Dedication

TO

HIS HIGHNESS THE RAJA OF COCHIN.

TWO HUNDRED AND TWENTY YEARS AGO HENDRIK ADRIAAN VAN RHEEDE, BARON OF MYDRECHT, SOMETIME GOVERNOR OF THE DUTCH SETTLEMENTS IN MALABAR, DEDICATED TO ONE OF YOUR HIGHNESS'S PREDECESSORS THE THIRD VOLUME OF THE "HORTUS MALABARICUS" OR GARDEN OF MALABAR, ONE OF THE MOST MAGNIFICENT BOTANICAL WORKS EVER PUBLISHED; REMARKING THAT WHEN HE WAS AT HIS WORK OF COLLECTING, PORTRAYING AND DESCRIBING THE PLANTS OF MALABAR HE HAD EVER BEFORE HIS MIND THE PRESENTMENT OF THE PRINCE WHO HAD VOUCHSAFED HIM SUCH VALUABLE ASSISTANCE IN THE MATTER; THAT HE WOULD NEVER FORGET WHAT HE OWED THAT PRINCE; AND HAD THEREFORE DEDICATED A VOLUME OF THE "HORTUS MALABARICUS" TO HIM IN ORDER THAT HIS HIGHNESS'S FAME AS A MARCENAS MIGHT BE SPREAD THROUGHOUT THE WHOLE WORLD.

I VENTURE TO DEDICATE THIS LITTLE WORK TO YOUR HIGHNESS IN GRATEFUL ACKNOWLEDGMENT OF YOUR HIGHNESS'S KINDNESS AND OF THE ASSISTANCE RENDERED TO ME BY THE OFFICERS OF YOUR HIGHNESS'S STATE, AND ESPECIALLY THE DIWAN, MR. A. R. BANERJI, I.C.S., AND THE DISTRICT MAGISTRATE, MR. C. ACHYUTA MENON.

PREFACE.

THE Dutch records in the Madras Government's record-rooms contain material for a chapter in the history of European enterprise in India. Samples of this material have been published in Dutch in previous volumes of this series. The present volume contains a sample in English.

The series has been published with the view of preserving for the future historian of the Europeans in India material the safety of which in the manuscript form cannot be guaranteed. Also partly in order to bring to public notice the existence of the material.

I began to read the manuscripts three years ago, being at that time interested, in connection with my official work, in the history of the Laccadive Islands and their former rulers, the Ali Rajas or Sea Kings of Cannanore; and it then appeared to me, and I submitted to the Madras Government, that some of the records were worth printing or even worth translating.

The Madras Government undertook the publication of the series at their press, and 15 volumes have now either appeared or are in an advanced state of preparation.

This, the 13th volume of the series, contains translations of the two first. Their translation was begun in the year 1907. But it soon became apparent that accurate translation would not be possible without more knowledge of the history, the organization and the technicalities of the Dutch East India Company than my collaborators or I possessed.

I then undertook a course of reading with the view of qualifying myself for the task. The well-known Dutch man of letters, Mijnheer Maurits Wagenvoort, who has made a special study of the history of the Dutch in the East, and was then travelling in the Madras Presidency, was good enough to advise me what to read, and I have found Mr. M. Nijhoff, book-seller, of the Hague, a serviceable book-purveyor.

On finishing the course of reading I had undertaken, I re-wrote the drafts of translations which had been prepared, and added an introduction and some notes.

The time at my disposal has, however, been very limited, and what I now offer by way of introduction and commentary to these translations is intended merely to indicate to others some of the sources for a history of the Dutch in Malabar—a virgin subject for the historian. The whole work is only a small contribution of material with such aids towards the understanding of it as a person with little leisure for study has been able to collect in a country in which there are no first-class libraries.

It is hoped that the statements made are, as far as they go, accurate. At any rate each statement can be verified by reference to the authority—printed book, manuscript, or living person—which I have been careful to quote for it.

The title of the book perhaps requires explanation. The name "Malabar" is now sometimes by usage proceeding from ignorance confined to the British district of Malabar, the native states of Travancore and Cochin being assumed to be "Travancore" and "Cochin" and not "Malabar". I use "Malabar" of the country of the Malayalam nation; which was, at the time these Dutchmen wrote, all parcelled out into "Native States," what is now the British district of Malabar not being considered then by any one exclusively or peculiarly Malabar.

The responsibility for this volume of the series is entirely mine. It is not published "By Authority" and the Madras Government accept no responsibility for the accuracy of the translation or of the history or for the opinions expressed.

6th February 1910.

INTRODUCTION.

I

IN the year 1795 the Dutch factories and possessions in this Presidency fell into the hands of the East India Company. The Madras Dutch Manuscripts. They comprised three groups, those of the Coromandel Coast, headquarters Pulicat, those of the Madras Coast (as it was called), headquarters Tuticorin, and those of the Malabar Coast, headquarters Cochin. The records of the first two groups existed in the case of Pulicat complete, in the case of Tuticorin incomplete, in the year 1818,¹ but have since disappeared or been removed from India; at any rate they are not to be found in the archives of the Madras Government or the district record offices. The records of Cochin, the head-quarter station of the third group, were retained for many years at Cochin, were then transferred to the headquarters of the Malabar Collectorate, Calicut, and finally, transferred to Madras in the year 1891².

These records consist of some 1,400 large volumes bound in leather or paper and packets of loose papers. In a list³ in Dutch, which is not dated but must have been drawn up in 1795, there are 1,648 entries. The Government of Madras, who were not aware of the existence of this list, caused a printed list to be drawn up in English by a Dutchman resident at Madras on the transfer of the records to that station. This list, in the compilation of which five years were occupied, arranges the records in chronological order and calendars a few of the most important of them. The Dutch list of 1795, which arranges the records under their proper headings, such as "Resolutions", "Letters from Batavia", "Translations of letters from Native princes", will also be of use to students who wish to obtain copies of particular documents. Two hundred or more of the volumes or packets which are entered in the list of 1795 are no longer to be found, while a few omissions or probable mistakes have been noticed in that list. Otherwise the records now in the Madras record-room are those listed at Cochin in 1795.

Many of the older records were already missing in 1795. For instance there were then, as now, only a few volumes of letters from Batavia dating back beyond 1757. Time has injured or further injured some of the oldest volumes, a few of which are now entirely illegible; but practically we have the contents of the record-room of a Dutch Chief Factory much in the same condition as they were in at the end of the 18th century while the administration was being carried on.

The history of the Dutch East India Company, which flourished for two centuries and bequeathed a magnificent empire to the nation, is of the greatest interest, but has been obscured by the loss of the great bulk of the Company's records⁴. The publication of the Batavia Diary for many of the years of the 17th century and the volumes of selections of De Jonge and others from what remains in Holland of the Company's archives have thrown light on the transactions of the Supreme Government at Batavia and the history of the Archipelago. But the history of the various out-factories, especially those on the continent of India, and a full account of out-factory administration, have yet to be written. The Cochin records preserved at Madras are a mine of wealth, as yet unexplored, to the student of the history of the Dutch East India Company at its out-factories, and, in a smaller degree, to the historian of India. From them it will be possible, after much preliminary work of perusal, selection and comparison, to draw a fairly complete picture of the administration and finances and historical development of the Dutch Commandery of Malabar, and the historian of India will find in them further material for the history of the West Coast before the rise of the British power.

¹ De Nederlandsche Factorijen in Voor-Indië in den Aanvang der 19^e Eeuw, by P. H. Van der Kemp (Nijhoff, the Hague). It has been ascertained that a few "Memoirs" of Governors of the Coromandel Coast exist at Batavia.

² Order of the Madras Government No. 202, Political, dated 17th April 1891.

³ MS. No. 1629, published as selection Number 6 in this series.

⁴ Klerk de Rous, Geschichtlicher Ueberblick der Administrativen, Rechtlichen und Finanziellen Entwicklung der Niderländisch-Ostindischen Compagnie, Introduction, p. II.

In view of the considerable interest of these records the Madras Government have issued orders that the more important of them should be copied and published, and a few volumes of Selections have already appeared in the original language. This book contains translations in English of the first two volumes of the Selections, in which were published Memoirs or Accounts of their Administration written by two Dutch Chiefs of the Malabar Settlements in the years 1743 and 1781, respectively.

II

It was one of the salutary rules of the Dutch Company that every Chief of a Settlement should ordinarily, before retiring from his appointment, prepare a memorandum on the administration for the guidance of his successor, who, in view of the great extent of the Company's field of enterprise, would in many cases have no experience of the country, the people or the history of his new station. Accordingly the successive Commandeurs or Governors of the Malabar Coast generally left such a memorandum on record. In a list of the year 1761¹ I find the following "Memoirs" entered:—

- (1) Memoir of Hendrik Van Rheede, 17th March 1677.
- (2) " of Gelmer Vosburg, 18th October 1687.
- (3) " of Magnus Michelman, 14th January 1701.
- (4) " of Johannes Hertenberg, 24th December 1723.
- (5) " of Jacob de Jong, 30th December 1731.
- (6) " of Adriaan Maten, 12th January 1735.
- (7) " of Julius Valentijn Stein Van Gollenesse, 1743.
- (8) " of Reinicus Siersma, 1748.
- (9) " of Fredrik Cunes, 31st December 1756.

The second, fourth and fifth of these "Memoirs" had already disappeared in 1795.² The third, sixth and eighth have since disappeared and the first is now undecipherable, though the volume is in the Madras record office. The earliest remaining "Memoir" is accordingly the seventh, which is the first of the documents translated in this volume.

The following is a list³ of the "Memoirs" left behind by the Commandeurs who succeeded Cunes:

- (10) Memoir of Caspar De Jong, 1761.
- (11) " of Godefridus Weijerman, 1765.
- (12) " of Cornelius Breekpot, 28th February 1769.
- (13) " of Adriaan Moens, 18th April 1781.
- (14) " of Johan Gerard Van Angelbeek, 15th March 1795.

These last five "Memoirs" still exist and have been, or are being published by the Madras Government in the Dutch language. No. (13) has been selected for translation into English as being by far the most interesting and comprehensive of these works. That place of honour would perhaps have been claimed by the first "Memoir" of all, that of Van Rheede, could it now be read. Stein Van Gollenesse³ absolves himself from writing a full account of Malabar because Van Rheede had already done it so admirably, and Van Rheede was one of the ablest of the Dutch Company's officials of his time; his memory is kept fresh to this day by the twelve folio volumes of the Hortus Malabaricus or Botany of Malabar. A copy of Van Rheede's Memoir is preserved at the Hague and the existence of another has been brought to my notice by a bookseller. Steps are being taken to obtain copies so that the work may be included in this series.

The translation of all, or even of the valuable part, of the Madras Dutch records, would be a task of immense magnitude. But a sufficiently clear view of Dutch enterprise in India may be obtained by readers who do not wish to make a special study of the subject from these "Memoirs", which were intended to be and to some extent are compendia of the history and administration of the West Coast Settlements. As it was necessary to make a *selection* for translation, two documents of the "Memoir" class have been selected.

¹ In MS. No. 874.

² MS. No. 1629.

³ P. 49 *infra*.

The history of Batavia and of the Supreme Government of the Company in India is best studied, not from "Memoirs", but from the Diary maintained at Batavia, in which all events of importance and abstracts of important letters were regularly entered. The Batavia Diary for the year 1663, for instance, is a portly volume of 700 printed pages in which lengthy descriptions, abstracted from despatches received, may be read of the capture of Cochin from the Portuguese and all other important events of the year. And so also persons curious about the history of the English factories on the West Coast would turn for information to the Diaries kept at Tellicherry and Anjengo. But at Cochin the Town Diary does not appear to have been regularly kept. We have volumes only for a few years and these contain little information. Special diaries were maintained for special occasions, for instance for the campaigns of 1717 against the Zamorin and of 1739 against Travancore, and these are of interest. But there is no continuous record of events in the journal form, and the history of the times can best be gathered from the "Memoirs."

The existence of these records has not been altogether unknown. Moens' Memoir is briefly referred to in Major Drury's translation of Canter Visscher's Letters from Malabar (1862) and Dr. Day used translations made for or lent to him of some documents for the account of the Dutch in Malabar given in his "Land of the Permauls" (1866). But Day knew no Dutch and appears to have been ill served by the persons he employed to collect material for him. At any rate his account is defective and not always accurate. It will be sufficient to observe that even his list of Commandeurs of Cochin is incorrect. Dr. Day's account has been followed in Logan's Malabar Manual and other semi-official publications.

III

"The Malabar Coast" formed but a small part of the possessions of the Dutch East India Company. The following is a list¹ of the Hoofd-Comptoirs or Chief Factories of the Company in the year 1650.

- | | |
|-----------------------------|---|
| (1) Moluccas. | (17) Malabar. |
| (2) Amboina. | (18) Surat. |
| (3) Banda. | (19) Mocha. |
| (4) Macassar (Celebes). | (20) Persia. |
| (5) Solor. | (21) Bassora. |
| (6) Acheen. | (22) Vingurla (near Goa). |
| (7) Malacca. | (23) Ceylon. |
| (8) West-Coast of Sumatra. | (24) Siam. |
| (9) Jambi (Sumatra). | (25) Taijouan (off the island Formosa). |
| (10) Palembang (Sumatra). | (26) Japan. |
| (11) Cambodia. | (27) Tonquin. |
| (12) Martapura. | (28) Manilla. |
| (13) Quinam. | (29) Coromandel. |
| (14) Arracan. | (30) Pegu. |
| (15) The Island Mauritius. | (31) Bengal. |
| (16) The Island Madagascar. | (32) Batavia. |

Most of these places were at that time only commercial residences, not strong places nor territorial possessions held in sovereignty, though in Java the conquest of the kingdom of Jaccatra had already raised the Company to the position of a Sovereign. As might be expected, losses or acquisitions occurred from time to time. No. (25), for instance, Formosa, was lost a few years after, while the absence from the list of that colony with a great future, the Cape of Good Hope, which was not occupied till 1652, will at once be noticed. The list in 1725, 75 years later, reads as follows² :—

- (1) Moluccas, under a Governor.
- (2) Amboina and 10 other islands, under a Governor.
- (3) Banda and 9 other islands, under a Governor.
- (4) Macassar, under a Governor.
- (5) Solor and Timor, under a Chief.

¹ From the "Instructions" of 1650 quoted by Klerk de Reus, p. 80.

² Valentijn, Oud en Nieuw Oost-Indien (1726).

- (6) Malacca with various subordinate factories in the Malay Peninsula and on the East Coast of Sumatra, under a Governor.
- (7) West Coast of Sumatra, under a Chief.
- (8) Jambi, under a Chief.
- (9) Palembang, under a Chief.
- (10) Malabar, under a Commandeur.
- (11) Surat, under a Director.
- (12) Mocha, under a Chief.
- (13) Persia (Gombroon), under a Director.
- (14) Ceylon, under a Governor, with subordinate Commandeurs at Jaffna and Galle.
- (15) Japan (island Desima off Nagasaki), under a Chief.*
- (16) Coromandel, under a Governor.
- (17) Bengal, under a Director.
- (18) Batavia, under the Governor-General.
- (19) Samarang or North-East Coast of Java, under a Commandeur.
- (20) Bantam (Java), under a Chief.
- (21) Cheribon (Java), under a Chief.
- (22) Cape of Good Hope, under a Governor.

The list of 1725 is shorter than the list of 1650, but the Company had become much more powerful in most of the places mentioned. Whenever a settlement was in charge of a Governor or Commandeur the Dutch maintained forts and an armed force and exercised some sort of sovereign powers. On the other hand the title "Director" (*i.e.* Director of trade) indicates the purely peaceful and commercial status of a settlement and at Surat, in Persia and in Bengal, which were in charge of Directors, the Company were mere tradesmen, as also at Mocha and in Japan, where the factories were in charge of men of inferior standing. Coromandel was in 1725 a Governorship, that is an important settlement with a strong garrison, and Malabar a Commandery, that is also a fortified settlement, though ranking lower in importance; they were only in name identical with the Coromandel and Malabar of the older list of 1650, and in fact comprised very different possessions. By the Malabar of the older list are meant unfortified factories at Cannanore and Cayenculam¹ and perhaps elsewhere², while the Malabar of the second list means the strong town of Cochin with territory won from the Portuguese or Native princes and fortresses at Cannanore, Chetwai, Cranganore, and Quilon besides factories or residencies at other places. In 1725 the strong fortified town of Negapatam was the headquarter station of the Coromandel Coast; in 1650 it was still in the possession of the Portuguese.

The Malabar of Stein Van Gollenesse (1743 A.D.) and of Moens (1781 A.D.) is the Malabar of the second list, and one of a score or more possessions of the Dutch East India Company. It is not easy to estimate the relative importance of the various possessions, but it may be observed that the ordinary establishment of Europeans at the Malabar factories in time of peace may be reckoned at some 500 to 800 out of a total of 15,000 to 20,000 Europeans employed by the Company in the East. Malabar was always put down as a possession that did not pay its way³ and the accounts kept in the East certainly show a considerable loss during the period of its occupation. No separate accounts were however kept for the different settlements of the profit or loss on produce exported to Europe and the Malabar factories, which in the eighteenth century bought one to three million pounds of pepper at $2\frac{1}{2}$ to 4 stivers (pennies) a pound and exported the amount or a portion of it to Europe to be sold at 12 to 20 stivers a pound⁴, were not credited with the profits which this trade doubtless represented; and similarly Amboina got no credit for its cloves nor Banda for its nutmegs nor Coromandel for its piece-goods.

¹ Letter of the Governor-General's Council of Batavia, dated 22nd November 1651, reproduced in Valentijn V, 2-30.

² *E.g.*, Ponnani; see treaty with Zamorin in Valentijn V, -2, 26. The Zamorin granted the Dutch permission to build a factory at Ponnani. In 1645 they obtained pepper at Cannanore, Cayenculam, Calicut, Purakad and Quilon (Batavia Diary for 1645, p. 308).

³ Canter Vissoher, Van Imhoff *apud* Dubois, etc.

⁴ Authority: MSS. Nos. 137, 593, 745, 1134, etc. So in 1724 A.D. 2,578,650 lbs. of pepper of the invoice value of 352,479 guilders were sent to Holland (MS. No. 137). This works out to $2\frac{1}{2}$ stivers a lb. This pepper was sold in Holland at $14\frac{1}{2}$ stivers a lb.; that is, the price obtained in Holland was more than five times that paid in the East. Pepper reached 20 stivers a lb. in Holland in 1763 (Price list in MS. No. 745). Towards the end of the eighteenth century Raynal reckons that the French could buy pepper in Malabar at 12 sous (*6d.*) a lb. and sell it in France at 25 to 30 sous (Sk. IV, Ch. XXVIII). The Dutch, being stronger in Malabar than their European competitors, then paid only $4\frac{1}{2}$ s. a lb. under a special contract with the King of Travancore.

Subject to this observation the following table¹, in which the profit and loss on each possession is given for the years 1760—8, may be taken as some sort of basis for a judgment of the relative value and importance of different possessions:

Finances of different possessions, 1760—8.

(in guilders at about 11 to an English sovereign.)

Possession.	Territorial Revenues.	Trade Profits.	Total Revenue.	Charges.
(1) Amboina	270,000	282,000	532,000	2,334,000
(2) Banda	218,000	307,000	525,000	1,887,000
(3) Ternate	157,000	122,000	279,000	1,564,000
(4) Macassar	584,000	373,000	957,000	1,848,000
(5) Banjermassing	2,000	99,000	101,000	268,000
(6) Timor	157,000	113,000	270,000	567,000
(7) Malacca	886,000	193,000	1,079,000	1,345,000
(8) Paduug (West Coast of Sumatra)	20,000	770,000	790,000	1,210,000
(9) Carek (Persia)	8,000	929,000	937,000	2,786,000
(10) Surat	18,000	6,050,000	6,069,000	1,928,000
(11) Malabar	238,000	2,455,000	3,393,000	3,471,000
(12) Coromandel	511,000	6,407,000	6,918,000	6,111,000
(13) Bengal	653,000	2,909,000	3,562,000	7,967,000
(14) Ceylon	6,453,000	3,055,000	9,507,000	23,101,000
(15) Cape of Good Hope	1,409,000	324,000	1,733,000	4,126,000
(16) Cheribon	540,000	124,000	664,000	168,000
(17) Bantam	22,000	92,000	114,000	693,000
(18) Samarang (East Coast of Java)	2,315,000	983,000	3,303,000	3,068,000
(19) Batavia	9,318,000	22,000,000	31,318,000	31,373,000

It will be clear that judged on a financial basis Malabar was of little importance in comparison with the great possessions of Java (Nos. 16—19) and Ceylon (No. 14); though it is to be observed that the large figure of twenty-three million guilders or over two million sterling under the Ceylon charges is not normal, but includes the cost of a war of the Dutch with the King of Candy, which went on from 1760 to 1766.

In regard to the home trade during this period Malabar was not a very important possession. The total amount of the profits on the coffee and sugar of Java, tea from China, spices from the Spice Islands, cinnamon from Ceylon, and piece-goods from Surat, Bengal and Coromandel was large in comparison with those on the Malabar staple, pepper, which was also to be obtained from other parts of the Dutch possessions, and a few thousand pounds of Malabar turmeric and cardamoms² and a few hales of piece-goods. The Company's sales of Indian products in Holland from 1760—8 averaged a little over 21 million guilders or a little under two millions sterling a year³, towards which the products of Malabar probably did not contribute more than £60,000 to £100,000 sterling.

IV

The Dutch first came to the East at the close of the 16th century in search of those products which they had been accustomed to procure in the ports of the Iberian peninsula before their revolt against Spain, with which Portugal was then united. It was part of the policy of the Portuguese to keep their charts of the Eastern Seas secret and to permit no information regarding the route to be published. But it was in fact impossible to conceal such knowledge. The Dutchman Linschoten, who proceeded to the East in 1583 in the train of the Archbishop of Goa, published a book⁴ in 1592 and communicated valuable information, while on the 17th April 1592 the bookseller Cornelis Claesz of Amsterdam informed the States-General that he had obtained twenty-five charts of the African, Indian and Chinese seas from the

¹ From the Memoir of the director of the Company in Holland C. Van der Oudermenlen quoted by Klerk de Reus, p. 209.

² So in 1726 A.D. 25,000 lb. of Malabar turmeric and 12,450 lb. of Malabar cardamoms were sent to Holland. The profits were not, as in the case of pepper, enormous; in 1726 the increase in value was only 75 per cent. in the case of turmeric and 45 per cent. in the case of cardamoms (MS. No. 137).

³ Klerk de Reus, Appendix V (3).

⁴ An English translation has appeared in the Hakluyt Series (1884).

scholar Peter Plancius, who in his turn had procured them from the cosmographer Bartolomeo de Lasso, who occupied an official position in Spain. Several companies were soon afterwards formed in the Netherlands and several expeditions were sent to the East; the names of the companies, of the commanders of the expeditions, the number of the ships under their command, and the dates of their departure and return are shown in the following table¹ :—

Table of early Dutch voyages to the East.

Serial number.	Company.	Commander.	Number of ships.	Date of departure.	Date of return.
1	Company Van Verre (of distant parts), Amsterdam.	Houtman	4	2-4-1595	14-4-1597
2	Old Company, Amsterdam ..	S. C. Van Neck	8	1-5-98	July 1599-Sept. 1600
3	Moucheron's Company, Veere.	Houtman	2	15-3-98	29-7-1600
4	Company of Middleburg ..	G. Leroy and L. Bikker ..	3	1598	1600
5	Do. ..	J. Mahu & S. de Cordes ..	5	1598	1601
6	Do. ..	O. de Noort	4	1598	1601

			65		

These expeditions² visited the Archipelago, not the Indian mainland. On the 20th of March 1602 the various Companies were united under the name of De Algemeene Geotroyeerde Oost-Indische Compagnie or General Chartered East-Indian Company and were granted a monopoly by the States-General. The United Company's existence continued for nearly two centuries. Though the earlier expeditions did not visit the Indian mainland, factors were despatched by native ships to Guzerat as early as the year 1602 from a factory which the Middleburg Company's expedition of 1601 (No. 12) had founded at Acheen in Sumatra. In a letter³, dated 20th April 1602, these factors announced their arrival at Surat after a voyage of 2 months and 6 days, of which 5 days were spent in the Maldives, and reported that business could be done with the Maldives, with Guzerat, and with Malabar, merchants from which last region had informed them that there were many places in their country where there were no Portuguese, and the Dutch might build a fort. These factors later proceeded from Surat to Calicut, but were seized by the Portuguese, taken to Goa, and hanged⁴.

In 1603 the new United Company sent out a great expedition of 13 ships with close on a million guilders worth on board under Steven van der Hagen. He was specially ordered to visit the West Coast of India, and mention is made in the instructions⁵ furnished to him of the piece-goods trade of Pulicat and Masulipatam on the East Coast. In 1604 the fleet touched at Cannanore, Calicut and Chetwai and Van der Hagen concluded a treaty of alliance⁶, dated 11th November 1604, with the Zamorin of Calicut against the Portuguese. The Dutch were to be allowed to build a fort at Calicut. The first Dutch factories in India seem, however, if the short-lived factory founded at Surat in 1602 be excepted, to have been at Masulipatam and Petapuli

¹ Roland Bonaparte, *Les premiers voyages des Néerlandais dans l'Inde* (1884). The Resolution of the States-General and other documents proving these facts are printed in the first volume of de Jonge's collection. Plancius got 300 guilders for his trouble and the bookseller the exclusive right of printing the maps.

² A bibliography of the very interesting journals and voyages of the early Dutch navigators was published by F. Müller, Amsterdam in 1867; and many of important documents regarding these expeditions are printed in De Jonge, Vols. I-III.

(now Nizampatam, Repalli Taluk, Guntur District), where factors had been left by the yacht "Delft", which van der Hagen had detached from his fleet, in 1605 and 1606 respectively¹. One of the factors was sent to the court of the King of Golconda and obtained a Firman², dated August 1606, permitting the Dutch to trade in his dominions. In 1607 there was again a Dutch factor at Surat, but he was as unfortunate as his predecessors; he was seized and conveyed to Berhampore and committed suicide³. In 1608 or 1609 a factory was founded at "Tegnapatnam" (Dévanápatnam, near the present European Club, Cuddalore) on the East Coast with the permission of the "King" (properly Naick under Vijanagar) of Jinji⁴ but it was soon removed to a house "made of blue free-stone 105 feet long by 74 broad" in the native fort at Tirupapuliyur, "two Dutch miles inland", i.e., near what is now Cuddalore New Town⁵. In 1610 a further Firman was obtained from the "King" of Jinji and the factory at Pulicat was founded⁶. In 1615 a fort called the "Castle of Gueldres" was built at Pulicat⁷, which became the Company's head-quarters on the Coromandel Coast, with numerous further subordinate factories in the Northern Circars, Hyderabad, Orissa, Bengal, Pegu, Arracan. For instance, for a few years before the kingdom of Golconda fell before Aurungzebe there was a factory at Golconda and another at Nagulawamsa, half-way between Masulipatam and Golconda, there were factories and bleaching-grounds for many years at Palcole in the Kistna, Draksháráma in the Godavari and Bimlipatam in the Vizagapatam districts of the Madras Presidency and the factory at Hugli had several sub-factories in the interior of the great province of Bengal. Meanwhile the factory at Surat had been re-established with sub-factories at Broach, Ahmedabad, Agra and other places and the Dutch agents from the West Coast penetrated as far as Lucknow and Benares in search of commodities⁸.

At the beginning of the seventeenth century, the Portuguese still occupied Ceylon and the southern part of the Indian peninsula was still encircled by their strong places, St. Thomé near Madras, Negapatam, Manar, Quilon, Cochin, Cranganore, Cannanore, Mangalore, Basrur, Honawar and Goa.

V

The Dutch could legitimately pursue a policy of aggression because Spain, with which Portugal was then united, was from time to time at war with them. The taking of Cochin from the Portuguese. Their first determined efforts, however, were not directed against the Portuguese strongholds on the *terra firma* of India. They harried the Portuguese on the seas, and endeavoured to drive them out of the Archipelago, Ceylon and the Malay Peninsula. Colombo and Singapore are now two of the great ports in the world; Ceylon and Malacca were even then keys to the trade of the East. Spain received warnings from the Portuguese Viceroy and urgent requests for ships and men and money⁹, but such fleets as Spain could fit out were for the most part wanted in South American waters. The Dutch had obtained a footing in Ceylon in 1610¹⁰, and took Malacca on the 14th of January 1641. Portugal had successfully rebelled against Spain in December 1640 and concluded a Treaty¹¹ with the States-General on the 12th of June 1641, under which there was to be an armistice in India for ten years; but disputes occurred regarding its application and the Dutch continued to strengthen their position in Ceylon till 1644. At the end of 1652¹² they renewed the attack on the Portuguese forts in the island. The Portuguese were a weak and poor nation with many interests to defend. The new king was chiefly concerned with maintaining himself against his neighbour of Spain. He had other wars to wage in Brazil

and in Africa. In the East the Portuguese had many more strongholds than they could adequately garrison, and the Dutch were not the only enemy. In 1652 their forts in Canara, which they had not sufficient means to keep in repair, had been attacked by the Chief of Bednore. In 1654 the king of Bijapur marched against Goa. Though they made a determined resistance in Ceylon from 1652 to 1656, their forces were inadequate. They had only 500 Europeans in Colombo at the beginning of its siege by the Dutch, nor was it well fortified¹. Colombo fell on the 12th of May 1656. On the 16th of December Major Van der Laen, the chief military officer who had been engaged in the siege, arrived at Batavia with despatches from the Governor of Ceylon², but no further measures were taken till on the 1st of July 1657 there arrived the Right Worshipful Rijklof van Goens, Extraordinary Member of the Council of India, in command of the ships from home³. He had commanded in Ceylon before and had been home on leave. In a council held a few days later⁴ it was decided to appoint Van Goens Admiral of the fleet and High Commissioner over the Governments of Coromandel, Ceylon and Malacca, the Directories of Surat and Bengal and the factory of Vingorla in order to complete the destruction of Portuguese power in Ceylon and on the coasts of India.

Of the many able servants of the Dutch Company Rijklof van Goens was one of the most distinguished. He arrived at Batavia with his father, who was in the military service first of the States-General and then of the Company, in 1629, at the age of ten. Two years later, his parents having died, he was sent to the Coromandel Coast and was taken care of and trained by Arent Gardenijs, Governor of the Coast. He passed through the usual posts of assistant, under-merchant and merchant. Between 1648 and 1654 he was frequently selected for duty as envoy to native princes. In 1649 he was a Judge of the High Court at Batavia. In 1653 he was appointed to command an expedition to Ceylon and the West Coast of India, and in 1654 took or destroyed many Portuguese ships. He became an extraordinary member of the Supreme Council in the same year, and now on return from two years' leave at home, he was selected for the command of the very important expedition which was finally to displace the Portuguese from their old position of arbiters of the commerce of the East. He had served the Company in a variety of capacities for 26 years and was then 38 years of age⁵. Twenty years later he was appointed Governor-General, and Valentijn⁶ describes him as at that time: "Slender of form, moderately stout, very handsome and rather tall, stately, fresh and still youthful, with long grey hair curling handsomely, as indeed he was in all parts a well-made Heer".

Major van der Laen accompanied him, but was under his orders⁷. "Major" seems to have been at that time the highest grade in the Company's military service, but it was the practice to place a distinguished member of the politico-commercial service in supreme command of important expeditions.

The fleet sailed from Batavia on the 6th of September 1657⁸. By the 10th of January 1658, 9 ships, 2 sloops, and 8 large dhonies to carry ammunition, etc., with some 1,500 men had been collected at Colombo⁹. On the 1st of February the fleet proceeded to Tuticorin, which it took, on the 20th to the island of Manar, where the fort with 181 men was captured on the 22nd. On the 1st of March van Goens crossed over and marched to Jaffna. He took the fort of "Cais" on a small island not far from Jaffna on the 27th of April¹⁰ and laid siege to the castle of Jaffna. No help came from Goa, which was blockaded by a Dutch fleet, and the castle fell on the 22nd June after more than 1,600 of the persons within had died or been killed. Negapatam was captured on the 1st of August. Van Goens then sailed to Pulicat, the Dutch head-quarters on the Coromandel Coast and returned *via* Jaffna and Manar to Colombo, where he arrived on the 3rd of November. Finding everything in good

¹⁰ Van der Meyden read with Baldaens, who was present.

order, he started again for Malabar, took the Portuguese stronghold of Quilon on the 29th of December¹, and proceeded to Cannanore, where he received orders to send back 500 men to Batavia and undertake nothing more for the time being². He then returned to Ceylon, leaving a considerable garrison at Quilon, which was, however, soon invested by "3,000 Portuguese and some thousand Nairs" according to Van der Meyden, Governor of Ceylon, who proceeded to Quilon and withdrew the garrison on the 14th of April, 1659. On the 27th of June the Batavia Council resolved that "another considerable fleet" should be equipped to attack the Portuguese on the coast of India and keep the bar of Goa closed to prevent the Portuguese sending reinforcements to Ceylon or appeals to Europe³; and on the 25th of January, 1660, van Goens and the fleet again sailed for Malabar⁴. The Batavia Diary for 1660 is missing, but it appears from an entry under the 26th of January, 1661, that van Goens gave up the idea of an attempt on Quilon and Cochin for that year and considered an attempt on S. Thomé. However at the beginning of 1661 six ships and 1,200 men were assembled in Ceylon and despatched under the Governor Van der Meyden, to join five more ships and a sloop which were already cruising off Malabar. On the 10th of February he was at Ayacotta, the northern "hook" of the strip of land called by the Dutch the Island of Vypeen, which stretches from the Cochin to the Cranganore passage from the sea to the backwater. The spot is one of great historic interest. Cranganore (Kudangalur) said to have been formerly Muziricodu⁵, has been confidently identified with the Muziris of the ancients, "the greatest emporium of India" according to Pliny the Elder⁶, which stood "on a river two miles from its mouth", according to the *Periplus Maris Erythraei*, the river being known as the Pseudostomos or False Mouth, a correct translation of Alimukam, as the mouth of the Periyar is still called⁷. The Greek or other traders of the Roman Province of Egypt were probably as familiar as the Portuguese with the low land or islands fringed with cocoanut trees to the water's edge of the river and lagoons about Cranganore. These lagoons were the first settlement of the Portuguese when they re-discovered India and established themselves almost simultaneously at Cochin near one passage into the backwater and near Cranganore at Palliport, where the well-preserved remains of their small three-storied octagonal castle built in 1507 A.D.⁸ are still to be seen. At Ayacotta, near Palliport, Van der Meyden met the heir of the Zamorin of Calicut and the King of Cranganore and later on the Zamorin in person, and it was agreed to attack the Portuguese forts of Palliport and Cranganore, to divide the loot if the attack should be successful, the Dutch to keep Christian captives, all Portuguese priests to be expelled, the forts to be pulled down, expenses to be shared, the land revenue and other taxes to be shared, the Dutch to administer justice, the Dutch to have all pepper at a fixed price except one-third which the native chiefs or their merchants should keep for their own trade.

Palliport lay about fifteen miles from Cochin along the backwater and commanded the estuary of the Periyar river on its left bank while the fort of Cranganore commanded it on the right bank. On the 15th of February, 1661, his Worship Van der Meyden landed his troops and had a skirmish, in which he lost a few men, with a Nair force. On the 16th he marched along the shore towards "the great fortress" of Palliport; clearly not the little octagonal castle of 1507, but probably a block of buildings serving also as a seminary of which the construction was begun shortly after 1600 A.D.⁹. The Portuguese had only 100 to 150 Europeans and 200 Nairs there. The Dutch brought up two twelve-pounders and a mortar and constructed an

⁹ P. Larrioi Thesaurus Rerum Indicarum, 1615, II (2) 225—I follow Van der Meyden's own account abstracted in Batavia Diary, 1661, p. 99 *seq.*, and the expression "great fortress" occurs there. Letters to Holland of 1726-6 in MS. No. 148 and an inscription still preserved show that the date of the Leper Asylum built or adapted on the spot (walls 4 feet thick) by the Dutch was 1728 A.D. This use preserved the site when the remaining sites on Vypeen were sold to Travancore in 1789, and the Leper Asylum still exists, is maintained by the British Government, and forms a little enclave in Native State Territory.

entrenchment south of the fort for security against forces coming from Cochin. Meanwhile the Portuguese fled by the backwater before the Dutch sloops had advanced far enough to be able to stop them. Three hundred to 500 Portuguese with 4,000 to 5,000 Nairs had set out by land and backwater from Cochin, but were too late. The Dutch were in possession of the fort.

A few days later Van der Meyden handed over Palliport to the Zamorin and returned to Colombo. Palliport and Cranganore forts were the keys to Cochin, but the Portuguese had been strengthening Cochin and Cranganore, and it was thought too late to do anything more that season. The fleet set off on the 5th of March and arrived at Colombo on the 26th, leaving some ships at Cayenculam to protect the Company's factory there. Letters were despatched to Batavia on the 5th of April. Van der Meyden was of opinion that it was not advisable to make any attempt on Cochin which was very strongly garrisoned. Van Goëns thought it was necessary, in order to consolidate the recent conquests and secure the pepper and wild cinnamon of Malabar, to take both Cochin and Quilon. He added: "In every case, even if our Nation should make peace with the Crown of Portugal, the design on Cochin must be kept in mind¹." Meanwhile he first proposed to make an attempt on S. Thomé², and the Governors of Coromandel and Ceylon were both of opinion that the opportunity should be seized to wrest that stronghold from the Portuguese before peace should be made. Van der Meyden thought it should then become the headquarters of the Coromandel Coast, while Governor Pit of Coromandel was in favour of keeping the headquarters at Pulicat. These designs came to nothing. S. Thomé was taken under his special protection in 1661 by the king of Golconda, who forbade the Dutch to attack it³, seized by the French in 1672⁴, taken by the Dutch with some assistance from the king of Golconda after a year's siege on the 6th of September 1674⁵. The Dutch then suggested to the king of Golconda that the fort and town should be destroyed, and with some difficulty got him to agree to this, and in October 1675 some thousands of natives were engaged in the demolition under his orders⁶. There was however a Portuguese colony there in 1749, when it was occupied by the English Company in spite of Portuguese protests, for the reasons explained in the following remarks of the Company's local agents⁷: "St. Thomé appears to us a place of very great consequence, its contiguousness to Madras, should it be in other hands, would greatly prejudice us, as it would affect our sea and land customs, investment and private trade, and be an asylum for our military, who would frequently desert. What pretensions the Portuguese can have to it we cannot perceive; it has been under the Moors for many years; they have not had any government, levied customs, nor hoisted colours there, but such as the ecclesiastics made use of to decorate their festivals."

Momentous consequences might possibly have ensued if the Dutch, then so powerful in the East, had in 1661 carried out their design and made S. Thomé, two miles from Madras, the headquarters of their important Governorship of the Coromandel Coast. When they took Cochin two years later they found an English factory at Purakad in the neighbourhood. They informed the English factors that they must leave. The English declined to move, but the native princes were afraid of the Dutch, and the Prince of Purakad offered "to cut off all the trade" of the English factors or "if that did not satisfy" the Dutch, "to have them all killed straight away⁸." They were in fact not allowed to trade and finally in 1665, war having broken out in Europe between England and Holland, the English factory was seized by the Dutch and the one remaining factor deported⁹. In the same year the Dutch Governor of Coromandel announced his readiness to attack Madras and was making enquiries about its defences¹⁰.

OLD PLAN OF COCHIN.

The actual course of events was as follows. The reply¹, despatched on the 3rd of June, 1661, of the Batavia Government to Van Goens' communication was to the effect that "the design on S. Thomé should be taken in hand and the place kept "after being captured, the seat of Government being removed thither from Pulicat, "or in case of difference of opinion, Their Right Worshipfuls' further orders to be "awaited." However on the 10th of August they received advices from home that peace was likely to be made with Portugal very shortly. Next day they held an extraordinary meeting of Council and it was resolved that it was too late to send a force to seize Macao in China, on which they had had designs, and that all forces, including ships of war coming from Holland, should be concentrated in the gulf of Manar². On the 14th instructions were sent to Van Goens to try and seize all the Portuguese settlements on the West Coast from Cape Comorin northwards, "Quilon, Cochin, Cannanore and then Goa and Diu and whatever other places the Portuguese may still possess there³." Their Right Worshipfuls said nothing more about the design on S. Thomé and were perhaps of opinion that there was no time for it. Meanwhile the Governor of Coromandel had received a letter from the King of Golconda in which he said S. Thomé should be left alone "as it belonged to himself and no one else," and both the Governor and Van Goens were of opinion it would be better to give up the design because Golconda's favour was worth preserving. It was thought to be "beyond doubt that the king had taken upon himself the protection of the Portuguese for fear that the Company's power should grow too great in his land." "His Majesty's standard was set up in the town, but the keys were still kept by the Portuguese⁴." Attempts were made to move the King of Golconda from his purpose and Van Goens proceeded to Pulicat. There on the 1st of September 1661 he received the orders from Batavia for the campaign on the West Coast, and on the 5th he set sail for Ceylon⁵. He collected troops from the garrisons on the way and arrived at Colombo on the 3rd of October. A fleet of 24 ships was collected.⁶ On the 20th of November it touched at Tuticorin and took in provisions. Further on a number of flat boats, to be used for disembarking, were requisitioned, and four vessels were detached to lie before Quilon, where they arrived on the 1st of December. On the 5th the whole fleet was before Quilon and on the 7th the troops, to the number of some 4,000 including 27 companies of European soldiers, disembarked. In an encounter with a Nair force next day they lost 13 men killed and about 30 wounded, while "the ways and fields were sown with dead Malabaris⁷." The Portuguese abandoned the town, and the Dutch entered it. They found the principal streets and buildings, except the churches, fallen into ruins, over-grown everywhere, and for inhabitants toads, snakes and centipedes⁸. There were seven fine churches built of brick, large and well-adorned. Van Goens then, after busying himself for some days with putting Quilon in better condition for defence, sailed for Cranganore leaving three ships before Cochin. He arrived in the roadstead outside the Cranganore estuary on the 1st of January 1662, landed on the 2nd, approached the Portuguese town early on the morning of the 3rd while the church bells were ringing for mass and finding the fortifications strong, undertook a regular siege. The commissariat was at first defective and Surgeon Schouten⁹, author of the well-known book of travels, who was present, says he never suffered so much hunger in all his journeys. The Zamorin sent a body of Nairs to the assistance of his allies. They served in the trenches with a fairly good grace in the heat of the tropical day when the Portuguese fire slackened, but would not enter them at night. Their musketry was very poor; they did not even aim. After a fortnight's siege the Dutch determined to storm the place on Sunday the 15th of January, 1662. The Portuguese, especially the Commandant, Urbano Fialho Ferreira, fought courageously according to Schouten. Finally, however the Commandant fell pierced with wounds, and the

³ Diary, 1661, p. 257.

⁴ Diary, 1661, pp. 322-4.

⁵ Diary, 1661, p. 400.

⁶ From this point I chiefly follow Schouten, Surgeon in the Company's service, who accompanied the expedition, the Diary for 1662 being missing. Baldaeus was a chaplain on the fleet. His account has been compared, as also those of Father Giuseppe di Santa Maria, who was in the neighborhood and of Nienhof and Van Goens, Junior, also both present.

⁷ Schouten, edition of 1740, I, 198.

⁸ Schouten I, 194. Nienhof however, who became Resident at Quilon shortly after, expresses admiration for the Portuguese buildings, public and private (Nienhof II, 121). Of the Europeans who have come East, the Portuguese alone have been builders.

⁹ Schouten I, 204.

garrison then retired to the great church of the Jesuits and there surrendered. The assault had cost the Portuguese about 120 Europeans besides a large number of Nairs, slaves and others. The Dutch lost about 70 men dead, among them several good officers¹. The "castle" of Cranganore, the remains of which may still be seen, was a strong fort commanding the entrance to the Periyar river and the backwaters on three sides, but the Portuguese had also to defend an extensive town. Cochin troops assisted the Portuguese who put down the loss of the place to the "treachery" of the Cochin hereditary general, Paliat Achan².

At Cranganore the Dutch found "a noble college of the Jesuits with a fine library attached to it, a Franciscan church and a stately cathedral adorned with the tombs of the archbishops of the place". There were in all seven churches, but the place, like Quilon, showed traces of Portuguese decadence³. Nothing now remains of these buildings or the Portuguese town. The stones have been used to guard the cocoanut plantations along the backwaters from erosion.

Van Goens next marched towards Cochin along the island of Vypeen,⁴ and built a fort near a large church on the island from which Cochin could be bombarded. There he left 400 men and embarked again to attack the town from the other side. The claimant to the throne of Cochin whom the Dutch favoured came on board. He was a handsome young man, covered with jewels, and understood Portuguese very well. Van Goens landed some miles south of Cochin and marched along the shore northwards till he reached a great church (church of St. Iago) in a clump of cocoanut trees in the open country three or four miles from the town. There he rested the night. Next day, after passing close under the walls of the Portuguese town, he marched on to the native town and stormed the palace of the reigning Queen, who favoured the Portuguese. In this affray Hendrik Van Rheede, afterwards Governor of Cochin and compiler of the famous *Hortus Malabaricus*, distinguished himself. On the first Sunday in February (the 5th) an assault was made on the town, but failed, the leader of the storming party losing his life and Van Goens receiving a ball on the gold buckle of his hat. Trenches were then dug and the siege continued for three weeks, during which not a day passed without attacks or sorties. Meanwhile the besieged received supplies from without; this is mentioned by Schouten⁵, and Father Giuseppe di S. Maria gives a long account of the adventures of a reinforcement from Goa which landed at Purakad⁶. In that intricate system of backwaters it was found impossible to guard all approaches.

The Dutch forces before the town were reduced to 1,400 men, the number of their sick increased every day, and they were short of many necessaries. In these circumstances Van Goens thought it best to give up the siege. He embarked on the night of the second of March, 1662, leaving garrisons in the new fort on the island of Vypeen and at Cranganore, as also at Quilon.

Van Goens spent the monsoon ill at Batavia⁷, and when the fleet started from Batavia as usual in August he had not recovered sufficiently to take the command, which was entrusted provisionally to his Worship Jacob Hustaert, formerly Governor of Amboina.

Cochin lies on a spit of land bounded on the east and north-east by an extensive backwater, on the north by a channel through which the backwater communicates with the sea between the spit and the island of Vypeen, on the west by the sea. Portuguese Cochin occupied a segment, being about one-third of a circle, of which the central part of the arc faced Vypeen, while the chord was a wall running nearly north-east and south-west dividing it from Native Cochin. On the south the sector did

¹ Baldaeus says the Dutch lost 3 Captains, 1 Lieutenant and 78 men, the Portuguese 200 Christians. Rijklof Van Goens the Younger, in notes for family use published by P. A. Leupe, says the Portuguese casualties were about 150 dead and 300 prisoners. Van Goens the Younger was present (Schouten).

and another to the breach, and the enemy were driven from the bastion. Reinforcements were sent by both sides and an obstinate fight ensued. The Dutch were much assisted by their battery at the church, which shot little stones through the breach, where the ground was soon covered with dead Portuguese. Victory rested with the Dutch who took 13 cannon and turned them on their former masters. Two hundred Portuguese were killed on the spot, as was ascertained later, including Don Bernardo, son-in-law of the Portuguese Governor, Ignatio Sermento. The Dutch leader of the assault, Major Dupon, was wounded in two places; a Dutch captain and two lieutenants died of their wounds, and the Dutch lost 30 men killed on the spot and 90 wounded, of whom 20 afterwards died.

The enemy was now in a hopeless position and next day (the 7th of January 1663) Ignatio Sermento capitulated. The terms were:

“(1) The town of Cochin shall be surrendered with all its jurisdictions, old privileges, revenues, lands, with the documents and papers relating thereto and whatever else is held in the name of the king of Portugal, all rights and titles thereto being ceded to the Dutch General or his Worship’s representatives.

“(2) All artillery, ammunition, merchandise, victuals, movable and immovable property, slaves and whatever else there may be, shall be handed over as above.

“(3) All free persons who have borne arms shall swear not to serve against the Netherlands in India for two years.

“(4) All the soldiers and others belonging to the army shall march out with flying colours, drums beating, fuses alight, bullets in their mouths and two guns, to a convenient place outside the town and lay down their arms beneath the standard of the general.

“(5) All true-born unmarried Portuguese shall be conveyed to Europe.

“(6) All married Portuguese and Mestics [assimilated half-castes] shall proceed to Goa and may take their bed and bedding and such other articles as the general and his council may permit.

“(7) All free Topasses [semi-assimilated half-castes and Indians] and Canarins [Konkanies] shall remain at the disposal and discretion of the general.

“(8) The clergy may take with them their images and church ornaments except those of gold and silver.

“(9) All free persons and all persons belonging to the Church now wandering in the country shall, if they be subjects of the King of Portugal, be comprehended in this treaty.”

On the 8th of January 1663, the soldiers and citizens came out and laid down their arms. The total number was 1,100 of whom less than 300 were soldiers. At the beginning of the siege there had been 700 soldiers in the town.

Seventy-three guns were found, but not much loot, the inhabitants having removed their property in time.

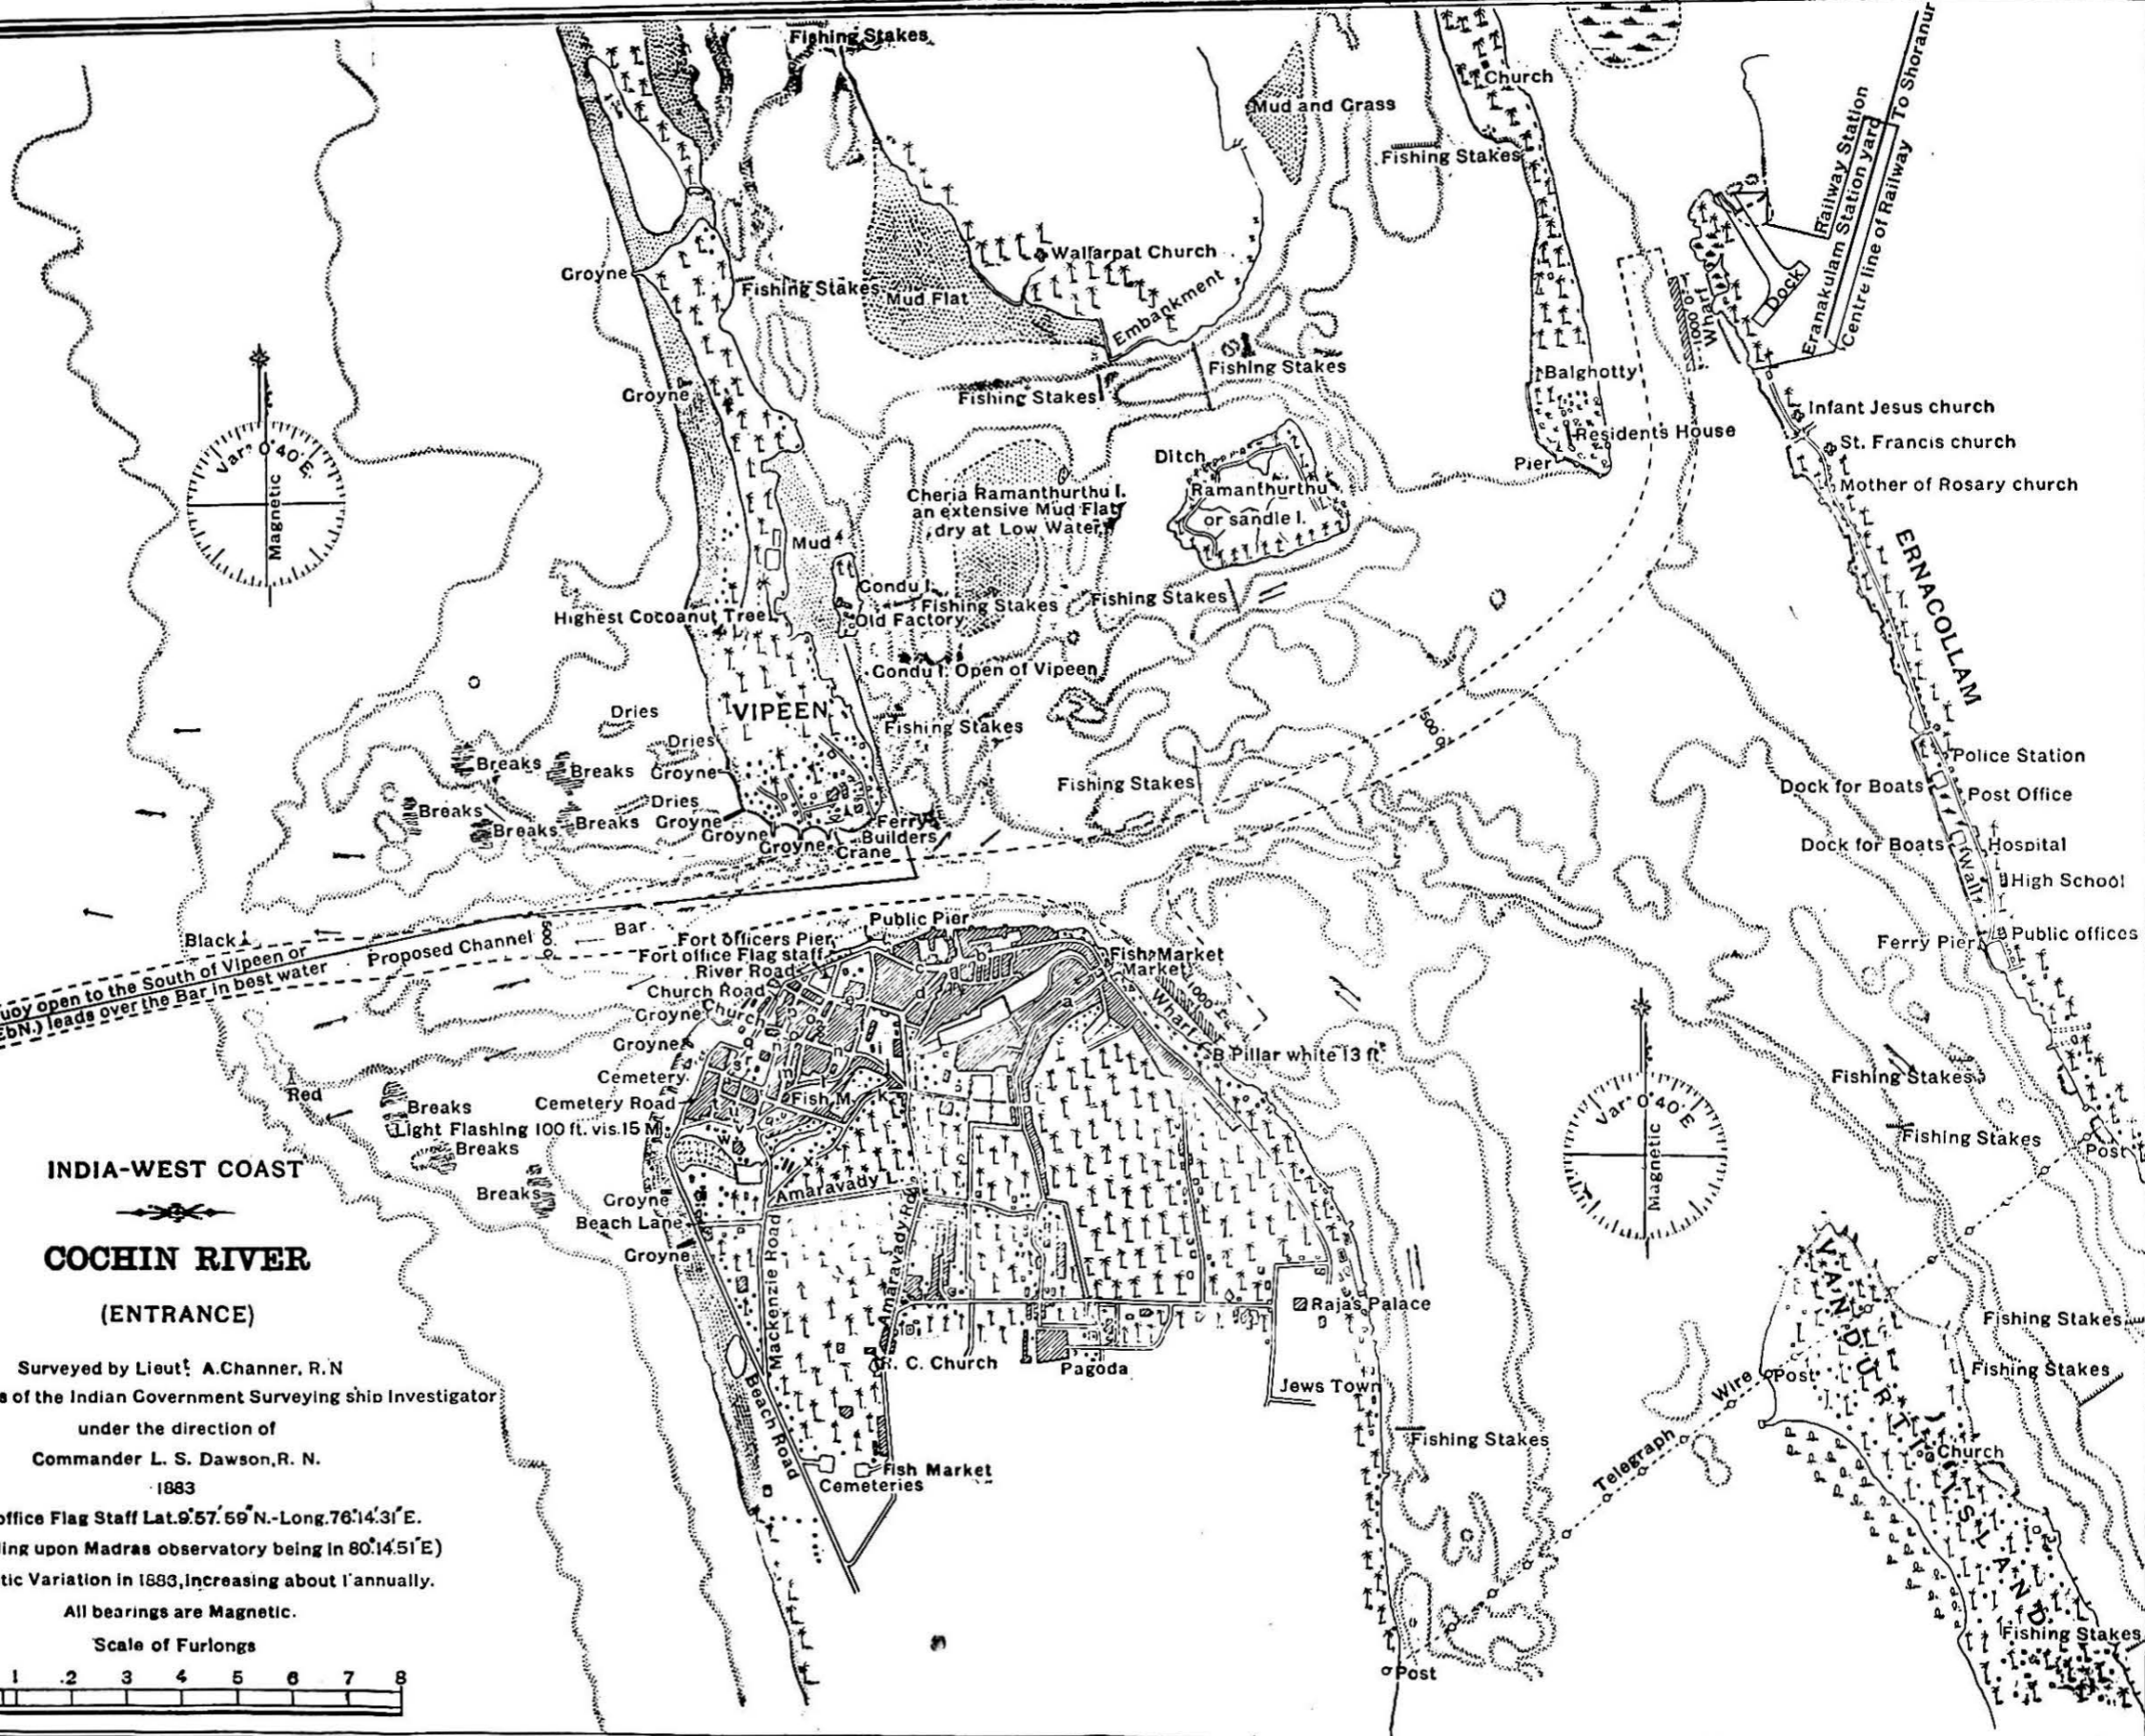

The siege had cost the Dutch 360 men, 300 more lay in hospital. 500 more were unfit for duty. On the enemy’s side 900 had been killed, wounded or captured, among them 200 priests or students who had taken up arms in defence of the town¹, the second in Portuguese India, “making with those who had marched out 2,320 men, being more than our numbers before the town, which were, according to Heer van Goens’ account, with 100 men afterwards received from Coromandel, 2,600 men, of whom 180 lay at Cranganore and Palliport, 120 at Quilon, 200 on Vypeen, 25 at Castello 6 miles from the camp, 70 to 80 at the King’s pagoda a mile from the camp, besides the garrison on Priests’ Island, which often consisted of one, two and three companies, and other places, so that we could not employ more than 2,000 men before the town.”

¹ Batavia Diary, confirmed by Father Giuseppe di S. Maria, whose comment is: “Those reverend ecclesiasties made themselves soldiers in a civil war with shedding of blood, with irreverence towards Sacred Places and with the scandal of all that populace” (Seconda Spedizione, p. 124).

CHART OF THE COCHIN RIVER.

Van Goens added in his Report that the Portuguese commandant, Ignatio Sermento, had been found a very puffed-up and truculent customer, but at the same time had borne himself remarkably well in his King's cause; for which reason he was treated generously and all his slaves and domestics, 59 in number, were restored to him.

So ended a siege creditable to both sides.

The last Portuguese stronghold on the Malabar Coast, Cannanore, capitulated to Hustaert on the 13th of February. The fort was very strong and it seems to have been considered at Goa that the Commandant should have held out. He was executed on his arrival there¹.

VI

The married Portuguese and mesties (or assimilated half-castes) removed to Goa from Cochin under the terms of the Portuguese influences. Fortification and its necessity. Fortification and its necessity. capitulation, with their women and children, numbered 4,000². There remained in the

Portuguese town 8,000 to 10,000 topasses (or semi-assimilated half-castes and Indians), and Native Christians³. The public buildings and houses were massive and high. The Jesuits, Dominicans, Franciscans and Austin Friars had fine monasteries or colleges with churches. There were besides a great cathedral and other churches⁴. The town was not only a commercial factory, but a Portuguese colony and a centre of Portuguese civilisation. From it Portuguese influence spread all along the coast to the south. In the stretch between Quilon and Cape Comorin the Dutch found 39 villages in each of which there was a Portuguese church. Between Cape Comorin and Tuticorin numerous villages were occupied by Christians of the Parava fishing-caste, converts of St. Francis Xavier. There were according to reports of 1663 not less than 12,000 Native Christian fishermen (Mukkuvass) on the Malabar Coast and 20,000 (Paravas) on the Tuticorin Coast⁵. According to a report of Van Goens, dated 24th of September 1675 and inserted by Valentijn in his Part V, Division 1, the Company had in the seven large and seven small harbours on the Tuticorin Coast, which it took over from the Portuguese, 70,000 families of Parava Christians under its protection⁶. When the Dutch took the island of Manar in 1658 they found seven Portuguese churches there⁷ and there were a cathedral and six churches in the little town of Cranganore⁸. Quilon had "seven fair brick churches, great and well-adorned" when the Dutch took it in 1661⁹. The Portuguese topasses continued to serve the new European masters, Dutch, English and French. Portuguese half-castes were employed as commercial residents, interpreters, soldiers, schoolmasters, and Portuguese remained the lingua franca of the coast and was the language in which the Worshipful the Chief of Tellicherry corresponded with the Honourable the "Commodore" of Cochin and the French at Mahé¹⁰. The Dutch and English directors, in their zeal for the conversion of Catholics to the reformed religion, instructed their chaplains to learn Portuguese or "enquire after some able Minister that can preach in the Portuguese tongue; and also a Domine as the Dutch call them, which in the style of our Church is a Deacon, that can read our prayers in Portuguese."¹¹ The backwaters and lagoons about Cochin are still strewn with ruins that bear witness to the extent of Portuguese enterprise and skill in building. Base Portuguese is still spoken at Cochin.

The considerable success of the Portuguese system of assimilation and colonisation, which may still be observed in the Goan territories, was not overlooked by the Dutch. Marriage with native women and Religion supplied the Portuguese deficiency of men. Their mixed colonies of Europeans, mestics and topasses were useful for defence and saved the great cost of bringing garrisons out from home. On the other hand in order to give the colonists the means of living, it would be necessary to throw a great part of the trade open to them, as the Portuguese had done. It was of no use sending out from home poor colonists, who would only be a burden to the Company and bring the nation into contempt. It would be necessary to encourage marriages with native women, but the offspring of such unions was not satisfactory. Colonists might find employment as sugar planters in Java, but it would not be easy for them to compete with the Chinese. Portuguese experience had shown that their colonists were not really of much use in the defence of their strong places.

Such were the considerations generally unfavourable to the proposal to imitate the Portuguese, advanced by the Governor-General and the majority of his Council in 1651 in separate minutes when they were asked their opinion on the subject¹. One member of the Council, however, Maetsuyker, afterwards Governor-General from 1653 to 1678, thought that "the Portuguese had maintained themselves till that time by no other means than the multitude of their colonists, who serve them instead of soldiers, and without whom they would, as far as we can judge, long since have been overthrown and forgotten."

The colonisation of Cape Colony began in the Company's time and a respectable colony of "burghers" still keeps fresh the memory of the Dutch in Ceylon, but in such a place as Cochin it was not in accordance with the national character to found a half-caste colony in the Portuguese manner and assimilate the Indian; and accordingly Cochin under the Dutch ceased to be a colony and became a mere fortified factory. It was decided on the 24th of July, 1663, after some consideration², that Cochin was to be retained, but a large part of the Portuguese town was to be pulled down and the perimeter of the fortifications was to be so reduced that the place could be held by a small garrison. Similar orders had been issued about Malacca³, which had been taken from the Portuguese twenty years before, and were afterwards passed about Colombo⁴ and Negapatam⁵ taken in 1658. The Dutch at once set to work to destroy the houses and public buildings at the eastern and western extremities of Portuguese Cochin and to pull down what remained of the walls at the tapering point of Calvetty on the east, which they had stormed, and on the west.

Batavia first proposed a small four-cornered fort on the river. Van Goens objected that the cost of destroying a large number of churches and houses and of cutting a ditch on three land sides through their massive foundations would be very great, and such a fort could easily be approached. He preferred a larger fort with five bastions which should be flanked by the sea and the backwater and border on the land side along the morasses that had made the approach of the Dutch so difficult⁶. This plan was adopted with some slight modifications and a wall about one and a half miles in length was built with a bastion on the sea-front (Gelderland), five on the land side (Holland, Zeeland, Friesland, Utrecht, Groningen) and some projecting works. These fortifications which can be traced on the ground to some extent to this day⁷, seem to have been little altered in the century of the Dutch occupation from the time that Baldaeus wrote his book on Malabar and Ceylon (1672) to the time that Stavorinus visited Governor Moens (1777) or Moens wrote his Memoir (1781)⁸. Canter Visscher (1717-23) and Stavorinus (1777) observe that they could hardly resist a European enemy. They seem to have been practically complete in

⁷ The position of bastion Holland is fixed by references in the records (*e.g.*, MS. No. 358) to the cemetery being under it. The little Dutch cemetery thickly crowded with 18th century tomb stones still exists and the lighthouse stands on the old bastion. The Bishop's house stands on what was bastion Zeeland, the Vicar's house near the new Roman Catholic Cathedral on Utrecht, Pierce Leslie & Co.'s offices on Groningen and a hotel on Gelderland.

1675 when Van Goens reported¹ that they had cost 875,190 guilders (about £30,000) while 450,000 should have sufficed. Proposals to fortify Purakad and Cayenkulam were rejected, but the fortifications at Quilon and Cranganore were restored, and other small forts were afterwards built.

The authorities at Batavia grudged the money spent in fortifications, and orders were received from time to time to cease to keep up or demolish this or that fort. But circumstances made the men on the spot unwilling to obey these orders, and they seem to have remained dead letters. To take an instance, Commander Breekpot received orders in 1765 to demolish the forts of Chetwai, Cranganore and Quilon. He went so far as to get an estimate drawn up of the cost of demolishing them, but wrote² that he did not consider it advisable to carry out the orders in view of the threatening attitude of Hyder Ali of Mysore and the King of Travancore, and for various other reasons.

Fortifications were in fact necessary so long as India possessed no settled government. However much the Dutch might wish to avoid trouble with the native rulers, they were from time to time dragged into the quarrels of princes of Malabar with one another or with foreign conquerors. Nor was it otherwise with the less considerable English settlements at Tellicherry and Anjengo in the neighbourhood. Their greatest expenses were under the heads "Garrison" and "Fortifications," the factors of Anjengo with some 120 men were massacred in April 1721 at Attungal and the factory in which some forty subordinates, etc., remained, was besieged for the next six months; while the factors of Tellicherry were constantly engaged in petty operations of war against the French at Mahé or native chiefs, maintained a garrison of 337 men as early as 1726, and were besieged by Mysore troops from July 1780 to January 1782, and had been blockaded before by petty chiefs³. In 1689 the Court of Directors of the English Company ordered the station "at Keturah, in the Queen of Attenger's country to be fortified in the strongest manner"⁴. A few years later it was reported⁵ to the English Directors that the Rajah of Tellicherry had offered to allow the English to take possession of that place "and fortify it, explaining that "otherwise he could no longer furnish them a proportion of pepper, from being "unable to defend his country." In the 17th and 18th centuries a factory in India was not safe without fortifications and a neighbouring petty prince or even a prince such as the King of Golconda or the Great Mogul himself could not guarantee its safety, however anxious he might be in his own interests that new traders should settle in his dominions. The King of Cochin could not have protected the Dutch against the Zamorin of Calicut if they had not been in a position to defend themselves, and the Zamorin himself, though perhaps the most powerful of the Malabar princes, could not prevent the Angria pirates attacking ships in the roads of Calicut in January 1743⁶, while other pirates had landed at Cannanore in the night in 1742 and burnt several houses and on the 27th November 1746 Tulasi Angria with a fleet of eight grabs and 40 or 50 galevats, landed his men at Mangalore, "which place they plundered & in about 26 hours re embarked."⁷ The Dutch company's "lodge" at Sadras on the East Coast was attacked on the 12th of March 1676 in the evening by about 100 bandits habited in a strange Moorish fashion, who slew, wounded or drove away the Company's native peons and after the few Company's servants had fled, broke open the dwellings, chests, and money-boxes and went off with 6,276 pagodas (about £ 3,000) in cash and not much less in goods⁸. In 1663, on the approach of the great Mahratta bandit Sivaji, the native inhabitants of Vingorla, where the Dutch had a factory, deserted it in fear⁹, and in the same year Sivaji plundered Surat while the Great Mogul's Governor cowered in the castle and the English factors were in fear of their lives. Instances could be multiplied, but the point hardly requires elaborating, and it is not surprising to find in Bruce that in 1703-4 "both

“(English Presidents) agreed in giving it as their opinion to the Court of Managers that grants of trade by the Mogul Government were temporary expedients only, that force alone, or a fortification with a strong garrison, was the only means by which the observation of the conditions in these grants could be made effectual”.

VII

Portugal and the Netherlands had made peace before Cochin and Cannanore fell.

The peace with Portugal.

The treaty was signed on the 6th of August 1661, ratified by Portugal on the 24th of May 1662, by the Netherlands on the 14th of December 1662¹, and published on the 14th of March 1663 but nothing was heard in the East of the ratification till much later. On the 11th of May 1663 the Dutch at Batavia heard that “the peace with the English was concluded, but that with the Portuguese not”², and it was not till the 14th of June that “the frigate Joncker arrived in the roads from the fatherland having stopped nowhere on the way”³ and brought a letter from the Directors, dated the 23rd December 1662, which announced the ratification of the treaty. The 6th article of the treaty ran as follows: “According to this treaty all hostilities and offensive actions shall cease between the King and the Kingdom of Portugal on the one part and the United Netherlands on the other and between their subjects and citizens in Europe within two months from the date that this treaty shall be signed by both parties, and in the other parts of the world from the date of the publication of this document, and to all prisoners on both sides shall be given their former freedom directly after the ratification of this treaty, while all regions, places, ships and goods which may be taken in the meantime by either party as well as those conquered before in the East Indies, the West Indies or elsewhere, will remain in possession of those who appear to have been their possessors at the moment; but such as are occupied and taken in Europe after the lapse of two months from the signature of the said treaty, in other parts of the world from its publication, shall be restored without delay or exception to their former masters.”

This seems clear enough. Cochin and Cannanore were taken in January and February, 1663, that is before the publication of the treaty on the 14th of March 1663. Nevertheless in March, 1664, an envoy from the Portuguese Viceroy arrived at Batavia with a letter from the Viceroy, dated the 18th January 1664, in which he wrote: “Under the capitulations of peace between the King of Portugal, my Master, and the Most Serene Estates of the United Provinces which you must have received by now and I again send for you to see, you must restore me the places of Cochin and Cannanore as having been taken after the publication of the said peace which was made on the 14th of December 1662”

The Dutch replied “it was true the treaty was ratified on the 14th of December 1662, but it only came into force so far as the East was concerned, in conformity with the sixth article, after the publication of the said peace which took place three months after the said ratification, as may be seen in article 26.”

The question was again raised in Europe two years later, but the claim was, as might have been expected, not taken seriously by the Dutch⁴, though they seem to have been open to an offer. The Portuguese continued to press their claims and under article 14 of the Treaty between Portugal and France of the 31st of March 1667 the Most Christian King was to endeavour to get Cochin and Cannanore restored to Portugal *omni genere officiorum*. The question was finally set at rest by the Treaty between Portugal and the Netherlands of the 30th July 1669, article 1 of which states that Cochin and Cannanore should remain in the hands of the Dutch East India Company until not only the war indemnity fixed by the treaty of 1661 had been paid but also a special indemnity for the cost of the Company's

¹ Danvers II, 329; date 14th Decr. (not 4th as Danvers nor 24th as Valentijn) I take from Bat. Diary, 1664, p. 84. The treaty is given in full in Biker's Collection, Vol. IV.

fleet, which had taken them, and of all the operations'. The fort at Cannanore remained Dutch until it was sold to the Ali Raja (Sea King) of Cannanore in 1771, and Cochin until it was taken by a British force in 1795.

VIII

The history of Dutch rule on the West Coast of India from 1663 to 1795 can be written in detail only when 1,400 volumes of records have been examined and compared. Meanwhile the accounts of Stein van Gollennesse and Moens will throw some light on the politics of Malabar during their administrations. The first was written just after the failure of an enterprise which might have resulted in the establishment of a Dutch Empire on the west coast, and just before Dupleix showed the French, the English and the world what a simple matter the establishment of European ascendancy on the east coast was. The second was written when the English were becoming the leading power in South India, but were still engaged in their struggle with Mysore. When Stein Van Gollennesse wrote, Malabar was divided up among a great number of petty princes, none of them formidable. In 1781, when Moens wrote, Holland was sinking to a low place among the nations, the Dutch had long ceased to be masters of the sea, and the once great Dutch East India Company could no longer dream of territorial expansion in the East, but was about to be ruined by the war between the home country and Great Britain.

Though the history of the Dutch in Malabar cannot yet be written, something may be said about two out-standing campaigns.

When the Dutch took Cochin the most powerful and aggressive of the petty princes of Malabar was the Zamorin of Calicut. He had been for a hundred and fifty years the enemy of the Portuguese and of the King of Cochin, and when the Dutch prepared to lay siege to Cochin he entered into an alliance with them and gave them some assistance, though much less than the Dutch had expected. The Zamorin expected in return to be made King of Cochin². But the Dutch had no intention of making him too powerful. He then asked for at least the island of Vypeen. But this also was refused him. The relations of the Zamorin with the Dutch were naturally not cordial thereafter. Moreover questions were always arising between him and the King of Cochin, whom the Dutch were bound by treaty to protect. As early as 1665 there was a question about a piece of territory called Catur. The Dutch had to interfere and propose a settlement, which was accepted. But hostilities continually broke out between the parties, and as often as not Cochin, though the weaker, was according to the Dutch the aggressor, relying on the Dutch to protect him³. War was in fact the natural state of Malabar; the different princes always had claims, often of great obscurity, to places in one another's territories. Moreover the Zamorin and Cochin were the heads of rival factions, also of obscure origin, called the Chavarakur and Panniyurkur factions, and as such had always an excuse for fighting. The Portuguese found Cochin at war with the Zamorin in 1500; the parties continued to be at war intermittently for the next two hundred and fifty years.

For half a century after the occupation of Cochin the Dutch were from time to time embroiled in these wars and led into expenditure which caused Malabar to be set down as an unprofitable settlement. The Zamorin's route of invasion lay along the shore by Chetway and Cranganore. The Payenchery Nair, in whose territory Chetway lay, and the Prince of Cranganore were tributary to him. In 1710 A.D. the Dutch forced the Zamorin to conclude a treaty by which he ceded to them the suzerainty over these two little chiefs (treaty of 10th January 1710) and proceeded to build or extend a fort at Chetway. The situation became acute again in the year 1715 when

¹ These treaties are given in full in Vol. IV of Biker's collection (Treaties relating to Portuguese India in Latin and Portuguese).

² Batavia Diary, 1663, p. 128.

³ Cantor Vissoher.

the Zamorin surprised the fort on the night of the 22nd of January¹. The prestige of the Company was seriously affected and the numbers of their enemies began to swell "like a snow-ball"². A glimpse of the Dutch Commandeur of the time, Barent Ketel, is obtainable from the diary of Stephen Strutt³, who was sent to inspect the English factories on the west coast in 1714. He was at Cochin on November the 16th and was received politely by the "Commodore", of whom he remarks: "The Governor Barran Kettle raised himself from a Centinell as several of their men in post have done he was mighty affable and courteous." He seems however to have been corrupt; for Strutt goes on to remark that the Governor and broker "being equally concerned" charged the Dutch Company "whatever they could agree" for pepper, and that private persons could easily procure pepper underhand in spite of the Company's monopoly, "but it must not be openly."

This person was afterwards summoned to Batavia to undergo his trial for high treason and cowardice, but was eventually acquitted in 1719⁴.

It was realised in Batavia that a considerable force would be required in Malabar to restore the Company's prestige. 1,573 men were sent in September 1715, and 1,500 more in September 1716⁵, these last under the command of the Right Worshipful the Councillor Extraordinary William Bakker Jacobsz. The Diary of His Worship's campaign was written up in great detail from day to day and part of it is still in existence⁶.

His Worship arrived in Cochin on the 23rd of November 1716. One of his first acts was to send letters announcing his arrival and that of Barent Ketel's successor, Johannes Hertenberg, and his intention of punishing the Zamorin, to the powers of Malabar. The list of addressees below will give some idea of the manner in which Malabar was then divided up into petty States—

⁶ MS. Nos. 97-99.

⁷ Where most of the places are and the meanings of the designations will be explained in Stein Van Golleneuse's Memoir and the notes thereto. The Nairs are the fighting caste (a Sudra caste), Pillai, Nambidi and Kurup Nair titles, Caymal means Prince, Atsja (Achan) = father, Adergia = Ali Raja, Sea King, Balnore is Malayalam Valluvanar, Ruler, etc.

From calculations as to how far a supply of rice would go it appears that the Dutch force in the field at the beginning of the campaign consisted of 3,226 men without counting 1,000 Cingalese expected from Ceylon who actually arrived at Chetway on the 26th February 1717¹. It is also mentioned that there were not more than 193 topasses and 113 lascorins in the service, and from an entry under the 10th January 1717 it appears that the Dutch could then dispose of 3,400 men as against 2,200 the year before. The Zamorin was entrenched in a pagger (stockade) at Paponetty (Pappinivattam), some 20 miles south of the captured fort of Chetway. The pagger was attacked on the 16th January 1717 and taken with a slaughter of 2,000 of the Zamorin's Nairs. The Dutch casualties were 17 Europeans dead, 72 wounded; others, 22 dead, 69 wounded. On the 27th the Dutch army arrived before Chetway, which they found abandoned, and the Zamorin began to negotiate.

According to the Rev. J. Canter Visscher, who was chaplain of Cochin from December 1717 to December 1723, the result of the action at Paponetty was a great shock to the heathen and the bones of the dead lay about the fields for many years afterwards. The reverend gentleman exaggerates a subsequent skirmish at Urevenir on the 12th of February, in which the Dutch, according to the Diary of the campaign, lost one man killed and five wounded, and the Zamorin 117 to 120 killed and severely wounded, into "a decisive victory", and cannot be considered a very trustworthy witness, but it certainly appears from the Zamorin's correspondence that he had no stomach for fighting after the action of the 16th of January. The negotiations fell through for the time being over the question of the amount of the indemnity, the Zamorin asserting that he had no cash but would surrender land, while the Dutch wanted both land and cash. A few months afterwards peace was concluded and the Dutch obtained a small indemnity² and were also placed in possession, in complete sovereignty, of a strip of sea-coast (Province Paponetty), forming part of what was called "the Sandy land" between Chetway and Cranganore³—now a southerly projection of the British district of Malabar, cutting off the Cochin State from the sea. They were also confirmed or established in the sovereignty over Cranganore and other petty states⁴, while certain other territories handed over by the Zamorin⁵ were handed on to Cochin. In this war the Zamorin seems to have received assistance from the English. This is not only asserted in the Campaign Diary of the Dutch, but is confirmed by the contemporary writer Alexander Hamilton (edition of 1739, I. 315) and by an entry on p. 67 of the Tellicherry Diary for 1743-4, where the old "linguist" or Eurasian agent of the English at Calicut is reported as observing: "when this Fort at Tellicherry was set about the Building of, Mr. Adams got leave from the Samorine to export what materials he should want from Calicut customs free, which he believes the Samorine more readily granted, as Mr. Adams was very serviceable to him by assisting him in his wars against the Dutch."

The supply of war material was a profitable branch of trade, while it was good policy to injure a trade rival and secure the favour of a native chief. Another extract from the Tellicherry Diary under date the 19th September 1743 will show that another native chief had been given similar assistance against the French: "From the circumstances of the Debt we judge that the reason he (the chief Boyanore) refuses to discharge it is that as it arose from Stores and Ammunition supplied to him privately in his wars with the French, he imagines we do not care to make any great stir about it, lest the French should be acquainted with our having assisted him."

Canter Visscher suggests that more advantages should have been obtained and hints that the Right Worshipful Willem Bakker Jacobsz had private reasons of his own for not completely humbling the Zamorin. This shows that the Dutch at Cochin, or some of them, were not satisfied with the acquisitions made. But His Worship had not a very large force and the Cingalese expected from Ceylon did not

¹ Diary of the Campaign. On the 7th of March the field army at Urevenir consisted of 4,181 men, of whom 941 were Europeans, 125 topasses, 371 lascorins (Indian or Ceylon sepoys), 1,654 Malays, 1,090 Cingalese. The auxiliaries supplied by the Raja of Cochin are estimated by Valentyn at 15,000.

arrive in time, and it was not the policy of the Dutch Company at this time to assume the sovereignty of extensive territories, but rather to force petty princes in the neighbourhood of their settlements to enter into contracts for the delivery of products at low prices (that is, to pay a disguised tribute), while it held in sovereignty only the sea-margin of productive hinterlands. It appears however, from Stein Van Gollennesse's Memoir¹ and papers of 1717 A.D.² that the authorities at Batavia were much dissatisfied with His Worship for being content with a small indemnity and for handing over to the King of Cochin some of the territories ceded by the Zamorin. The revenue of the strip of land retained (Province Paponetty) was not large. The average nett revenue for the five years before Hyder Ali took it was only 15,000 guilders or 12,500 rupees³ while, if Canter Visscher is to be believed, the war had cost the Company nearly two million guilders⁴.

The Company may have been somewhat ill served, but even had more ambitious counsels prevailed the time was not favourable for acquiring large possessions in Malabar. The second Javanese Succession War shortly afterwards broke out and occupied the Dutch forces for the next five years. Reinforcements could hardly have been spared for Malabar. The finances of the Company would perhaps have permitted them to conduct a war in Malabar as well as the war in Java. 40 per cent. dividend was paid each year from 1715 to 1720, 33 $\frac{1}{3}$ per cent. in 1721, 30 per cent. in 1722, 12 $\frac{1}{2}$ per cent. in 1723, 15 per cent. in 1724 and 20 per cent. in 1725, the Company's stock reached 1260 for every hundred in 1720⁵ and its credit was excellent. But there was always great difficulty in getting European troops. The pay was not attractive and the mortality, especially on the voyage out and in the depôt, Batavia, then perhaps the most unhealthy European Station in the East, was appalling. Sufficient Dutchmen could not be procured; men had to be obtained from the interior of Germany or elsewhere⁶, and the Dutch had at one time French, at another Swiss regiments in their service in the East. In some of their wars they employed considerable armies, but the necessary stiffening of Europeans was always small, and they probably seldom had as many as 10,000 Europeans in their military service in the Indies. With a mortality in the European army calculated at from 70 to 120 per thousand, with garrisons in numerous stations which even at minimum strength absorbed many thousands of men, with recruitment very difficult and with only 25 ships of a few hundred tons each a year on an average to convey the new levies from home⁷, the Dutch Company was scarcely in a position to conduct a war of conquest in Malabar while it was engaged in Java.

However that may be, the campaign of 1717 restored the Company's prestige in Malabar and there was no further trouble for some years. The next campaigns of importance occurred in a war with the Kingdom of Travancore which lasted from 1739 to 1742.

When the Dutch first came to Malabar, Travancore was a very small principality. According to a report⁸ of Van Goens written in 1675 "Travancore begins with the West cape of Comorin and ends on the coast about two hours' walk or less north of Tegenapatnam" (a port in Vilavankod Taluk 15 minutes south of the present capital, Trivandrum). On the north along the coast followed the principalities of Attungal (whose rulers permitted the English Company to construct a factory at Anjengo), of Quilon or properly Desinganad (the Signatty) and of Cayenculam. On the north-east Travancore was bordered by the Kingdom of Peritalli and Elayadatu Svarupam. Even the memory of the Kingdom of Peritalli has died out,⁹ but I find it mentioned in the early English as well as Dutch records. On the 4th of March 1726 the English factors at Tellicherry recorded in their Diary: "The Kings of Chingannaatta and Perital have joined Vanjanatta and are resolved to crush the King of Travancore."

⁸ Apud Valentijn V (1) III, 238.

⁹ So Mr. Achyuta Menon informs me.

From 1729 to 1758 an able and ambitious prince, Martanda Varma, reigned in Travancore. He first reduced his own vassals to obedience; with the help of the English according to Stein Van Gollennesse¹, a statement which cannot be fully checked as the Anjengo records of the time no longer exist, but is confirmed by a letter written in 1757 by the Chief of Anjengo to the Select Committee at Madras². He then turned his attention to his neighbours. He first (1734 A.D.) attacked Elayadatu Svarupam, in which Peritalli had by that time been absorbed, and imprisoned the ruling family in a fort in the hills, where the King died in 1741³. The acquisition doubled his dominions. In the same year he attacked the Raja of Cayanculam, who fell in battle on the first of June 1734⁴. The Signatty of Quilon, who had had previous differences with Martanda Varma and was the nephew of the Raja of Cayanculam, declared Cayanculam absorbed in his State and continued the war.

It was to the interest of the Dutch to maintain the position they had acquired of arbitrators in Malabar, to prevent any one prince growing too powerful, and to stop encroachments on the principalities of Cayanculam and Quilon, where they had factories. The conquest of Peritalli and Elayadatu Svarupam, the peaceful absorption of Attungal on which Travancore had a claim through his mother⁵, and the practical absorption of another small principality called "Marta" (between Quilon and Purakad) by the succession thereto of a female member of Travancore's own family, alarmed the Dutch. Eventually it was determined to take the field on behalf of the Signatty and of the imprisoned prince of Elayadatu Svarupam.

The Commandeur of Cochin was not in 1739 as in 1717 a corrupt ex-"Centinell" destined to be tried for incompetency, but the author of one of the Memoirs here translated, Stein Van Gollennesse, a man of good family, afterwards promoted to be Governor of Ceylon and member of the Batavia Council; and a superior officer of the Company, the ordinary Member of Council, Van Imhoff, who made a short visit to Malabar at the beginning of the year 1739 and seems to have suggested the policy of war⁶, was an even more distinguished personage than the Right Worshipful Willem Bakker Jacobsz. Gustaaf Willem, Baron Van Imhoff, was member of a family of nobles. The monument to a relative in Wolfendal church, Ceylon, displays sixteen quarterings⁷. He was born on the 8th of August 1705, came out to the East in 1725, became Councillor Extraordinary in 1732 and in 1736 Ordinary Councillor and Governor of Ceylon. In 1738 he was at home on leave and made so good an impression on the Directors that they resolved to appoint him Governor-General at the next vacancy⁸, and he was in fact destined to be one of the most distinguished of the Dutch Governor-Generals in the East.

His Worship was an able and energetic man. He seems to have concluded that the system under which the Dutch had endeavoured to act as arbitrators in Malabar and to content themselves with a tribute in products to be delivered at a price much below that of the market, had broken down. The action of a single ambitious prince had shown that the system could not be maintained without a considerable force. Malabar must either become an ordinary commercial settlement, like the English or Danish factories on the coast, and buy products at the market price, or the Company must establish its sovereignty over the country. The second of the two policies was adopted and war was declared on Travancore. The position being critical, reinforcements from Batavia were not awaited. A few companies arrived from Ceylon and the campaign was opened with these and the Malabar garrison. A history of the war which ensued could be written from the diaries and other papers of the time. A summary will be found in the foot-note to page 83 below. It will be sufficient to say here that it never became much more than "a defensive and auxiliary war" as Moens calls it, because events in Java, in which Van Imhoff himself bore a great

part, while they resulted in establishing a Dutch empire in that great and rich island, made it impossible for the Company to despatch troops to Malabar. After four campaigns Travancore had become more powerful than he had ever been before, the Dutch were compelled to recognise all his claims, and the schemes for large territorial acquisitions on the West Coast of India were dropped by the Company, though we still find Stein Van Gollennesse writing in 1743¹: "Should the Hon'ble Company at any time have a great force in India and occasion permit us to push the matter energetically, my opinion would be that it would suffice to *make ourselves completely masters* of the states of Peritalli and Vadacancur." The Dutch, he goes on to say, had previously "conquered the coast", but the sovereignty of the coast was insufficient as pepper could be exported inland and the only way to secure an unfailing supply of cheap pepper was to assume the sovereignty of tracts in which the spice grew.

Even this modified imperialistic scheme came to nothing and in 1753 the Dutch finally came to terms with Martanda Varma. They were not to stand in the way of Travancore absorbing all the petty principalities of South Malabar², and were to supply him with 12,000 rupees worth of arms annually on payment³. He on his part was to supply them with all the piece-goods manufactured in his country, with 1,500,000 lbs. of pepper from his hereditary possessions (Travancore and Attungul) at Rs. 65 per candy (500 lbs. Dutch⁴) and with another million from the principalities "he had conquered or might conquer through the neutral attitude of the said Company."⁵ By this treaty the Dutch reverted to their traditional policy of recognising a native prince in return for an indirect tribute paid in kind. The market price of pepper of course varied; but I find from the Tellicherry Diaries that it was Rs. 100 a candy of 520 lbs. English (Diary 1740-1, p. 69) in December 1740, Rs. 104 a little later, Rs. 98 in April 1741, Rs. 116 in March 1742, Rs. 95 for a supply of 410 candies obtained from Ezechiel Rabbi of Cochin in December 1743, and in general the price seems to have been never much less than Rs. 100 during the next forty years. On the 28th of February 1780 the Tellicherry factors shipped a cargo of 939 candies odd of the invoice value of Rs. 1,14,000 odd (Rs. 121 per candy). In the same year out of a total of 1,065,249 lbs. collected by Governor Moens at Cochin, 1,001,999 lbs. were supplied by Travancore at Rs. 65 per candy⁶. The indirect tribute paid by Travancore to the Dutch in that year may accordingly be reckoned at over a lakh of rupees (2,000 × Rs. 50). It would have been about three lakhs of rupees if the full amount stipulated for by the treaty of 1753 had been supplied. But Travancore argued that the 2,000 candies to be supplied from lands conquered or to be conquered were not due, as the Dutch had by preventing him absorbing the kingdoms of Cochin and Calicut, not fulfilled their part of the bargain⁷, and he usually did not even supply the full 3,000 candies or million and a half pounds due from his hereditary territory on the plea that that small territory did not yield so much—which may have been true. Martanda Varma at any rate, in the opinion of Commandeur F. Cunes, who wrote a Memoir⁸ in 1756, three years after the conclusion of the treaty, honestly intended to deliver the full amount, and if his successors were lax in making the supply, it must be remembered that they could obtain the war material of which they stood in need from other European nations who were willing to pay a higher price for pepper. "A candy of pepper for every musket you let me have" was a proposal made by Martanda Varma to the Anjengo factors in 1744⁹; on the 19th of February 1780 the Anjengo factors received "600 stand of new Arms for the King of Travancore;¹⁰" and the following passage from a letter written by the Chief of Anjengo in 1757 illustrates the point: "As the Dutch on one side supplied him

⁶ Accounts in MS. No. 1136. The Anjengo factors were getting pepper from Travancore at the same time at Rs. 82 a candy, but that was under special contract, and they supplied him with arms in return. In 1793 the English Company contracted with Travancore for 2,000 candies of 560 lbs. at Rs. 115 per candy and with Cochin for candies of 500 Dutch lbs. or 540 English lbs. at the same price, in 1795 with Travancore for 3,000 candies of 560 lbs. at Rs. 130 (Logan's Treaties, pp. 174, 184, 234).

⁹ Anjengo MS. Diary.

¹⁰ Anjengo Diary.

(Travancore) with arms, etc., and the Danes and other Europeans at times did the same at Coletchy, for which they got pepper, he withheld pepper from us under pretence that we show'd ourselves less friendly to him than others. Therefore, tho' reluctantly, the Hon'ble Company were necessitated to submit to the said evil other Europeans had indulged him in¹."

The political result of the Dutch policy was that Travancore absorbed all the smaller principalities south of Cochin and a part of Cochin itself and attained its present dimensions, while Cochin continued to exist at all only because it was under the immediate protection of the Dutch, and the Calicut Kingdom perhaps only because the Dutch at Cochin barred the way. Travancore maintained a considerable army partly trained by Dutch deserters, of whom Lanoy and Duyvenschot are specially mentioned by Moens² as the most important. Stein van Gollenesse's administration regarded the reported appointment of Duyvenschot to command the King of Travancore's forces as a most serious danger and an attempt by Travancore to storm Quilon in July 1742 was attributed to his influence³. Lanoy was afterwards appointed Commander-in-Chief of Martanda Varma's disciplined forces, said to have amounted to 50,000 men⁴; and served him and his successors for 37 years (1740 to 1777)⁵. He died at the age of 62 while giving the finishing touches to the famous Travancore lines which checked Hyder Ali and Tippu. The resistance offered by Travancore to the formidable armies of Mysore at a time when they were disputing the British supremacy in South India is a historical fact of no small importance. The Dutch policy assisted in the creation of a strong state out of the numerous principalities of South Malabar and Dutchmen commanded the forces of Travancore for thirty-five years and fortified his frontiers.

IX

Such was the actual course of events. The fact that the Dutch had entertained plans for the acquisition of territorial sovereignty in India before Dupleix and Clive had shown the way is not generally known⁶, and it may be worth while to explain why the determined and energetic Van Imhoff, who seems to have been their originator, did not execute them when in the year 1742 he became Governor-General and could dispose of all the Company's forces.

There is an interesting contemporary entry in the Tellicherry Diary under date 24th July 1742. "The Dutch at Cannanore inform that Baron Imhoff is coming General to Batavia with thirty-six men of war." Congratulations were sent by the English factors "on such a fleet as we had not heard of before in India". Stein Van Gollenesse tells us⁷ that on hearing the news of Van Imhoff's return to India as Governor-General Travancore "hurriedly returned with his army to his own country", and sued for peace "in very polite terms," and as late as November 1744 he is reported by the Anjengo factors as still "very apprehensive" that the Dutch would attack him again⁸. Why did the new Governor-General not fulfil the general expectation and send to Malabar forces which would have made it possible to carry out what seems to have been his own old policy?

In 1729 began what is called "the black period" of the Company's rule. In 1731 the Governor-General Diedrik Durven, three members of the Supreme Council and other officers were removed from office and re-called to Europe. They were not put on their trial and clear proofs of the charges against them are not now available. But it was notorious that the administration, political, commercial and judicial, had become corrupt, and it is believed that the main charges against Durven were of selling

⁶ The following remark in the Imperial Gazetteer, 1908, II, 470, is not true either of the Portuguese or of the Dutch: "Until after the death of Aurangzeb all the Europeans confined themselves strictly to their commerce, and as traders were ready to obey the ruling chief in their neighbourhood, of whatever race or religion he might be." At Cochin both Portuguese and Dutch were from the beginning sovereigns, not subjects but the Paramount Power in Malabar.

⁸ Anjengo Diary.

appointments, and of impaling Chinese alive and letting them die of slow torture in public; at any rate these are among the charges advanced in the pamphlets of the day. Ceylon had suffered from similar tyranny and a Governor, Peter Vuijst, had been found guilty of cruelty, oppression, corruption and judicial murders, and had suffered a shameful death on the scaffold at Batavia.

For a hundred years no Governor-General had been appointed from home. A member of the Council, often chosen by the Council itself, had succeeded on a vacancy occurring. Such a man could not be without his likings and prejudices; he had usually formed family ties in the east; he had had his quarrels with other members of the service. The post of Governor-General was often won by intrigue and used to pay off old scores or to reward partisans. The service was full of cliques, and a clique which had made its way into the Council Chamber was bitterly opposed by the cliques which had been unsuccessful, while the Council itself was often divided.

In the year 1740 Van Imhoff was a member of council at Batavia. He had for years been an enemy of the Governor-General Valkenier, who had reached that eminence in 1737 after being passed over in 1735 for one Patras, a feeble old man. In the long secret letters that Valkenier had occasion to write some years later he put down his supersession in 1735 to the opposition of Van Imhoff. In 1740 violent quarrels broke out between Van Imhoff and Valkenier¹.

The council was at that time confronted with a problem of great difficulty. The settlement of the Dutch in Java had led to a large immigration of Chinese. The Chinese were not easy people to deal with, and the Dutch had from time to time forbidden their settlement in Batavia or required them to take out residential licenses. With the civil service as corrupt as it was at this time the system of licenses led to manifold abuses. The rich Chinese were squeezed, the poor were driven from their occupations and trades and a large class was formed of Chinese tramps, criminals and bandits. In 1740 the Dutch became seriously alarmed and on the 25th of July a resolution was passed in Council that all suspect wandering Chinese, even if provided with licenses, should be arrested.

Van Imhoff brought forward this resolution. Valkenier opposed it. But Van Imhoff commanded the stronger party in the Council and it was carried.

Many honest Chinese were imprisoned under the resolution, and the rumour among them was that the prisoners were to be put on ships on the pretext of being taken to the Cape, and drowned on the way. On the 26th of September news arrived that the Chinese in the highlands were forming themselves into bands of 50 and 100 men under separate commandants and providing themselves with arms. In the Council Chamber Van Imhoff complained of the oppressive way in which the resolution of July had been carried out and of the general squeezing and oppression of the Chinese. Valkenier pretended to be surprised and declared that he knew nothing about it. Meanwhile the town was put in a position of defence, and all kinds of rumours went about regarding the intentions of the roving bands outside and of the Chinese population of Batavia. Actual attacks from outside followed on the night of the 8th of October, but were repulsed, the members of Council commanding detachments at the different gates of the town. Batavia had passed a very unpleasant wakeful night and when the Council met at six o'clock on the morning of the 9th of October, "Valkenier proposed that "whereas in the past night the Chinese nation had not "hesitated to attack the outposts weapons in hand and to show themselves and "commit hostilities before the very walls and gates of the town, this nation should "be declared enemies of the Company and *the town cleared of Chinese*, who were "to be found within the same in great numbers, in order that the enemy should not "have to be faced within and without the town at the same time." Van Imhoff was not for violent measures. He proposed sorties to discover what was going on outside the town, a pacificatory proclamation and the inspection of all Chinese houses in the town, those in whose houses arms were found to be imprisoned, the rest to be left unmolested on condition that they did not leave their houses after half-past seven. Van Imhoff's proposal was approved, the register of resolutions recording that it was

¹ I follow De Jonge, Vol. X, in my account of these transactions.

strongly opposed by the Governor-General "who was of opinion that the Chinese "in general must be declared enemies of the State and that the first thing to do was "to wipe the town clear of them from within if we wished to place ourselves in a "position to attack the enemy outside."

Orders were given to carry out Van Imhoff's proposal. Meanwhile a fire broke out in the Chinese quarter. It was believed by some to have been lighted by the Chinese with the purpose of destroying the town. Others afterwards declared it was the work of Europeans. At the same time the magisterial officers charged with the execution of the resolution that the Chinese houses should be searched arrived with their numerous following. The escort mixed with the crowd which had been attracted by the fire. Misunderstanding, or taking advantage of, the presence of the officers, a mob of Europeans began to plunder the houses of the Chinese and massacre the inhabitants. In the next two days they massacred every Chinese man, woman and child they could find, 10,000 altogether it is said, even the prisoners in the jails and the sick from the hospital.

Valkenier was accused of having ordered the general massacre. He denied it to the day of his death, but certainly did not raise a finger to prevent it, and on the 10th of October he issued an order that the Chinese in the hospital should be turned out into the streets, knowing of course what their fate would be. Nor can Van Imhoff and his party, who afterwards vaunted their outraged feelings and their innocence, be acquitted of blame. They seem to have done nothing to stop the massacre, though a week after, on the 17th of October, Van Imhoff laid a written declaration on the table in Council that he was in no way responsible for the horrible massacre on the 9th, left the responsibility to those who had given the orders for it, and had no desire to participate in the consequences of that "unheard-of" event, though he would gladly help to restore order. He then carried a resolution to the effect that the responsibility for the massacre of the Chinese was left to those that had ordered it and that a general amnesty should be offered to all Chinese who laid down their arms within a month. Valkenier protested, but was outvoted.

The panic in the town died down and measures were taken to deal with the roving Chinese bands; but the quarrels in Council reached such a point that on the 6th of December Valkenier placed Van Imhoff and two other councillors under military arrest and on the 10th of January 1741 sent them home in arrest.

Meanwhile orders, dated December 1740, arrived in Batavia appointing Van Imhoff Governor General in succession to Valkenier. Valkenier started home in November 1741 leaving a locum tenens in charge. On arriving at the Cape in January 1742 he found himself in military arrest under orders from the Directors that he should be sent back a prisoner to Batavia to stand his trial. Van Imhoff had arrived in Holland and told his story.

Valkenier's trial was never concluded. He languished in jail till he died on the 20th of June 1751. The charges took long to draw up, still longer to answer. Valkenier asked for copies of an enormous number of papers. His answer to the charges, which was handed in in December 1744, consisted of no less than 12,333 (twelve thousand three hundred and thirty-three) paragraphs. He was accused of selling offices as well as of crimes under various heads in connection with the massacre and with the arbitrary arrest of the three councillors. The 12,333 paragraphs naturally afforded opportunities for further replies, counter-replies, demands for documents and applications to the Courts. His death broke off criminal proceedings which had lasted nine and a half years. They were followed by civil proceedings regarding his estate of some £60,000 sterling which lasted another $8\frac{3}{4}$ years.

Meanwhile Van Imhoff was Governor-General from 1743 to 1750. The Chinese bands and the Javanese who had joined them had been overcome, before he returned to India, after some very severe fighting and with the result that the Company claimed supremacy in all Java. But that supremacy was again challenged in 1745 in a war which lasted from 1747 to 1755, is known as the Third Javanese Succession War and really left the Company sovereigns of Java. While the Company was putting out all its strength and spending millions of guilders¹ in Java, it could not afford to

¹ Klerk de Reus XXXVIII; Note.

conduct wars in Malabar. And that is why Van Imhoff, though he arrived "with such a fleet as had not before been heard of in India," could not send troops to Malabar to carry out what may once have been his own ideas.

X

The civil and military administration was elaborately organised in the Dutch settlements. They had many Courts, Committees, Institutions. The Directors of the English Company long held the Dutch system up as a model to their subordinates, the chief offices in their settlement and sometimes their designations were borrowed from the Dutch system. In the early days the advisability of imitating the Dutch was freely acknowledged, and many Dutchmen were induced to enter the English Company's service. So in 1687 Governor Yale of Madras (afterwards founder of Yale University) having sent the Directors "a book containing the Dutch methods", they observed that they had found in it "not much more than "some of us understood before of their affairs, but as there appears in this great "wisdom and policy . . . we recommend to you the frequent reading and "consideration of what is contained in these papers, which the oftener you read, "the more you will discover the wisdom of those persons who contrived those "methods . . . our design in the whole is to set up the Dutch Government among "the English in the Indies (than which a better cannot be invented) for the good of "posterity, and to put us upon an equal footing of power with them to offend or "defend, or enlarge the English dominion and unite the strength of our nation "under one entire and absolute command subject to us; as we are and ever shall "be most dutifully to our own sovereign" [who was ousted for a Dutchman the year after!]. "But this distinction we will make that we will always observe our "own old English terms, viz. Attorney General instead of Fiscal, Alderman instead "of Sepin, Burgesses instead of Burghers, Serjeants instead of Baillies, President "and Agent instead of Commander, Director or Commissary etc¹."

What especially provoked the admiration of the English Directors in the Dutch conduct of affairs was that they placed administration before trade. "The wise "Dutch", wrote the Directors in 1689, "in all their general advices that we have "seen, write ten paragraphs concerning their government, their civil and military "policy, warfare, and the increase of their revenue, for one paragraph they write "concerning trade²."

Such citations might be multiplied, and it was not only the governing body of the English Company that felt the superiority of the Dutch in the seventeenth century and at the beginning of the eighteenth. An early instance is afforded by a plaintive remark of the English factors at Pulicat about the Dutch in a letter dated the 26th of July 1622: "thus in every qualitye they goe beyond us"³; a later by the observation of the traveller Fryer (1674): "I should mightly blame them [the "English Company] should they prove ungrateful to His Majesty, who by his "gracious favour has united them in a Society, whereby they are competitors for "Riches (though not Strength) with the Noted'st Company in the Universe"⁴; and one yet later by the remarks of the traveller Grose (middle of 18th century): "One of the reasons why the Dutch East India Company flourishes, and is become "more rich and powerful than all the others is its being absolute and invested with "a kind of sovereignty and dominion more especially over the many ports, provinces "and colonies it possesses. . . . The power of the Dutch by sea and land "is very great in the East Indies; where by force, address and alliances they raised "themselves and still support a great superiority in spite of the English, Portuguese "and other Europeans that have some trade there; but so inconsiderable that all "together is not equal to what the Hollanders singly enjoy⁵."

⁵ Grose, Voyage to the East Indies, edition of 1772, I, 322-3. J. H. Grose went to India in 1760, [First edition, 1767.

The organisation of the Dutch Company was briefly as follows¹. In Holland it was organised in "Chambers" at the various ports from which ships sailed for the East. Just as the Netherlands themselves were a loose confederation of several states, so the Company was a confederation of the Chambers of Amsterdam, Middleburg, Rotterdam, Delft, Hoorn and Enkhuizen. Each chamber fitted out its own ships and kept its own accounts. The chambers supplied directors to the Company. Their number was 60, 20 for Amsterdam, 12 for Middleburg, 7 for each of the other chambers. The governing body of the confederacy of chambers was a Committee of Seventeen members, commonly referred to as the Seventeen, the Majores, the Principals, etc. Of the 17, 8 were appointed by the Chamber of Amsterdam, 4 by Middleburg, 1 by each of the smaller chambers, and 1 in rotation by Middleburg, by Rotterdam and Delft taken together, and by Hoorn and Enkhuizen taken together. The Seventeen sat for six years at Amsterdam, for the next two years at Middleburg. They gave orders to the government in India, fixed the number of the ships to be fitted out by each chamber, settled the dates of sales of products. They only met three times a year as a rule, but special sub-committees were appointed to prepare drafts of the General letters to India, and for other purposes. The drafts were sent to the several Chambers so that they might instruct their representatives among the Seventeen regarding them before that Assembly met.

The Government in the East consisted of a Governor-General and a Council.

The Government in the East. The Governor-General began by being simply the presiding member; but he soon acquired large powers. Valentijn, who published his eight folios on the East India Company in 1726, writes as follows²: "The power of this Heer is very near that of a King; though he is only President of the Council, and, as it appears at first sight, bound by the votes of the other members, he can always be master if he uses his power." In 1617 it was laid down in Instructions that the Council should consist of 9 members besides the Governor-General, the first a commercial expert, the second a man fit to command the fleet, the third the army, the fourth to be also Advocate-General (Fiscal) and a jurist, the fifth to be Director-General for the out-factories, the remaining four, who could seldom be present at headquarters, Governors of the Moluccas, Amboina, Banda and Coromandel. The Governor-General had a casting-vote and the power to settle what office should be held by each of the members. In 1626 the number of the ordinary members of Council was reduced to 8, of whom 4 with the Governor-General at Batavia, and power was given to appoint two extraordinary members. In 1641 the number of ordinary members at headquarters was again raised to 5, in 1646 to 6. Later the Director-General, who was the mercantile as the Governor-General was the political head of the Company in the East, was expressly declared Second in Council and provisional successor of the Governor-General in a vacancy. The members of Council all belonged to the politico-mercantile service of the Company. No professional military member was ever appointed till the year 1786 when the Colonel (Commander-in-Chief) was given a seat in Council, the lowest, and allowed to vote, but only in military matters.

This Council was practically sovereign in the East. The Seventeen could interfere little and only at long intervals. They attempted occasionally, but only occasionally, to exercise control by the appointment of Commissaries or of Independent Fiscals, who combined the offices of a Comptroller-General of Finance and Public Prosecutor, and were, as their designation implies, independent of the Supreme Government.

This was the Council, Haar Hoog-Edelheden or Their High Nobilities, as they were styled, at Batavia, under whose orders the Commandeurs of Cochin stood like other Chiefs of Out-Settlements.

The Services.

The officers at all stations belonged to one or other of various organised services.

¹ I here follow Klerk de Reus, mainly, for the organisation in the Netherlands.

² Valentijn IV (1), 262.

(1) The *Political service* had also mercantile functions. There were various grades, apprentice, junior assistant, assistant book-keeper, under-merchant, merchant, upper-merchant, with at their head in each settlement a Governor, Commandeur, Director, Resident or Chief. They lived largely on private trade or recognised commissions, perquisites and allowances, but the pay of their posts, according to which they ranked, was usually during the greater part of the period of the Company's rule Governor, 200 guilders a month, Commandeur 120 and 150-180 (Malabar), upper-merchant 80-100, merchant 60-70, under-merchant 40, book-keeper 30, assistant 24-26, junior assistant 16-20, apprentice 9-10 (a guilder a month may be taken as about the equivalent of a pound a year). The allowances were in the form of provision allowances, house-rent and free supplies of provisions. They may be taken as usually about doubling the pay. The chief commissions at Amboina under Regulation of the 31st of May, 1755, were 5 per cent. on cottons, etc., to the Governor and Second in Council between them and 20 per cent. on cloves, of which 20 per cent. 40/100ths went to the Governor, 13/100ths to the Second in Council, 6/100ths to the Fiscal, and so on for other members of the political service and the chief members of the military and naval services. The commissions were very valuable. At Amboina, commissions being worth less than elsewhere, the Governor's pay was raised by 6,000 rix-dollars (£1,300) in 1755, yet in that year his commission on cloves alone came to 6,322 rix-dollars; while the Second in Council's commission on cloves was over £400, the Fiscal's over £200, an under-merchant's over £100, the purser-marine's £70, etc. The post of Governor of the North East Coast of Java was reckoned to be worth £20,000 sterling a year in the eighteenth century,² and the Director in Bengal told Stavorinus that his house-hold expenses came to Rs. 35,000 a year³. In Bengal, as also at some other settlements, a great deal could be made by the private trade which the Company allowed its servants to undertake or by illicit private trade. Valentijn had heard of under-merchants and book-keepers in Bengal chartering vessels of 200 or 300 lasts (tons), under the name of Danes, etc., to trade with the Maldives. He also tells a story of an official who owed "a certain Heer of the first rank" 10,000 rix-dollars which he could not pay. The Heer got him appointed to Bengal as Director. In a very few years he had not only paid his debt but had made so much that at his death he left 300,000 rix-dollars (about £60,000).⁴ Another gentleman, who was Director in Persia from 1704 to 1706, made in those three years £270,000 for the Company and not less for himself "without in any way acting contrary to the interests of his masters⁵."

The system in Malabar is explained by Moens⁶. Regulations were drawn up under which prices were fixed for works or goods, not too narrowly, and the subordinate officer charged with execution or provision was expected to make what he could. The Governor and his Second in Council had had to be content with the profits of private trade permitted to them. Moens was dissatisfied with this partly, as he says, because the interests of the Governor might clash with those of the Company, and other abuses might result, but also, I imagine, because not enough could be made at Cochin. He got the Company to take over the old private trade of the Governor and Second and to give them instead 5% on sales of merchandise and 3% on pepper bought, the Governor getting 4/5ths and the Second 1/5th. I have examined the accounts⁷ for the year 1779-1780 and find that the Company's profits on the old private trade amounted to 18,902 guilders in that year, while the commission of the Governor and Second under the new system amounted to 27,383 guilders. The office of Commandeur or Governor of Dutch Malabar, though not one of the more lucrative appointments in the service, may be taken to have been worth, with salary, allowances and commissions, at least two or three thousand pounds a year. It may here be mentioned that the proper designation of the office was Commandeur, and that a Commandeur ranked below a Governor (the Governor in Ceylon had Commandeurs subordinate to him at Jaffna and Galle), but that Moens was entitled to the style of Governor as being also an extraordinary member of the Council of India.

The establishments were somewhat larger in Stein Van Gollennesse's time than in Moens'. We have a complete list of them drawn up when Stein Van Gollennesse

⁶ Chapter XV and Chapter XIII of his Memoir.
⁷ MS. No. 1136.

handed over charge to his successor in 1743 A.D. (MS. No. 358). The Malabar Coast Command then, consisted of one fortified town, Cochin, four fortresses, Quilon, Cranganore, Chetway and Cannanore, two ruined forts, Castello and Palliport. The Dutch maintained military posts at eleven other places including Alleppey, Ayacotta, Cheramangalam, Paponetty and Ponnani. They also had commercial factories at Purakad between Cochin and Quilon and at Basrur in Canara. Cochin and Quilon were the really important posts. Cochin had an establishment of 1,233 men, of whom 767 were Europeans, and Quilon of 903 men, of whom 332 were Europeans. There were also 40 pensioned Europeans at Cochin. The garrisons of course made up the great majority of these numbers and in 1743 they had been reinforced on account of the war with Travancore. Including Eurasians and natives the total number of the employees was 2,819. The total number of Europeans was 1,426. Of these only about 80 belonged to the political service. At Cochin the members of the political service were the Commandeur, the Second-in-Council, who was an Upper Merchant, 6 Under-Merchants, 15 Bookkeepers, 24 Assistants and 19 Apprentices, or 66 in all. At Quilon there were nine members of this service, at Cannanore four. At Basrur there were two Residents, at Purakad one, at Ponnani one.

In Moens' time the dependencies of Cochin were reduced to four, Quilon (fortified) Cranganore with Ayacotta (both fortified) Cayenculam (unfortified) and Purakad (unfortified). Vingorla (fortified) had already been given up before Stein Van Gollenne's time, Cannanore (fortified) had been sold in 1771 to a local chief, Chetway (fortified) had been taken by Hyder Ali, European residents were no longer maintained in some stations which had at one time or other been occupied by Dutch factors.¹ The members of the political service in Malabar numbered 48, of whom 43 were stationed at Cochin, two at Quilon, one each at Cranganore, Cayenculam and Purakad².

The duties of the service lay in the Warehouse and Storehouse, the Treasury, the Zoldy Comptoir or Pay Office, the Negotie Comptoir or Trade Office, and the Political Secretariat. The political Government was constituted in much the same way as at Batavia. The Commandeur was assisted by a Council composed of members of the political department and the head of the military, and nominally, as at Batavia, the President was only *primus inter pares*. In 1743 there were nine resident members of Council besides the President, in 1761 seven. The Second in Council, also entitled the Hoofd-Administrateur or Chief-Administrator, took the place of the Director-General at Batavia and was in special charge of commercial affairs. The Major or Captain in command of the garrison seems always to have been third in Council. The Fiscal, the Warehouse-keeper, the Paymaster and the Storekeeper also seem always to have been members³. Members had the title of "Edele," Honourable. The general title of the subordinate members of the political service was "administrator". They were divided into grades as elsewhere according to their seniority. They were members of Courts of Justice; one of their number was Fiscal (Advocate-fiscal) or Advocate-General. They might also be members of the Fire and Ward Committee, the Church Committee, Committees for education (the Scholarchs) and for the administration of the orphan-fund, the poor fund, the leper-asylum, etc. A political Council might exist in factories subordinate to the chief factory of a settlement. Quilon was sufficiently important in Stein Van Gollenne's time to have its Council, and the correspondence of the Cochin Council was then addressed to the "Chief, the Lieutenant and the Council of Quilon."⁴ At the end of the century letters were still addressed to the Chief and Council of Quilon or else to "the Under Merchant and Chief and the Commandant," but the Under Merchant, an Ensign and a Surgeon seem to have been the only superior officers stationed there then.⁵

¹ So in 1761 Tenganpatnam was a Residency (MS. No. 674) and we have seen that Ponnani was a Residency in 1743.

² MS. No. 1186.

³ See e.g. MS. Nos. 358, 674, 1320.

⁴ MS. No. 305.

⁵ MS. No. 1179. Cf. Forbes' Oriental Memoirs, edition of 1834, I, 212: "The next morning (in 1772) we arrived at Quilon, or Coulan, another Dutch settlement; it was formerly a large town belonging to the Portuguese with extensive fortifications; these are now destroyed; the churches are converted into warehouses, and the European inhabitants reduced to a factor, surgeon and a small garrison."

(2) The Dutch Company attached great importance to the *Ecclesiastical Service*. There were two grades, Predikant or Preacher, and Krankenbezoeker or Zieken-trooster (Visitor, Comforter of the Sick) who was something between a Church clerk and a deacon. At Amboina the Preacher ranked fourth after the Governor, the Second and the Captain (Valentijn). Education and religion were not separated in those days, and the Preacher was also President of the Committee of Scholarchs (School Board) and head of the educational department (which in some stations employed numerous teachers, chiefly Eurasians), in subordination to the political Authority. The preacher and deacons were encouraged and instructed to learn the vernacular of the place in which they were stationed and in Malabar also Portuguese. A certain amount of missionary effort, especially among the Roman Catholics, was expected of them. The Preacher's nominal salary was 90 rising to 120 guilders a month at outstations, 110-150 at Batavia. A deacon got 24-36 guilders; a school-master 7-15. But these officers also received allowances. The emoluments of a Preacher at Batavia are thus reckoned up in Valentijn IV (1), 247:—

	Guilders a year.
Salary at 130 guilders a month	1,560
Provision allowance at 24-18 guilders	298-16
House-rent at 12-38 rix-dollars	368-8
Butter, 24 lbs. a month	172-16
Wine, 13 large quarts (kan — about 1½ quart) a month	280-16
Candles, 14 pounds a month	100-16
Firewood	113-8
Lisbon oil, 4 quarts a month	86-8
Cocoonut oil, 6 quarts a month	14-8
Dutch vinegar, 4 quarts a month	14-8
Water	14-0
Language allowances (1) for Portuguese	48-0
Do. (2) for Malay	48-0
Total ..	3,140-4

or something under £300 sterling a year.

Both in 1743 A.D. and in 1781 A.D. the establishment at Cochin consisted of a Preacher and two Deacons. Two of the Preachers of Cochin, the Rev. Philip Baldaeus, a famous orator according to his contemporary, Schouten¹, and the Rev. J. Canter Visscher, published works dealing with Malabar, which I have frequently had occasion to cite. The Preacher Casarius assisted Van Rhee in turning the *Hortus Malabaricus* into Latin. The encyclopaedist, Valentijn, who has also been so frequently quoted, was also a Preacher in the Company's service. He seems, however, never to have served in Malabar, and his account of the Malabar settlements is superficial.

(3) In the military service of the Company at the beginning of the 18th century the grades were Serjeant-Major (at Batavia), 120 guilders a month, Chief Engineer (at Batavia) 140, Captain 80-100, Captain-Lieutenant 70, Lieutenant 50-60, Ensign 40, Serjeant 20, Corporal 14, Private 9². In 1753 higher grades existed.³ The head of the Company's forces, was then a Brigadier on 350 guilders, a Colonel drew 250, a Lieutenant-Colonel 200, a Major 150, a Captain 80. The chief officer of the Malabar garrison had usually the rank of Captain (sometimes Major), was a member of the Political Council and might be a member of judicial benches or administrative committees. In 1743, for instance, he was a member of the Bench of Justices and President of the Court of Wards as well as third member of the Political Council⁴. In 1761 the Captain held these same posts and was also a Director of the Hospital.⁵ The sanctioned (peace) strength of the garrisons he commanded was in Stein Van Gollenesse's time 678, of whom 300 at Cochin, 99 at Quilon, 56 at Cranganore, 144 at Chetway and 79 at Cannanore.⁶ The actual

strength was 976 Europeans and about 1,100 Malays, Eurasians and natives, or altogether more than 2,000.¹ When the policy of taking part in the wars of the native princes was finally abandoned in 1753 the sanctioned strength was reduced (9th of May 1755)² to 462, of whom 226 at Cochin, 96 at Quilon, 33 at Cranganore, 74 at Chetway and 33 at Cannanore.³ In 1769 the actual garrison at Quilon consisted of only 27 men, at Chetway of only 43.⁴ In the time of Governor Moens a somewhat larger garrison had to be maintained owing to the attitude of Hyder Ali of Mysore, though the fort at Cannanore had been sold and that at Chetway lost. In April 1781 the total number of infantry is given as 1,182, of whom over 400 [the last two figures in the original manuscript are lost] Europeans, and of the artillery as 84.⁵ Lists dated the end of December 1780⁶ show that the European garrison then numbered 393, and Malay, Eurasian and Native troops 643 and that this garrison had been reinforced by a detachment from Ceylon numbering 298; 882 of the men were at Cochin, 310 at Ayacotta, 92 at Cranganore and 50 at Quilon; total 1,334. In 1787 the sanctioned strength was 828, but the actual numbers were 1,361 of whom 679 natives; in 1788 the actual strength with auxiliaries from Ceylon was 1,901, of whom 410 European infantry, 71 European artillery, 120 topasses, 321 Malays, 56 Malabar artillery, 612 Malabar infantry (chogans), 149 Malabar sepoy and 162 foreign sepoy.⁷ By 1793 Cranganore and Ayacotta had been sold to the King of Travancore and it had again been resolved to reduce the garrison to a peace footing. The garrison of Cochin was to be 550 infantry and 50 artillery. Of the artillerymen 30 were to be Europeans, of the infantry 300 in two companies, there being one other company of Malays and one other of Natives. The pay of the 600 men worked out to 83,889 (heavy) guilders or about £7,000 a year. The officers were to be 1 Captain, 1 Captain-Lieutenant, 4 Lieutenants and 6 Ensigns for the two European companies; 1 Captain, 2 Lieutenants and 1 Ensign for each of the other companies; and a Captain-Lieutenant, a 1st Lieutenant and a Sub-Lieutenant for the artillery.⁸

The members of the Political, Naval and Artisan services were also, sometimes at any rate, formed into companies under officers of their own class. So in 1761 the Political Company was commanded by the Second in Council with the rank of Captain, the Paymaster was the Ensign and there were 45 other members; there were two companies formed by the artisans and one by the sailors; there was also a company of 142 "burghers", that is, independent civilians.⁹

(4) In the *Naval Service* the ranks were Commandeur or Chef d'Esquadre, 120 guilders a month, Captain-at-Sea, 100, Captain-Lieutenant-at-Sea, 80, Skipper, 60, Lieutenant, 48. Common seamen got about 8d a day or a pound a month. On shore the Chief maritime officer at each settlement was the Equipagemeester, port-officer, master-attendant, or as the English Company called this officer "purser marine." At Cochin there was only one maritime officer who combined the shore and sea commands,¹⁰ and the settlement only possessed two sloops and a few smaller vessels in Moens' time, whose uses in war and peace are described in Chapter XI of his Memoir. The number of men in the maritime service at Cochin in 1781 was 128, of whom 45 were Europeans.¹¹ In 1743 it was considerably greater; 186 Europeans were employed and about 40 natives.¹²

(5) The grades in the *Medical Service* were Surgeon-General at Batavia (Hoofd der Chirurgie), 80 guilders a month, Upper Surgeon, 45-63, Surgeons, Under and Third Surgeons 14-30. In 1743 the Company employed eleven medical men at Cochin, four at Quilon, one at Cannanore and three with troops.¹³ In 1780 there were two Upper-Surgeons in Malabar, two Surgeons and nine Under and Third Surgeons.¹⁴ Of these medical men 8 were stationed at Cochin, 3 at Ayacotta and one each at Quilon and Cranganore.

(6) The Dutch settlements had a well-developed European *Artisan (Ambagt) Service*, as it was called, though we should hardly call some of the members of that service, e.g., an Inspector of Fortifications, or Superintendent of the Press, artisans

¹ MS. No. 358.² MS. No. 855.³ MS. No. 674; cf. also Batavia Diary, 1653, p. 41.⁴ MS. No. 1136.⁵ MS. Nos. 1146 and 1299.⁶ MS. No. 1136.¹⁰ MS. No. 1136.⁷ MS. No. 593.⁸ MS. No. 1426.⁹ MS. No. 368.

now. At Cochin this service consisted of 113 Europeans in 1743 A.D. of whom 32 attached to the Armoury, 34 to the Fortifications and 37 to the Shipyard, besides a few more in the out-stations, and natives¹. In Moens' time the establishment was smaller; it consisted of some 40 men in all, of whom 10 were Europeans. Some of them were employed in the ship-building yard under a Superintendent, others were smiths, masons, carpenters, gun-carriage makers.

The heads of the various departments were styled Baas (boss) and were important officials. In 1743 the Foremen of the Armoury, the Fortification Works and the Shipyard were all members of the Fire and Ward Committee and the last named was also a deacon².

The various courts and institutions are described or referred to by Stein Van Gollennesse (Chapter III) and Moens (Chapters XVII and XVIII). It will be seen that the question of the separation of judicial from executive functions was one even then agitated in India, and that the administration of justice and charity was fairly well developed. There was a Bench of Justices, a Court for Small Causes and Matrimonial Affairs, a Court of Wards, a Board of Education, a Board of Guardians, an Orphanage, a Hospital, a Leper Asylum, a Ward and Fire Committee and a Church Committee. The Bench of Justices consisted of the Second in Council as President, the Fiscal and eight or nine other senior members of the political or military services. The Court of Small Causes was presided over by the Warehousekeeper in 1743 and 1761 and consisted of seven members besides the President. In 1743 the Captain of the Topasses, Silvester Mendes, was a member. The members of the Court of Wards in 1743 included the Chief Surgeon of the Hospital and a Sergeant. It was presided over by the Military Commandant and consisted of eight members.

The commerce of Cochin is described fairly fully by Moens (Chapters XII and XIII). The Company's local trade in the few articles in which it maintained a monopoly, though small, was very profitable. I find from the accounts of the year 1779-80³ that in that year merchandise, the invoice value of which was 110,063 guilders, was sold for 277,081 guilders or at a profit of about 150 per cent. The profit on the separate branch of trade, which had formerly been in the hands of the Governor and Second in Council in their private capacity, and was not monopolised, was from Rs. 14,000 to Rs. 23,000 a year from 1773-74 to 1779-80 and averaged Rs. 18,300. The cost of purchases and all expenses in this branch of trade amounted to about a lakh and a half of rupees a year and the profit was a mere 12 to 14 per cent⁴. The Company did not usually care to undertake trade in articles on which the profits were not enormous and only took over this branch at Cochin in special circumstances which have been explained above. Both in its European and its local trade the Company's policy was to obtain a monopoly of a few very valuable articles and fix its own price. The trade in other articles remained free or free under restrictions and the Company's officers were allowed and encouraged to take their share in it. It gave Mr. Moens pleasure to see every servant of the Company doing his little bit of trade⁵. The total trade was considerable. James Forbes (1766-84) says "I have occasionally resided there (at Cochin) several weeks when transacting business for the East India Company: it was a place of great trade, and presented a striking contrast to Goa; a harbour filled with ships, streets crowded with merchants, and warehouses stored with goods from every part of Asia and Europe, marked the industry, the commerce, and the wealth of the inhabitants"⁶.

The Dutch settlements in Malabar were maintained principally in order that pepper, on which the profit was very large, might be collected for the European market. The amount of pepper collected by the Company varied in accordance with its relations with the native princes, from whom it obtained the spice at rates very much below the market value. In the year 1726 A.D. 1,952,979 lbs. were despatched from Malabar⁷. In 1746 it was not possible to collect more than 541,189 lbs.⁸

⁷ MS. No. 147.

⁸ MS. No. 593.

After 1753, when peace was made with Travancore, more pepper was again obtained. Travancore himself delivered about a million pounds on an average from 1753 to 1756 A.D. and about a million and a half on an average for the next four years; in which the total collections were nearly ten million pounds. Between the 1st of October 1755 and 30th of September 1756 the amount of pepper collected from Travancore was 1,494,451 lbs., from Cochin 533,505 lbs., at Cranganore 21,181 lbs., at Cannanore 153,000 lbs.; total 2,202,837 lbs.¹ From 1778 to 1780 the amount collected averaged something over a million lbs., of which almost the whole was supplied by Travancore. The amount for 1778 was 1,136,000 lbs.,² for 1779 1,199,000, for 1780 1,060,000 lbs., of which Travancore supplied 1,002,000. Pepper was sold in Holland in the 18th century at three to five times the price—less than the market rate even there—which the Dutch paid in Malabar. The equivalent of £12,000 to £18,000 sterling would buy in Malabar a million pounds of pepper, which would be sold in Europe for the equivalent of £50,000 to £80,000 after deducting wastage. Other products were sent home from Malabar, turmeric, cardamons, cloths, cowries, but only in small quantities and at moderate profits³.

The local revenues, which consisted of small territorial revenues, customs, excise and tolls and the profits of trade other than the European trade, were usually insufficient to cover the expenses. The Company's trade profits were not large. The territorial and other revenues amounted in 1741-2 (in time of war) to 43,484 light guilders or Rs. 25,840 (at 16 rupees = 27 guilders) of which 9,000 guilders from Quilon, 9,000 from Province Papponetty and 12,000 from other lands and islands⁴. In 1755-6 they were 70,516 guilders of which 13,000 from Quilon, 15,000 from the Province, 17,000 from other lands and islands⁵. In 1779-80 in the time of Moens, after the loss of the Province and the sale of Cannanore, the revenues were 54,984 guilders (or Rs. 45,570 at 5 rupees = 6 guilders)⁶. In that year the total of the nett trade profits (162,604 guilders) and the revenues (54,984 guilders) was 217,639 guilders (Rs. 1,81,365), while the total charges, including 119,000 guilders charged to preparations for war with Hyder Ali, 46,000 to fortifications, 30,000 to ships, 129,000 to salaries, and so on, amounted to 377,918 guilders (Rs. 3,14,932)⁷. The year before the charges had been higher—490,000 guilders (Rs. 4,08,333), but the revenue had also been higher, trade profits having been larger, and had amounted to nearly 415,000 guilders (Rs. 3,45,833).

When Stein Van Gollennesse wrote the charges were abnormal on account of the war with Travancore. They amounted to 1,216,333 light guilders (a little over 7 lakhs of rupees) in 1741-2 and to 869,265 light guilders (a little over 5 lakhs) in 1742-3, the revenue being 320,000 and 340,000 guilders⁸ (about 2 lakhs). Twenty years earlier, in time of peace, the only Dutch factory on the West Coast which showed a profit was Basrur, there being a loss of nearly 200,000 guilders on Cochin, 17,000 on Quilon, 8,000 on Cannanore and 800 on Puracad⁹. From 1752 to 1760 the revenues averaged about 300,000 guilders a year, the charges about 400,000¹⁰. From 1760 to 1768 the revenues and charges about balanced at 400,000 guilders as is shown in the table on p. 5 above, while at the beginning of Moens' administration profits were realised. But as has been explained already these are merely the local accounts, the accounts of trade with Europe being kept separately; and the Dutch did not maintain the Malabar Settlements so much for the sake of the local revenues and trade, as for the European trade, and especially the pepper trade.

XI

The relations of the Dutch at Cochin, Quilon and Cannanore with the English, first at Purakad, then at Anjengo and Calicut and afterwards Tellicherry and Anjengo were friendly or otherwise according to circumstances. The Dutch began

with pretensions to a monopoly of the trade of the Coast. In 1663 they concluded a treaty with the prince of Purakad, who granted them a trade monopoly, and they then contended that the English factory at Purakad had no right to further supplies, and eventually enforced their contention by seizing the factory¹. In 1714-1717, while the Dutch were at war with the Zamorin, there was some trouble about an English "house" at "Chittoa" (Chetway). The Zamorin had disputed the Dutch claim to Chetway but had given them "a writing that since he would not permit them he should not permit any other European nation a settlement there."² Now the English had a house there which was "the Hon'ble Company's house but went in the Linguist's" [Eurasian resident's] "name"³. In the campaign of 1717, when the Dutch occupied Chetway, the King of Cochin, who was assisting them, "went to the place where the English had a flag-staff together with a house, both of which he had pulled down by his Nairs."³ Meanwhile Mr. Adams, Chief of Calicut and then of Tellicherry, seems to have given what assistance he could to the Zamorin.⁴ The feeling between Dutch and English seems to have been bitter at this time. At any rate Canter Viischer devotes one of his letters from Malabar (1717-1723) to an attack upon the English, whom he accuses of ill-conduct towards the natives both in Malabar and Sumatra and declares to be exceedingly unpopular with them. He describes the massacres of Bencoolen and Anjengo as the natural result of English oppression. These are imputations commonly made in similar circumstances; when one European nation attacked another in the East the position of deliverer of the Malay or the Indian from the oppression of the rival Europeans was not only morally elevating but implied hopes of native assistance. So we find the Portuguese Viceroy writing to his King in 1635 that if only he would send him troops, he would easily get the better of the Dutch "since they were everywhere cordially hated, and only succeeded in carrying on trade by means of the forces at their disposal"⁵, while in 1781 after war had been declared against Holland, the Governor of Fort Marlborough wrote to the Governor of Fort St. George that the Dutch Government was everywhere "abhorred" by the country people and he was persuaded that the appearance of ships alone at some settlements would occasion a revolt.⁶ The English factors on the Coast at the beginning of the 18th century were too weak to be very oppressive, and the proper inference from the Rev. J. Canter Viischer's denunciations seems to be only that they were very disagreeable to the Dutch; and indeed when the fort at Anjengo and Tellicherry were built at the end of the 17th century, it was intended to break up the Dutch practical monopoly of the pepper trade;⁷ and, the wish being father to the thought, it was even reported in 1699-1700 that "the Dutch were withdrawing their factories and establishments on the Malabar Coast having found it impossible to engross the whole of the pepper trade of that country."⁸ The Dutch did not, however, abandon the Coast, where for nearly another century they probably did a bigger trade than any of their competitors, Portuguese, English, French or Dane. Cochin was moreover a most useful intermediate port between Batavia and Surat, Mocha and Persia. They could not wish to see it fall again into Portuguese hands, or into English or French hands (as it doubtless would have if they had abandoned it), not only on account of the pepper trade but because it was an outpost of Ceylon, and a port in which a hostile fleet could be conveniently collected for an attack on that island.⁹ But though they did not abandon the Coast, the competition of other European nations could not but be displeasing to them, and disputes about the non-return of deserters,¹⁰ about the grant of passes to native ships, about supplies of war material furnished to native princes, and so on were common. In 1756 I find the Dutch Commandeur still complaining about the "jealousy" of European rivals which was "nothing new", about the Danes at Calicut furnishing the Zamorin, who

was again at war with the Dutch, with powder and shot and seven cannoneers, and about the English "who are only precariously established at Anjengo" requiring native ships to take passes from them ¹.

However the town diaries show that foreign European ships constantly put in at Cochin, Mr. Stephen Strutt of the English Company's service was courteously received at Cochin in 1714, James Forbes, also a member of that service, who kept journals in India from 1766 to 1784, writes in his *Oriental Memoirs* ² that during his visits to Cochin on his Company's business he always received the kindest attention from the Governor and the principal inhabitants, whose tables were furnished with hospitality and graced with politeness, and when Tellicherry was besieged by Mysore troops in 1780, Moens wrote courteous letters and complied with requisitions for supplies ³. On the 24th of February 1782 I find the Anjengo Chief suggesting an attack on Cochin which he thought "would prove an easy conquest" ⁴, but England had declared war on Holland in Europe on the 20th of December 1780, and the news had been received in the East by July 1781 ⁵.

In general there seems to have been peace, but not often friendliness, between the Dutch and other Europeans on the West Coast in the 18th Century. They would intrigue against one another with native princes, supply one another's enemies and harbour one another's deserters. The different European settlements would only very occasionally unite against a common enemy. So there was one joint expedition during the century of English and Portuguese ⁶ against pirates and another of Dutch and English (1750) ⁷. If Moens assisted Tellicherry against the Mysoreans, it must be remembered that the Dutch also were at variance with Hyder Ali. Ten years later, in 1790, when Tippu broke through the Travancore lines and the Dutch expected to be besieged in Cochin, they proposed to join the English alliance with Travancore, but received a long and evasive reply from Lord Cornwallis and Council politely declining their help ⁸. However in the ensuing May I find Col. Hartley in command of a detachment from Bombay writing: "Having a greater quantity of stores and ammunition than is immediately wanted in the Field, I have made a depot at Cochin, the Governor Mynheer Angelbeck, readily offering every assistance." ⁹

XII

Stein Van Gollenesse and Moens both seem to have been officials of some merit. At any rate each of them reached the second position in the Dutch Empire in the East, that of Senior Ordinary Member of the Supreme Council at Batavia and Director-General. After leaving Malabar, Stein Van Gollenesse was Governor of Ceylon and extraordinary and then ordinary member of Council from 1743 to 1751. He went to Batavia as Director-General in 1751 ¹⁰. Moens went direct from Cochin to Batavia, served as ordinary member of Council there and became Director-General in due course. ¹¹

Stein Van Gollenesse lost a girl of seven and a boy a year old at Cochin in 1739. They were buried in the church of St. Francis, where the inscription may still be read. The boy was called Gustaaf Willem, which were the Christian names of Van Imhoff. Stein Van Gollenesse is associated in Ceylon with the building of Wolfendal Church, Colombo ¹², on the facade of which his initials and the date 1749 are still to be seen. ¹³

I have found occasional mention of Moens in travellers' books of the period. Stavorinus stayed with him for a fortnight in December, 1776, and he gave Fra Paolino di San Bartolomeo a letter of introduction to the King of Travancore in 1780. Fra Paolino notes that the King of Travancore "had studied English for several months and spoke it very well." The King of Cochin who succeeded in 1787 "spoke Dutch exceedingly well and was desirous of learning English also." Travancore and Cochin had already in Moens' time realized that Dutch influence was giving way to English. In 1786 the King of Travancore paid a visit to Moens' successor, Van Angelbeek, at Cochin. He conversed in the English language and it is noted that "he reads the English newspapers of London, Madras and Calcutta whereby he has acquired much knowledge which would be sought in vain in other Malabar princes.¹" Van Angelbeek's "Memoir" written in 1793 contains very little except an account of the Dutch relations with the English; the Dutch no longer pretended to influence in Travancore and scarcely in Cochin, they had sold all the territory they could get rid of including the forts of Cranganore and Ayacotta to Travancore or the Cochin noble Palyat Achan between 1785 and 1789 A.D.², and reduced their garrison at Cochin to a minimum footing. When war with England broke out again in 1795 the capture of Cochin was an easy matter. The war with England of 1781 to 1784 had practically destroyed the Dutch Company's influence outside the Archipelago, the Cape and Ceylon, and financially ruined it. In 1795 Holland was divided against itself. The French revolution had overwhelmed the Netherlands and the fugitive prince, William V, had taken refuge in England, and in a circular issued from Kew exhorted his late subjects to place their colonies under the protection of Great Britain.

Stein Van Gollenesse's Memoir describes Malabar as it was when it might still have become a Dutch possession and the Dutch were still much more powerful there than any of their European rivals, gives a brief but clear account of the numerous warring principalities among which it was then divided, and throws light upon the Dutch policy and ambitions of the time. Moens, though he wrote when Dutch influence had waned and though he does not appear to have been a man of much cultivation, has yet left us a work of real interest and value. He confesses his ignorance of the French³ language, and of the fact that the learned world was not without information regarding the history of Christianity of Malabar⁴. He had perhaps too not a very strong sense of humour and from the remarks made by the Batavia Council on the judicial portion of the Memoir⁵, it would seem he was not a great jurist. But he seems to have been a very earnest and laborious gentleman and his discursive Memoir, besides giving a fairly complete view of the administration when Dutch rule in Cochin was nearing its close, contains interesting chapters on Hyder Ali, the Jews of Cochin, and the Syrian Christians. The facts related about Hyder Ali's relations with the Dutch and some of the Malabar princes seem to be new; at any rate Wilks has no better authority for his few pages on the subject than the defective chapter on the history of the Malabar settlements in Stavorinus' travellers' book, and the latest biographer of Hyder Ali scarcely refers to it. Other attempts have been made since Moens' time to translate the ancient Jewish charter; but the three translations he gives are not without their interest. Books have since been written on the Syrian Christians, but his dissertation, which in part at least is based on contemporary Dutch records, may be considered of some value. Moens had studied the Cochin records carefully and gives numerous references to the papers from which he compiled different portions of his memoir. It accordingly contains among other things a storehouse of references which will be useful to persons who may wish to study the history and administration of the Dutch settlements in Malabar at first hand.

¹ Notes of the Interview in MS. No. 1299.

² Secret Resolutions in MS. No. 1320, especially resolution of 29th of July 1789, where the draft of the Treaty for the sale of the forts is given. A summary of the various sales, nine in number, is given in letter to Batavia of 30th April 1790 in MS. No. 1299. The sales realised about five lakhs of rupees.

Brief Bibliography.

A. Books necessary to a student of the subject:—

(1) *Batavia Diary*.—Dagregister gehouden in't Casteel Batavia. Printed at the Hague. In progress. The following volumes have appeared :

Volume for the Year :	Published in the Year :
1624-9	1896
1631-4	1898
1636	1899
1637	1899
1640-1	1887
1641-2	1900
1643-4	1902
1644-5	1903
1647-8	1903
1653	1888
1656-7	1904
1659	1889
1661	1889
1663	1891
1664	1893
1665	1894
1666	1895
1668-9	1897
1670-1	1898
1672	1899
1673	1901
1674	1902
1675	1902
1676	1903
1676	1904
1677	1904
1678	1908
1679	1909

Contains abstracts of despatches from all parts of the Dutch possessions, India, Ceylon, Japan, China, as well as the Archipelago.

Invaluable to the historian.

(2) *J. K. J. De Jonge*: De Opkomst Van het Nederlandsch Gezag in Oost Indië (Rise of the Dutch power in East India). The Hague. 13 Vols, 1862-1888.

A collection of documents from the Company's archives with a full introduction to each volume; deals almost entirely with Java. A Supplement in 3 more volumes by P. A. Tiele and E. Heeres (1886-1895) deals chiefly with the other islands in the Archipelago. Their lost possessions do not seem to interest the Dutch much. Collections relating chiefly to the Cape, India or Ceylon would be of great interest to students of the history of the British Empire.

(3) *François Valentijn*: Oud en Nieuw Oost Indie (Old and New East India), Dordrecht & Amsterdam, 1724-6, 5 parts folio. Usually bound in 8 Vols. Encyclopedic account of the possessions of the Dutch Company. A work of vast bulk containing amongst other things many excerpts from old official documents. The account of Malabar is superficial, but the account of Ceylon contains valuable reports on, *inter alia*, Malabar, made by Governors of Ceylon, under which Malabar at first stood. A modern abridgment of Valentijn issued by one Keijzer in 1862 is useless for our purposes as the parts dealing with lost possessions are omitted. The old edition contains maps and also views and plans of Cochin, Quilon, Cranganore and Cannanore. Valentijn was son of the master of the Latin school at Dordrecht and was born on the 17th April 1666. He studied at Utrecht and Leyden and in 1684 was appointed a chaplain in the East India Company's service. He started for the East in May 1685 and arrived at Amboina in May 1686. In 1687 he was transferred to Banda, in 1688 back to Amboina. In 1695 he was back in Holland. He remained in Holland 10 years and returned to Batavia in 1705. In 1706 he was chaplain to the army on the

East Coast of Java. From 1707 to 1712 he was again chaplain at Amboina, in 1713 at Batavia, in 1714 back in Holland. He died in 1727. His book is a most comprehensive work and still indispensable to the student.

(4) *J. Canter Visscher*: Letters from Malabar, 1743. The letters were published by his brother after his death. The author was chaplain at Cochin from 1717-1723 and then at Batavia. He died in 1736. English translation by Major Drury, Madras, 1862. A series of 27 letters on politics and policy, the people, the coinage, flora and fauna. Much of the information reads as if it were taken from Memoirs of the old Commandeurs. The author seems to have been a little prejudiced and uncritical, but his local knowledge is valuable.

(5) *Encyclopaedie Van Nederlandsch-Indie* (Encyclopædia of Netherland-India) by P. A. Van der Lith and others; the Hague, 1895-1907; four volumes. A valuable work with much information on the antiquities of the Dutch Company. The lost possessions are, however, as usual, scarcely referred to.

(6) *G. C. Klerk de Reus*: Geschichtlicher Ueberblick der Administrativen, Rechtlichen und Financiellen Entwicklung der Nederlandisch-Ostindischen Compagnie, Batavia and the Hague, 1894. Valuable work on the administrative, financial and judicial development of the Dutch Company with numerous statistical tables.

Useful Works.

(1) *Johan Nieuhof*: Zee-en-land Reize (Sea and Land Journey), 1682. Nieuhof served in Malabar. Translation in Churchill's Collection.

(2) Father *Giuseppe di Santa Maria*, otherwise Monsignor Sebastiani, Bishop of Hierapolis. First and second expeditions printed at Rome (in Italian) 1666 and 1672 A.D. Was a Carmelite and sent out on special missions to the Syrian Christians (1657-58 and 1660-3). Describes the two sieges of Cochin and gives many particulars regarding the Syrian Christians &c.

(3) *Philippus Baldaeus*: Description of Malabar, Coromandel and Ceylon 1672. Translation in Churchill's Collection, which preserves the valuable prints. Accompanied the expedition against the Cochin of 1661-2 as Chaplain.

(4) *Wouter Schouten*, Oost-Indische Voyagie (East-Indian-Voyage), 1676. Surgeon in the Company's service. Accompanied Cochin Expedition of 1661-2. There are several editions and a French translation. My references are to the edition of 1740.

(5) *S. P. J. Du Bois*: Vies des Gouverneurs-Generaux avec l'abrégé de l'histoire des Etablissemens Hollandois aux Indes Orientales. The Hague 1763. Uncritical. Contains a translation of Van Imhoff's Considerations of 1740.

(6) *J. S. Stavorinus*, Voyages, (a) 1768-71, published at Leyden in 1793, (b) 1774-8, Leyden 1797-98. Combined in translation with notes by S. H. Wilcocke, London, 1798. Stavorinus visited Cochin in Moens' time.

(7) *The Abbé Raynal*: Histoire philosophique et politique des établissemens des Européens dans les deux Indes, 1770. Numerous editions; English versions 1776 and 1798 (6 volumes).

(8) *Fra Paolino di San Bartolomeo*. Viaggio alle Indie Orientali (Voyage to the East Indies). Rome, 1796. Uncritical. He was in India 1776-1789. English translation, 1800.

(9) *N. G. van Kampen*: Geschiedenis der Nederlanders buiten Europa. Haarlem, 1831.

(10) *Dr. F. Day*. *The Land of the Permauls, Madras*, 1863. Untrustworthy. Two or three of his most dubious anecdotes are taken from a pamphlet entitled Historical Notices of Cochin by the Rev. T. Whitehouse, 1859.

(11) *Manuscript Diaries* of Tellicherry and Anjengo (from 1726 and 1744 respectively with breaks) in the Madras Government's record-rooms. Also manuscript Diary of Mr. Stephen Strutt, 1714.

(12) *Glossaries*: Yule & Burnell (Hobson-Jobson) and Maclean (Vol. III. Manual of the Madras Administration) are useful for words taken from the eastern languages by both Dutch and English, but are of course Anglo-Indian and not Hollando-Indian glossaries and leave many of the Indian or Malay words which occur in these Dutch records unexplained.

Brief Note on Coinage and Weights.

(Further information in foot-notes to the text.)

When the Dutch first came to the East they found the Spanish dollar (real, real of eight, weight 27.045 grams = about 417 grains) in general use. They used this at first, and afterwards substituted the rix-dollar. Dollars are in general large silver coins of about 50*d.* to 60*d.* In Stein Van Gollennesse's time the rix-dollar was 48 stivers or pence in the East. The common Bengal bazaar rupee and other rupees current at Cochin (*e.g.* the Persian) were there reckoned 27 stivers, the Sicca and Surat rupees being a stiver or two more. The rix-dollar was the standard coin. Other coins with rough values in rix-dollars and rupees are shown in the table below, the values being taken from actual entries in Dutch or English (Malabar) records of the time. The rupee was of course worth much more gold than it is now. It was reckoned at 8 to the pound sterling in the Tellicherry accounts of 1743, in the Tellicherry and Anjengo accounts of 1780 and in the intermediate years so far as I have seen. The values are *rough* because the exchange value was constantly changing and the fluctuations were large. So I find Gold Rupees (or Gold Mohurs) selling at Batavia at prices varying from 21½ to 25½ guilders in the course of the ten years 1730-40¹. This seems to have depended partly on variations in the coin itself. The value of weighed gold did not fluctuate quite as much in those years.

*Table.**Gold Coinage about 1740 A.D.*

1. Gold Rupee or Mohur = about 7½ rix-dollars
= about 13 silver rupees.
2. European gold ducat
(“ Venetians ” and others) = about 2½ rix-dollars
= about 4½ rupees.
3. Moorish gold ducat
(Turkish and others) = about 2½ rix-dollars
= about 4 rupees.
4. Pagoda (of Ikkeri and other West
Coast Mints) = 2 rix-dollars or a little less
= 3½ rupees or a little less.

The ducats and pagodas were nearly the same weight, a little under 3½ grams = a little over 50 grains. The ducats were better gold and about a grain heavier. According to Shekleton's Assay Tables ducats of 1781-91 average 53.44 grains of which 52.326 pure, Ikkeri pagodas 52.4 grains of which 44.3 pure and Travancore pagodas 52.46 grains of which 37.3 pure.

Silver Coinage about 1740 A.D.

Rix-dollar	=	8 schellings
	=	48 stivers
	=	192 doits
	=	1⅞ths rupees
	=	32 Cochin fanams.
Rupee	=	27 stivers
	=	4½ schellings
	=	⅞ths rix-dollars
	=	18 Cochin fanams.

Dollars, of which the various rix-dollars were some of several varieties, weighed as a rule more than double the rupee, but contained a little less than twice the amount of pure silver.

Base Metal Coinage about 1740 A.D.

1. Cochin fanam = 60 buseruks (budgerooks).

The fanam was originally a gold coin of about 6 grains. The Cochin fanam only contained one part of fine gold to 4½ of silver and 4½ of copper². Budgerooks were minted by the Dutch of a mixture of lead and tin. The Dutch also minted copper budgerooks of which 275 went to the rix-dollar at Cochin according to Valentijn.

¹ MS. No. 322.² Cantor Vissocher, Van Rheede's Memoir, 1677.

The guilder or florin, which was used in keeping the accounts, was properly a silver coin of 20 pence or stivers weighing about 150 grains or $\frac{5}{8}$ ths of a rupee. In Stein Van Gollenesse's time it was reckoned in the accounts at 16 stivers or one-third of a rix-dollar and this imaginary account guilder, which was devised to enable the Company to make a profit on salaries, etc., was called the "light" guilder. In Moens' time the guilder of the general accounts was the heavy guilder of 20 stivers.

The price of gold at Batavia, 1730-40, was from $50\frac{7}{10}$ ths to $53\frac{1}{10}$ ths light guilders per real (417 grains); of silver $3\frac{1}{2}$ ths to $4\frac{2}{5}$ ths guilders; *i.e.* the ratio of gold to silver was about 13 to 1.

In Moens' time (1780) the rupee was in more general use. It was reckoned at $\frac{4}{3}$ ths guilders "heavy" money, $1\frac{1}{2}$ guilders "light" money. Dollars were about 2 rupees, Venetian and other European ducats slightly over 4 rupees, "Moorish ducats" slightly under. The Cochin fanam was reckoned at 20 to the rupee instead of 18.

Weights.—The pound commonly referred to in these records seems to have been, as elsewhere in the Company's possessions, the old Amsterdam pound = 494 chilogrammes = about 1.09 English pounds avoirdupois. A Dutch pound of 1.09 English pounds was still in use at Cochin in Dr. Day's time (1863)¹. The common *last* or ton was 3,000 Dutch pounds. Other common weights are the *catti* and *picol* introduced from the Archipelago. The Dutch usually reckoned the *catti* at $1\frac{1}{4}$ and the *picol* at 125 lbs. They also used the common Malabar measures *candy* and *parra*, reckoning the pepper candy at 500 Dutch lbs., and, in the earlier period at any rate, 14 parras to the candy. For grain 75 parras were reckoned to the last of 3,000 pounds. The pepper candy was accordingly about 545 English pounds. The grain *parra* was 40 Dutch pounds². For raw cotton and cotton cloths the Travancore and Madura weight *palam* was used. It varied slightly according to locality, but was reckoned at about $\frac{1}{4}$ th of a Dutch pound³. Goldsmiths' weights were then as now in Travancore the *kalanju* and the *fanam*. The Dutch used the Spanish *manca* and *real*. In a diary written in Travancore in 1739 the following equivalents are given; 1 manca = 48 kalanjus = 9 reals⁴. A real was 27.045 grams⁵ or about 417.368 grains. 1 kalanju accordingly = $78\frac{1}{4}$ grains. The modern Travancore kalanju is 78 grains and 13 fanams of 6 grains each⁶. The old Travancore fanam was about $5\frac{1}{2}$ to 6 grains, as the old fanam coins show, and accordingly it may be assumed that there has been practically no variation in goldsmiths' weights in Travancore since 1739. It is to be observed that though gold fanam coins seem all to have weighed about $5\frac{1}{2}$ to 6 grains, they varied greatly in value according to their composition⁷. The Quilon fanam, referred to commonly by both Portuguese and Dutch as the Raja fanam, must have been good gold as its value is given in 1723 as $2\frac{1}{2}$ schellings⁸ (= 15 stivers), in 1743 as $1\frac{4}{8}$ rix-dollars⁹ (= $15\frac{3}{8}$ stivers), in 1781 as $15\frac{2}{8}$ stivers and $\frac{4}{12}$ of a rupee¹⁰. The coin referred to as "the gold fanam" of Chetway and the neighbourhood, which is shown by entries in MS. No. 848 and elsewhere to have been the Calicut fanam, was reckoned at 8 to the rix-dollar ($4\frac{1}{2}$ to the rupee) in 1742¹¹ and later at about five to the rupee or $17\frac{1}{2}$ to the pagoda and so could only have contained three grains of gold. The Travancore gallioon (kaliyan) fanam was reckoned at 9 to the rix-dollar ($5\frac{1}{8}$ to the Rupee) in 1727¹² and exchanged later at 6 or 7 to the Rupee; the Cochin fanam, in which there was only about half a grain of gold, at 18, $19\frac{1}{2}$, 20 to the Rupee at different times.

7th March 1909.

MEMORANDUM

ON THE

ADMINISTRATION OF THE MALABAR COAST

COMPOSED BY

THE RIGHT WORSHIPFUL THE EXTRAORDINARY MEMBER OF COUNCIL,
GOVERNOR-ELECT OF CEYLON AND OUTGOING COMMANDEUR OF
MALABAR

JULIUS VALENTIJN STEIN VAN GOLLENESSE

FOR HIS SUCCESSOR

THE WORSHIPFUL COMMANDEUR REINICUS SIERSMA

IN THE YEAR 1748 A.D.

TRANSLATED BY

THE BRV. A. J. VAN DER BURG AND A. GALLETTI, I.O.S.,

WITH NOTES BY

A. GALLETTI, I.O.S.

TABLE OF CONTENTS.

TRANSLATION OF THE INDEX IN THE ORIGINAL MANUSCRIPT.

INTRODUCTION.

	PAGE
Whether this work is to contain a detailed or a concise account	49
The writer chooses the latter because in the Memorandum of Commandeur Hendrik van Rhee de most points have been well treated and at great length	"
The writer's annotations on Malabar affairs are added; also a Malabar dictionary of the chief kingdoms, lands, towns, bazaars, pagodas, rivers, festivals, idols, titles of honour, arts and professions, etc., in Malabar	"
On the History and Religion of Malabar the Company's papers and the History of the Rev. Baldaeus may be consulted	50
In addition a second bundle of some papers referred to in this Memorandum is added	"
In the matter of Domestic Economy, the Instruction and Memorandum of Commissary Swaardecroon must be your guide, with the exception of some points on which different instructions have been received from Their High Worshipfuls	"
The permanent orders collected in eight folios are of great use; the headings however are somewhat general	"
Division of this work into three parts—	
I.—The persons with whom the Hon'ble Company comes in contact on this coast.	51
II.—Articles which the Hon'ble Company sells and buys on this coast	"
III.—The Company's domestic affairs	"
A few remarks applicable to the people of Malabar in general—	
(a) Their nature and morals	"
(b) To what extent the rulers exercise power over their subjects	"
(c) Whether rulers have power to sell to the Hon'ble Company below market rates	"
(d) The answer is in the negative and is proved	52

CHAPTER I.

DESCRIPTION OF THE KINGS, RULERS AND LANDED PROPRIETORS OF MALABAR.

1. Travancore	53
2. Peritally and Elleda Surovan [Elayadatu Svarupam]	55
3. Coilan [Quilon]	"
4. Marta	56
5. Calicoilan [Cayankulam]	"
6. Pannapaly	"
7. Pandalam	"
8. Pagodingo	"
9. Tekkencur	57
10. Repolim [Edapalli]	"
11. Porca [Purakad]	"
12. Berkencur [Vadakkankur]	58
13. Mangatty	59
14. Paro [Parur]	"
15. Cochin	"
16. The Anjicaimala	60
17. Murianatty	61
18. Coddacherry	"
19. The Palyet	62
20. Bardella [Vadutala]	"
21. Tevengel Nairo	"
22. Corretty [Koratti]	"
23. Changanara Cooda	"
24. Cranganore	"
25. Airur	63
26. Paponetty [Papinivattam]	"
27. Belosta Nambiar	"

	PAGE
28. Changara Canda	64
29. Chittur Nambury	"
30. Payenchery Nair	"
31. Ainecutty	"
32. Punatur	"
33. Manna Collam	"
34. Manacotta	65
35. Valluanatty [Valavanad]	"
36. Zamorin	"
37. Cottica pirates	66
38. Bettete [Vettadnad] or Tanore	"
39. Parapur	"
40. Reppu Cowil	"
41. Maisur [Mysore]	"
42. Palecatchery [Palghat]	"
43. Colastry [Kolattiri]	"
44. Cunje Nair	"
45. Balnore of Bargare [Valunnavar of Badagara]	"
46. Adiraja	67
47. Cottatta [Kottayam]	"
48. Canara	68
49. Sunda	69
50. Sivaji	"
51. Angria pirates	"

CHAPTER II.

THE PROFITS OF THE HON'BLE COMPANY ON THIS COAST.

A—By the sale of all sorts of stouk merchandise—	
(a) The articles are only enumerated	70
(b) Favourable situation of Malabar for the sale of much merchandise	"
(c) The articles are mostly exported to Purbander, Sind or Calicut	"
(d) Articles imported from those places	"
(e) Something is said of opium	"
(f) And elephants	"
B—By the Company's revenues—	
(a) Tolls	71
(b) Rents of gardens and lands	"
(c) Taxes	"
C—Articles bought by the Hon'ble Company on this coast—	
1. Appertaining to trade—	
(a) Pepper	71
(b) Piece goods	73
(c) Chintz	74
(d) Cardamom	"
(e) Surat and Cathay cotton	"
(f) Malabar areca	75
(g) Sandalwood	"
(h) Cowries	"
(i) Chanks from Sind	"
(k) Saffron	76
(l) Indigo	"
(m) Seedlings	"
2. Articles appertaining to consumption and domestic use—	
(a) Slaves	77
(b) Timber	"
(c) Lime	78
(d) Bricks	"
(e) Rice	"
(f) Coir	"
(g) Fuses	79
(h) Hides	"
(i) Coconut-oil	"
(k) Salt	"
(l) Charcoal	"
(m) Firewood	"

CHAPTER III.

THE COMPANY'S DOMESTIC AFFAIRS.

	PAGE
1. Religion	80
2. Justice	"
3. Political Council	"
4. Court of Orphans	81
5. Commissioners of petty and matrimonial affairs..	"
6. Fire and ward Commissioners	"
7. The Church Committee	"
8. The Scholarchs	"
9. Lady Visitors of the Orphan Asylum	"
10. Deacons	82
11. Managers of the Leper Asylum	"
12. Garrisons	"
13. Fortifications at—	
(a) Coilan [Quilon]	82
(b) Cochin	"
(c) Cranganore	"
(d) Chettua [Chettuvayi]	"
(e) Cannanore	"
14. Residents at—	
(a) Tengepatnam	84
(b) Peza	"
(c) Calicoilan [Cayankulam]	"
(d) Porca [Puracad]	"
(e) Panany [Ponnáni]	"
(f) Barsalore [Basrur]	"
15. New wooden buildings	"
16. Repairs	"
17. Vessels	"
18. Seamen	85
19. Indents	"
20. Presents	"
21. Coinage	"
22. Fanam mint	86
23. Buseruk mint	"
24. Gunpowder	87
25. Provisions	"
26. Drinking-water	"
27. Bacon and meat	"
28. European employees	88
29. Deserters	"
30. Cartel and general pardon	"
31. Native employees and subjects—	
(a) Topasses	89
(b) Lascorins	90
(c) Mukkuvas	91
32. Coolies	"
33. { Roman } clergy	"
{ Syrian }	
34. Domestic economy	92
35. Outstanding debts	"
36. Peace Negotiations	93
37. Signatty [Desinganad]	95
38. Vessels	"
39. The Company's merchants	"

APPENDICES TO MOENS' MEMOIR.

APPENDIX No. I.

Extract from the notes taken by the Chief Interpreter Simon van Tongeren in the year 1772.

I do not think it necessary to translate this appendix. It contains some papers of no great interest about the dispute with Travancore referred to in Chapter II of the Memoir regarding seizure of contraband tobacco in territory belonging to the Dutch Company and of alleged force used against the Company's renter. The Dutch made a great fuss, asserting that their territorial sovereignty had been violated, and demanded instant satisfaction. Travancore's representatives replied that there had been no intention of insulting the Company. The King's officers had only, while pursuing smugglers who were the King's own subjects, crossed the Company's frontier under a misapprehension. The Company's renter could not produce impartial evidence to prove the charge of force, and finally the matter dropped.—Editor.

APPENDIX No. II.

Letter from the Pope to the Bishop of Verapoly referred to in Chapter II of the Memoir.

Clemens PP. XIV.

Venerabilis Frater salutem et apostolicam Benedictionem. De strenuo viro Gubernatore Hollandico, de illius erga Christianos istarum Regionum studia, atque egregia ab eodem datam (*sic*) opera pro tranquillitate iis obtinenda multa nobis fuerunt commemorata a Dilecto Filio Stephano Borgia nostrae Congregationis de Propaganda fide Secretario. Cum hujusmodi in Christianos homines collatum beneficium ad nos maxime pertinere, nosque eodem devinctos esse censeamus, magnopere cupimus saltem hos ipsos grati animi nostri sensus eidem Gubernatori esse cognitos, atque perspectos.

Itaque hoc munus nostrae illi propterea referendae gratiae tibi, venerabilis Frater, dare hisce Literis volumus et committere prout facimus ut quam uberrimis indiciis nostram illi propensissimam voluntatem declares, eique significes tanto impensius etiam hoc illius merito nos esse obstrictos, quanto magis confidimus illum aequè deinceps de Christianis atque adeo de nobis ipsis benemereri peracturum. Demum in nostri Pontificii in te animi pignus tibi venerabilis Frater, ac Populis curae tuae traditis, apostolicam Benedictionem (*sic*) peramanter impertimur.

(Inferior) (*sic*) Datum Romae apud sanctam Mariam majorem sub annulo Piscatoris die XXIII: July MDCCLXXII: Pontificatus nostri anno quarto: subscriptum erat: Benedictus Staij (*sic*) et corroboratum Sigillo Annuli piscatoris in dorso opposito.

APPENDIX No. III.

This appendix, as appears from the reference to it in Chapter VI of the Memoir, contained an account of the Malabar castes. It is unfortunately now missing from the original volume; removed perhaps by some curious person who neglected to replace it.—Editor.

APPENDIX No. IV.

Report of a Committee.

This is merely a report, which I do not think it necessary to translate, on the state of the Cochin fortifications and buildings. It deals with the town walls, the bastions, the gates, the warehouse, the store-houses, banksals, armoury, powder-magazine, smithy, ship-yard, wood-yard, slave godowns, hospital, Government house, Second's house, Secretariat, Company's garden house outside the town, Company's stables and cow-houses, etc.—Editor.

APPENDIX No. V.

Abstract of conditions for the maintenance of the Cochin fortifications by the highest bidder.

This is merely a draft of conditions of a contract for keeping the fortifications in repair. I do not think it necessary to translate it.—Editor.

APPENDIX No. VI.

(Referred to in Chapters X and XIV).

*Memorandum of gardens and lands belonging to the Company on the coast of Malabar.*The island *Bendurty* lying half an hour south of this town, containing :

4,990 fruit-bearing cocoanut and other trees,
 314 parras of cultivated lands,
 9,300 salt-pans.

A garden called *David de Castella* lying at Aru about two hours south of this town, containing :

3,275 fruit-bearing cocoanut and other trees,
 490 parras of cultivated land,
 2,980 salt-pans.

A garden called *St. Jago* lying by the third Roman Church on the southern shore of Cochin, containing :

3,116 fruit-bearing cocoanut and other trees,
 48 parras of cultivated land.

A garden called *Hendrik de Silva* lying at Malambelly one and a half hours south of Cochin on the sea-shore, containing :

1,659 fruit-bearing cocoanut and other trees,
 728 parras of cultivated land.

The island *Muttucunu* and two [islands] belonging to it lying nearly half an hour south of Cranganore, all three containing :

3,673 fruit-bearing cocoanut and other trees,
 531 parras of cultivated land.

A garden called *Ilacada* lying west of the Company's outside garden, on the shore, containing :

1,563 fruit-bearing cocoanut and other trees,
 103 parras of cultivated land.

The island *Calliacatte* or *Morenbruil* lying in the back-water between Calicoilan and Coilang, containing :

5,462 fruit-bearing cocoanut and other trees,
 41 parras of cultivated land,
 1,300 salt-pans.

The island *Bettenienny* lying a little to the east of the above-mentioned island *Calliacatte*, containing :

423 fruit-bearing cocoanut and other trees,
 2 parras of cultivated land.

A garden at Calichery Bitjur lying to the east of the back-water, 8 hours south of Cochin, containing :

1,570 fruit-bearing cocoanut and other trees,
 44½ parras of cultivated land.

A garden at Purpencarre called *Mathys Mendes*, containing :

315 fruit-bearing cocoanut and other trees,
 4 parras of cultivated land.

A garden at Purpencarre called *Anthony Fernando Pilot*, containing :

257 fruit-bearing cocoanut and other trees,
 22 parras of cultivated land.

A garden at *St. Andries* lying six hours from Cochin, containing :

983 fruit-bearing cocoanut and other trees,
 44½ parras of cultivated land.

A piece of land called *Gasany* on Vypeen, containing :

108 fruit-bearing cocoanut and other trees,
 225 parras of cultivated land.

A garden called *Bellesior Rodrigus* lying one hour south of this town, containing :

195 fruit-bearing cocoanut and other trees,
 10 parras of cultivated land.

The *Verdronken* (submerged) island lying north-east in the back-water in front of Cochin, containing:

14 parras of cultivated land,
400 salt-pans.

A little parcel of land on the shore south of the Company's Outside Garden, containing:
96 fruit-bearing cocoanut and other trees,
5 parras of cultivated land.

A little parcel of land behind or beside the Banyas' village, containing:
177 fruit-bearing cocoanut and other trees,
 $\frac{1}{2}$ parra of cultivated land.

Five parcels of land lying west of the Sacrifice Tree in the Canarin bazaar, containing:
34 fruit-bearing cocoanut and other trees,
1 parra of cultivated land.

Two little gardens lying on the old channel from the Canarin bazaar, containing:
213 fruit-bearing cocoanut and other trees,
300 salt-pans.

Ten little parcels of land lying between the two channels on this side of the Canarin bazaar, containing:

513 fruit-bearing cocoanut and other trees,
180 salt-pans.

A garden lying east of the Company's Outside Garden, containing:
341 fruit-bearing cocoanut and other trees,
8 parras of cultivated land.

A piece of land called *Mallienarre* opposite to the out-post Aycotta, containing:
487 fruit-bearing cocoanut and other trees,
25 parras of cultivated land.

The *plain* (military free zone) beginning at the Company's Garden and ending at Calvetty,
A piece of land lying north of St. Andries, containing:
289 fruit-bearing cocoanut and other trees,
2 parras of cultivated land.

A piece of land of 1,690 roods in extent lying at Calvetty on this side of the channel from the Canarin bazaar, containing:

112 fruit-bearing cocoanut and other trees,
10 parras of cultivated land.

A piece of land at *Cattur* containing:
166 fruit-bearing cocoanut and other trees.

The island called *Mallienarre*, opposite the out-post Aycotta, containing:
466 fruit-bearing cocoanut and other trees,
20 parras of cultivated land.

A piece of land at *Paliapote* on which the trees have been cut down and the loose money has been reduced but is still planted with:
243 fruit-bearing cocoanut and other trees.

A garden at *St. Andries*, containing:
298 fruit-bearing cocoanut and other trees,
5 parras of cultivated land.

A garden lying at *Carcarpally*, containing:
121 fruit-bearing cocoanut and other trees.

A garden lying at *Cheramagalam* 8 hours south of Cochin, containing:
69 fruit-bearing cocoanut and other trees.

A garden at *Manicorde*, containing:
493 fruit-bearing cocoanut and other trees.

A garden called *Hendrik de Siloa Pequena*, containing:
1,119 fruit-bearing cocoanut and other trees,
20 parras of cultivated land.

- A garden at *Senhora De Saude*, containing :
 1,222 fruit-bearing cocoanut and other trees,
 29 parras of cultivated land.
- A garden at *St. Louis*, containing :
 333 fruit-bearing cocoanut and other trees,
 7 parras of cultivated land.
- The *Musquiten* (Mosquito) island opposite to Cranganore, containing :
 233 fruit-bearing cocoanut and other trees,
 308 parras of cultivated land,
 103 salt-pans.
- A garden at *Crus de Milager*, containing :
 100 fruit-bearing cocoanut and other trees,
 2 parras of cultivated land.
- The *Paulist Island*, otherwise called *Wallarpart*, containing :
 676 fruit-bearing cocoanut and other trees,
 325 parras of cultivated land,
 1,324 salt-pans.
- The garden called *Ballegatty* (Bolgotty) containing :
 297 fruit-bearing cocoanut and other trees,
 562 salt-pans.
- A garden at *Angecainaul*, containing :
 82 fruit-bearing cocoanut and other trees,
 92 parras of cultivated land.
- A garden called *Catharina Cardoza* at Irreweni, containing :
 82 fruit-bearing cocoanut and other trees,
 4 parras of cultivated land.
- A garden called *Joan Correa de Silva*, containing :
 148 fruit-bearing cocoanut and other trees,
 4 parras of cultivated land.
- A garden at *Castella*, one and half hours south of Cochin, containing :
 930 fruit-bearing cocoanut and other trees,
 20 parras of cultivated land.
- A garden called *Ilha de Lethy* or *Carmarta* lying near Cranganore, containing :
 338 fruit-bearing cocoanut and other trees,
 80 parras of cultivated land.
- A garden called *Domingo Fernando* lying one hour from Cochin, containing :
 217 fruit-bearing cocoanut and other trees,
 42 parras of cultivated land.
- The island *St. Domingo* lying half an hour north-east of Cochin, containing :
 476 fruit-bearing cocoanut and other trees,
 126 parras of cultivated land,
 900 salt-pans.
- A garden at *Aycotta* of 3 parcels of 21,281½ roods, containing :
 587 fruit-bearing cocoanut and some other trees,
 2 parras of cultivated land.
- A garden at *Aycotta* of 2 parcels, containing :
 721 fruit-bearing cocoanut trees,
 6 parras of cultivated land.
- A garden at *Aycotta* of 2 parcels, containing :
 631 fruit-bearing cocoanut trees,
 2 parras of cultivated land.
- A garden at *Aycotta* of 2 parcels of land, containing :
 359 fruit-bearing cocoanut trees.

- Still another garden at *Aycotta* of 4 parcels of land, containing :
 182 fruit-bearing cocoanut trees.
- A garden lying on the old channel of the Canarin bazaar, containing :
 66 fruit-bearing cocoanut and some other trees,
 1 parra of cultivated land.
- A little garden lying near *Calbetty*, containing :
 22 fruit-bearing cocoanut trees.
- A garden lying at *Alipe* of 9 hours south of Cochin, containing :
 76 fruit-bearing cocoanut and other trees,
 2 parras of cultivated land.
- A garden on the *Vreede* (Peace) island at Allepaar lying 2 or 3 hours north of Coilan, containing :
 265 fruit-bearing cocoanut and other trees,
 30 parras of cultivated land,
 490 salt-pans.
- Two little pieces of land or cultivated fields 32 parras in extent lying near *Aycotta*.

Land let on cowle (See Chapter XIV).

- A piece of land on the other side of *Aycotta*.
 A piece of land near *Manicoorde*.
 A piece of land on the shore near *Aycotta*.
 A piece of land lying near *Illewade*.
 A piece of land at *St. Jago*.
 A piece of land at *St. Andries*.
 A piece of land on the north side of *Kastella*.
 Two pieces of land lying opposite the post *Aycotta*.
 A piece of land at *Aycotta*.
 A piece of land also lying near *Aycotta*.
 A piece of waste land behind the post *Aycotta*.
 A piece of land lying near the post *Manicoorde* on the sea-shore.
 Some little pieces of land at *Calichery Bitsjur*.
 A piece of land on the "plain" near the Company's Outside Garden.
 Some little pieces of land in the *Illawada* farm.
 A piece of land lying at *Baliaporta*.
 A piece of land lying east of the Company's Outside Garden.
 A piece of land lying next the one just mentioned.

APPENDIX No. VII.

This merely contains a list which I have not thought it necessary to reproduce, of all artillery at Cochin (150 guns), at *Aycotta* (10 guns), on the islands of *Mutucunu* (3 guns), at *Cranganore* (22 guns), at *Quilon* (14 guns), besides guns on board ships and in reserve, field artillery, mortars, etc.—*Editor*.

APPENDIX No. VIII.

This contains correspondence from 1763 A.D. to 1779 about the private trade and commissions of the Chief and Second. The subject having been sufficiently dealt with in Chapter XIII of the Memoir, I have not thought it necessary to translate this appendix. It shows among other things that the profits of the private trade of these officials after it had been taken over by the Company were—

									RS.
1873-74	16,780
1874-75	23,348
1875-76	18,364
1876-77	19,319
1877-78	20,686

APPENDIX No. IX.

This contains voluminous correspondence about the defalcations of one Isaacs referred to in Chapter XVI. It does not appear to me to be of much interest; so I have not translated it.—
Editor.

APPENDIX No. X.

Marginal Remarks of the Batavia Government of the Memoir.

[These notes have been extracted from Manuscript No. 1146. They do not form an appendix to Moens' Memoir in the original volume, and have accordingly not yet been published in Dutch. I now give the Dutch as well as English. The page references in the Dutch are to the copy of the manuscript sent to Batavia; in the English to this volume.]

Marginale aantekeningen op de Memorie door den Heer Raad Extraordinaire van Indie, Adriaan Moens, als afgaande Gouverneur en Directeur van Mallabar aan zijn Ed's successeur in het bestier, den Commandeur Johan Gerard van Angelbeek nagelaten.

Page 29.

Met opzigt tot den eersten minister van den Koning van Travancoor, is goedgevonden en verstaan den Commandeur te recommandeeren in observantie te houden den raad door den Heer Moens aan de hand gegeven, om met dien minister kennis te maaken, en denselven nu en dan eens een presentje te zenden, als ook hem te gerieven met kleinigheden, daar hij omvraagd.

Page 35.

De verklaring deezer regeering, bij aparte brief naar Cochim van den eersten October 1771, bepalende in hoe verre den Commandeur mag blijven staan op het bedongene bij het contract met den Koning van Travancoor, dat na de leverantie van de volle gecontracteerde quantiteit peper, op ieder 300 candijlen, aan zijne Hoogheid een pas zal worden verleend, en in hoe verre gepousseerd mag worden, dat zijne Hoogheid, dien conform, eerst peper moet leveren alvorens hij passen kan krijgen, moet secreet gehouden worden.

Page 40.

Schoon het project om den Koning van Travancoor meer peper te doen leveren, door het opkopen van al de tabak die Jaffanapatnam uitleverd, en dan de peper niet alleen contant maar ook in tabak te betaalen, deeze regeering van veel omslag voorkomt, is egter goedgevonden en verstaan een extract uit de Memorie van den Heer Moens, voor zoo verre dit point betreft, aan den Heer Raad Ordinaire en Ceilons Gouverneur Mr. Willem Falck te zenden, om bij occagie, daar op de dienen van zijn Ed's consideratien.

Page 44.

Den Commandeur van Angelbeek is verstaan aan te schrijven zorge te draagen, dat de peper rekening van den Koning van Travancoor, en de vooruijverstrekingen aan zijne Hoogheid gedaan jaarlijks verevent worden.

Page 48.

Ingevalle den Koning van Travancoor zijne geformeerde pretentie op de eilanden Moetoe-coenoe weder mogt vernieuwen, sal den Commandeur zig moeten reguleeren, na het aangeschreevene op dat snjet, bij aparte brief deezer regeering van den eersten October 1771, terwijl dit point almede secreet moet blijven.

Page 53.

En wanneer hij zijne pretentie op de gemelde eilanden, als voorzeggd, weder mogt tragten te doen gelden, sullen de Ministers in geheugen moeten houden, om de 16,000 rop's welke de Comp. daarvoor heeft betaald, te augmenteeren met 7.000 rop's wegens het ten koste gelegde aan drie aldaar opgerigte paggers, en dus de somma moeten verhoogen tot 23,000 rop's.

Page 74.

De Ministers is verstaan te gelasten attent te zijn, en nauwkeurig te letten, dat de tollén op de Cannarijnsche bazaar, de bazaar op Pagodingo en Mattancherij absolut niet verhoogd worden, maar steeds blijven, en geheven worden op en naar de bepaaling, bij de daarvan door den Koning van Cochim overgegeeven lijst, vermeld bij Mallabarsche resolutie van den 13 Augustus 1772.

Page 76.

Dewijl de Heer Moens niet ongeraaden agt dat den voorslag om het regt van Cochims Koning, op de helft der inkomende en uitgaande regten, van Zijne Hoogheijd af te kopen, in geheugen worde gehouden en zijn Ed. vermeend, dat den Koning, wanneer hij in de uiterste verlegenheid is, en het mag doen, dat regt ook wel zal willen verkoopen maar indien hij door den Koning van Travancoor daar in belet wierde, den laatsten in dat geval direct daarover onderhouden zoude dienen te worden, zoo is verstaan den Commandeur van Angelbeek aan te schrijven zulks in gedagten te houden.

Page 79.

Belangende de onderstelling van de Heer Moens, dat de Compagnie ter goeder trouw zoude mogen afschaffen, pagt te betaalen van de bijzondere of zoo genaamde particuliere handel, die zeederd eenige jaaren ter dezer custe voor haar Ed. reekening is gedreeven, en den Koning van Cochim daar door gepersuadeerd soude konnen worden, van zijn regt op de halve pagt afstand te doen, in aanmerking genomen zijnde :

Dat de pagt conditien zijn ingerigt in een tijd dat zodanig een particulieren handel voor Compagnies reekening niet wierd gedreeven en ons het 18 articul der pagt conditien, waarop zijn Ed. zig fundeerd, als van een veel vroeger datum, dan den handel op zig zelfs wezende, in dezen van geen applicatie kan zijn.

Dat den Koning bevorens, en in dien tijd, dat de scheeps overheeden hunne gepermitteerde lasten aan particulieren demanneerden de pagt daar van en met regt genoten heeft, en dus niet geen regt ingesloten kan worden van dezelve, door de introductie van een particuliere handel, die, om bijzondere reden is ingevoerd, en waardoor, indien men de tol niet betaalde van de indiervoegen genegotieerde goederen, den Koning op eene indirecte en ongepermitteerde wijze onthouden zoude worden datgene 't welk anders de particuliere souden verhandelen, en nadien die, door den particulieren handel voor de Compagnie daar van worden gesecludeerd, zoo is geoordeeld, dat men, ter goeder trouw te werk gaande, de betaaling der gewoone gerechtigheeden van de gepermitteerde lasten der scheeps overheeden, die voor de Compagnie worden aangeslaagen, niet kan of mag weigeren, en den Koning van Cochim daarentegen met billijkheid mag urgeeren op zijn regt, om daar van ook de halve tol te genieten.

Page 110.

De aparte brief, in dato 7^o Maart 1777, door de Heer Moens aan deeze regering geschreeven moet secreet blijven.

Page 129.

Den Commandeur van Angelbeek is verstaan aan te beveelen, bij bekwaame oocagie, te probeeren om de landen, welke de Compagnie op de Mallabaar bezet, op de door den Heer Moens voorgestelde voet, in een kaart te laten brengen.

Page 154.

En verdagt te zijn, dat tot invordering van hetgeen de Collastrijsche princen eigentlijk aan de Compagnie ten agteren staan, maar door den voormaligen Commandeur Weijerman voldaan is, alle devoiren aangewend moeten worden.

Page 164.

En niet minder ter inpalming der schulden van den overleden Moorsch regent Adij Ragia, of de tijd, schoon daar toe tans geen apparentie schijnd te zijn, somtijde verandering mogt baaren, zonder egter, ten minsten voor eerst tot, middelen van geweld over te gaan.

Page 221.

Tot het aangaan van een of en defensieve alliantie met den Nabab Haider Alichan, bij screete brieven aan den Heer Raad ordinair Falok en den Chormandels Gouverneur van Vlis-singen, van den 10^o Julij dezes jaars bereeds qualificatie gegeeven zijnde, zoo wierd met betrekking tot de remarque van den Heer Moens, wegens het zichtbare verlangen van den Nabab, tot het sluijten van zodanig een tractaat, nog aangemerkt, dat zulks met de uiterste precantie moet geschieden om dat men zig niet verder kan verbinden als voor zoo lange den staat in oorlog sal blijven met Engeland, en daar in zal afhangen van den toestand der zaaken in Europa, en dat men dus diend te conditioneeren dat wanneer in tijds opening word gegeeven, dat men door het staaken van den oorlog in Europa, hier vrede moet maaken, zulks ten beste zal worden geduijd onder verzeeking dat men teffens zoo veel mogelijk sal zorgen voor de belangen van Comp's bondgenooten.

Page 222.

Terwijl verstaan is den E. van Angelbeek te recommandeeren de aanmerking van de Heer Moens, dat men te Cranganoor en Aijkottee steeds ophoede diend te zijn, om den Nabab het doordringen te beletten.

Page 231.

Zoo meede de nadeelige beschrijving van zijne personeele hoedanigheeden, en de consideratien van de Heer Moens, dat hij, de maatschappij in zijn belang hebbende, niet veel beeter soude handelen als de Franschen, en zig tot geen andere inzigten laten gebruiken als om zijne, en niet des Maatschappij's belangen te bedelen; zig tot narigt te laten strekken, mitsgaders alle voor en omzigtigheid omtrend den Nabab te gebruiken.

Page 235.

Ook in serieuze overweging te houden, dat hij een usurpateur en wreedard-is, na wiens overleiden grote omwentelingen te dugten zijn, en dat dierhalven op zijne bestendigheid niet te rekenen valt, als voor zoo lange hij leefd.

Page 235.

En almede verdagt te sijn, dat de Marhettas tegen hem aangezet en hij daar zoo niet nijtgerooid, ten minsten klein gemaakt zoude kunnen worden, als ook te overwegen, of men van dien kant mede iets kan uitvoeren.

Page 241.

Voorts, bij voorkomende oecagie, attent te zijn, dat de Marhettas bij het te onderbrengen van Haider Alichan, of het weder herstellen der vorsten die bevorens hunne tributarissen geweest, dog welkers landen tans door den Nabab overheerd zijn, min of meer Compagnies buuren zouden kunnen worden.

Page 243.

Het geremarqueerde door de Heer Moens dat voor de canris de Maldivos op Ceijlon te weinig geld betaald zoude worden, om den inlander te animeeren die in groter quantiteit derwaards overtevoeren, is goed gevonden en verstaan de Ceilonsche ministers door toezending van extract uijt zijn Eds. memorie, voor te houden.

Page 309.

Het gezag en regt van de Compagnie over de Roomsche Kerk en Kerkmiddelen moet gemainteneerd worden, met uitsluiting der Roomache geestelijken, mits het geschiede met discretie en omsigtigheid.

Page 315.

Indien het onderhoud van de koster en voorzanger der Cochimsche kerk door de diaconij niet kan worden gedraagen, is goedgevonden en verstaan hetgeen daar aan ontbreekt uit Compagnies kasse te laten suppleeren, en daartoe aan Commandeur van Angelbeek qualificatie te verleen.

Den gereformeerden kerken raad dezer stede is verstaan op te draagen, de bezorging, voor de forten Coilan en Cranganoor, van twee Krankbezoekers, bij bekoming van dezelve uit Neederland.

Page 368.

Het onderhouden der fortificatie werken ter custe Mallabaar is verstaan voortaan te laten aanbesteeden op zoodanige conditien als vermeld staan bij de bijlage No. 5, agter de Memorie van de Heer Moens.

Page 380.

Den Commandeur van Angelbeek is verstaan te gelasten een preuve te neemen, om de in het gebied van Trevancoor verstrooid leggende landen van de Compagnie, na het voorstel van den Heer Moens, aan den Koning van Trevancoor te verkopen voor een capital eenigzints geproportioneerd na de revenuen die de Maatschappij van deselve trekt.

Page 391.

Boven de 120 sipais die nog aan de voldoening van den eisch manqueeren, is verstaan nog een honderd koppen van dat volk van de Mallabaar te vorderen.

Page 403.

Den particuliere inzaam van peeper thans ingevoerd zijnde, zoo is verstaan den Commandeur van Angelbeek te qualificeeren, daar bij te continueeren, indien hij meede met particulieren negotieerd, dog alleen voor zoo verre, dat de quantiteit niet hooger loope als hij weder spoedig met winst kan debiteeren en in recomandatje om den inkoop met verdektheid te behandelen.

De ministers is overstaan nader aan te beveelen nogmaals een preuve te neemen, of het mogelijk zij op Mallabaar, door middel van de noordsche Kooplieden, Sourattesche lijwaaten voor de Compagnie in te samelen, bij zonder in deezen tijd dat Compagniees comtoir Souratta naar alle waarschijnlijkheid in handen der Engelschen zal zijn.

Page 413.

Ter zaake van de tegenwoordige tijds gesteldheid, is goedgevonden en verstaan den Commandeur van Angelbeek te ordonneeren, over den verkoop van peper ter custe Mallabaar met den Heer Ceijlons Gouverneur Falek te correspondeeren, en hem te qualificeeren zoo veel van dat articul, van de hand te zetten, als op Ceijlon niet benodigd zal zijn gedurende de presente onzekerheid wegens de afzending van retour schepen naar Neederland.

Page 415.

Nopens de prijzen der goederen, op de door den Heer Moens opgenoemde verschillende plaatsen is verstaan de Ministers te ordonneeren successive notitien herwaards te zenden ten eijnde zig hier daarna casu quo te kunnen reguleeren, in de afzending van koopmanschappen.

Page 419.

Desgelijks is verstaan de ministers te gelasten deeze regeering een opgave te bezorgen van de onderscheiden soorten van lijwaaten welke de Bombarassen aanbrenge, als ook van de prijsen tegen dewelke die doeken, bij eenige partijen, te krijgen zijn, en hoeveel men casu quo, daar van zoude kunnen bekomen, bij benodigdheid.

Page 420.

Ook is verstaan de ministers op te draagen van het salpeeter, dat de sibaars van Bajapoer doorgaans aanbrenge, een monster over te zenden, met opgave van de prijs, waar voor dat silt ingekogt kan worden.

Page 442.

Het overneemen voor de Compagnie van de gepermitteerde lasten der sloopverheeden is verstaan op den presenten voet te laten, met recommendatie aan den Commandeur om daarin naar gemoede te werk te gaan.

Page 500.

Om alle nauwkeurigheid te betragten, en tot voorkoming van een verkeerd begrip, is verstaan tot narigt van den Commandeur van Angelbeek te noteeren, dat in tegenoverstelling van de magt, welke aan de hoofdgebieders is gegeven, om de executie der vonnissen in het crimineele, om gegronde redenen, te surcheeren, het proces en vonnis in cas contrair eigenlijk niet word geapprobeerd, maar de hoofdgebieders alleen hunne toestemming moeten verleenen tot het laten voortgaan der executie, als een bewijs, dat hun gene redenen zijn voorgekomen, waarom de uitvoering der sententie soude worden gesurcheerd.

Page 501.

Ongeugt het goede oogmerk, dat de Heer Moens bedoeld met zijn Ed's badenking, dat een gebied, in de aangehaalde gevallen, civile processen soude mogen opeischen eenlijk tot zijn speculatie, is egter verstaan, den Commandeur van Angelbeek te gelasten van dit in zig zelfs onbestaanbaar middel, zoo min mogelijk gebruik te maaken, te meer zodanig eene opeissening niet alleen nutteloos zoude zijn, maar ook includeeren een merklijk bezwaar voor den regter, die, het vonnis uitgesproken zijnde, wel heeft gedefungeerd, maar aan wien nochtans, voor zoo verre van des regters depart is, indien er niet word geappelleerd, de executie van het gewijsde mede incambeerd, 't geen een voornaam gedeelte zijner rechtsoeffening uitmaakt, en hij daar te boven in cas van appel, alleen gehouden is, aan den regter ad quem, het proces over te zenden, om, des geraaden vindende, bij denselven zijn vonnis te sustineeren en te verantwoorden.

Page 504.

Voorts onder notitie, dat de Heer Moens met de fatalia prosecutionis, eigenlijk heeft gemeend, de fatalia appellationis, te remarqueeren, dat het verleenen van relief, tegen den laps deezer fatalia, competeerd aan den regter van appel, om dat zulke een provisie is waarop parthij gehoord, en die, alvorens er eijch gedaan word, moet voldongen worden, en zulke gedingen, gelijk doorgaans volgt, bij wege van interinement afgedaan worden.

Dat het alleen den regter in appellatorio competeerd acta pro Deo te verleenen, en daarop, na gelegendheid van zaaken, parthij advers alvorens ook wel word gehoord, omdat daarin voor hem een merklijk nadeel is geleegeen.

Page 505.

Dat ofschoon bij het wijgeren van appel in 't civile een gebieders' den succumbant wel uit menschlievendheid zonde mogen informeeren, dat den weg van appel des onaangezien voor hem open blijft, te weeten om het te verzoeken bij den regter ad quem, zulks egter met het karakter van een hoofdgebieder ook onbestaanbaar zoude kunnen zijn, want dat, indien een diergelijke ondergting wierd gegeven, omtrend een interlocoitronniss dat ten definitive reparabal is, en waarvan dus niet kan worden geappelleerd, zulks (niet zoude quadreeren met de last, welke) de hoofdgebieders bij hunne commissien word aanbevoolen om te zorgen dat er regt en justitie, zoo in het crimineele als civile, onder den volke geadministreerd worde.

Dat dengeenen, die aan eenig gewijsde moet voldoen, dan wel hij, die daar bij iets is toegewezen, wanneer in een sententie een onverstaanbaare obscuriteit resideerd, van den regter interpretatie moet vragen, en wanneer hem zulks word geweigerd, als dan door den gebieders den regter mag worden gerecommandeerd, die obscuriteit weg te neemen, en de sententie verstaanbaar te maaken.

Page 506.

Dat het verleenen van beneficien, als daar zijn die van relief substantiaal, cessie, respijt, atterminatie en andere, die doorgaans met committimus aan den regter worden verleend, in allen gevalle aan een hoofdgebieder niet alleen zoude staan, dog de ministers op de buiten comptoiren omtrend het accordeeren derzelve zeer naauw zijn bepaald, onder recommendatie, zig tot narigt te laten strekken dat zulke beneficien zoo min mogelijk, en niet als om gewichtige redenen moeten worden toegestaan.

Page 508.

Dat in cas crimineel de procedures, conform de wet, extra ordinair moeten worden begonnen dog den regter bij het retourneeren van den eisch en de stukken, waarmede den fiscaal dezeive tragt te verifieeren, met alle mogelijke nauwkeurigheid behoord te oordeelen, of de misdaad daarin klaar is beweesen, dan wel nadere bewijsen of ophelderingen nodig zijn, en of dienvolgende de zaak is geconstitueerd, om extraordinair te worden afgedaan, of om den gevangenen in een ordinair proces to admittieren en dat, dewijl dezen aangaande een klaar en duidelijc voorschrift voor de regters op de buiten comptoiren word gevonden in het 4^o deel van de door wijlen den Heer Raad extraordinair Louis Taillefert ontworpen ruwe schets of manier van procedereen, hetzelve zoo veel doenlijk tot narigt moet dienen.

Page 510.

Dat om den fiscaal zijne procedures ordinario modo te laten entameeren, wanneer uit de ingewonnen enquesten blijkt dat den beschuldigde zig met uitvlugten behelpt, die onderzoek vereijschen, zulks soude strekken in prejudicie van den fiscaal en ook van het regt der maatschappij.

Mitsgaders dat de extraordinaire procedures daartoe zijn ingerigt, om, langs een korte weg, op en omtrend alle de deelen van de zaak te kunnen inquireeren, maar zoo er ordinair word geprocedeerd, het examineeren van den beklagden cesseerd, als meede het confronteeren van denzelve, hetzij tegen zijne complices, of tegen de getuigen, en hier door dus het beste onderzoek kan worden gedaan naar de uitvlugten waarmede den beschuldigde zig tragt te behelpen, met recommendatie aan den Commandeur om deze omzigtigheid steeds in agt te neemen.

Page 517.

Dat door een aantal orders, zoo door de Hoog Edele Heeren Zeventien als deze Regeering, op de administratie der justitie van tijd tot tijd gesteld, de bepaaling bereeds is gemaakt, dat de justitie haaren onbelemmerde cours gelasten, en door geene politieke dispositien gestremd moet worden, zoo lange den regter zijn ampt behoorlijk exerceerd, de zaaken behandeld worden zoo als in goede justitie behoord, en een ieder kort, goed en overtogen regt word gedaan, waarop door de overigheid, en dus in de eerste plaats door de hoofdgebieders, wel voornamentlijk moet worden gelet, als eigentlijk hetgeene zijnde, dat een gebieders in zijne commissie ten deezen opzigte word voorgeschreeven en aanbevoolen, dan dat het waakzaam oog, hetwelk een hoofdgebieder verpligt is, hier omtrend te houden, egter niet moet intimideeren, of eenige belemmeringen te weege kunnen brengen, maar wanneer een reelee quade administratie der justitie voorziening vorderd, het als dan de pligt van een hoofd gebieders is, nauwkeurig kennisse van zaaken te neemen en met advis van raade, het nodige redres te beraamen, dog dit point zoo teeder is, dat daar toe niet dan in gevallen van de uiterste noodzaakelijcheid, en met alle mogelijke prudentie moet worden getreeden, en welke prudente omzigtigheid is beslooten, den Commandeur van Angelbeek aan te recommendeeren.

Page 521.

Alhoewel de abuisen, die door het emploieeren van inlandsche tolken kunnen worden begaan, een gebrek is, dat niet wel geremedieerd kan worden, en waar omtrend het in zonderheid aankomt op den regter en officier van justitie, zoo is egter verstaan den Commandeur van

Angelbeek te gelasten de hand te houden aan twee Europeesche jongelingen die den Heer Moens de inlandsche taal heeft laten aanleeren, en die tot tolken te gebruiken, gelijk hier ook geschied, met aanschrijvens om aan deeze Regeering voor te dragen wat dezelve successive toegevoegd zoude kunnen worden.

Page 521.

Wijders is goedgevonden en verstaan den Commandeur van Angelbeek aan te beveelen den verderen inhoud deezer memorie waarop bij deeze regeering geen speciaale reflectien gemaakt, of dispositien gevallen zijn, nevens de voorstaande aanmerkingen en besluiten te laten strekken ter zijner narigt en observatie.

Page 521.

En laatstelijk den Heer Moens voor de genomen moeite, tot het instellen van dat schriftuur, te bedanken, gelijk zijn Ed. daar voor bedankt word bij deesen.

Batavia in 't Kasteel den 10^e September 1781

Per ordonnancie van Hunne Hoog Edelheeden den Gouverneur Generaal en de Raaden van Indie.

H. GOETBLOED

Sec.s.

Marginal notes on the "Memoir" left by Mr. Adrian Moens, Councillor Extraordinary of India, departing Governor and Director of Malabar, to his Worship's successor in office, the Commandeur Johan Gerard van Angelbeek.

Page 111.

With regard to the prime minister of the King of Travancore it is resolved and agreed to recommend the Commandeur to observe the advice given by Mr. Moens (viz.) to make the acquaintance of the said minister, and to send him a small present occasionally and also to oblige him with little things he asks for.

Page 113.

The instructions of this Government contained in a special letter to Cochin dated 1st October 1771, defining to what extent the Commandeur may insist on what has been stipulated for in the contract with the King of Travancore (viz.) that after having supplied the whole quantity of pepper according to contract, a pass must be given to His Highness for every 300 candies; and also to what extent to push our claim that His Highness must accordingly supply pepper first, before he can obtain passes; must be kept secret.

Page 115.

Although the scheme for making the King of Travancore supply more pepper by buying up all the tobacco which Jaffnapatnam exports and then paying for the pepper not only in cash but also in tobacco, seems to this Government rather cumbersome, it is resolved and agreed to send an extract from the "Memoir" of Mr. Moens, so far as this point is concerned, to Ordinary Councillor Mr. William Falck, Governor of Ceylon, in order to invite His Worship's reflections upon this subject, when opportunity presents itself.

Page 116.

It is agreed to order the Commandeur van Angelbeek to take care that the pepper accounts of the King of Travancore and the advances made to His Highness are settled annually.

Page 117.

Should the King of Travancore renew his formal claims on the Mutucunu islands, the Commandeur shall conform himself to that which has been ordered on this subject by special letter of this Government dated 1st October 1771. In the meantime, this also must be kept secret.

Page 118.

And should he again urge his claims on the islands in question, our officers must remember to add to the Rs. 16,000 which the Company paid for them Rs. 7,000 on account of expenses incurred for the 3 paggers (stockades) constructed on them, and so to raise the sum to Rs. 23,000.

Page 124.

It is agreed to order the officials to take care and to pay particular attention, that the taxes on the Canarin Bazar, the Bazar of Pagodingo and Mattanchery must absolutely not be raised, but remain the same and be levied in accordance with what is laid down in the list supplied by king of Cochin, referred to in the Malabar resolution of 13th August 1772.

Page 125.

Since Mr. Moens thinks it advisable that the proposal of buying up the king of Cochin's right to half of import and export duties should be borne in mind, and since it is the opinion of his Worship that the king, if he gets into very great difficulties and is allowed to do it, would certainly like to sell that right, but that if he were prevented by the king of Travancore, the latter in that case ought to be directly approached, it is agreed to order the Commandeur Van Angelbeek to make a note of this.

Page 126.

With regard to the suggestion of Mr. Moens that the Company might in good faith stop paying duty on the special or so called private trade which has been conducted for the last few years on this coast on the Company's account and the king of Cochin might then be persuaded to give up his right to half the duty; having taken into consideration:

That the conditions of the lease were drawn up at a time when no such private trade was conducted on behalf of the Company and that Art: 18 of the lease conditions, on which his Worship bases his argument, has no application, since the lease is of much older date than the trade.

That the king, before and during the time that ship authorities disposed of their "permitted" cargoes to private individuals, duly enjoyed the duties thereon, and hence cannot with any right be deprived of them by the introduction of a private trade which has been introduced for special reasons and by which, if duty were not paid on the goods so dealt with, the king would be deprived indirectly in an inadmissible manner of the business which private traders would otherwise have;

and since these people are excluded on account of the private trade of the Company, it is considered that on grounds of good faith, the payment of the ordinary duties on the "permitted" cargoes of the ship officers which are taken over for the Company, cannot and may not be refused and that the king of Cochin on the other hand in all fairness may insist upon his right of enjoying half the duty on them.

Page 134.

The special letter, dated 7th March 1717, written by Mr. Moens to this Government must be kept secret.

Page 139.

It is agreed that the Commandeur van Angelbeek be recommended, when opportunity presents itself, to try and make a map of the lands which the Company occupies in Malabar, in the manner proposed by Mr. Moens.

Page 147.

And to remember that every effort must be made to collect what is due from the Princes of Collastray to the Company, though it has been paid by the former Commandeur, Weijerman.

Page 149.

And no less to remember to collect the debts of the deceased Moorish ruler Ady Ragia should the times (although for the present there seems to be no likelihood of this) bring about a change; but without having recourse to force, at least for the present.

Page 164.

With regard to the making of an offensive and defensive alliance with the Nabob Hyder Ali, to which consent has already been given in secret letters, dated the 10th July of this year, to Ordinary Councillor Mr. Falck and to the Governor of Coromandel van Vlissingen, a further observation will be made in connection with the remark of Mr. Moens about the visible desire of the Nawab to make such an alliance that it must be done with the greatest caution, because we cannot bind ourselves longer than for such a period as war is going on between the State and England, and this will depend on the state of affairs in Europe, and so a condition must be made that when we are informed of the discontinuance of war in Europe and peace must be made here, it will be taken in the right spirit, an assurance being conveyed at the same time that care will be taken as far as possible of the interests of the allies of the Company.

Page 164.

At the same time it is agreed to recommend to his Worship van Angelbeek the observation of Mr. Moens to be on his guard at Cranganore and Aykotta in order to prevent the Nabob breaking through.

Page 166.

And also that he must take notice of the unfavourable description of his personal qualities and the view of Mr. Moens, that having the Company siding with him, he would treat it little better than he did the French, and could not be made use of for any other purposes than to advance his own interests and not those of the Company; and besides to use every precaution and care with regard to the Nabob.

Page 167.

Also to bear carefully in mind that he is an usurper and a tyrant and that after his death great revolutions are to be feared, and that on this account one cannot rely on his permanency except for so long as he lives.

Page 167.

And also to bear in mind that the Mahrattas might be set on him and he might be, if not crushed entirely by them, at least made small, and also to consider whether something could be done in this direction.

Page 169.

Furthermore if occasion presents itself to remember that if the Mahrattas make Hyder Ali subject to them, or reinstate the kings who formerly paid tribute to them, but whose dominions are now ruled by the Nabob, they might become the neighbours of the Company more or less.

Page 170.

The remark of Mr. Moens that the Maldive islanders are paid too little in Ceylon for their cowries to induce them to take them there in larger quantities will be conveyed to the Ceylon administration, an extract from his Worship's "Memoir" being forwarded.

Page 187.

The authority and right of the Company over the Roman church and church funds must be maintained, the Roman clergy being excluded, provided this is done with discretion and prudence.

Page 190.

If the poorhouse is unable to bear the maintenance of the sexton and proctor of the church of Coshin, it is resolved and agreed to supply the deficiency from the Company's funds, and to authorize Commandeur van Angelbeek to disburse the money.

It is agreed to require the Reformed Church Council of this town to supply two comforters of the sick for the forts of Coilan and Calicoylan, when they get them out from the Netherlands.

Page 203.

It is agreed to give the repairs of the fortifications on the Malabar coast out on contract henceforth and on such conditions as are laid down in Appendix No. 5 at the end of Mr. Moens' "Memoir".

Page 208.

It is agreed to order Commandeur van Angelbeek to try to sell the scattered fields of the Company in the territory of Travancore, according to the proposal of Mr. Moens, to the king of Travancore, for a sum somewhat proportioned to the revenue, which the Company draws from them.

Page 211.

It is agreed to demand from Malabar another 100 head of sepoy besides the 120 who are still wanting to make up the previous indent.

Page 214.

The private collection of pepper being now introduced, it is agreed to authorise Commandeur van Angelbeek to continue it, if he also trades with private traders, but only on condition that he does not purchase a greater quantity than he can dispose of quickly at a profit, and with the recommendation that the purchases should be made secretly.

Page 216.

It is agreed to recommend the administration to try again whether it would be possible to collect Surat piece-goods for the Company through the northern merchants, especially now that, in all probability, the Company's factory at Surat is in the hands of the English.

Page 217.

On account of the conditions of the present time it is resolved and agreed to order Commandeur van Angelbeek to correspond with Mr. Falck, the Governor of Ceylon, regarding the sale of pepper on the Malabar Coast, and to authorize him to dispose of so much of this article as will not be required in Ceylon during the present uncertainty about the despatch of ships to the Netherlands with cargoes for home.

Page 218.

With regard to the prices of the goods in the various places named by Mr. Moens it is agreed to order the administration to forward successive advices here in order that we may "casu quo" regulate ourselves by them when despatching merchandise.

Page 219.

In the same way it is agreed to order the administration to furnish this Government with a statement of the different kinds of piece-goods which are imported by the Bombaras, and also of the pieces for which these cloths can be obtained in a few parcels, and how much "casu quo" might be obtained if wanted.

Page 220.

It is also agreed to order the administration to forward a sample of the saltpetre which the *sibars* of Bajapur as a rule import, the price for which this "silt" can be bought being noted.

Page 226.

With regard to the taking over of the "permitted" cargoes of the ship authorities for the Company it is agreed to leave that on the same footing as it is, recommending the Commandeur to go to work in the matter according to the best of his judgment.

Page 243.

In order to be quite precise and to prevent a wrong conception, Commandeur van Angelbeek will be informed that the contrary of the power of staying execution, for well-grounded reasons, of criminal sentences, which has been given to the Administrators in Chief, is not properly described as "approval" of the case and sentence, but that the Administrators have only to "assent" to the execution being carried out to show that it appears to them that there are no reasons why the execution of the sentence should be stayed.

Page 244.

In spite of the good object Mr. Moens has in making his remark that an Administrator might in the cases quoted ask for the papers in civil suits just to look at them, Commandeur van Angelbeek will be instructed to make use of this device, in itself really inadmissible, as little as possible, the more so because such a demand for the records would not only be useless but it would also include notable prejudice to the judge who, the sentence having been passed, is undoubtedly *functus officio* but upon whom however, in so far as it is within the judge's province, lies, if no appeal is made, the execution of the sentence pronounced, which is an important part of his jurisdiction, and further if appeal is made, he is only bound to send the case to the judge "ad quem" in order if he thinks it advisable, to maintain and to answer for his sentence to him.

Page 244.

Further, it being noted that Mr. Moens by the "Fatalia prosecutionis" really means the "Fatalia appellationis", to give relief against the lapse of these "Fatalia" belongs to the judge of appeal, because this is a matter in respect of which the party must be heard and which must be determined before an "application" can be made and such suits are, as usually follows, decided by "interination".

It belongs to the judge of appeal alone to grant "acta pro Deo" and in these suits the adverse party is sometimes heard previously according to circumstances because he may be considerably prejudiced.

Page 244.

Although, when appeal has been refused in civil cases, an administrator may from motives of humanity inform the losing party that the way of appeal nevertheless lies open by direct application to the judge "ad quem", yet it might be inconsistent with the character of an

Administrator in Chief; for if such information is given in the case of an interlocutory sentence which is alterable at the final hearing and from which accordingly no appeal is possible, such action would not be consistent with the charge laid on Administrators in Chief in their commission to see that right and justice is administered among the people both in criminal and civil cases.

Persons who have to obey a sentence which has been pronounced and also those who have gained something by it, must, in case there is an obscurity in the sentence, ask the judge for an explanation, and it is only in case of his refusal that an administrator may recommend the judge to remove the obscurity and to make the sentence clear.

Page 244.

The grant of concessions such as "relief substantial", "cession", "respite", "attribution" and others which are usually granted with "committimus" to the judge would not in any case appertain to the Administrator in Chief only, but the officials in the out-factories will be very strictly limited in regard to granting of the same and instructed to accord such concessions as little as possible and only for very good reasons.

Page 245.

In criminal cases the procedure must, in conformity with the law, start as "extraordinary", but the judge, when he "returns" the application and the documents by which the fiscal tries to justify the same, must decide, with all possible care, whether the crime is clearly proved or whether further proofs and elucidation are necessary, and whether the facts constitute a case which should be proceeded with as "extraordinary" or give the accused the right to be tried "ordinarily"; and since clear and lucid instructions for judges of out-factories will be found in the 4th part of the rough scheme, or manner of proceeding, composed by the late Mr. Louis Taillefort, Councillor Extraordinary, the same should as far as possible serve for information and guidance.

Page 245.

If the fiscal were required to start the procedure "ordinario modo" when it appears from the informations obtained by him that the accused takes refuge in evasions, which require examination, it would tend to the prejudice of the fiscal and of the rights of the Company.

Moreover the "extraordinary" procedure was prescribed in order that enquiries might be made quickly and publicly about all the details of the case, but if the case is taken up "ordinario [modo]" the examination of the accused ceases and also the confronting of him either with his accomplices or with the witnesses, and it is just by these means that the most effective enquiry can be made about the evasions with which the accused tries to help himself. The Commandeur should always observe this precaution.

Page 247.

By a number of orders laid down from time to time both by the Worshipful Seventeen and this Government regarding the administration of justice, it has been provided already that justice must have its free course and must not be hampered by any political measures, so long as the judge exercises his functions in a proper manner and cases are disposed of as justice requires and every one obtains justice quickly, well and conclusively; to which attention must be paid by the authorities, and so in the first place by the Administrators in Chief; for it is this that properly speaking is prescribed and recommended to an Administrator in his commission; accordingly the watchful eye, which an Administrator is bound to keep on these things, must not intimidate or create obstacles; but when a really bad administration of justice requires to be provided against, then it will be the duty of an Administrator in Chief to enquire carefully and, with advice of his Council, to concert the necessary redress; but the matter is so delicate that recourse must not be had to such measures save in cases of extreme necessity and with all possible prudence; which prudent circumspection will be recommended to Commandeur van Angelbeek.

Page 248.

Although the evils which may result from employing native interpreters is a defect which can hardly be remedied and which concern especially the judge and the public prosecutor, Commandeur van Angelbeek will be ordered to keep two European boys, who have been ordered by Mr. Moens to learn the native language, and to use them as interpreters, as is the custom here also, with instructions to propose to this Government what pay should be given to them from time to time.

Page 248.

Again it is resolved and agreed to recommend to the Commandeur van Angelbeek for his information and guidance the further contents of this memoir, upon which no special comments have been made, or orders passed, together with the foregoing remarks and resolutions.

Page 248.

And lastly it is resolved to thank Mr. Moens for the trouble taken in writing this paper ; the thanks of the Government being accordingly hereby conveyed to his Worship.

Batavia, in the Castle, 10th September 1781,

By order of the Right Worshipful the Governor-General and Council of India.

H. GOETBLOED,
Secretary.
