CONTENTS

	Page
Historical	27
Determination of the concentration of carbon dioxide in soil air	27
The measurement of the evolution of carbon dioxide from soils	28
Determination of the rate of diffusion of carbon dioxide through soil	29
Experimental	29
Part I. Percentage of carbon dioxide in soil air	30
Part II. Evolution of carbon dioxide from soils	35
1. Free evolution of carbon dioxide from the soil	35
2. Effect of treatment on the evolution of carbon dioxide from soils by the free evolution method	41
a. Effect of lime and straw on carbon dioxide production in Waukesha silt loam	41
b. Effect of calcium hydroxide on carbon dioxide production in Tama silt loam	42
c. Effect of manure and crop residues on carbon dioxide production in Carrington loam	43
d. Effect of sterilization of soil on carbon dioxide production in Carrington loam	43
3. Effect of crop rotation on carbon dioxide production in soils	44
Part III. Manometric method for determining the rate of carbon dioxide production in soils by measuring oxygen consumption	45
Discussion and summary	48
Literature cited	50
Experiment station staff	52
