Guide to Current Official Statistics,

Prepared by the Permanent Consultative Committee on Official Statistics.

Volume Eleven (1932) - - - 1s. (1s. 5d.).

The issues of the Guide provide a systematic survey of the statistics contained in official publications. The Guide consists of a List of Publications (grouped under the Departments severally responsible) and an alphabetical Subject Index, which not only refers the inquirer to the appropriate volumes in the list, but also supplies details as to the mode and degree of analysis of the statistics contained therein.

Whilst the Guide is based upon official publications containing statistics, it constitutes, in effect, a general work of reference to most of the activities of Government Departments.

Those wishing to avail themselves of the statistical material published prior to the period covered by the several issues of the Guide will find, in the Appendix to Volume Two, a broad survey of publications of permanent statistical interest issued mainly since the year 1900.

All prices are net. Those in brackets include postage.

Obtainable from

UNIVERSITY GRANTS COMMITTEE

INTRODUCTORY NOTE.

TO THE LORDS COMMISSIONERS OF HIS MAJESTY'S TREASURY:—

The University Grants Committee have the honour to present to Their Lordships a series of comparative tables of statistics based on the returns for the academic year 1932-33 supplied by Universities and Colleges in Great Britain which receive Treasury grants on the Committee's recommendation. Their Lordships will observe that four Institutions of the University of London have been added to those named in the tables, viz., the Courtauld Institute of Art, the Institute of Education, the Institute of Historical Research, and the School of Slavonic and East European Studies. These Institutions are administered by the University as "central activities"; the Courtauld Institute of Art was first opened in October, 1932; the Institute of Education (formerly the London Day Training College) was transferred from the control of the London County Council to that of the University in September, 1932; and the School of Slavonic and East European Studies* was similarly transferred from King's College, London, in August, 1932. The financial figures for the Institute of Historical Research have hitherto appeared in the tables incorporated with those of the University; the opportunity has now been taken of including this Institute separately.

The Committee are now engaged in their periodical task of visiting all the Universities and Colleges on the grant list. At the conclusion of these visits they will, in accordance with their usual practice, address to Their Lordships a general Report on the conditions prevailing at the Institutions as a whole; this Report will include a comprehensive review of student numbers and finance over a period of five years. It is therefore thought sufficient to give on this occasion in the Introductory Note little more than a summary of the figures included in the detailed returns, and a comparison of the more important of these figures with those of the previous year.

STUDENTS.

Total Number.—For the academic year 1932-33, the total number of full-time students attending the Universities and Colleges to which this publication relates was 50,155; of these, 2,586 were engaged in research and other advanced work, 38,816 were reading for a first degree, and 8,753 for a diploma.

The total number of part-time students was 13,960, of whom 6,166 were engaged in research or other advanced work or were reading for a first degree, or for a diploma, and 7,794 were occasional students, i.e., taking one or more courses of lectures or laboratory instruction, which, though of university standard and given by university teachers, did not lead to a degree or diploma.

Regional Distribution.—Of the total number of 50,155 full-time students, 35,813 were in English, 3,367 in Welsh, and 10,975 in Scottish University Institutions; the English figure is made up as follows:—Oxford and Cambridge 10,509, London University, its Colleges and Schools 12,017, Provincial Universities and Colleges 13,287.

Of the 6,166 part-time students engaged in Advanced work, or reading for a first degree or for a diploma, 5,469 were in English, 70 in Welsh, and 627 in Scottish Institutions.

Residence.—The number of full-time students residing in Colleges and Hostels was 12,069† or 24·1 per cent. of the total, in Lodgings 16,167 or 32·2 per cent., and at Home 21,919 or 43·7 per cent.

The proportion of men residing in Colleges or Hostels was 20 per cent. of their total number, of women 35·8 per cent. of their total number.

It should be remembered that, while in any one year there is always a considerable number of students at Oxford and Cambridge shown as residing "in Lodgings", these are somewhat differently circumstanced from the students at other Universities placed under that category. Practically all undergraduate members of the Universities of Oxford and Cambridge also enjoy, throughout their courses, membership of some College, Hall or

* Figures of students and finance for this School have previously been included in the tables incorporated with those of King's College.

† Oxford and Cambridge 5,564; other English Institutions 5,000; Wales 596; Scotland 909.

recognised Society, with all the opportunities of corporate life which such membership implies, and the great majority live for a substantial period in College or Hall buildings at some stage of their careers.

British Empire and Foreign Students.—Of students coming from homes outside the British Isles but within the British Empire, there were 2,653 full-time and 605 part-time; of students from Foreign Countries there were 1,825 full-time and 787 part-time.

The Institutions attended by 100 or more full-time British Empire and Foreign students were:—Cambridge University, 538; Oxford University, 524; Edinburgh University, 505; London School of Economics, 375; University College, London, 339; Imperial College of Science and Technology, 213; Glasgow University (including the Glasgow Royal Technical College), 213; King's College, London, 143; Manchester University (including the College of Technology), 131; Guy's Hospital Medical School, 117; Birmingham University, 113; St. Bartholomew's Hospital Medical College, 112; St. Andrews University (including Dundee University College), 101.

Entry.—The total number of full-time students admitted for the first time amounted to 15,050, of whom 12,349 were reading for a First Degree and 2,701 for a Diploma. Of the 12,349 reading for a First Degree, 229 were under 17 years of age, 1,547 were 17 and under 18, 4,803 were 18 and under 19, and 5,770 were 19 or over.

Subjects of Study.—The distribution of the general body of full-time students over the various subject groups was as follows:—

Arts, 25,175 (50·2 per cent. of the total); Medicine and Dentistry, 11,247 (22·4 per cent.); Pure Science, 8,394 (16·7 per cent.); Technology, 4,534 (9·1 per cent.); Agriculture, 805 (1·6 per cent.).

Of the full-time Advanced students 1,038 or 40·1 per cent. were in the Arts group, 1,023 or 39·6 per cent. in the Pure Science and Mathematics group, 347 or 13·4 per cent. in Technology, 134 or 5·2 per cent. in Medicine, 44 or 1·7 per cent. in Agriculture.

The part-time students engaged in Advanced work were distributed somewhat differently, viz.: 845 or 44·9 per cent. in Arts, 536 or 28·4 per cent. in Medicine, 393 or 20·9 per cent. in Pure Science and Mathematics, 104 or 5·5 per cent. in Technology, and 5 or 3 per cent. in Agriculture.

Men and Women.—Out of the grand total of 50,155 full-time students, the men numbered 37,258 or 74·3 per cent., and the women 12,897 or 25·7 per cent.; in the English Universities and Colleges men were 75·9 per cent. and women 24·1 per cent. of the total; in Wales the corresponding figures were men 71·1 per cent. and women 28·9 per cent., and in Scotland men 70 per cent. and women 30 per cent. Of the total number of full-time advanced students, 2,178 or 84·2 per cent. were men, and 408 or 15·8 per cent. were women.

The percentage distribution of the total number of the men and the women full-time students over the subject groups was as follows:—Men, Arts 42·8 per cent., Medicine 26·4 per cent., Pure Science 17 per cent., Technology 11·9 per cent., Agriculture 1·9 per cent.; Women, Arts 71·5 per cent., Pure Science 16 per cent., Medicine 11 per cent., Agriculture 8 per cent., Technology 7 per cent.

Comparisons with previous year.—In making these comparisons, account must be taken of several factors. The Courtauld Institute of Art and the Institute of Education, London, are new Institutions in the list, and the few students working at the Institute of Historical Research but not included in the returns of another University or College* have not previously been included in the tables. In addition, two of the Institutions showed, as part-time students in the academic year 1931-32, 104 men and 2 women, who should have been shown as full-time students.

After making due allowance for these variations, there was an increase of 1,255 (1,267 more men and 12 fewer women) in the total number of full-time students, made up as follows:—England 1,050 more men and 57 more women students; in Wales 211 more men and 34 more women; in Scotland 6 more men and 103 fewer women. The number of full-time advanced students rose by 171 (167 more men, 4 more women), the number of first degree students by 1,137 (1,038 more men, 99 more women), and the number of diploma students fell by 53 (62 more men, 115 fewer women). Taken together, full-time and part-time students from Foreign Countries increased from 2,516 to 2,595, but British

* See note || to Table 1.

Empire students were again less numerous than in the year before, falling from 3,385 to 3,240.

The total entry of full-time students rose by 451 in the year 1932-33, there being an increase of 665 in the number reading for a First Degree, and a decrease of 214 in the number of Diploma students.

There has again been no alteration in the general outlines of the distribution of the whole body of full-time students over the different subject groups; the Arts group still contains just about one-half, the next largest groups being Medicine, Pure Science, Technology, and Agriculture, in that order. Detailed examination shows 389 more men and 211 fewer women in the Arts group, 667* more men and 140† more women in the Medical group, 203 more men and 60 more women in the Pure Science group, 42 more men and 4 more women in the Technological group, and 34 fewer men and 5 fewer women in the Agricultural group. Among the full-time Advanced students in all subjects, the Pure Science and Mathematics group, formerly first, is now a close second to Arts, with Technology third, Medicine fourth, and Agriculture fifth. The relative popularity of individual subjects also shows practically no change, Chemistry remaining far ahead of all the rest.

FINANCE.

Income.—In the academic year 1932-33 the total incomes of the Institutions covered in this publication amounted to £5,919,518. This sum was distributed over the main heads in the following manner:—Endowments, £808,940 (13·7 per cent.); Donations and Subscriptions, £148,863 (2·5 per cent.); Grants from Local Authorities, £541,672 (9·1 per cent.); Parliamentary Grants, £2,093,512 (35·4 per cent.); Fees for Tuition, Examination, Graduation, Matriculation and Registration, £1,924,154 (32·5 per cent.); Other Income‡ £402,377 (6·8 per cent.).

The total income for England was £4,691,894; (London University, £1,692,061; §Oxford and Cambridge, £1,060,376; Provincial Universities and Colleges, £1,939,457); for Wales, £364,042; for Scotland, £863,582.

These totals were made up as follows:—

	Endowments.	Donations and Subscriptions.	Grants from Local Authorities.	Parliamentary Grants.	Fees for Tuition, Examination, Graduation, Matriculation and Registration.	§Other Incomes.
	£	£	£	£	£	£
England	629,616 (13·4%)	120,865 (2·6%)	481,437 (10·3%)	1,551,885 (33·1%)	1,534,219 (32·6%)	373,872 (8·0%)
Wales	25,274 (6·9%)	4,410 (1·2%)	60,235 (16·6%)	175,192 (48·1%)	87,919 (24·2%)	11,012 (3·0%)
Scotland	154,060 (17·9%)	23,588 (2·7%)	—	366,435 (42·4%)	302,016 (35·0%)	17,493 (2·0%)

Expenditure.—The total expenditure of the Universities and Colleges concerned was £5,818,957, distributed as follows over the main heads:—

Administration, £496,059 (8·5 per cent.); Departmental Maintenance, £3,792,154 (65·2 per cent.); Maintenance of Premises, £641,409 (11 per cent.); Other Expenditure, £889,335 (15·3 per cent.).

The head "Departmental Maintenance", which accounts for so large a proportion of the total, covers salaries of teaching and research staff and payments for superannuation, the cost of maintaining laboratories, lecture rooms, libraries, and museums, and of supplying them with materials, apparatus, books, specimens, etc. Under the miscellaneous head entitled "Other Expenditure", the largest items are cost of ordinary university examinations (column 18), and capital expenditure met from income (column 19); of the sums included in column 25 the largest items are the expenditure on local and school examinations and on extra-mural work by the appropriate Boards and Delegacies at the Universities of Oxford, Cambridge and London.

Comparisons with previous year.—The total figures of income and expenditure for the year 1932-33 do not show any very noteworthy change when

* 653 in Medicine, 14 in Dentistry.

† 125 in Medicine, 15 in Dentistry.

‡ The main items in this miscellaneous head were payments from Local Authorities and other bodies for services rendered (e.g., examination of bacteriological specimens), and fees for local and school examinations conducted by the Universities of Oxford, Cambridge and London.

§ Excluding of course the Colleges.

|| For the purpose of calculating the figures given in this paragraph, the returns of the Courtauld Institute of Art and the Institute of Education, London, have been ignored, as entries for these Institutes appear in the tables for 1932-33 for the first time.

compared with the figures for the preceding year. Total income rose by over £22,000, the main items which produced this figure being an increase of over £52,000 in Tuition, Examination and other fees (mainly due to the increased number of students), against which has to be set decreases of over £19,000* in Parliamentary Grants and of over £17,000 in Grants from Local Education Authorities. Total expenditure was greater by a sum of over £10,000, in which the principal items were increases of over £52,000 under the head Departmental Maintenance, due no doubt, in the main, to the larger number of students under tuition, and of over £9,000 under Maintenance of Premises, against which has to be set a decrease of over £53,000 under the head of Other Expenditure, the principal cause of which was a fall of over £57,000 in the amounts which the Institutions were able to provide from their annual revenues for capital expenditure.

In 1932-33 the total of accumulated revenue deficits was again reduced, this time by the substantial amount of over £17,000. It is also a matter for satisfaction that the level of financial stability, as measured by the revenue accounts, has been successfully maintained. There were only four Institutions whose accounts showed deficits on the year, and at only one of these four was the deficit of any substantial amount—two of the others were each under £50; all the remainder, with the exception of four which precisely balanced their accounts, showed surpluses of income over expenditure.

The total amount of debt on capital account (about £1,000,000) has increased by some £65,000, but this rise was more than accounted for by the transaction entered into by one of the London Medical Colleges during the past year, in the purchase of a site and buildings which will ultimately provide a new home for the College. The effect of this transaction was to show an increase of about £100,000 in the indebtedness of the College at the end of last year, but active steps are being taken by the Governing Body to raise the funds necessary to reduce the debt. This total of debt, spread over a large number of Institutions, many of which are well able to make adequate provision for repayment, may not seem unduly burdensome, but it does represent a sobering charge upon the funds of the Institutions.

It must not be assumed from the preceding paragraphs that these University Institutions will emerge quite unscathed from the financial crisis which overshadowed the Nation in 1931. As we have pointed out in the Introductory Note to this publication for the previous two years, the Universities have since that time been continuously engaged in the task of keeping down expenditure to the lowest point compatible with the maintenance of a proper standard of efficiency. Faced with considerable difficulties, they have in general succeeded in maintaining a position of financial stability.

A most important contribution to this satisfactory state of affairs was made by the Government when they decided to make no reduction in the annual Treasury grants to the Universities, which had already been fixed for the current quinquennium. Although Local Authorities generally† in England and Wales could not see their way to follow the Government's example without qualification, none the less the total reduction in Local Authority grants for 1932-33, as compared with 1930-31 (i.e. the last completed year before the crisis), amounted to no more than approximately £28,000. This fall is not proportionately large, although only a few of the individual Institutions have entirely escaped, and at some of them the reductions have caused embarrassment. It may be hoped that as soon as better times return, the Local Authorities concerned will be found willing to restore the reductions which have been made, and thus give a renewed proof of their faith in the value of the work which the Universities are doing.

On behalf of the Committee,

W. B. RIDDELL,

Chairman.

JOHN BERESFORD,

Secretary.

February, 1934.

* Over £9,000 of this decrease was due to two special factors, viz:—(1) the figures for 1931-32 included a sum of £5,250, representing Treasury recurrent grant which was actually applicable to 1930-31, and (2) a decreasing total amount of certain special Treasury non-recurrent grants given in 1930 for books, periodicals and binding, is naturally spent in each succeeding year.

† There were some noteworthy exceptions,

* Includes figures for Two-Year Teachers' Training Department.

† See Note ¶ to Table 1.

‡ See Note ¶ to Table 1.

§ Of these, 680 were registered internal students of the University of London, proceeding to one of the B.Sc. degrees of the University in addition to the College diploma. Under the arrangement between the University and the College, no further examination in subjects or branches of subjects already covered by the examinations of the University is required for the College diploma of a student who has obtained his University degree.

¶ See Note § to entries in Cols. 7 and 8.

** These classes in England and Wales were recognised under the Board of Education (Adult Education) Regulations, 1932, and supervised by Universities and University Colleges. The figures are those of students duly registered as regular students for the purpose of those regulations, but some of these classes, particularly the University Extension Courses, are attended also by members of the public other than the regular students.

†† These were students attending Extra-Mural Classes supervised by the University of London.

‡‡ In addition, certain one year and Terminal Courses in Music were organised by the National Council of Music of the University of Wales.

§§ These figures were supplied by the Scottish Universities as representing students in attendance at Tutorial Classes conducted by co-operation between the Universities, the Local Authorities, and the Workers' Educational Association.

* The figures in these columns exclude higher degrees granted without further study, examination or other test subsequent to the first degree.
† The figures for women students in the degree columns relate to titles of degrees conferred by diploma in the year 1932-33, and do not apply only to those satisfying the requirements during that year.
‡ The degrees in Medicine and Surgery granted by the Universities of Oxford and Cambridge are included in the figures of these Universities only, but it should be remembered that the greater proportion of the Oxford and Cambridge medical students take their final medical studies at schools of the University of London.

* Excluding amounts for remission of fees. (Total of these appears in Column 16.)

† Non-recurrent grant is included here only so far as it appears in the ordinary revenue account of the Institution.

‡ In addition, the Government also provides the Central Offices of the University with accommodation in the Imperial Institute, South Kensington, free of rates and taxes, and the greater part of the cost of maintenance of the buildings is also borne by the Government.

§ The figures for this University do not include the accounts of the Colleges. The contributions from the Colleges to the University are included in Column 2.

¶ A considerable part of this sum is payment for work below University standard, and as such is allowed by the Board of Education to rank in due course for grant from the Board under their Regulations. If it were possible to include the Board's grant in the above figures, the percentage in column 14 would be very considerably increased, and that in column 8 correspondingly diminished. The Manchester College of Technology is controlled by the Local Education Authority.

¶ A part of this sum is payment for work below University standard undertaken by the University on behalf of the Local Education Authority responsible for the provision of technical education in its area, and as such is allowed by the Board of Education to rank in due course for grant from the Board under their Regulations.

* Non-recurrent grant is included here only so far as it appears in the ordinary revenue account of the Institution.

† See Note † to Table 9.

‡ Excluding amounts for the remission of fees. (Total of these appears in Column 11.)

§ These grants are made from the Treasury Recurrent Grants and the Grants from Local Authorities which are paid over to the Central University Authorities of London and Wales for distribution between the various constituent elements of these Universities.

|| Owing to the special circumstances of this College, complete figures for the income and expenditure on tuition as distinct from residence can be given as approximations only.

¶ These Colleges receive certain special grants direct from Local Authorities, which are additional to the general grants paid by the Local Authorities of Wales and Monmouthshire to the University in support of the University and its Colleges.

* Includes the staffs of Departments aided by Advisory and/or Research Grants from the Ministry of Agriculture and Fisheries, most of whom appear in the last column above.

† The Treasury grant to the Universities of Oxford and Cambridge is paid in each case to the University as distinct from its Colleges. The lists of teachers supplied by these Universities accordingly cover only those who hold University appointments. The University of Oxford list includes 299 Lecturers, Assistant Lecturers, Demonstrators, etc., and the University of Cambridge list 348, but some of these teachers are part-time in the same sense as the part-time teachers at other Institutions who are excluded from the above figures, and many of the others hold their University appointments along with College posts, and are thus actually devoting their whole time to teaching.

‡ There is actually no grade of full-time Assistant Lecturer at these Colleges, but certain Lecturers have been classified under this head in order to facilitate comparison with the figures of other Institutions.

§ These were teachers employed at more than one College or School of the University of London.

¶ There are a substantial number of part-time Readers at this University.

* These numbers exclude unbound pamphlets, of which for example there were 284,000 in the library of the London School of Economics.

† Includes part of special Treasury non-recurrent grants for books and binding. The total amount of these non-recurrent grants included in the figures above for all the Institutions was £3,807.

‡ Under the Copyright Act, each of these Universities is entitled to receive on demand a copy of every book published in the United Kingdom.

§ These are the approximate figures given by the University and they do not include the books in the College Libraries or in certain special libraries of the University.

|| The students of this College have access to the General Science Library of the Science Museum at South Kensington.

¶ The discrepancy between this figure and that for the previous year is due to the fact that during the year the Librarian has recalculated the number of bound volumes.

** Includes grants for books and periodicals from the Carnegie Trust for the Universities of Scotland as follows:—Aberdeen University £1,000, Edinburgh University £2,500, Glasgow University £1,000, Glasgow Royal Technical College £120.

* The recurrent grants for each of the academic years 1925-26, 1926-27, 1927-28 and 1928-29 were the same as those for the academic year 1929-30, with the following exceptions:—

Durham Colleges—1925-26 £5,000.

London, St. Mary's Hospital Medical School—1925-26 £10,730, 1926-27 £10,760, 1927-28 £10,570, 1928-29 £10,650.

London, St. Thomas's Hospital Medical School—1925-26 £13,070, 1926-27 £13,180, 1927-28 £13,190, 1928-29 £13,330.

London, School of Hygiene and Tropical Medicine—1925-26 and 1926-27 (each) £7,200, 1927-28 £13,000, 1928-29 £25,000.

London, University College Hospital Medical School—1925-26 £12,500.

Edinburgh University—1925-26, 1926-27, 1927-28 and 1928-29 (each) £81,000.

† As from the academic year 1930-31, the grants for University Education in London were merged in a single comprehensive grant, which was paid to the Court of the University for allocation on its own responsibility to the various purposes of the University, its Colleges and Schools.

‡ A special grant of £212,500 towards the cost of a site in Bloomsbury and accommodation was paid to the University of London in the academic year 1926-27, from a Supplementary Estimate presented to Parliament by the Government.

§ £5,000 of this sum was given for the Welsh National School of Medicine, which was at that time organised as a part of Cardiff University College.

|| These figures include grants paid in accordance with Section 52 and the Sixth Schedule of the Local Government (Scotland) Act, 1929, as follows:—Aberdeen University £6,000, Edinburgh University £10,800, Glasgow University £8,700, St. Andrews University, including Dundee University College £4,500. These grants have now been amalgamated with those paid on the recommendation of the University Grants Committee. Previous to the passing of the Local Government (Scotland) Act, 1929, these grants were paid under Section 2 of the Education and Local Taxation Account (Scotland) Act, 1892.
