

## Census of India, 1941

## VOLUME XXIII

# MYSORE 

Part II-TABLES

P. H. KRISHNA RAO, M.A.,<br>(Mysore Civil Service)<br>CENSUS SUPERINTENDENT, MYSORE

## PREFACE

T1HIS volume differs in many respects from its previous counterparts, in the format as well as in its contents. The more convenient size, the absence of lines in the Tables, the dark-blue calico jacket and the gilt-lettered spine-improvements introduced by the Census Commissioner for India-lend it a certain attractiveness.

One complaint to which the previous Census Reports were open, was the pablication of the absolute and the proportional figures in two different volumes which tended to give at times an exaggerated, and often, a distorted idea. That is obviated now by bringing together in this volume, both the main and the subsidiary tables.

There are three series of tables in this volume, viz., (i) Imperial, (ii) Provincial and (iii) State. The first two are obligatory tables prescribed by the Census Commissioner for India, while the third is included by me to supplement and elucidate the Imperial Tables. Imperial Tables IX-Industry, X (i) Unemployment, X (ii) Educated Unemployment and the six Fertimity Tables, were prescribed as additions to the Imperial Series. Of these, Table IX-Industay is not pablished on account of certain glaring inaccuracies in the returns. Table XIV-Variation in Population of Selected Tribes is also not pablished, as the namber of persons returning themselves as Tribal is too insignificant to warrant a separate Table. Tables dealing with 'Crvil Condition by Age for Selected Castes, Tribes and Races'-'Infirmities', and 'Occupation by Caste, Tripe or Race', (Imperial Tables VIII, IX and XI-A
of 1931), are omitted this time by the Census Commissioner for India. The two Provincial Tables, except for a few minor changes, are substantially the same as on the last occasion.

There are altogether nine State Tables in this Volame. Two of these, viz, $V$ (i) Cotiage Industries (General) and VII (i) Structures Classified.by Natúre of Roofing and Use, correspond to Provincial Tables IV and $V$, respectively, of 1931. Supplementary details in respect of these two tables are furnished in Tables $V$ (ii) and VII (ii). State Table III-Population and Litteracy by Caste, is a combination of Imperial Tables XIV and XVII of 1931. State Table IV-Indostrx, embodies the results of the Special Indastrial Census conducted this time along with the general Population Census, and does duty for the omitted Imperial Table IX. Imperial Table IX-(A) (Immigrants mo Selected Abeas) of 1911 is revived this time in a modified form and published as State Table VIImmigrants to Cities. State Table II deals with the urban/rural aspect of literacy in Mysore in detail for the first time. All these tables supplement the Imperial Series, and some of them at least, open up, I trust, new lines of investigation.

The word "Community" is sabstitated this time for "Religion", and totals are given now in all the tables only for "State including C. \& M. Station, Bangalore", instead of the two usual totals, viz., (1) for State including and (2) for State excluding the C. \& M. Station.
P. H. KRISHNA RAO.

## TABLE OF CONTENTS
