

Annual Report of the Department
of Land Records, Bombay, for
1939-40

[For official use only]

No. A.D.P.R.B. 1 of 1940.

Via Poona, 11th November 1940.

From

M. J. DESAI, Esquire, I.C.S.,
Settlement Commissioner and
Director of Land Records, Poona;

To

THE SECRETARY TO GOVERNMENT,
Revenue Department,
Bombay.

Subject.—Annual Report of the Department of Land
Records for 1939-40.

Sir,

I have the honour to submit the Annual Report of the Department of Land Records for the year ending 31st July 1940.

CHAPTER I.

PREFATORY.

1. The charge of the Department was held by Mr. S. Aminuddin, I.C.S., as Director of Land Records from 1st August to 3rd October 1939 and by me for the remaining part of the year. The permanent post of the Settlement Commissioner and Director of Land Records which was held in abeyance by Government Resolution, Revenue Department, No. 7262/28, dated 21st March 1932, has been revived with effect from 1st January 1940, by Government Resolution, Revenue Department, No. 2844/33, dated 24th January 1940; and since then I am holding the charge of that post also. The Settlement Commissioner and Director of Land Records is also the Inspector General of Registration and the Registrar General of Births, Deaths and Marriages. The administrative control of the Photozinc Press which was with the Director of Land Records, was transferred to the Superintendent, Government Printing and Stationery, with effect from 1st April 1940, by Government Resolution, Revenue Department, No. 4529/33, dated 25th September 1939.

2. *Superintendents of Land Records.*—Under orders in Government Resolution, Revenue Department, No. 2844/33, dated 16th December 1935, the districts in the three divisions were re-distributed into three Circles—Northern, Central and Southern—with

the headquarters of the Northern and Southern Circles at Ahmedabad and Belgaum, respectively. The Central Circle with its headquarters at Poona was immediately under the control of the Director of Land Records, who was also the Superintendent for the Central Circle, till 8th February 1940. The post of the Superintendent of Land Records, Central Circle, has been revived with effect from 9th February 1940—the date on which Mr. (now Rao Saheb) V. N. Konnur assumed charge of the post, by Government Resolution, Revenue Department, No. 2844/33, dated 24th January 1940. The Superintendent of Land Records, Central Circle, is also the Personal Assistant to the Settlement Commissioner and Director of Land Records.

The charge of the Northern Circle was held by the following officers :—

1. Mr. A. L. Dias, I.C.S., from 1st August 1939 to 5th October 1939 and again from 1st November 1939 to 10th June 1940.
2. Mr. B. K. Pandya, B.A., from 6th October 1939 to 31st October 1939.
3. Rao Saheb V. N. Konnur, from 11th June 1940 to 31st July 1940.

The charge of the Central Circle was with the Director of Land Records from 1st August 1939 to 8th February 1940. Mr. (now Rao Saheb) V. N. Konnur held this charge from 9th February to 10th June 1940, Mr. A. L. Dias, I.C.S., from 11th June to 29th July 1940 and Mr. S. P. Mohite, B.A., LL.B., from 30th July 1940 to the end of the year.

In the Southern Circle Mr. N. S. Kulkarni, L.Ag., continued as Superintendent of Land Records throughout the year.

Mr. A. L. Dias, I.C.S., also worked as Settlement Officer for the Viramgam and Dhandhuka Talukas in the Ahmedabad district, in addition to his own duties as Superintendent of Land Records, Northern Circle, as per orders in Government Resolution, Revenue Department, No. 1016/39, dated 16th January 1940.

3. *Touring.*—I toured in all the districts of the Province, except Broach and Panch Mahals, East Khandesh, Sholapur, Bijapur and Ratnagiri districts, for inspection of District Survey Offices and City Survey Offices, for testing the measurement work of the District and Cadastral Surveyors and Pot Hissa measurers; and for inspection of village records, and Sub-Registrars' and District Registrars' offices. The total number of days devoted to touring was 149. The Superintendent of Land Records, Northern Circle, toured for 171 days. Of these 171 days, 88 days were devoted by him to revision settlement enquiry work of Viramgam and Dhandhuka talukas. He could tour only in 5 districts of his Circle owing to this additional duty. The Superintendent of Land Records, Central Circle, after assuming charge of the post, toured for 39 days and visited all the districts in his Circle. The Superintendent of Land Records, Southern Circle, toured for 171 days and visited all the 7 districts in his Circle.

CHAPTER II.

LAND RECORDS DEPARTMENT.

4. The functions of the Land Records Department are to provide statistics necessary for sound administration in all matters connected with land, to reduce, simplify and cheapen litigation in the Revenue and Civil Courts, to provide a Record of Rights for the protection of all who hold interests in lands and lastly to simplify and cheapen periodical settlement operations.

5. The Land Records Department has to maintain all survey and classification records up-to-date and for this purpose it carries out field operations preliminary to the incorporation of changes in these records.

A complete Record of Rights and interests in land has been prepared for all unalienated and many alienated villages throughout the Province and steps are being taken to prepare it in the remaining alienated villages.

City surveys form an important part of Land Records.

6. The superior staff of the Land Records Department consists of a Director of Land Records who is also the Settlement Commissioner, the post having been revived from 1st January 1940, 3 Superintendents of Land Records and 20 District Inspectors of Land Records.

The subordinate staff of the Department is divided into three sections:—

(a) the District staff of Circle Inspectors under the Collectors,

(b) the District and Cadastral Surveyors' staff (including the City Survey staff and the Pot Hissa Survey staff) under the District Inspectors, and

(c) the staff in the District Survey offices who keep all the survey records up-to-date.

7. The function of the officers of the Land Records Department in respect of Circle Inspectors' staff is to advise and assist the Revenue Officers who give the actual orders. All the other establishments are directly administered and controlled by the Superintendents and supervised by the District Inspectors of Land Records.

8. *Training of Junior Civilians.*—In the Northern Circle, Messrs. A. E. Shields, I.C.S.; N. M. Wagle, I.C.S.; P. J. Chiumulgund, I.C.S.; and B. P. Dalal, I.C.S.; and in Southern Circle, Messrs. S. Garvin, I.C.S.; E. R. Evans, I.C.S. and M. Zinkin, I.C.S.; were trained in survey and settlement matters.

9. *District Survey Offices—Northern Circle.*—The Central Record Office, Ahmedabad, disposed of 2,612 cases involving 11,070 survey numbers as against 2,007 cases involving 6,117 survey numbers leaving in arrears 215 cases involving 640 survey numbers as against 421 cases involving 1,351 survey numbers of the last year. The disposa

compares favourably with that of the previous year. The realizations from supply of extracts from the survey records and from sale of maps amounted to Rs. 3,453 as against Rs. 3,477 of the last year. The cost on account of pay of the copying clerks during the year was Rs. 760 and their earnings were Rs. 2,633. The staff was self-supporting.

The District Survey Offices, Thana, Nasik, East Khandesh, West Khandesh and Bombay Suburban District in the Northern Circle, disposed of 1,448 cases involving 4,916 survey numbers as against 1,005 cases involving 3,271 survey numbers leaving in arrears 420 cases involving 846 survey numbers as against 483 cases involving 1,459 survey numbers of the last year. The outturn is satisfactory.

The realization from supply of extracts from the survey records and the sale of maps in the District Survey Offices amounted to Rs. 6,797. The cost on account of pay of the copying clerks amounted to Rs. 2,012 whereas their earnings were Rs. 4,749. The copying staff of 3 permanent, and two temporary Utara Karkuns and two candidates, was self-supporting. The Superintendent of Land Records inspected the District Survey Office at Nasik only. The other District Survey Offices could not be inspected by him owing to the settlement work of the Viramgam and Dhandbuka talukas which was entrusted to him in addition to his duties and which occupied most of his time from January to May. The Settlement Commissioner and Director of Land Records inspected the District Survey Offices of Thana and Bombay Suburban District.

10. *Central Circle.*—The District Survey Offices of Poona, Nagar and Kolaba, disposed of 778 cases involving 1,953 survey numbers and 3,066 hissas as against 820 cases involving 1,405 survey numbers and 4,633 hissas leaving a balance of 573 cases involving 697 survey numbers and 5,747 hissas as against 339 survey numbers and 4,065 hissas of the last year. The outturn on the whole is adequate. The balance is heavy as compared with that of the last year, but it is due to the greater number of cases received during the year.

The realizations from the supply of extracts from survey records and sale of maps came to Rs. 5,071. The cost on account of the copying clerks came to Rs. 1,543 while they earned Rs. 3,362. The copying staff consisting of 2 permanent and 2 temporary Utara Karkuns was self-supporting.

11. *Southern Circle.*—The District Survey Offices disposed of 2,761 cases involving 3,797 survey numbers and 25,958 hissas as against 3,622 cases with 4,901 survey numbers and 33,690 hissas leaving a balance of 631 cases with 452 survey numbers and 10,001 hissas as against 702 cases with 503 survey numbers and 10,129 hissas of the last year. The disposal is adequate as some of the surveyors had to be sent out on field work for disposing of urgent measurement cases during the monsoon. The Superintendent of Land Records, Southern Circle, inspected all the District Survey Offices in the Circle.

The realization from the supply of extracts from the survey records amounted to Rs. 10,386 while the cost on account of the 8 permanent and 8 temporary Utara Karkuns was Rs. 5,213. The staff was more than self-supporting.

DISTRICT INSPECTORS.

12. Statement IV shows the routine work done by these officers and the number of days spent on tour for inspection work is shown in column 4 of the statement.

13. *Northern Circle.*—The touring of the District Inspectors in Northern Circle considered from the quantity of test of measurement and classification work is adequate except in the case of District Inspector of Land Records, Surat, in respect of the test of pot hissa measurement work. The crop and other inspection work done by the District Inspectors of Ahmedabad, Broach and Panch Mahals, Bombay Suburban District and Nasik is less as compared with that of the last year but this is due to the special measurement and classification works in progress in those districts. The inspection of crops and waste survey numbers of all other District Inspectors in Northern Circle except East Khandesh is inadequate. These District Inspectors are being asked not to neglect this part of their duty.

14. *Central Circle.*—The touring of the District Inspectors of Land Records in Central Circle is adequate judged from the quantity of test of measurement and classification work taken by them except in the case of Kolaba where the shortage is due to changes in the personnel of the District Inspectors. The inspection of crops and waste survey numbers and Record of Rights inspection is adequate in all the districts except Ahmednagar where the inspection of waste survey numbers and Record of Rights entries is too low. The District Inspector is being asked to take adequate test in this respect.

15. *Southern Circle.*—The touring of the District Inspectors of Land Records in Southern Circle considered from the quantity of test taken is adequate except in Belgaum where the shortage is due to the illness of the late District Inspector of Land Records Mr. Arjungikar and change of hands. The crop inspection of all the District Inspectors of Land Records except Dharwar and Kanara and the inspection of waste survey numbers by the District Inspectors of Land Records of Ratnagiri and Satara are inadequate.

16. All the District Inspectors of Land Records except the District Inspector of Land Records, Ahmednagar, have done adequate inspection of the City Survey offices in their charge.

Measurement Work.

17. *Northern Circle.*—Thirty-three permanent and four temporary Cadastral Surveyors, eight District Surveyors and four Field Party Surveyors were employed on the work throughout the year;

and two temporary Cadastral Surveyors and eleven Maintenance Surveyors did this work for some months of the year. The staff measured 5,672 new hissas and 4,770 survey numbers on private applications and 4,111 survey numbers on Government work. The cost of the staff amounted to Rs. 47,907 while the fees earned (including estimated fees for Government work) came to Rs. 48,019. The staff is self-supporting.

18. *Central Circle*.—Sixteen Cadastral Surveyors and three District Surveyors were employed throughout the year and seven Maintenance Surveyors also did this work for some time in the year. This staff measured 108 new hissas and 2,472 survey numbers on private applications and 2,050 survey numbers on Government work. The cost on account of staff was Rs. 18,322 while the fees earned (including estimated cost of Government work) came to Rs. 19,122.

19. *Southern Circle*.—Fifty-four Cadastral Surveyors and six District Surveyors were employed on the work throughout the year; and five Maintenance Surveyors did this work for some months of the year. The staff measured 3,815 new hissas and 6,586 survey numbers on private applications and 5,775 survey numbers on Government work. The cost of the staff amounted to Rs. 54,420 while the fees earned (including the estimated fees for Government work) came to Rs. 49,212.

The increase in expenditure on account of the staff over receipts in Southern Circle is due partly to the fact that most of the Cadastral Surveyors and District Surveyors have reached the maximum of their grade. The question of increasing the present scale of measurement fees in order to make the staff self-supporting is under consideration.

20. Statement II shows the outturn of measurement and classification work done in each district. In Northern Circle the disposal is adequate although the arrears are more than those of the last year. This is due to the increase in the number of receipts. In Central Circle the disposal compares favourably with that of the previous year. In Southern Circle the disposal is adequate.

CIRCLE INSPECTORS.

21. Statement I shows the work of Circle Inspectors. The average number of days devoted to inspection work by the Circle Inspectors in Northern Circle compares favourably with that of the previous year in the case of Ahmedabad, Thana and East Khandesh districts; and in respect of other districts it is adequate. The inspection of waste survey numbers which is important from the standpoint of Government is adequate in respect of all the districts except Surat. The outturn of work of checking the entries in the Record of Rights compares favourably with that of the previous year in respect of the districts of Ahmedabad, Kaira, Thana, East Khandesh and West Khandesh. In respect of the remaining districts, it does not compare favourably with that of the previous year.

In the Central Circle, the average number of days devoted to inspection is adequate. The inspection of waste survey numbers and the outturn of work of checking the entries in the Record of Rights is adequate.

In the Southern Circle, the average number of days devoted to inspection work compares favourably with that of the previous year, in the case of Dharwar and in the case of the remaining districts, it is adequate. The inspection of waste survey numbers does not compare favourably with last year's figures in Sholapur. In Belgaum and Kanara it compares favourably with that of the previous year. In the case of remaining districts it is adequate. The outturn of work of checking the entries in the Record of Rights compares unfavourably in Sholapur, Satara, Kanara, Bijapur, and Ratnagiri. It compares favourably with that of the previous year, in Belgaum and Dharwar.

The defects noticed in the Circle Inspector's work which came under inspection of the District Inspectors of Land Records, Superintendents of Land Records and the Director of Land Records are:—

(a) Omission to correct the Taluka copies of village maps and copies of maps in villages in accordance with the Kamjasti Patrahs received from time to time.

(b) Neglect in noting in pencil the hissas in the village map and consequent damage to the Gat books by constant handling.

(c) Neglect in the preparation of the new hissa statement.

(d) Notices of mutations were not posted in the "Chavdi".

(e) Neglect in preparing Village Form No. VII-B.

(f) Disagreement between the abstract of Village Form I and that of the District Survey Office.

(g) Village Form VIII-A was not properly maintained and index to it not prepared.

The omissions mentioned above were noticed generally in all the districts. All these omissions have been brought to the notice of the revenue officers by issuing inspection notes, but the compliance with the memos is reported to be unsatisfactory in Southern Circle. Unless the Collectors and the Prant Officers take up the question seriously with the Mamlatdars, mere instructions are not likely to be of much use.

SUB-DIVISIONAL OFFICERS' AND MAMLATDARS' TEST.

22. Statement III shows the inspection work of these officers. The necessary information has not yet been supplied from the district of Sholapur in spite of reminder; so the columns are left blank in respect of this district. The figures given in the statement are not in themselves a criterion of the value of the inspection work. Government in paragraph 2 of Government Resolution, Revenue Department, No. P-62, dated 9th May 1931, have,

therefore, asked the Collectors to offer remarks on the quality of inspection work done by the officers. Accordingly, all Collectors, except the Collectors of Kaira, Broach and Panch Mahals, Surat, Thana, West Khandesh, Nasik, Bombay Suburban District, Poona and Satara have offered their remarks.

The Collector of Ahmedabad remarks that the test of all the officers, is adequate. The Collector of Ahmednagar remarks that the work done by the Prant Officers and the Mamlatdars and Mahalkaris, is fairly sufficient. The Collector of Belgaum remarks that the volume of test and of out-door duties done by the Sub-Divisional officers, the Mamlatdars and the Mahalkari, Chandgad, is substantively larger than that of the previous year. In Bijapur, the Collector remarks that the inspection work of the Prant Officers is far better than that of the previous year particularly in respect of Boundary marks and Village Officer's work; and that of the Mamlatdars and Mahalkaris is better than that of the last year. The Collector of Dharwar remarks that the amount of work done by the Mamlatdars is more than that of the previous year and is on the whole adequate. In Kanara, the Collector remarks that the inspection work done by the Prant Officers is adequate; and that the quality of work done by the Prant Officers and the Mamlatdars and Mahalkaris is fair on the whole. The Collector of Ratnagiri remarks that taking into consideration the other multifarious duties the Sub-Divisional officers, the Mamlatdars and the Mahalkaris have to do, the inspection work done by them is adequate.

Boundary Disputes.

23. The Superintendent of Land Records, Northern Circle, was the British delegate for the settlement of boundary between the Baroda State and the British territory and he did this duty in addition to his own duties. During the year under report three meetings were held by the delegates. The details about the number of boundary dispute cases pending settlement on 1st August 1939, the number of cases decided during the year and those pending on 1st August 1940, are as shown below :—

Year in which the case arose.	No. of cases pending on 1st August 1939.	No. of cases settled.	No. of cases pending on 1st August 1940.
1926-27 	1	1
1928-29 	2	2
1929-30 	1	1
1930-31 	4	4
1932-33 	1	1
1933-34 	1	1
	10	7	3

Out of the 7 cases, 2 were disposed of by the delegates and 5 were referred to higher officers. Of the 5 cases referred to the Director

of Land Records, 2 were disposed of and the remaining three are pending disposal. There are 3 more cases before the Boundary Commissioner for decision. The staff entertained for the purpose worked up to 29th February 1940. The cost of the establishment during the year was Rs. 1,422-7-6 and the total cost since the commencement of the work amounts to Rs. 1,16,510-11-9.

Measurement of Sub-Divisions.

24. *Northern Circle.*—There were two parties in Nasik, one in East Khandesh and one in West Khandesh; and one surveyor was working in the Bombay Suburban District. All these men were working under the control of the respective District Inspectors of Land Records. The temporary staff of 50 pot hissa surveyors under 4 Nimtandars in 4 parties and one surveyor in Bombay Suburban District measured in all 30,844 hissass during the year as detailed in the statement given at the end of the paragraph.

Central Circle.—Two parties in Poona and two in Ahmednagar of 10 and 9 measurers each under a Nimtandar worked during the year under the control of the District Inspectors of Land Records concerned. This temporary staff and 3 Field Party Surveyors who were detailed on the sub-division measurement work, measured in all 31,752 hissass as shown in the statement given at the end of the paragraph.

Southern Circle.—In Belgaum, Bijapur, Kanara, Ratnagiri and Sholapur, 6, 3, 2, 5 and 6 measurers respectively worked during the year. One party of 10 surveyors under a Nimtandar was employed in each of the districts of Dharwar and Satara during the year. All the above establishment worked under the control of the respective District Inspectors of Land Records. The total number of hissass measured by the establishment mentioned above is 26,330. The statement given at the end of the paragraph shows the total number of hissass measured both by the temporary and permanent staff and the total number of hissass which remained to be measured at the close of the fair season.

In all 38,626 hissass, as shown below, were found to be in excess of the number of hissass reported by the Revenue Department in the villages in which the measurement work was done :—

Northern Circle	14,433
Central Circle	20,603
Southern Circle	3,590

This indicates that the figures of hissass are not correctly reported by the taluka officers.

The balance of recovery of pot hissa survey fees in Northern Circle is heavy in respect of the districts mentioned below :—

District.	Amount to be recovered.		
	Rs.	a.	p.
1. Bombay Suburban District	...	17,521	15 8
2. Nasik	...	14,897	3 8
3. East Khandesh	...	6,016	5 10
4. West Khandesh	...	1,465	8 9

In respect of the remaining districts, it is below Rs. 1,000.

In the Central Circle, the balance of recovery is as shown below:—

	District.		Amount to be recovered.		
			Rs.	a.	p.
1. Poona	25,592	12	9
2. Ahmednagar	8,395	12	2
3. Kolaba	36,530	7	10

The balance in Kolaba includes a balance of Rs. 34,194-1-3 of original hissa survey of villages in Mahad Taluka, the recoveries of which taluka have been spread over up to the year 1940-41 as per Government Memorandum, Revenue Department, No. 2657-B, dated 6th February 1939.

The balance of recovery on account of original pot hissa survey in Honnavar and Siddapur Talukas of the Kanara District on 1st August 1939 was Rs. 1,838-8-7. Out of this amount, Rs. 1,054-11-1 have been recovered, leaving a balance of Rs. 777-3-6. In the case of the following districts, the balance of recovery on account of Upkeep Pot Hissa Survey is as shown below:—

	District.		Balance.
			Rs.
1. Belgaum	6,869
2. Dharwar	3,812
3. Ratnagiri	2,121
4. Satara	8,047
5. Sholapur	4,156

In the case of remaining districts in Southern Circle it is below Rs. 1,000.

A party of 10 measurers with a Head Surveyor was employed on the Survey of Inam Villages for Record of Rights purposes in the Satara District at the beginning of the field season under the control of the District Inspector of Land Records. Eleven Inam villages were selected for survey. The detailed measurement of the four villages, viz. Yevateshwar, Mardhe, Nigadivandan and Luman-khol, of which the theodolite survey was completed in the previous year, was finished. Similarly the theodolite and detailed measurement of the Inam Village Gopuj was completed. In the case of the remaining 6 villages, viz. Varud, Mandoshi, Datewadi, Yermal-wadi, Ramnoli Taraf Kudal and Bhogaon, the theodolite work has been done. The detailed measurement work of these villages will be taken up during the next fair season.

The detailed measurement work of the Inam Village Upale in Barsi Taluka of the Sholapur District, taken up for Record of Rights purposes, could not be started during the fair season of 1939-40 owing to the outbreak of plague therein. This work will be taken up during the next fair season.

Statement showing the number of hissas measured during the year.

District.	Number of hissas to be measured during the year including balance of those reported at the beginning of fair season.	Number of hissas measured during the year.	Number of hissas which remained to be measured at the close of the year.

(a) Hissas in villages in which there was not full day's work and which could not therefore be measured (Director of Land Record's No. L.R. 135 of 28th April 1919).

(b) Hissas in which there was full day's work but which could not be measured.

NOTE.—Figures in italic denote the number of hissas measured by the Pot Hissa Surveyors.

25. As a result of mistakes detected by Hissa Survey Parties and Cadastral Survey Staff in the original hissa survey records, assessment was reduced during the year to the extent of Rs. 121-8-3 in Northern Circle, Rs. 37-10-3 in Central Circle and Rs. 79-7-9 in Southern Circle.

26. The following is an account of the hissas surveyed by the Department since the commencement of the operations at no cost to the general tax-payer :—

CHAPTER III.

SURVEY AND SETTLEMENT.

Revenue Survey.

27. No work in connection with the survey and settlement of Inam villages was undertaken during the year.

There were 16 cases for measurement (either betta or part of garden survey numbers) and 63 for survey correction in respect of the reclassification work of fallow garden lands sanctioned in paragraph 5 of Government Resolution, Revenue Department, No. 5357/28, dated 27th May 1936. All the 16 cases of measurement have been disposed of and out of 63 survey correction cases, 61 have been disposed of, leaving a balance of 2. The balance of two cases will be disposed of on receipt of necessary sanction from the Forest Settlement Officer.

The measurement, classification and formation of small survey numbers in the disforested lands in the Nasik District was to be done in four talukas. Out of this, the whole work in two talukas and part of the work in one taluka, was done in the fair season of 1938-39. In the last fair season, the remaining work was completed by the end of March 1940. The barsat work will be completed during the current barsat season.

The forest lands in five villages of the Kalol Taluka, viz. Kanod, Pingli, Bodidra, Satamna and Naranpura, had to be surveyed and classified. Theodolite work of 60 stations was done in the fair season of 1938-39. The remaining work of 23 theodolite stations and measurement and classification of 249 survey numbers was done during the last fair season. The work was completed on 7th March 1940.

There were six special scarcity measurement works in Viramgam Taluka of the Ahmedabad District. All of them have been completed. There were ten special measurement works in connection with the roads and canal in Kaira District. They were taken up and completed during the year. The measurement of Untdi-Dungri road in Bulsar Taluka of the Surat District was taken up and completed. The measurement of Bhandup salt works and of the Cantonment Area of Military Barracks and bungalows at Santa Cruz in the Bombay Suburban District was taken up and completed.

28. Government in their Revenue Department Resolution No. 1016/39, dated 16th January 1940, decided that the work of revision settlement should be started in the order in which the settlements have become due for revision. Accordingly the following officers were appointed fulltime Settlement Officers to undertake

settlement work of the Talukas mentioned against their names for a period of seven months in the first instance :—

Name of the officer.	Name of Taluka.	District.
1. Rao Saheb T. P. Jetli ...	Nadiad, Kapadwanj, Anand, Thasra, Borsad.	Kaira.
2. Rao Saheb D. G. Shaligram.	Malegaon, Baglan, Kalvan.	Nasik.
3. Mr. K. P. Mathrani, I.C.S.	Sirsi, Siddapur, Yella- pur, Mundgod.	Kanara.

Mr. A. L. Dias, I.C.S., Superintendent of Land Records, Northern Circle, was appointed settlement officer, in addition to his ordinary duties, for the revision settlement of the Viramgam Taluka and 12 Government villages of the Dhandhuka Taluka in the Ahmedabad District.

The Settlement Officers of Kaira, Nasik and Kanara assumed charge of settlement duties on 1st February 1940, 23rd January 1940 and 6th February 1940 respectively. These three officers and Mr. Dias, Superintendent of Land Records, Northern Circle, who was appointed as Settlement Officer, Viramgam and Dhandhuka talukas in addition to his duties, were trained in the theory and practice of settlement work and were actually shown by visit to villages for two mornings how settlement statistics should be collected and verified at the village and the line of inquiry to be followed. This training lasted from 24th January to 29th January. The officers concerned spent the rest of the fair season in visiting the villages in the tracts under inquiry for collection and verification of settlement statistics. The following will give an idea about the nature and extent of the touring :—

—	Number of days spent on tour.	Number of villages visited for the purpose of settlement inquiry.	Remarks.
Settlement Officer, Viramgam (Superintendent of Land Records, Northern Circle) ...	85	190	
Settlement Officer, Kaira .	57	67	The Settlement Officer proceeded on leave from 18th April 1940 since which day the post was kept vacant.
Settlement Officer, Nasik .	134	221	
Settlement Officer, Kanara ...	101	137	

The Settlement Commissioner also visited the tracts under inquiry to see that the Settlement Officers were working on proper lines and that the statistics collected were properly sifted. Twelve villages were visited by the Settlement Commissioner in Malegaon (Nasik), 7 in Kapadvanj (Kaira), 18 in Viramgam and Dhandhuka (Ahmedabad) and 11 in Yellapur and Mundgod (Kanara).

29. The enquiry work is in progress in Malegaon and Baglan Talukas in the Nasik District; Sirsi, Siddapur, Yellapur Talukas and Mundgod Mahal in Kanara District. The Settlement Officer, Nasik, is to submit the settlement report of Malegaon and Baglan Talukas to the Collector of Nasik before 1st March 1941; and the Settlement Officer, Kanara, is to submit the report to the Collector of Kanara before 1st July 1941.

It has been directed in Government Resolution, Revenue Department, No. 1016/39, dated 29th August 1940, that the Settlement Officers, Nasik and Kanara, should undertake during the next fair season the settlement work of the Sakri Taluka in the West Khandesh District and the Canal tract of the Kopergaon Taluka in Ahmednagar District and of the Haliyal Taluka and Supa Mahal of the Kanara District respectively. The period of appointment of these two Settlement Officers is further extended up to 15th August 1941.

30. Mr. A. L. Dias, I.C.S., completed the enquiry work and submitted the settlement report of Viramgam Taluka and of 12 Government villages in Dhandhuka Taluka, to the Collector of Ahmedabad for forwarding it to Government through the usual channel, after his review.

CHAPTER IV.

CITY SURVEYS.

31. *Northern Circle.*—There are in all 59 City Surveys out of which 55 are maintained. Two of Kaira District and seven of Thana District are maintained by the Talatis, the technical part of the work being attended to by the Cadastral Surveyors. Out of 37 Village Site Surveys, the maintenance of three Village Site

Surveys—Ville Parle, Juhu and Malad—has been discontinued as per Government Resolution, Revenue Department, No. 6464/33, dated 12th August 1937. The City Survey of Faizpur sanctioned in Government Resolution, Revenue Department, No. 9037/33, dated 3rd September 1938, has been completed. The question of making arrangements for the maintenance of City Surveys of Savada and Faizpur is under consideration. The enquiry work of Paldhi Budruk in East Khandesh District and Naroda in Ahmedabad District is completed.

32. *Central Circle.*—There are in all 13 City Surveys and six village site surveys under maintenance. The maintenance of Wambori City Survey in Ahmednagar District and of Roha and Uran in Kolaba District has been entrusted to the Talatis, the technical part of the work being done by the Cadastral Surveyors in charge of the talukas.

The enquiry work of the village Site Survey of the Inam village Perne in Haveli Taluka and of Wanavari in Poona City Taluka of the Poona District was completed and the writing of the Record of Rights is in progress.

The original city survey of the Inam village Mirajgaon in Ahmednagar District sanctioned in Government Memorandum, Revenue Department, No. 862-E-39 of 3rd June 1939, was taken up. The Survey and Enquiry work has been finished. The writing of Property Register and sanads is in progress.

33. *Southern Circle.*—There are in all 27 City Surveys and six village site surveys under regular maintenance. The enquiry work of Gokak City Survey in Belgaum District was completed. The writing of Property Register and the sanads of this city survey was also completed.

The detailed measurement and the enquiry work of the Ashta City Survey in Satara District, are completed. The writing of Property Register and Sanads is in progress.

The remaining work of Property Register writing of Uppin-Betageri Village Site Survey in Dharwar District was completed.

General Remarks.

34. Statement "A" shows the earning of the city survey maintenance establishment in the Province and the budget expenditure incurred on it during the financial year 1939-40.

On the whole, the City Surveys and their maintenance staff earn more than their cost. In smaller towns the staff is hardly self-supporting. To remedy this, as far as possible, two or more small towns are put in charge of one Maintenance Surveyor and the work of maintaining the Property Register is entrusted to Talatis. In some places, Cadastral Surveyors' work is entrusted to the Maintenance Surveyors to keep them fully engaged.

35. In the majority of old city surveyed towns the system of writing the Property Register on cards has been introduced in the Province. It is invariably introduced in the new city surveys. The system is working satisfactorily.

36. During the enquiry, a large number of encroachments were detected on Government and Municipal lands. Fresh encroachments are also being detected during the maintenance of the city surveys. The progress made in the removal of encroachments on Government land is satisfactory; but the progress made in removing encroachments on Municipal land is not as satisfactory as it should be. The encroachments removed on Government and Municipal land are 2,653 and 11,009 leaving a balance of 5,058 and 58,664 respectively. Statement "B" shows the position as regards these encroachments. The balance of encroachments on Municipal land is due to the indifference of the Municipal bodies.

The maintenance of the village site surveys is not being done properly. The defects have been brought to the notice of the Collectors concerned.

PHOTOZINCO PRESS.

37. The administrative control over this Press was transferred to the Superintendent, Government Printing and Stationery, as per Government Resolution, Revenue Department, No. 4529/33, dated 25th September 1939. The outturn of work of this Press during the year is not therefore given in this report.

CHAPTER V.

RECORD OF RIGHTS.

38. The writing of the combined Village Form VII-XII has already been completed in all the districts of the Province.

39. The Record of Rights (new combined form VII-XII) was for the first time introduced in 16 Inam villages in Belgaum District and in one village of Shirala Peta of Satara District.

40. The Record of Rights was rewritten in the combined Village Form VII-XII in 57 villages of Mulshi Peta in Poona District.

MEASURES TAKEN FOR SUPPRESSION OF CORRUPTION.

41. The orders issued by Government in this respect from time to time were brought to the notice of the staff. There occurred seven cases of corruption in the subordinate services of the Department. Out of these, in one case, the allegations were found to be untrue and the subordinate ultimately retired on invalid pension. In one case, the subordinate was sentenced to one day's rigorous imprisonment and a fine of Rs. 100, in default, further rigorous imprisonment for three months. The subordinate has filed an appeal in this case which is still pending. In one case the acting District Inspector of Land Records was found guilty of writing false diaries and of claiming travelling allowance fraudulently and he was reduced by the Director of Land Records as a clerk on Rs. 70; but Government dismissed him from service. In one case the subordinate was reduced from the post of Maintenance Surveyor to that of Cadastral Surveyor but he was made to retire from service, under Government Memorandum, Revenue Department, No. 8563-E/33, dated 29th November 1939. The enquiry in the remaining three cases is still pending.

SUPERINTENDENCE.

42. The Superintendents of all circles worked hard to maintain effective supervision over the work of the large field staff under their charge. But this part of the work could not be done very well in Northern Circle as the Superintendent of Land Records was employed as Settlement Officer for over three months in the touring season.

Your most obedient servant,

M. J. DESAI,

Settlement Commissioner and
Director of Land Records.
