*THE METHODS OF MEDICAL GENETICS*

This book is an Introduction to human genetics with special emphasis on genetic aspects of disease. It aims at giving the reader some insight into statistical methods by which it is possible to circumvent the peculiar difficulties inherent in the study of morbid inheritance in human populations.

CHAPTER I	
THE MEDICAL APPLICATIONS OF GENETIC PRINCIPLES	page 9
CHAPTER II	
APPLICATIONS AND LIMITATIONS OF THE PRINCIPLE OF RANDOM MATING	34
CHAPTER III	
CONSANGUINEOUS PARENTAGE AND THE THEORY OF INBREEDING	56
CHAPTER IV	
THE GENETIC ANALYSIS OF FAMILIAL DISEASES	72
CHAPTER V	
THE INTERDEPENDENCE OF NATURE AND NURTURE	91
APPENDICES (including "The Analysis of Linkage in Human Data")	123
INDEX	144

## INDEX

- Abnormal abdomen 115  
 Albinism 20, 60, 61, 78, 79  
 Alcaptonuria 16, 56 et seq., 77  
 Amaurotic family idiocy 21, 60-61, 77, 90  
 Amblystoma 13  
 Amentia 23, 70, 126  
 Anencephaly 14  
 Aniridia 20, 51  
 Assortative mating 54, 104  
 Ateleiosis 88  
  
 Bar eye 96, 115  
 Bateson 91  
 Bernstein 23, 49, 133 et seq.  
 Blood groups 23, 45 et seq.  
 Brachydactyly 37, 51  
  
 Cancer 30-32  
 Colour blindness 22, 80  
 Correlation 98 et seq.  
 Cretinism 12  
  
 Darwin 10, 11  
 Diabetes insipidus 20, 51  
 Double dominants 83 et seq.  
 Drosophila 16, 96, 115  
  
 Fisher 91 et seq.  
 Freeman, Holziner and Mitchell 109  
 Friedreich's ataxia 60  
 Frizzle 16  
  
 Galton 11, 90  
 Garrod 56  
 Gates 72  
  
 Hæmophilia 22, 81, 90  
  
 Haldane 15, 31, 64, 66, 75  
 Hereditary optic atrophy 22  
 Herrmann 28, 119  
 Hogben 60, 64, 75, 102  
 Holzinger 28, 94, 118, 120  
 Hopkins 107  
 Huntingdon's chorea 20  
  
 Ichthyosis 60, 78, 132  
 Inbreeding 62 et seq.  
 Incest 64 et seq.  
 Intelligence 27-28, 69  
 Isoagglutinins 23, 45 et seq.  
  
 Jennings 62  
 Johannsen 18  
 Juvenile amaurotic idiocy 60, 78  
  
 Killifish 17  
 King 18  
 Krafka 96, 115  
  
 Landsteiner and Levine 24  
 Latter 47  
 Lauterback 94  
 Leber's disease 22, 82  
 Lenz 60  
 Levit 24  
 Levy 12, 105  
 Linkage 23, 66, 133 et seq.  
 Lobster claw 20, 51  
  
 Maculo-cortical degeneration 60  
 Megalo cornea 22, 82  
 Mendel 10  
 Mental defect 31, 70  
 Merriman 94  
 Mongolism 15, 25  
  
 Neotery 12  
 Night blindness 20, 82  
  
 Ostwald 121  
  
 Pease 12  
 Penrose 25, 70  
 Phenyl-thio-urea 24, 42  
 Platypoecilus 17  
 Punnett 91  
  
 Reed and Gordon 17  
 Retinitis pigmentosa 21, 60, 78  
 Rose comb 35  
  
 Sex-linked inheritance 22, 40, 64, 81  
 Single comb 35  
 Slorne 62, 78  
 Stocks 93  
  
 Tallmann 28, 119  
 Taste blindness 24, 36, 42-45  
 Tay Sachs disease 21, 60  
 Total colour blindness 60, 79  
 Twins 28, 93, 112, 118  
  
 Unit characters 17  
 Uterine environment 14, 89, 107  
  
 Variation 17  
  
 Weismann 11  
 Wingfield 94  
 Wright (Sewall) 109  
 Wyandotte 35  
  
 Xeroderma 60, 78, 132  
  
 Zein 107

time tables, unemployment aggregates, fines, taxes, war debts, overtime schedules, speed limits, bowling averages, billiard scores, calories, babies' weights, rainfall, hours of sunshine, bank rates, discount, interest lotteries, wave-lengths, and tire pressures. . . . Above all, this book reveals a heritage which is our own; the wealth of human knowledge and achievement. . . . It doesn't merely tell you about things, it helps you (in a lively, genial way) to understand that rationally planned language which is necessary for a rationally planned society."—*The Times of Los Angeles*

"There is a great social inspiration to this invitation to learn *size language*. . . . Hogben would teach the language of measurement to people so that they could understand the open bible of modern science . . . if a million really read *Mathematics for the Million* it will make a new kind of popularisation of science possible, a kind of popularisation free from wholesale misrepresentation because of an abject avoidance of the 'language of size.' "—*New York Times Book Review*

## SCIENCE FOR THE CITIZEN

1128 pages and 500 drawings by J. F. HERRABIN

7th Printing

16s. net

This is the only book we know from which ordinary people can learn the foundations of the whole body of modern science. It does not just invite us to stand in awe before the latest dizzy hypothesis. It teaches us the science by which we live, by which we may be destroyed if we do not learn to understand and control its vast new forces. This book explains the science which could now give us an age of plenty—not science for the privileged but for society if rightly used.

“This is a marvellous book. The civilized world is indebted to him.”—*The Spectator*

“The popularisation of thought in England has been dominated for thirty years by Mr. Bernard Shaw and Mr. H. G. Wells. With the publication of Hogben’s second great work of popularisation, this domination ends.”—*Manchester Guardian*

## MATHEMATICS FOR THE MILLION

672 pages and drawings again by J. F. HERRABIN

16th Printing

12s. 6d. net

“Once the immediate necessities of life have been secured no money can be better expended than in buying this book.”—*Time and Tide*

“My deliberate opinion is that it is a great book, a book of first-class importance and that it should be read by every intelligent youth from 15 to 90 who is trying to get the hang of things in this universe.”—H. G. WELLS

“I am soberly and carefully measuring my words. This is one of the indispensable works of popularisation our generation has produced.”—Professor HAROLD LASKI

“Mr. Hogben, worthy democrat of science, brings maths. down from the thin air of mystery to a real world of cookery recipes,
