production index of Oil Seeds increased by 43.0 percent when compared to the previous year. Production Index of Groundnut and Castor increased by 45.7 and 51.1 percent respectively and the production index of Sesamum and Linseed decreased by 28.5 and 13.6 percent respectively.

7.9 Fibres Sub-group:

The Production index of Fibres sub-group in 1987-88 declined by 15.8 percent when compared to the previous year. Production Index of both the Constituent crops viz cotton and Mesta declined by 11.9 and 46.9 percent respectively over the previous year.

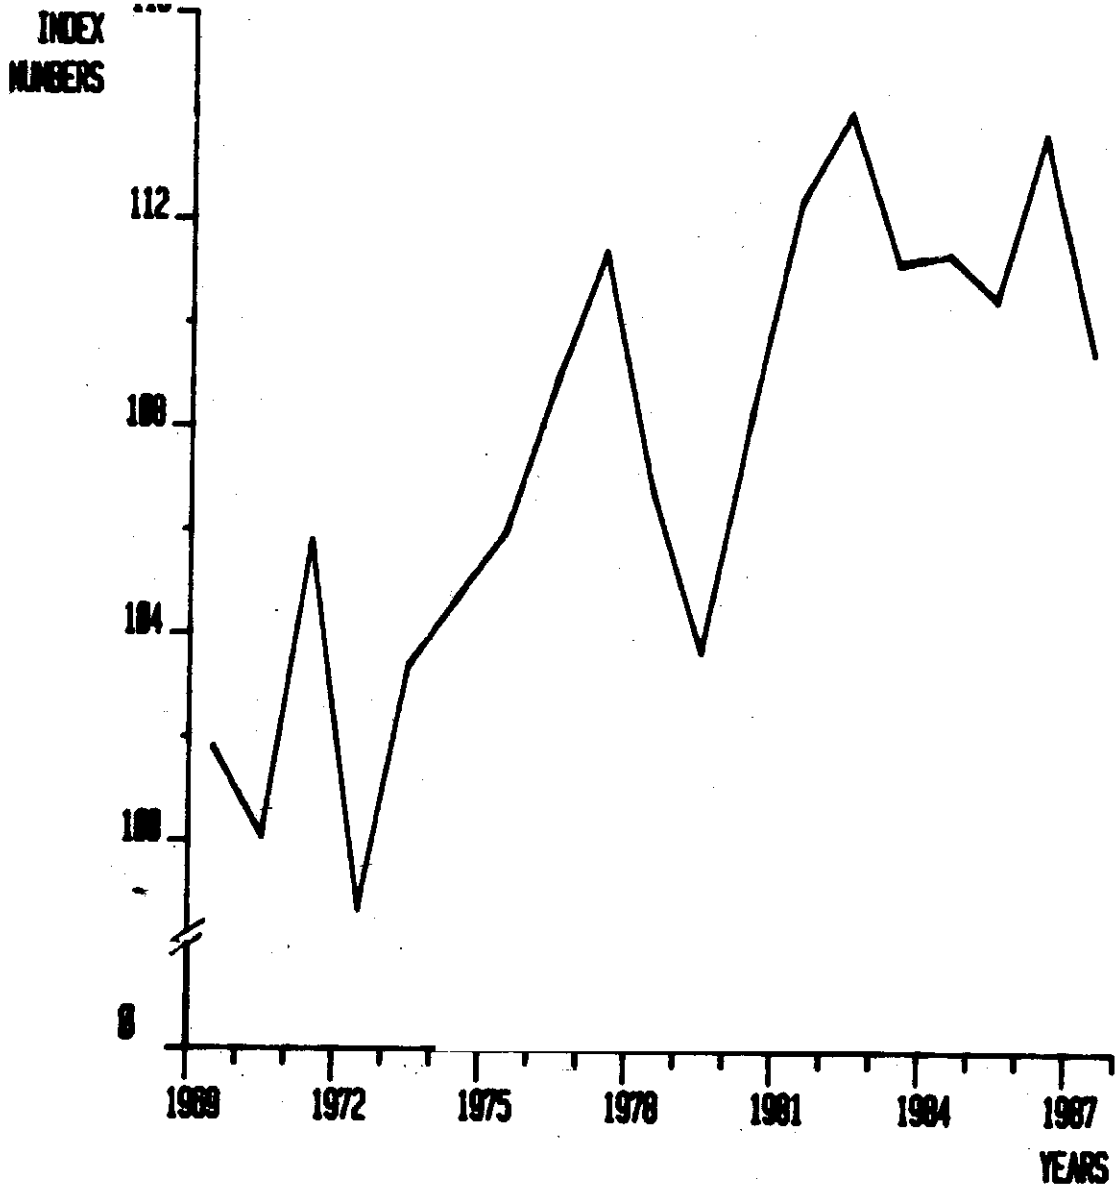

GRAPH 3-8

INDEX NUMBERS OF AREA PROD. AND PRODUCTIVITY

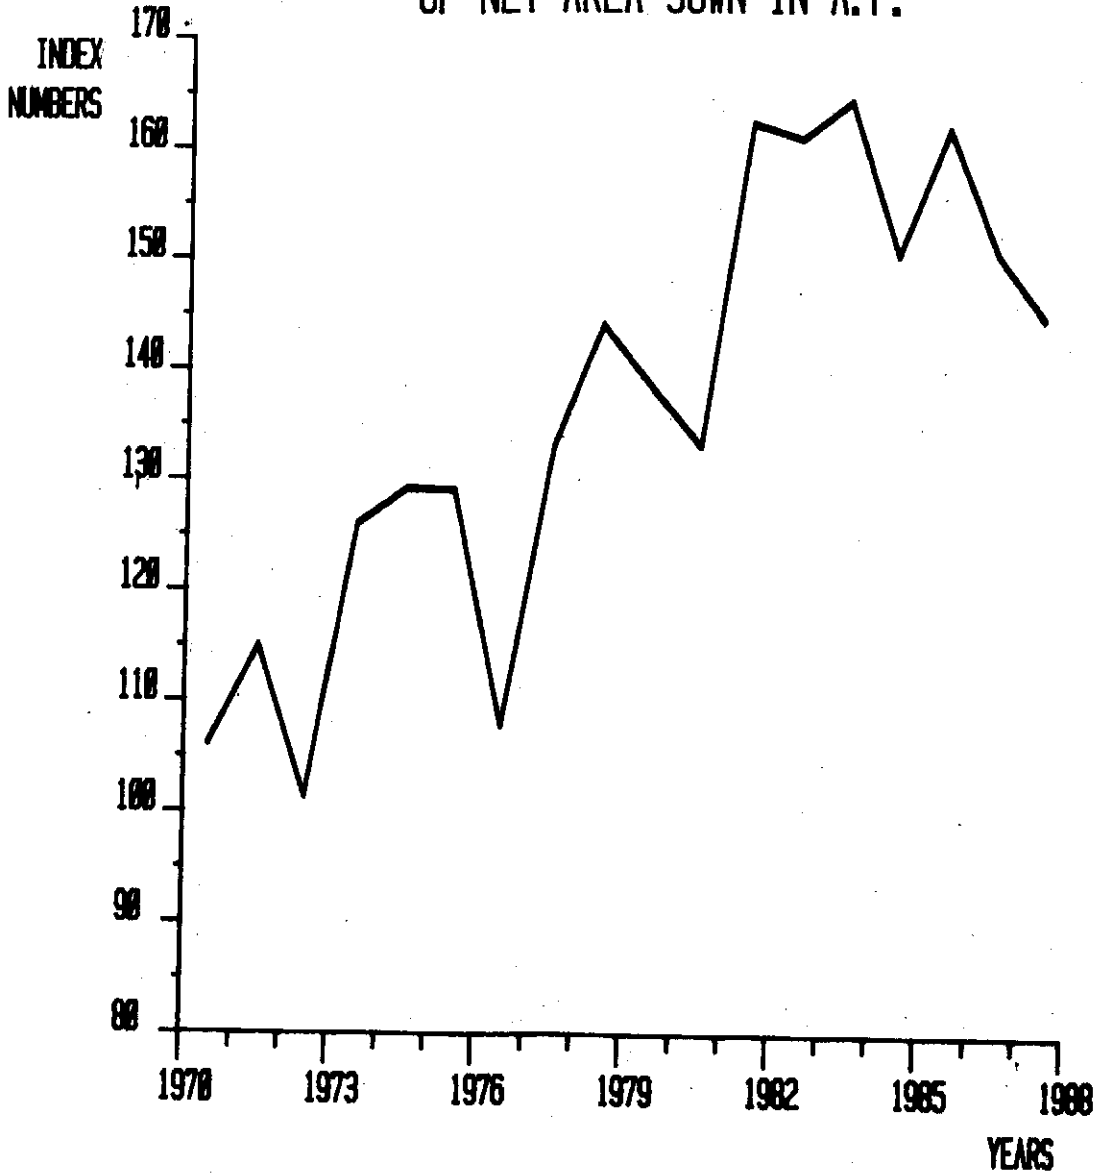

GRAPH_3-9

INDEX OF CROPPING PATTERN IN ANDHRA PRADESH

GRAPH - 4.0

INDEX NUMBERS OF GROSS VALUE PER HECTARE
OF NET AREA SOWN IN A.P.

7.10 Miscellaneous Sub-group:

During the year 1987-88 the production Index of Miscellaneous Sub-group has declined by 10.5 percent when compared to the previous year. Tobacco and Chillies Crops have shown a decline in production index by 30.9 and 9.9 percent respectively while the production index of Sugarcane crop has increased by 18.7 percent.

7.11 Index Numbers of Net area sown:

The Index of Net area sown has risen to 92.5 in 1987-88 from 89.2 in 1986-87 showing an increase of 3.7 percent.

7.12 Index Numbers of cropping Intensity:

The Index Number of Cropping intensity has increased to 102.6 in 1987-88 from 102.5 in 1986-87 showing a marginal increase of 0.1 percent.

7.13 Index Number of Cropping Pattern:

The Index Number of cropping pattern during the year 1987-88 has decreased to 109.5 in 1987-88 from 113.7 in 1986-87 showing a decrease of 3.7 percent.

7.14 Index of Productivity per hectare of Net area sown:

The Index of Productivity per hectare of Net area sown measures the growth of gross value per hectare of Net area sown at base period prices. This Index has decreased to 144.8 in 1987-88 from 150.2 in 1986-87, showing a decline of 3.6 percent.

The Indices of Net Area Sown, Cropping intensity, Cropping Pattern and Productivity per hectare of net area sown are given in Table 7.4.

7.15 Graphs 3.8, 3.9, 4.0 showing the Index numbers of Area, Production and Productivity, Index numbers of cropping pattern and Index numbers of Gross value of per hectare of Net Area sown are given in the report.

TABLE - 7.4

Index Numbers of Net Area Sown, Cropping Intensity, Cropping Pattern And Productivity Per Hectare of Net Area Sown in Andhra Pradesh, 1983-84 to 1987-88.

Sl. No.	Year	Net Area Sown	Cropping Intensity	Cropping Pattern	Productivity per hectare of net area sown
(1)	(2)	(3)	(4)	(5)	(6)
1.	1983-84	101.5	103.1	111.2	164.4
2.	1984-85	93.1	102.5	111.4	150.4

REVIEW ON THE TRENDS IN THE WHOLESALE PRICES OF PRINCIPAL AGRICULTURAL COMMODITIES DURING THE YEAR 1987-88 IN ANDHRA PRADESH

GENERAL:-

8.1 The State average wholesale prices of all the food crops recorded moderate increase during the year 1987-88 over the previous year 1986-87. The wholesale prices of commercial crops viz., Castor Seed, Chillies-dry and Onions rose steeply following with a moderate increase of cane Jaggery, Coconuts and Groundnuts.

The commodity-wise review of price trends is given below.

I. Food Crops:

8.2 **Rice I Sort:** A steady increasing trend was observed in the price of Rice I Sort from June 1987 to June 1988. The annual average price of Rice I sort for the year 1987-88 over 1986-87 increased by 11.6 percent. The price of Rice I sort was Rs. 358.65 in June 1987 and has gone upto Rs. 418.87 in June 1988 recording an increase of 16.8 percent.

8.3 **Rice II Sort:** A steady increasing trend was observed in the price of Rice IIInd sort from June 1987 Rs. 294.59 to June 1988 Rs. 354.00 or 20.2 percent. The annual average price of Rice II Sort for the year 1987-88 over the year 1986-87 recorded an increase of 11.2 percent.

8.4 **Jowar White:** A steady increasing trend was observed in the price of Jowar White except in the months of July to September 1987 from June 1987 to January 1988 and again erratic trend was observed for the remaining months for the year 1988. The annual average wholesale price of Jowar White for the year 1987-88 over the year 1986-87 recorded an increase of 6.9 percent. There was an increase in the wholesale price of Jowar White in June 1988 over June 1987 by 8.8 percent.

8.5 **Bajra:** The annual average wholesale price of Bajra for the year 1987-88 over 1986-87 recorded an increase of 10.4 percent. There was an increase in the wholesale price of Bajra in June 1988 over June 1987 by 21.7 percent.

8.6 **Ragi:** The annual average wholesale price of Ragi for the year 1987-88 over 1986-87 recorded an increase of 10.7 percent. There was an increase in the wholesale price of Ragi in June, 1987 by 11.4 percent.

II. Commercial Crops:

8.7 **Cane Jaggery:** The annual average wholesale price of Cane Jaggery for the year 1987-88 at Chittoor centre indicated an increase of 18.4 percent over the preceding year (1986-87) and the monthly wholesale price in June 1988 over June 1987 also recorded an increase by 18.6 percent.

In the other selected Centre viz. Nizamabad the annual average wholesale price for the year 1987-88 over 1986-87 increased by 12.3 percent while the monthly wholesale price June 1988 over June 1987 recorded a decline of 4.8 percent.

8.8 Castor Seed: The annual average wholesale price of Castor seeds for the year 1987-88 over 1986-87 at Nalgonda centre recorded a steep rise of 61.8 percent. The monthly wholesale price of Castor seeds in June 1988 over June 1987 recorded steep rise of 118.4 percent.

(Note:- Bodapally centre has been substituted by Nalgonda as there were no transactions in that place)

8.9 Coconuts: The annual average wholesale price of coconuts for the year 1987-88 at Kakinada Centre indicated an increase of 16.6 percent and the monthly wholesale price for June 1988 Over June 1987 recorded a marginal increase of 4.9 percent.

8.10 Groundnuts: The annual average wholesale price of Groundnuts (Seed) for the year 1987-88 over 1986-87 at Proddutur centre recorded an increase of 8.8 percent, while the monthly wholesale price of June 1988 over June 1987 recorded a decline of 9.4 percent.

8.11 Chillies Dry: The annual average wholesale price of Chillies dry for the year 1987-88 over 1986-87 at Guntur centre recorded a steep rise of 109.0 percent and the monthly wholesale price of June 1988 over 1987 was also recorded a steep rise by 169.4 percent.

8.12 Onions: The annual average wholesale price of Onions for the year 1987-88 over 1986-87 at Karimnagar Centre recorded considerable increase of 61.2 percent while the monthly wholesale price of June 1988 over June 1987 also recorded as steep rise of 137.5 of percent.

9.0 Brief review on the trends in Retail prices essential commodities in A.P. during 1987-88.

9.1 During the year 1987-88 the State average retail prices of all six commodities recorded increase ranging from 1.5 percent to 13.1 percent when compared with previous year. (Rice I sort)
(Ragi)

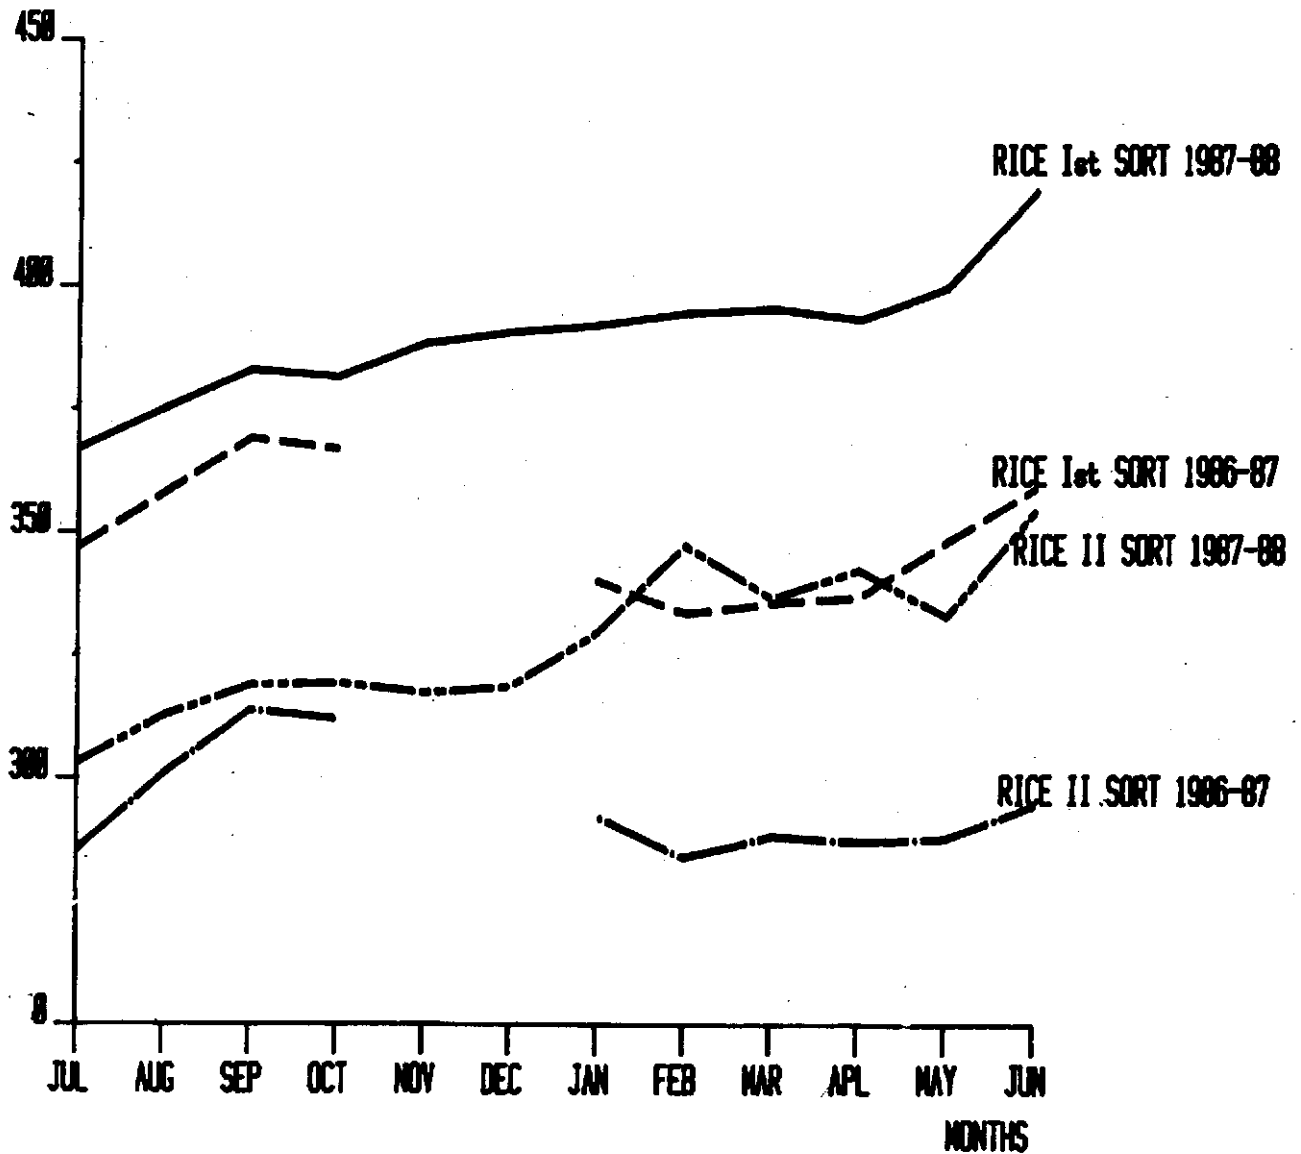

9.2 Graph 4.1, 4.2, 4.3, 4.4, 4.5 and 4.6 showing the monthly wholesale prices of Rice, Jowar, Bajra, Ragi, Cane (Jaggery), Groundnut, Castor and Coconut are given.

10.0 Review on the Trends of Agricultural wages in Andhra Pradesh during 1987-1988.

10.1 In Andhra Pradesh three representative rural centres based on concentration of Agriculture labour in each district were selected for the collection of data on daily wages of Agriculture Labour. This data is being collected during the last week of every month regularly in respect of skilled labour and Agriculture Labour since 1958-59. The categories of skilled labour comprises (1) Carpenter, (2) Blacksmith, (3) Cobbler. Agriculture labour is broadly classified into 3 categories (viz) (1) Field Labour, (2) Herdsman (3) Other Agriculture labour Each category is again sub-divided into three categories viz. Man, Woman and Non-adult. Field labour includes labourers engaged in ploughing, Sowing reaping, harvesting and transplanting operations of the crops. Herdsman are those who collect livestock from different owner houses, feed them on grazing lands and bring them back to

owners. Other Agriculture labour includes labour engaged in watering fields, load carrying, well digging, removal of silt from wells and embankment work etc.

10.2 The index numbers of Agriculture labour is constructed on the basis of wages being collected from sixty six centres selecting 3 centres from each district.

Base period:

10.3 The Agriculture year 1980-81 is taken as the base year.

10.4 The wages of different categories of labour for a district as a whole is arrived at as a simple arithmetic mean of the wages prevailing at the selected centres in the district during a particular month. The wages of each category of Agriculture labour for the State as a whole are arrived at as a simple arithmetic mean of the district wages. The base year wages for the State are arrived at as the simple average of monthly wages of all the 12 months of the year i.e. 1980-81.

10.5 The wage relatives for each category of labour are expressed as a percentage ratio of the current wages to the base year wages. The index number of wages of skilled labour is worked-out as the average of wage relatives of carpenters, blacksmith and cobblers. The simple average of wage relatives of different categories of Agriculture Labour is taken as the index numbers of Agriculture wages for the month.

Skilled labour:

10.6 **Carpenter:** The index numbers of wages for carpenters increased from 237.8 points in July 1987 to 254.5 points in June 1988 showing a rise of 16.7 points or 7 percent.

10.7 **Blacksmith:** The index number of wages of blacksmith also recorded an increase from 232.2 points in July 87 to 246.5 points in June 1988 or 6.2 percent.

10.8 **Cobblers:** The index numbers of wages of cobblers fluctuated but stood at 236.8 points in June 88 from 234.4 points at the beginning of the year.

10.9 Graphs 4.7 to 5.0 showing the Index numbers of Daily Field Labour wages in Andhra Pradesh, Daily wages of Herdsman etc., are given.

DETAILED TABLE VIII A

FARM HARVEST PRICES (WEIGHTED) OF THE PRINCIPAL AGRICULTURAL COMMODITIES
IN ANDHRA PRADESH FOR THE YEAR 1987-88.

(Prices in Rs. & Per Quintal)

Sl. No.	Name of the Crop	Farm Harvest Prices Per Quintal		Percentage variation (+) or (-) Col. (4) over Col. (3)	Remarks Reasons for variation
		1986-87	1987-88		
(1)	(2)	(3)	(4)	(5)	(6)
1.	Paddy	160.71	175.10	+9.0	1. due to drought conditions, the area under Paddy decreased, hence increase in price. 2. due to fixation of higher price.
2.	Jowar	153.91	169.36	+10.0	due to drought conditions, production decline and hence increase in price.
3.	Bajra	154.09	167.89	+9.0	due to drought.
4.	Maize	160.22	176.27	+10.0	due to drought.
5.	Ragi	149.01	167.95	+12.7	due to drought.
6.	Korra	150.31	170.45	+13.4	due to increase in demand of korra since the prices of other cereals increased.
7.	Redgram	476.82	653.60	+37.1	due to pests attack
8.	Bengalgram	384.47	485.16	+26.2	due to drought.
9.	Blackgram	403.02	446.54	+10.8	due to drought.
10.	Greengram	363.35	477.81	+31.5	due to drought and short supplies.
11.	Horsegram	201.06	198.76	-1.1	
12.	Cane Jaggery	317.64	352.22	+10.9	due to drought.
13.	Onions	115.06	183.53	+59.5	1. damage of crop due to unseasonal heavy rains. 2. due to permission to other states.

1)	(2)	(3)	(4)	(5)	(6)
4.	Turmeric	537.97	714.85	+32.9	1. due to drought, pest attack production decreases. 2. due to export orders.
5.	Chillies (Dry).	646.26	1318.17	+104.0	1. failure of crop, 2. export orders to other states.
16.	Coriander	1127.55	778.96	-30.9	due to increase in produc- tion, price declined.
17.	Groundnut (pods)	536.59	626.60	+16.8	1. due to drought 2. due to increase in cost of produc- tion 3. due to short supply from neighbouring states.
18.	Gingelly	741.60	898.62	+21.2	due to drought short supply.
19.	Safflower	437.29	478.89	+9.5	
20.	Castor	422.43	648.72	+53.6	due to drought, the yield of Castor crop decreases hence the increase in price
21.	Mesta	210.02	264.75	+26.1	due to drought conditions.
22.	Cotton Kapas.	613.63	857.13	+39.7	due to pests, the yield decreases.
23.	Tobacco (Virginia F.C.V.)	1208.67	1934.04	+60.0	1. due to restriction in area by the Tobacco Board. 2. due to low production on account of drought condi- tions. 3. Competition in market.

DETAILED TABLE-X

GLOSSARY OF BOTANICAL, ENGLISH AND TELUGU NAMES OF CROPS

Botanical	English	Telugu
(1)	(2)	(3)
CEREALS		
<i>Oryza Sativa</i>	Paddy	Vadlu
<i>Triticum Species</i>	Wheat	Godhumalu
<i>Sorghum Vulgare</i>	Jowar	Jonnalu
<i>Pennisetum Typhoide</i>	Bajra	Sajja or Ganti
<i>Hordeum Velgare</i>	Barley	Barley
<i>Zea Mays</i>	Maize	Mokkajonnalu
<i>Eleusine Coracana</i>	Ragi	Ragi and Chodi
<i>Setaria Italica</i>	Kora (Italian Millet)	Korralu
<i>Paspalum Serobiculatum</i>	Varagu	Arikelu
<i>Panicum Miliare</i>	Samali	Samulu
<i>Panicum Milliaceum</i>	Common Millet	Varigalu
PULSES		
<i>Cicer Arietinum</i>	Bengalgram	Shanagalu
<i>Phaseolu Aureus</i>	Greengram	Pesarlu
<i>Cajanus Cajan</i>	Redgram	Kandulu
<i>Phaseolus Mungo</i>	Blackgram	Minumulu
<i>Dollichose Biflorus</i>	Horsegram	Ulavalu
<i>Phaseolus acdonitifolius</i>	Dewgram	Mittikalu or Kumkumpesalu
<i>Dolichos Lablab</i>	Fieldbean	Anumulu
<i>Vignacatjang</i>	Cowgram cowpea	Alasandulu or Bobbarlu
SUGAR		
<i>Saccharum Officinarum</i>	Sugarcane	Cheruku
<i>Borassus Flabelliber</i>	Palmyra	Thati
<i>Poenix Sylvestris</i>	Date Palm	Kharjuramu
CONDIMENTS AND SPICES		
<i>Areca Catichu</i>	Betelnuts	Vakgalu or Pokalu
<i>Cadsicum Annun</i>	Chillies	Mirapakayalu
<i>Zingiber Officinale</i>	Ginger	Allam
<i>Cureuma Longa</i>	Turmeric	Pasupu
<i>Allium Sativum</i>	Garlic	Tellagadda or Velluli
<i>Coriandrum Sativum</i>	Coriander	Dhaniyalu or Kottumeri
<i>Tamarindus Indica</i>	Tamarind	Chintapandu
FRUITS AND VEGETABLES		
<i>Musa Sapientum</i>	Bannanas	Aratipandu
<i>Vitis -Vinifera</i>	Grapes	Draksha
<i>Magnifera indica</i>	Mangoes	Mamidi
<i>Anarcadium Occidentale</i>	Cashewnut	Jeedinamidi
<i>Psidium Guajava</i>	Guava	Jama
<i>Sokanum Tukersoum</i>	Potatoes	Urlagadda
<i>Manihot Utilissima</i>	Topioca	Karrapendalam
<i>Ipomaco Batatas</i>	Sweet potatoes	Genusugaddalu or Chilagadam

DETAILED TABLE-X (Conclg.)

(1)	(2)	(3)
Allium Ceba	Ulligadda	Nirulli
Olden Landia Unbellata	Chayroot	Chirriveru
Amaranthus	Amaranths	Thotakoora
Solanum Melongena	Brinjal	Vankaya
Lycopersicon Esculentum	Tomatoe	Seema Vanga
	OIL SEEDS	
Arachis hypogoca	Groundnut	Verushenaga
Ricinus Communis	Castor	Amudalu
Cocos Nucifera	Coconut	Kobbera
Seesamum indicum	Gengelly, Sesamum	Nuvvulu
Brassica campestris	Rape and Mustar	Avalu
Carthamus tinctorius	Safflower	Kusuma
Linum Uitastisimum	Linseed	Avisi
Guzotia Abyssinica	Nigerseed	Verinuvvulu
	FIBRES	
Gossypium SP.	Cotton	Prathi
Hibiscus Cannabinus	Bombay Hemp	Gogu
Agave Vivipara	Agave	Kalabanda or Kittanara
	DRUGS AND NARCOTICS	
Coffea arabica	Coffee	Coffee
Camellia Theifera	Tea	Theyaku
Cannabis sativa	Indian Hemp	Ganjaya, Bangjaku
Piper Betle	Betel Vines	Tamalapakulu
Nicotiana Tabacum	Tobacco	Pogakku
Papaver Somniferum	Opium	Nallamandu
	MISCELLANEOUS	
Indigofera Tinctoria	Indigo	Neeldi
Phaseolus Trilobus	Pillipesara	Pillipesara

APPENDIX
CONVERSION COEFFICIENTS
For changing British Units of Weight, Length and Capacity
into Metric Units

I. Standards of Weights

1 Oz.	28.3493 Grams
1 Gram	0.0352740 Ounces, 0.09 Tola
1 Pound	0.45359 Kilogram
1 Kilogram	2.20462 Pounds
1 Tonne (Metric Ton)	0.98420 Tons, 1000 Kilograms 10 Quintals
1 Ton	1.01605 Metric Tons, 2240 Lbs.
1 Mound	0.037324 Metric Tons, 82.2857 Lbs 0.3732 Quintal
1 Cwt.	0.5010 Quintal
1 Seer	0.9331 Kilogram
1 Bale of Cotton lint (392 Lbs.)	0.1771 Metric Ton
1 Metric Ton	5.641 Bales
1 Bale of Jute (400 Lbs.)	0.181436 Metric Ton
1 Metric Ton	5.5166 Bales of Jute

II. Standards of Area

1 Hectare	2.47105 Acres
1 Acre	0.404686 Hectare, 4840 Sq.yards (43.560) Sq.ft.
1 Sq.Mile	640 Acres, 2.59 Sq. Kilometres
1 Sq. Kilometre	0.3861 Sq.Mile, 100 Hectares
1 Sq. Yard	0.8361 Sq. Metre
1 Sq. Metre	1.1960 Sq. Yards

III. Standards of Length and Capacity

1 Kilometre	0.62137 Mile
1 Metre	1.0936 Yards
1 Yard	0.9144 Metre, 91.44 Centimetres
1 Inch	25.4 Millimetres
1 Millimetre	0.04 Inch
1 Gallon	4.54596 Litres
1 Litre	0.21998 Gallon
