PREFACE.

This volume is revised under the orders contained in the Punjab Government, Revenue Department, letter No. 2279-R., dated the 14th June, 1928. The lines on which the revision of District Gazetteers is to be undertaken are laid down, in the Government of India, Home Department, letter No. 3375, dated 1st October, 1902 and are as follows:—

The chief difficulty which stands in the way of the periodical revision of the existing Gazetteers, and that reason which has caused so large a portion of their contents to become obsolete, is that they contain a mixture of permanent matter, such as that relating to the history, physical characteristics, religion, ethnography, etc., of the district; of matter which changes gradually but as a rule slowly, such as that dealing with the agricultural and economic conditions; and of ephemeral mattar, mainly statistical, which soon becomes out of date. For this reason, when a new District Gazetteer is issued, it should consist of two volumes, A and B, compiled on the following lines:—

- "(1) In the first edition all descriptive matter should go into the A volume; but the volume should contain only such general figures (incorporated in the letter-press) as are necessary to give point to remarks in the text.

 All detailed statistics should be relegated to the B volume, which would at first consist only of these and of such notes as may be necessary to elucidate them.
- "(2) On the occasion of the next revision, the statistics in the B volume should be re-compiled, and this volume should be expanded by adding to it any matter that might be required to correct or supplement the A volume. Thus if there had been a famine since A was published, if a new railway had been opened, and so forth, information on these points would appear in B as supplementary to the appropriate chapters in A.
- "(3) This process would go on till the time had come for revising the A volume. Then all the supplementary text matter should be incorporated in the new A volume, and B would revert to its original form as a statistical appendix with explanatory notes.
- "(4) A new edition of the B volume should be brought out after each Census. The revision of the A volume must be left to the discretion of the Local Governments. The occurrence of a new settlement will ordinarily be the best time for such revision; but it may well happen that plenty of copies of the original A volume are still available, and that the settlement and lapse of time have not wrought any important change in the conditions of the district. In that case the revision of A should stand over till the stock of it no longer suffices for the demand; but a brief account of the settlement operations, and of the changes which they have produced or disclosed in the state of affairs, described in the A volume, should be prepared by the Settlement Officer, before he is relieved of his duties, for inclusion in the next decennial B volume.

"(5) The statistical part off the B volume should be issued with interleaved blank pages, so that those who use it can have the figures of later years written in. The tables included in the B volume should be drawn up on uniform lines and should contain the main administrative statistics of the district and its tabsils or other sub-divisions.

It is thought, that including the explanatory notes they should not ordinarily exceed a maximum limit of 50 pages.

Instead, of issuing the tables with interleaved blank pages as suggested in para. (5) above, it has been found convenient to print the tables themselves with blank spaces in which to insert the figures of future years. The pages occupied by the statistical matter, thus include the space which in the original scheme would have been appropriated by the interleaved pages, and consequently are somewhat in excess of the maximum fixed in para. (5).

In the Punjal the Settlement Officer is generally entrasted with the revision of the District Gazetteer, and this plan is commended for adoption in other Brovinces.

Supplement to Gazetteer, Part A, as required by Para. 4 (2) of Punjab Government letter No. 670, dated 8th May, 1903.

- (1) A heavy flood occurred in Jumna River in 1924, which damaged the crops badly and destroyed many houses and lives.
- (2) A Paper Mill was started at Abdullapore in 1928 but failed soon after in 1930.
 - (3) Sirhind-Rupar Railway was constructed in 1928.
- (4) Locusts appeared in 1929-30. Measures were taken to protect crops. Remissions were granted in land revenue to relieve zamiodars.
