

THE FUTURE OF CONSTANTINOPLE

BY

LEONARD S. WOOLF

This work deals with one of the most vital problems of British foreign policy, the settlement of the Ottoman Empire after the war. It proposes and discusses a settlement of Constantinople based upon the political, economic, and strategic interests not of one nation, but of all nations. The possibility of its administration by an international organ, modelled on the European commission of the Danube, is examined in detail, and the history and achievements of the Danube Commission are for the first time, in this book, made fully available for English readers.
