Professor M. J. STEWART, M.B., F.R.C.P.

CECIL WALL, D.M., F.R.C.P.

E. L. MIDDLETON, M.D. (Secretary).
PREFACE

This report is issued by the Medical Research Council on the recommendation of their Committee on Industrial Pulmonary Disease. It deals with an investigation which was promoted by the Council, at the request of the Home Office, into the particular question of respiratory dust disease in operatives in the cotton industry. For this purpose the Council were fortunate in securing the services of a distinguished investigator in industrial medicine, Professor Carl Prausnitz, who had had to relinquish his former appointment in the University of Breslau. The work was done in Professor H. B. Maitland's department in the University of Manchester, with the co-operation of the employers' organisations and trade unions concerned, and of many other persons to whom the author makes acknowledgement in the following pages. The expenses of the investigation were borne by the Medical Research Council, but the remuneration of Professor Prausnitz was mainly provided in the form of a personal grant from the Rockefeller Foundation of New York.

The handling of cotton in its early stages, especially in the process known as carding, is inevitably a dusty occupation. When the compressed bales of raw cotton arrive in this country from the plantations, much dust still remains mixed with it and has to be removed in a series of processes, preparatory to spinning the material into yarn. Important among these are the processes carried out in the blowing or scutching room, in which partially loose masses of cotton are thoroughly separated; and in the carding room, where the cotton is subjected to an intensive teasing action, by which its hairs are combed into a parallel arrangement and removed in the form of a filmy rope.

The Departmental Committee on Dust in Card Rooms in the Cotton Industry, appointed by the Home Office, concluded in their report (H.M. Stationery Office, 1932) that the dust in card rooms is still a cause of some discomfort and ill-health due to respiratory disease among operatives. They found that the main effects can be considered in three stages, which gradually merge as the malady progresses. The first evidence of the condition, when it occurs, consists of symptoms of irritation, particularly cough and a feeling of constriction in the chest, but these pass off on removal from the dusty atmosphere. After ten or more years' work the effects may become more persistent, with periods of incapacity, at first short and infrequent but tending to become more prolonged and to occur at shorter intervals. Cessation from work in the dusty atmosphere at this stage is generally followed by recovery, or at least by sufficient improvement to permit of work in another atmosphere. Finally, a stage may be reached in which there is total incapacity for work, with signs of chronic bronchitis and emphysema, and a strain on the heart which is apt to lead to cardiac failure. The very nature of the condition made it difficult to investigate: the absence of special clinical features which would serve to distinguish the disease of card-room workers from other non-specific forms of chronic
pulmonary disorder, indicated the importance of studying the underlying causes rather than the character of the condition.

While the inquiry of the Departmental Committee was in progress, the Council assisted the work by arranging for various relevant investigations. In the first place, Dr. A. Bradford Hill made a statistical inquiry on their behalf into sickness among operatives in card rooms in Lancashire cotton mills, and the results of this were published by the Council as a report of their Industrial Health Research Board. Secondly, Dr. J. C. Bramwell and Dr. R. Ellis, at Manchester, clinically examined for the Council many cotton operatives suffering from cardio-respiratory symptoms believed to be due to the inhalation of cotton dust: the results suggested that some form of sensitisation played an important part. Subsequent work by Professor H. B. Maitland, assisted by Dr. A. Brown, showed the discovery of the hitherto unsuspected presence of histamine in the cotton dust. The obvious desirability of following up this clue led to the investigation of which an account is now given.

In the present report Professor Prausnitz shows how he studied the problem of "strippers' asthma" from many angles, so that he was led ultimately to the view that there is a specific agent in cotton dust capable of producing the observed symptoms and ultimately the pathological changes in the lungs which cause complete disablement in a number of workers exposed to cotton dust for a long time. As a result of an able and laborious research, he has shown the strong probability that this substance, or group of substances, is contained in the protein fraction of the dust and is responsible for the changes which may occur in the lung after prolonged inhalation. He does not think that histamine, although present in cotton dust, is the toxic agent at fault. Professor Prausnitz has also established the existence of super-sensitiveness (allergic sensitiveness) in all patients suffering from this respiratory dust disease, and concludes that in this respect it is related to ordinary asthma.

It seems clear from the results obtained that there is only one method of overcoming this disability of the cotton industry, and that is by preventing access of the finest dust to the respiratory tract. It would appear that the ventilating and exhaust appliances which are now generally in use, although they remove the coarser particles of cotton dust from the atmosphere, do not in fact prevent access to the worker of the finer particles which are particularly liable to produce intense irritation of the respiratory system in those susceptible to the dust. Now that this essential fact is established by Professor Prausnitz, the practical problem seems to rest on the need of discovering a method of removing these finer particles. The ingenuity of the engineer which is shewn in the modern machinery of the cotton industry ought to have relatively little difficulty in solving this mechanical problem and so eliminating an important cause of ill-health among industrial workers.

MEDICAL RESEARCH COUNCIL,
38 Old Queen Street,
Westminster, S.W.1.

LIST OF PUBLICATIONS

(The prices given are net: those in brackets include postage.)

July, 1936.

The following publications relating to the work of the Medical Research Council can be purchased directly from H.M. Stationery Office, at the following addresses: Adastral House, Kingsway, London, W.C.2; 120 George Street, Edinburgh 2; York Street, Manchester 1; 1 St. Andrew's Crescent, Cardiff; 80 Chichester Street, Belfast; or through any bookseller.*

In addition, numerous memoirs upon work aided by the Medical Research Council have appeared in Scientific Journals: particulars of these may be seen in the Annual Reports.

Out-of-print reports are not included in the following list.

ANNUAL REPORTS

Medical Research Committee, Nos. 1-5, 1914-15 to 1918-19.
Medical Research Council, 1919-20 and subsequently.

(Price of each report from 1920-1 to 1925-6, 3s. 6d. (3s. 8d.); from 1926-7 to 1928-9, 3s. 2d. (3s. 6d.); 1929-30 and 1930-31, 2s. 6d. (2s. 8d.); 1931-32, 2s. 2d. (2s. 6d.); 1932-33, 2s. 6d. (2s. 9d.); 1933-34, 3s. each. (3s. 3d.).)

SPECIAL REPORTS, &c.

Alcohol:
No. 56. The effects of Alcohol and some other Drugs during Normal and Fatigued Conditions. By W. McDougall and May Smith. [1920.] 1s. (1s. 1d.).
No. 168. Alcohol and Inheritance: An Experimental Study. By F. M. Durham and H. M. Woods. [1932.] 1s. 3d. (1s. 5d.).
(Book). Alcohol: its Action on the Human Organism. Second Edition [1924.] 1s. (1s. 2d.) paper covers, 1s. 6d. (1s. 8d.) cloth bound.

Anaerobic Bacteria: see Wound Infections.

Animals, Diseases of:
No. 121. Borna Disease and Enzootic Encephalomyelitis of Sheep and Cattle. By S. Nicolau and I. A. Galloway. [1928.] 5s. (5s. 3d.).

Dust: see Respiration, etc., (No. 212), Ventilation, etc.

Dysentery:

Reports upon Investigations in the United Kingdom of Dysentery Cases received from the Eastern Mediterranean:

No. 7. V.—Report upon 2,360 Enteritis "Convalescents" received at Liverpool from various Expeditionary Forces. By E. Glynn and others. [1918.] 6s. (6s. 2d.)

No. 15. A Study of 1,300 Convalescent Cases of Dysentery from Home Hospitals: with special reference to the Incidence and Treatment of Amoebic Dysentery Carriers. By Clifford Dobell, H. S. Gettings, Margaret W. Jepps, and J. B. Stephens. [1918.] 1s. 3d. (1s. 4d.)

No. 29. A Contribution to the Study of Chronicity in Dysentery Carriers. By W. Fletcher and Doris L. Mackinnon. [1919.] 9d. (10d.)

No. 30. An Investigation of the Flexner-Y Group of Dysentery Bacilli. By H. S. Gettings. [1919.] Is. (1s. 1d.)

No. 40. Studies of Bacillary Dysentery occurring in the British Forces in Macedonia. By L. S. Dudgeon and others. [1919.] 3s. (3s. 2d.)

No. 42. A Study of the Serological Races of the Flexner Group of Dysentery Bacilli. By F. W. Andrewes and A. C. Inman. [1919.] 2s. (2s. 2d.)

See also Food Poisoning.

Enteric Infections:
No. 9. A Report upon the Use of Atropine as a Diagnostic Agent in Typhoid Infections. By H. F. Marris. [1917.] 1s. (1s. 1d.)

No. 179. Chronic Enteric Carriers and their Treatment. By C. H. Browning with others. [1933.] 1s. 6d. (1s. 8d.)

See also Bacteriology; Food Poisoning.

Epidemiology:
No. 75. The Schick Test, Diphtheria and Scarlet Fever. By S. F. Dudley. [1928.] 1s. (1s. 2d.)

No. 111. The Spread of Droplet Infection in Semi-isolated Communities. By S. F. Dudley. [1926.] 1s. 6d. (1s. 8d.)

No. 120. An Inquiry into the Relationship between Housing Conditions and the Incidence and Fatality of Measles. By J. L. Halliday. [1928.] 1s. (1s. 1d.)

No. 180. Epidemiological Study of Scarlet Fever in England and Wales since 1900. By Hilda M. Woods. [1933.] 1s. 3d. (1s. 5d.)

No. 192. Housing Conditions and Respiratory Disease. Morbidity in a Poor-class Quarter and in a Rehousing Area in Glasgow. By C. M. Smith. [1934.] 9d. (10d.)

No. 195. Active Immunization against Diphtheria: its effect on the Distribution of Antitoxic Immunity and Case and Carrier Infection. By S. F. Dudley, P. M. May, and J. A. O'Flynn. [1934.] 3s. (3s. 3d.)

No. 209. Experimental Epidemiology. By M. Greenwood, W. W. C. Topley, and J. Wilson. [1936.] 3s. 6d. (3s. 10d.)

See also Small-Pox; Tuberculosis; Etc.

Flying, Medical Problems of:
Reports of the Air Medical Investigation Committee:—
No. 28. The Sense of Balance and Stability in the Air. By Henry Head. [1919.] 9d. (10d.) (Included in No. 53.)
Special Reports—continued.

No. 37. The Effects of Diminished Tension of Oxygen, with especial reference to the Activity of the Adrenal Glands. By C. H. Kellaway. [1919.] 1s. (1s. 1d.).

No. 53. The Medical Problems of Flying (including reports on oxygen want, selection of candidates for flying, sense of balance, and flying strain). [1920.] 6s. (6s. 4d.).

No. 84. The Application of the Air Force Physical Efficiency Tests to Men and Women. By L. D. Cripps. [1924.] 1s. 6d. (1s. 8d.).

Food Poisoning:

No. 91. An Investigation of the Salmonella Group, with Special Reference to Food Poisoning. By W. G. Savage and F. Bruce White. [1925.] 3s. 6d. (3s. 8d.).

No. 92. Food Poisoning: a Study of 100 Recent Outbreaks. By W. G. Savage and F. Bruce White. [1925.] 2s. 6d. (2s. 8d.).

No. 103. Further Studies of the Salmonella Group. By F. Bruce White. [1926.] 5s. (5s. 3d.).

Goitre:

Haemoglobin: see Blood.

Hearing:
Reports of the Committee upon the Physiology of Hearing.

Heart:
No. 8. Report upon Soldiers returned as Cases of “Disordered Action of the Heart” (D.A.H.), or Valvular Disease of the Heart. By Sir Thomas Lewis. [1917.] 1s. (1s. 1d.).

No. 147. The Electrocardiogram. By W. H. Craib. [1930.] 1s. 3d. (1s. 5d.).

No. 208. The Course of the Oesophagus in Health, and in Disease of the Heart and Great Vessels. By William Evans. [1936.] 2s. 6d. (2s. 9d.).

Heredity: see Immunity (No. 196).

Immunity:
No. 194. The Chemistry of Antigens and Antibodies. By J. R. Marrack. [1934.] 2s. 6d. (2s. 8d.).

No. 195. The Inheritance of Resistance to Infection in Animal Species. A Review of the Published Experimental Data. By A. Bradford Hill. [1934.] 1s. 3d. (1s. 5d.). See also Epidemiology.

Industrial Health:
The Annual Reports of the Industrial Health (formerly Fatigue) Research Board, and special reports on particular subjects, are published for the Council in separate series. The subjects dealt with include accident causation, rest pauses, spells of work, movement study, vocational selection, and problems of particular industries. A list can be supplied on application to the Secretary of the Board, 38, Old Queen Street, Westminster, S.W.1.
Special Reports—continued.

Influenza:
No. 36. Studies of Influenza in Hospitals of the British Armies in France, 1918. [1919.] 3s. 6d. (3s. 8d.).
No. 63. Studies in the Aetiology of Epidemic Influenza. By J. McIntosh. [1922.] 2s. 6d. (2s. 7d.).

Jaundice:
No. 113. Spirochaetal Jaundice. By G. Buchanan. [1927.] 4s. (4s. 2d.).

Pituitary Extract: see STANDARDS.
Pneumonia:
No. 79. Bacteriological and Clinical Observations on Pneumonia and Empyemata, with special reference to the Pneumococcus and to Serum Treatment.
By E. E. Glynn and Lettice Digby. [1923.] 5s. (5s. 3d.).

Pneumothorax, Artificial: see TUBERCULOSIS.
Print, Legibility of: see VISION.
Protozoan Infections:
By Clifford Dobell. [1921.] 2s. (2s. 2d.).

Psychology:
By G. W. Pailthorpe. [1932.] 2s. (2s. 2d.).

Quinine:
No. 98. Clinical Comparisons of Quinine and Quinidine.
By the Committee upon Cinchona Derivatives and Malaria. [1925.] Is. (Is. 1d.).

Radium:
No. 62. Medical Uses of Radium: Studies of the Effects of Gamma Rays from a large Quantity of Radium.
By various authors. [1922.] 5s. (5s. 3d.).
No. 90. Medical Uses of Radium: Summary of Reports from Research Centres for 1923. [1924.] 1s. (1s. 1d.).
No. 102. Ditto for 1924. [1926.] 1s. 6d. (1s. 7d.).
No. 112. Ditto for 1925. [1926.] 1s. 3d. (1s. 4d.).
No. 116. Ditto for 1926. [1927.] 1s. (1s. 2d.).
No. 126. Ditto for 1927. [1928.] 1s. (1s. 2d.).
No. 144. Ditto for 1928. [1929.] 1s. (1s. 1d.).
No. 150. Ditto for 1929. [1930.] 9d. (10d.).
No. 160. Ditto for 1930. [1931.] 1s. (1s. 1d.).
No. 174. Ditto for 1931. [1932.] 1s. 3d. (1s. 5d.).
No. 186. Ditto for 1932. [1933.] 1s. (1s. 1d.).
No. 197. Ditto for 1933. [1934.] 9d. (10d.).
No. 204. Ditto for 1934. [1935.] 1s. (1s. 2d.).

Respiration and Respiratory Diseases:
No. 198. Test for Respiratory Efficiency.
By A. Moncrieff. [1934.] 1s. (1s. 2d.).
No. 212. Investigations on Respiratory Dust Disease in Operatives in the Cotton Industry.
By C. Prausnitz. [1936.]

Rheumatism: see CHILD LIFE (No. 114).

Rickets:
No. 61. Experimental Rickets.
By E. Mellanby. [1921.] 4s. (4s. 2d.).
No. 68. Rickets: the Relative Importance of Environment and Diet as Factors in Causation.
By H. Corry Mann. [1922.] 2s. 6d. (2s. 8d.).
No. 71. The Aetiology and Pathology of Rickets from an experimental point of view.
By V. Korenechevsky. [1922.] 4s. (4s. 3d.).
No. 77. Studies of Rickets in Vienna, 1919–22. [1923.] 7s. 6d. (7s. 11d.).
No. 93. Experimental Rickets: The Effect of Cereals and their Interaction with other factors of Diet and Environment in producing Rickets.
By E. Mellanby. [1925.] 3s. 6d. (3s. 8d.).
Special Reports—continued.

Salvarsan: see Venereal Diseases; Streptococcal Infections; Standards, Biological (No. 128).

Scarlet Fever: see Epidemiology (Nos. 137, 180).

Scurvy: see Nutrition (No. 146).

Shock, Surgical:
Reports of the Committee on Surgical Shock and Allied Conditions:—
No. 25. Wound-Shock and Haemorrhage. [1919.] 4s. (4s. 5d.).
No. 26. Traumatic Toxaemia as a Factor in Shock. [1919.] 1s. (1s. 1d.).

Small-pox:
No. 98. Studies of the Viruses of Vaccinia and Variola. By M. H. Gordon. [1925.] 3s. 6d. (3s. 9d.).
No. 106. Small-pox and Climate in India. Forecasting of Epidemics. By Sir Leonard Rogers. [1926.] 2s. (2s. 2d.).
No. 143. Diagnostic Value of the "Vaccinia Variola" Flocculation Test. By W. L. Burgess, James Craigie, and W. J. Tulloch. [1929.] 1s. 3d. (1s. 4d.).
No. 158. Further Investigations on the Variola-Vaccinia Flocculation Reaction. By James Craigie and W. J. Tulloch. [1931.] 3s. (3s. 3d.).

Spectroscopy:
No. 177. Apparatus for the Rapid Study of Ultra-Violet Absorption Spectra. By J. St. L. Philpot and E. H. J. Schuster. [1933.] 1s. 3d. (1s. 5d.).

Spinal Deformities: see Surgery (No. 161).

Standards, Biological:
No. 69. I.—Pituitary Extracts. By J. H. Burn and H. H. Dale. [1922.] 1s. 6d. (1s. 7d.).
No. 128. II.—Toxicity Tests for Novarsenobenzene (Neosalvarsan). By F. M. Durham, J. H. Gaddum, and J. E. Marchal. [1929.] 1s. 9d. (1s. 10d.).
No. 183. III.—Methods of Biological Assay depending on a Quantal Response. By J. H. Gaddum. [1933.] 1s. (1s. 1d.).
No. 202. IV.—The Standardisation and Estimation of Vitamin A. Edited by E. M. Hume and H. Chick. [1935.] 1s. (1s. 2d.).
See also Venereal Diseases (No. 44) and Nutrition (No. 158).

Statistics (Miscellaneous):
No. 16. A Report on the Causes of Wastage of Labour in Munition Factories. By Major Greenwood. [1918.] 1s. 6d. (1s. 7d.).
No. 60. The Use of Death-rates as a Measure of Hygienic Conditions. By John Brownlee. [1922.] 3s. (3s. 2d.).
No. 95. Internal Migration and its Effects upon the Death-rates: with Special Reference to the County of Essex. By A. B. Hill. [1925.] 3s. 6d. (3s. 8d.).

Streptococcal Infections:
No. 119. A Study of some Organic Arsenical Compounds with a view to their use in certain Streptococcal Infections. By L. Colebrook. [1928.] 1s. 3d. (1s. 4d.).
No. 205. The Source of Infection in Puerperal Fever due to Haemolytic Streptococci. By Dora C. Colebrook. [1935.] 1s. 6d. (1s. 9d.).
Special Reports—continued.

Surgery:
See also Burns; Shock, Surgical.

T.N.T. Poisoning:
No. 11. The Causation and Prevention of Tri-nitro-toluene (T.N.T.) Poisoning. By Benjamin Moore. [1917.] 1s. (1s. 2d.).
No. 58. T.N.T. Poisoning and the Fate of T.N.T. in the Animal Body. By W. J. O'Donovan and others. [1921.] 3s. (3s. 2d.).

Tuberculosis:
No. 1. First Report of the Special Investigation Committee upon the Incidence of Phthisis in relation to Occupations.—The Boot and Shoe Trade. [1915.] 3d. (3d.).
No. 22. An Inquiry into the Prevalence and Aetiology of Tuberculosis among Industrial Workers, with special reference to Female Munition Workers. By Major Greenwood and A. E. Tebb. [1918.] 1s. 6d. (1s. 7d.).
No. 48. An Investigation into the Epidemiology of Phthisis in Great Britain and Ireland: Part III. By John Brownlee. [1920.] 2s. 6d. (2s. 8d.).
No. 67. Report on Artificial Pneumothorax. By L. S. T. Burrell and A. S. MacNalty. [1922.] 2s. 6d. (2s. 8d.).
No. 76. Tuberculosis in Insured Persons accepted for Treatment by the City of Bradford Health Committee. By H. Vallow. [1923.] 6d. (7d.).
No. 83. Tuberculosis of the Larynx. By Sir St. Clair Thomson. [1924.] 2s. 6d. (2s. 8d.).
No. 88. An Inquiry into the After-Histories of Patients treated at the Brompton Hospital Sanatorium at Frimley during the years 1905-14. By Sir P. H.-S. Hartley, R. C. Wingfield, and J. H. R. Thompson. [1924.] 1s. 6d. (1s. 7d.).
No. 94. Tuberculin Tests in Cattle, with special reference to the Intradermal Test. By the Tuberculin Committee. [1925.] 3s. (3s. 3d.).
No. 122. The Intradermal Tuberculin Test in Cattle: Collected Results of Experience. By J. B. Buxton and A. S. MacNalty. [1928.] 1s. 6d. (1s. 8d.).
No. 152. Studies of Protection against Tuberculosis: Results with B. C. G. Vaccine in Monkeys. By A. Stanley Griffith. [1931.] 9d. (11d.).
No. 172. Tuberculosis Disease in Children: Its Pathology and Bacteriology. By J. W. S. Blacklock. [1932.] 3s. (3s. 3d.).
No. 182. Tuberculous Bacillaemia, A Review. By G. S. Wilson. [1933.] 2s. 6d. (2s. 8d.).
No. 184. The Eradication of Bovine Tuberculosis. By L. Jordan. [1933.] 2s. (2s. 2d.).
No. 189. Tuberculous Infection in Milk. A Report by the Department of Health for Scotland. [1933.] 9d. (10d.).
Venereal Diseases:

No. 23. An Analysis of the Results of Wassermann Reactions in 1,435 Cases of Syphilis or Suspected Syphilis. By Paul Fildes and R. J. G. Parnell. [1919.] 2s. (2s. 1d.).

No. 41. (I.) An Investigation into the Ultimate Results of the Treatment of Syphilis with Arsenical Compounds. By Paul Fildes and R. J. G. Parnell. (II.) A Clinical Study of the Toxic Reactions which follow the Intravenous Administration of "914". By R. J. G. Parnell and Paul Fildes. [1919.] 2s. (2s. 1d.).

No. 44. Reports of the Special Committee upon the Manufacture, Biological Testing, and Clinical Administration of Salvarsan and of its Substitutes. I. [1919.] 1s. (1s. 1d.).

No. 45. Unsuspected Involvement of the Central Nervous System in Syphilis. By Paul Fildes, R. J. G. Parnell, and H. B. Maitland. [1920.] 1s. (1s. 1d.).

No. 47. The Accuracy of Wassermann Tests, applied before and after death, estimated by Necropsies. I. The Wassermann Test applied before death. By H. M. Turnbull. [1920.] 2s. 6d. (2s. 8d.).

No. 66. Toxic Effects following the Employment of Arsenobenzol Preparations. By the Salvarsan Committee. [1922.] 2s. (2s. 2d.).

No. 78. The Serum Diagnosis of Syphilis: The Wassermann and Sigma Reactions compared. [1923.] 5s. 6d. (5s. 9d.).

No. 107. The Effect of Treatment on the Wassermann Reactions of Syphilitic Patients. By E. E. Glynn, R. E. Roberts, and P. M. Bigland. [1923.] 3s. 6d. (3s. 8d.).

No. 132. The Treatment of Syphilis: A Survey of Records from St. Thomas's Hospital. By L. W. Harrison. [1929.] 2s. (2s. 2d.).

Ventilation, etc.:

No. 32. The Science of Ventilation and Open-air Treatment. Part I. By Leonard Hill. [1919.] 10s. (10s. 4d.).

No. 52. The Science of Ventilation and Open-air Treatment. Part II. By Leonard Hill. [1920.] 6s. (6s. 5d.).

No. 73. The Kata-thermometer in Studies of Body Heat and Efficiency. By Leonard Hill and others. [1923.] 5s. (5s. 3d.).

No. 100. Methods of Investigating Ventilation and its Effects. By H. M. Vernon and others. [1926.] 2s. (2s. 2d.).

Vision:
No. 80. Second Report of the Miners' Nystagmus Committee. [1923.] 9d. (10d.).
No. 110. The Legibility of Print. By R. L. Pyke. [1926.] 4s. (4s. 2d.).
Reports of the Committee on the Physiology of Vision:
No. 104. I. Illumination and Visual Capacities. By R. J. Lythgoe. [1926.] 2s. 6d. (2s. 8d.).
No. 127. II. Dark Adaptation (a Review of the Literature). By Dorothy Adams. [1929.] 5s. (5s. 3d.).
No. 130. III. Two Studies in the Psychology of Reading. By M. D. Vernon and R. W. Pickford. [1929.] 2s. (2s. 2d.).
No. 133. IV. Experiments on Binocular Vision. By N. M. S. Langlands. [1929.] 2s. 6d. (2s. 8d.).
No. 134. V. The Adaptation of the Eye: its Relation to the Critical Frequency of Flicker. By R. J. Lythgoe and K. Tansley. [1929.] 2s. 6d. (2s. 8d.).
No. 136. VI. Some Experiments on Peripheral Vision. By Myer Salaman. [1929.] 2s. 6d. (2s. 7d.).
No. 139. VII. A Re-determination of the Trichromatic Mixture Data. By W. D. Wright. [1929.] 1s. 3d. (1s. 4d.).
No. 163. IX. Psychological Factors in Peripheral Vision. By G. C. Grindley. [1931.] 1s. (1s. 1d.).
No. 173. X. The Measurement of Visual Acuity. By R. J. Lythgoe. [1932.] 1s. 6d. (1s. 8d.).
No. 181. XI. Individual Differences in Normal Colour Vision. By W. O'D. Pierce. [1933.] 2s. (2s. 2d.).
No. 185. XII. Colour Vision Requirements in the Royal Navy. [1933.] 1s. (1s. 2d.).
No. 188. XIII. Determination of the Sensitiveness of the Eye to Differences in the Saturation of Colours. By L. C. Martin, F. L. Warburton, and W. J. Morgan. [1933.] 1s. (1s. 1d.).
No. 200. XIV. Characteristics of Dichromatic Vision. By F. H. G. Pitt. [1935.] 1s. 3d. (1s. 5d.).

Vitamins: see Nutrition.
Wassermann Test: see Venereal Diseases.

Wound Infections:
No. 39. Report on the Anaerobic Infections of Wounds and the Bacteriological and Serological Problems arising therefrom. By the Committee upon Anaerobic Bacteria and Infections. [1919.] 6s. (6s. 4d.).
