## F o r e w o r d

The first issue of the Statistical Epitome of Education in Maharashtra for 1959-60 presented the educational situation on the eve of inauguration of the State of Maharashtra. The present volume for 1960-61 details the educational progress achieved in 1960-61, the last year of the II Five Year Plan. Consequentially, the scope and content of the Epitome have been suitably enlarged so as to present a more comprehensive educational picture.

As a summing up of the progress made during the II Five Year Plan, a comparative statement of the educational position in 1955-56, the last year of the I Five Year Plan and in 1960-61, the last year of the II Five Year Plan has been appended indicating the achievement of the Second Plan in terms of percentage increase in institutions, pupils (boys and girls) and expenditure (Government and Total).

To the official world, this volume should serve as a ready reference for all statistics on education for Maharashtra.

during II Five Year Plan

1955 - 56 to 1960 --61

## Explanatory Note

The Statistics presented in this Epitome have been collected from thousands of institutions in the State, and then processed and analysed for recording. While data pertaining to institutions, pupils, teachers and other allied items, by their very nature, are exact and therefore reliable, those relating to expenditure, in particular to financial concessions awarded to students, however, can only be accepted as fair approximations. The financial assistance received by pupils at all stages of education, today, have an important bearing on the utilisation of educational opportunities, especially by social groups to whom these facilities were so long prohibitive. For these reasons particulars of various financial benefits received by pupils have been recorded in this Epitome in spite of limitations regarding their accuracy. These figures, in particular, have to be read and accepted with reservations.
