APPENDIX A.

INDIAN SYSTEMS OF MEDICINE ENQUIRY COMMITTEE, BOMBAY.

Questionnaire.

The terms of reference of the Committee are as follows:—

1. To consider and make recommendations to Government in regard to the 'amendments necessary in the Bombay Medical Practitioners' Act, 1938, and the rules and regulations framed thereunder, in the light of their working for the last seven years.
2. To consider and report on the working of the State Faculties for the Ayurvedic and Unani Systems of Medicine and to suggest any changes, if necessary.
3. To consider and recommend to Government what steps are necessary to foster and raise the standard of the Indian Systems of Medicine and to promote research therein.
4. To suggest for the consideration of Government the basis on which grants recurrent as well as non-recurrent should be paid to Ayurvedic and Unani Teaching Institutions.

The Committee will welcome any statements of views or suggestions within the field of enquiry referred to it. Persons replying to the questionnaire below may cover the whole of the field or any particular part of it which lies within their special knowledge. The Committee will, however, feel specially grateful if such persons give detailed answers to those questions in which they are particularly interested or with which they are specially well acquainted.

It is requested that replies may be forwarded as soon as possible and not later than the 30th June 1947, to the Secretary, Indoan Systems of Medicine Enquiry Committee, C/o Board of Indian Systems of Medicine, 144, Esplanade Road, Fort, Bombay.

1. Has the Bombay Medical Practitioners' Act, 1938, in your opinion achieved the object for which it was enacted? If not give your reasons therefor.
2. Have the teaching institutions in the Indian Systems of Medicine recognized by the Board of Indian Systems of Medicine, Bombay, been successful in turning out efficient Ayurvedic and Unani Practitioners? If not, give your reasons therefor.
3. What is your impression of them as practitioners of Medicine?
4. What changes would you suggest in:—
 - (a) the minimum qualifications for admission to the courses for the qualifying examinations prescribed by the Board.
 - (b) the syllabus of studies.
 - (c) the length of the course and its gradation,
 - (d) the inclusion of modern subjects and the extent to which they should be included in the courses, and
 - (e) the practicals and clinical studies?
 Give your reasons for the same.
5. Do you consider that the present standards of the qualifying examinations in the Ayurvedic and Unani Systems of Medicine as prescribed by the Board of Indian Systems of Medicine, Bombay, are adequate? If not, what changes would you suggest?
6. What is your opinion regarding the existing arrangement made by the Board for the recognition of teaching institutions? Have you any suggestions to offer?
7. What according to you should be the minimum requirements of a teaching institution (i.e., for the College and Hospital, respectively) for Indian Systems of Medicine?
8. Have you any improvements to suggest in the present working of the teaching institutions with a view to raising their standard in relation to each of the following?
 - (1) Teaching staff.
 - (2) Laboratories and Museums.
 - (3) Hospitals and their staff and equipment.
 - (4) Periods of instruction: theoretical and practical.
 - (5) Methods of practical training (i.e., clinical, laboratory, dissection, operative surgery, postmortem, etc.).

Have you any suggestions to offer regarding the composition and working of the State faculties for the Ayurvedic and Unani Systems of Medicine, Bombay? Would you suggest any other machinery for the purpose?

10. Do you consider that the normal tendency of students is to take to the study of Western medical science in preference to the Indian Systems of Medicine? If so, give your reasons for such a tendency.

11. What steps would you recommend to encourage the study of the Indian Systems of Medicine?

12. Do you consider that the institution of a post-graduate degree in Indian Systems of Medicine by Statutory Universities in India would encourage the study of these systems?

13. What according to you should be the courses of studies for such a postgraduate degree in Indian Universities?

14. Would you recommend the establishment of a Government institution for research in Indian Systems of Medicine? Do you consider that the establishment of a research department in an institution—hospital and/or college—teaching Indian Systems of Medicine would promote research? Are there sufficient facilities either in men or in material for the purpose?

15. What steps would you recommend to encourage private efforts in research in Indian Systems of Medicine?

16. (a) What should be the objectives of research in Ayurvedic and Unani Systems of Medicine?

(b) What should be the lines of working to achieve the same?

(c) What equipment and requirements do you consider necessary for the same?

(d) Would you suggest any definite scheme for establishment of such research work?

(e) Would you give financial estimates for the scheme of research work proposed by you?

17. What are your suggestions regarding the institution of post-graduate instruction in institutions recognised under the Board of Indian Systems of Medicine, the duration of the course for the same and the examinations therefor?

18. Is it possible in your opinion to have a reasonable approach towards similarity in or harmonising the theory and practice of the Ayurvedic, Unani and Modern (Allopathic) System of Medicine? What are your suggestions in this regard?

19. Do you consider that a compilation of an Indian Pharmacopoeia and the standardisation of Indian Drugs would materially help to popularise Indian Systems? If so, who should undertake such compilation, and what suggestions have you to offer?

20. Can Indian Systems of Medicine be made part of a comprehensive scheme of medical relief in the province? If so, please give details of your plan for future arrangement.

21. Do you consider that the present constitution of the Board of Indian Systems of Medicine is such as would enable the Board:—

(A)—to discharge adequately all its functions, and

(B)—to achieve the objectives of the Act, viz., encouragements of the study and spread of the Indian Systems of Medicine? If not, what changes would you suggest in respect of:—

(a) Its composition,

(b) the proportion of elected and nominated members on it,

(c) representation on it of:—

(i) teachers in Ayurvedic and Unani Institutions,

(ii) qualified registered practitioners in the Ayurvedic and Unani Systems, and

(iii) non-qualified registered practitioners in the Ayurvedic and Unani Systems,

(d) its term of office, and

(e) the mode of election.

22. Have you any suggestions to offer regarding the powers of the Board in the matters of prescribing the courses of training for the qualifying examination and those prior to it as also for post-graduate degrees in the Indian Systems of Medicine?

23. Do you consider it advisable that a schedule of recognised qualifications similar to one given in the Bombay Medical Act 1912, should be added to the Bombay Medical Practitioners Act, 1938, and if so, under what conditions?

24. Do you consider that the interpretation of Sec. 36 (c) of the Act given by the High Court of Bombay calls for an amendment of clauses (c) & (d) of Section 36?

25. Do you consider that the provisions in Section 36 (e) should be immediately implemented and Government should prescribe the institutions qualified for training Homeopathy.

26. Do you consider it advisable to amend Sec. 36 of the Act so as to exempt persons practising in systems of Medicine other than the modern scientific system of Medicine, Indian Systems of Medicine and Homoeopathy and if so, which other systems should in your opinion be recognised for the purpose? Give reasons therefor.

27. Do you propose that immediate provision for the registration of dentists, homoeopaths and persons practising other systems of medicine to which you may make reference in your reply to question No. 26 should be made?

28. Do you propose that a provision of renewal of registration periodically, say, every five years, should be made so as to make it possible to maintain a correct list of medical practitioners registered under the Act? Do you propose that a small fee should be levied for such renewals?

29. Do you propose that a grant-in-aid be made or a fixed annual grant be provided by the Government for the functioning of the Board? What should be the basis for fixing such grant?

30. Do you consider that it is advisable to prescribe a separate form of declaration required to be filed for the purpose of reentry on the Register under Rule 79 and also a form of declaration and of undertaking required for the purpose of voluntary removal of name from Register under Rule 78?

31. Have you any amendments to propose to Section 35?

32. Do you consider that the grants at present made by Government to teaching institutions in Indian Systems are adequate?

33. What considerations according to you should be borne in mind in determining the basis of recurrent and non-recurrent grants to these institutions?

34. Do you consider that the basis of recurrent grants to non-Government institutions should be a fixed percentage of their annual expenditure to enable the proper development of such teaching institutions?

35. What portion of the non-recurring expenditure such as on building, apparatus furniture and other equipment should, in your opinion, be borne by Government?

36. How far can private philanthropy be depended upon for establishing Ayurvedic and Unani institutions (a) for medical relief and (b) for teaching.
