CONTENTS

TABLES A-General Population Tables

	Pages
A—I. Area, Houses and Population	1—3
<p>This table shows for each district the area, the number of towns and villages, the number of occupied houses and the total urban and rural population and males and females in the State. Number of houseless persons and institutional inmates are given in the fly leaf of the table.</p>	
A—II. Variation in population during fifty years.	5—7
<p>This table compares the population as ascertained at the census of 1951 of each district in Vindhya Pradesh as now constituted with that of five previous Censuses. Similar comparison is also made in respect of the Administrative Divisions into which the districts are grouped.</p>	
A—III. Towns and Villages classified by population	9—13
<p>The revenue Survey Village has been taken as a Census Village. Persons enumerated within Railway Premises have been included in the Village or Town within the boundry of which such premises are situated. In towns where there are Municipalities the areas having municipal jurisdiction have been taken as a town, disregarding the revenue survey village area.</p>	
A—IV. Towns classified by Population with Variation since 1901	15—23
<p>In this table the population of the towns as ascertained at the Census of 1951 is compared with the population of the five previous Censuses. In the census of 1941 there were only 19 town in the areas now forming the State of Vindhya Pradesh and now the towns are 64. Villages which have the characteristics of town even if the population is below 5,000 have been classified as towns. List of 45 towns other than 1941 census is also given in the flyleaf.</p>	
A—V. Towns arranged territorially with population by Livelihood Classes.	25—29
<p>This table shows the analysis of urban population by livelihood classes instead of by communities as in the previous Censuses. In this table the towns in each district are arranged according to population. In case of municipal towns "M" is shown in brackets after the name of the towns. Others are unclassified towns.</p>	
E.—Summary Figures by Districts and Tehsils	31—43
<p>In this table area, percentage variation, density of population and distribution of population by livelihood classes are shown for the districts and tehsils with the corresponding rural and urban break up. this table corresponds to provincial table I and II of the last census with the difference that the figures of population are now presented by Livelihood Classes and with rural/urban break up instead of by communities. This table has been elaborated since last Census. Rural and urban break up of population for each tehsil has been introduced for the first time.</p>	

TABLES B-Economic Tables	Pages
Indian Census Economic Classification Scheme	45—80
B. I.—Livelihood Classes and Sub-Classes	81—102
<p>This table shows the number of persons deriving their principal means of livelihood from the 8 livelihood classes grouped into the two principal categories of population, namely, agricultural and non-agricultural. Each livelihood class has been divided into three livelihood sub-classes viz. (i) Self supporting (ii) Non-earning dependents and (iii) Earning dependents. Thus the table presents the picture of the distribution of persons economically active, inactive and semi-active.</p>	
B. II—Secondary Means of Livelihood.	103—136
<p>This table shows the number of persons in each of the eight livelihood classes who possess a secondary means of livelihood and cross classifies them (according to the nature of such means of livelihood) under the same livelihood classes. It also shows under each livelihood class, the earning dependents who supplement with their own contribution the resources provided for their maintenance by the persons on whom they are dependent. The contribution made to economic activity by economically, semi-active persons is thus shown in the table.</p>	
B. III—Employers, Employees and Independent workers in Industries and services by divisions and sub-division	137—243
<p>This table shows the classification of the self-supporting persons in non-agricultural classes according to their secondary economic status, namely employers, employees and independent workers and their distribution in the various divisions and sub-divisions of Industries and Services.</p>	
TABLES C-Household and Age (Sample) Tables	
C. I—Household (size and composition)	245—250
<p>This table is prepared from a four percent sample of the households recorded in the National Register of citizens relating to each village or town ward.</p>	
C. II.—Livelihood Classes by age groups	251—259
<p>This table has been prepared from the data collected from 10% sample slips which were taken out from the entire lot of slips when they were initially sorted. This table is new. No smoothing formula has been adopted in preparing the table and the figures have been tabulated as actually returned in suitable age groups.</p>	
C. III.—Age and Civil Condition	261—272
<p>The table contains the information with regards to age and civil condition of the general population on the basis of the data collected from the ten percent sample slips, as in the case of the table C—II. It also contains the figures for all the displaced persons in the districts. The figure for the sample population and the displaced persons population are exhibited side by side and not in separate tables to effect economy. In this table, the figures for the divorced and widowed persons are shown together.</p>	
CIV—Aged and Literacy	273—288
<p>In this table figures of illiterate include figures of partially literate i.e. those who can read simple letters but cannot write one. The details of such persons are given in this table.</p>	

C. V—Single Year age returns (Sample) Tables 289—317

This table was prepared on the basis of data collected from the ten percent sample slips of general population, as in the case of table C II, and the figures have been tabulated as returned without the use of any smothing formula.

TABLE A-I.

This table shows for each district the area, the number of towns and villages, the number of occupied houses and the total Urban and Rural Population and Males and Females in the State. The State of Vindhya Pradesh was formed in the year 1948 by the Union of 34 States of the Bundelkhand and Baghelkhand Political Agencies of Central India and one State of Gwalior Residency.

2. After the transfer of enclaves under the Provinces and States (Absorption of Enclaves Order, 1950) the area of this State is 23,603 square miles, according to the figures supplied by the Surveyer General of India.

3. The Urban population is 305,910. Urban/Rural ratio is 9.91.

4. There are 3,883 houseless persons and institutional inmates in Vindhya Pradesh as shown in the following inset. (The institutional inmates are likely to be 3,683 and houseless persons 200).

State and District						Houseless persons and institutional inmates.
1						2
VINDHYA PRADESH	3,883

TABLE A-II

Variation in population during fifty years

This table compares the population as ascertained at the census of 1951 of each district in Vindhya Pradesh as now constituted with that of five previous censuses. Similar comparison is also made in respect of the Administrative Divisions into which the districts are grouped.

The figures of the previous censuses in respect of all districts, except Sidhi, differ from those shown in the previous census Tables of the various integrating states on account of the following factors:—

- (1) Fusion of 35 States of the Bundelkhand and Baghelkhand Agencies and subsequent transfer of districts and also subsequent transfer of territory from one district to another district of a neighbouring state.
- (2) Promulgation of the Provinces and States (Absorption of enclaves) Order, 1950, with the adjoining States.

The effect of the changes on the population of districts concerned has been calculated and the figures adjusted accordingly for all the districts except for Sidhi district where there has been no territorial change.

The table below gives the increase or decrease in the 1941 census population of the districts on account of the Transfer of enclaves. Sidhi and Shahdol districts are not affected by this transfer. The table also shows the effect on the adjoining States.

TABLE A.V

Towns arranged territorially with population by Livelihood classes

This table shows the analysis of urban population by livelihood classes instead of by communities as in the previous censuses.

2. In this table the towns in each district are arranged according to population. In case of Municipal towns "M" is shown in brackets after the name of the town. Others are all unclassified towns.

TABLE—E

Summary Figures By Districts and Tehsils

In this table area, percentage variation, density of population and distribution of population by Livelihood Classes are shown for the districts and tehsils with the corresponding rural and urban break up.

2. This table corresponds to provincial table I and II of the last census with the difference that the figures of population are now presented by Livelihood Classes and with rural/urban break up instead of by communities.

3. The area figures for districts given in column 2 are those supplied by the Surveyor General of India, and for the Tehsils are those supplied by Deputy Commissioners and adjusted so as to tally with the district figures. In calculating the percentage variation in population, the actual adjusted population of rural and urban areas of each census was adopted.

4. This table has been elaborated since last census. Rural and Urban break up of population for each Tehsil has been introduced for the first time. The additional column 10 relating to density of 1941 provides comparison with the rural and urban density of 1951 of each district and tehsil. The area figures in column 2 are rounded to the nearest integer. The density has been calculated on the actual area figures for districts supplied by Surveyor General India and for the tehsils supplied by the Deputy Commissioners and not on the rounded figures shown in column 2 of the table.

Economic Tables

Indian Census Economic Classification Scheme

The Economic Tables for the 1951 Census are based on the Indian Census Economic Classification Scheme 1951 prepared by the Registrar General, which is reproduced below (with all annexures)

1. 1931 Scheme of Occupations:—The last occasion on which the economic characteristics of the people were not only ascertained but also classified and tabulated on an All India basis was in the 1931 census.

The basis of classification adopted at that census was a Scheme of Occupations consisting of four classes, 12 Sub classes, 55 Orders and 195 Occupational Groups. The total following the occupations for each Class, Sub class, Order and Group was given, together with sub totals for numbers following occupations as "principal occupation" or as "working department" or as "subsidiary to other occupations."

2. I. C. E. C. Scheme:—The scheme of classification set out in this memorandum may be referred to as the Indian Census Economic Classification Scheme. It is based on the 1931 Scheme of occupations. It embodies, however, extensive revision and re-arrangement designed to secure the following purposes, viz:—

- (i) to establish a comprehensive economic classification of the people as a whole, and not merely of persons who are gainfully occupied;
- (ii) to simplify and improve the method of presentation of census economic data; and provide additional data; and
- (iii) to secure international comparability of data as recommended by the Economic and Social Council of the United Nations.

3. Basis of Classification Economic Status and Means of Livelihood:—The 1951 Census seeks to ascertain, the "economic status" and the means of livelihood of every person enumerated. Questions 9, 10 and 11 relate to these economic characteristics. What the enumerators are required to ascertain and record in respect of these questions is explained in Appendix I. The answer to question 10 and the two parts of Question 9 will form the basis of classification of each individual.

4. Livelihood Categories and classes:—On the foregoing basis, the people will be divided into two broad livelihood categories, viz., the Agricultural Classes and the Non-Agricultural Classes.

There will be four Agricultural Classes, defined as below :—

- I Cultivators of land, wholly or mainly owned ; and there dependents.
- II Cultivators of land, wholly mainly unowned ; and there dependents.
- III Cultivating labourers ; and there dependents, and
- IV Non-cultivating owners of land ; agricultural rent receivers ; and their dependents.

There will be four Non-Agricultural Classes, defined as comprising all persons (including dependents) who derive their principal means of livelihood from—

- V Production (other than cultivation),
- VI Commerce,
- VII Transport,
- VIII Other services, and Miscellaneous sources.

All these classes will be referred to as Livelihood Classes.

5. Livelihood Sub-Classes:—Each of the 8 Livelihood Classes will be divided into three sub-classes, with reference to their economic status as below :—

- (i) Self supporting Persons,
- (ii) Non earning Dependents ; and
- (iii) Earning Dependents.

The tests to be applied in determining to which sub-class any individual belongs are defined and fully explained in Annexure I.

6. Economically active, semi-active, and Passive persons:—All non-earning dependents are economically passive. They include persons performing housework or other domestic or personal services for other members of the same family household. But they do not include “unpaid family workers” or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependents are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. [Their contribution to economic activity is, however, taken into account, in the tabulation of data based on secondary means of livelihood] (vide para. 9 below).

All self supporting persons are, ordinarily, economically active. But, there are certain classes and groups which constitute an exception to this rule. These are mentioned below :—

- (i) All Self Supporting persons of Agricultural Class IV,
- (ii) The following group of self supporting persons who are included in Non-Agricultural Class VIII, and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity).
 - (a) Non working owners of non-agricultural property.
 - (b) Pensioners and remittance holders.
 - (c) Persons living on charity and other persons with unproductive occupations, and
 - (d) Inmates of penal institutions and asylums.

7. Classification of economic activities and economically active persons :—Economic activities may be defined as including all activities of which the result is the production of useful commodities or the performance of useful services; but not including the performance of domestic or personal services by members of a family household to one another.

The most important among all economic activities is the cultivation of land (or the production of field crops). It stands in a category by itself. All other economic activities may be regarded as following in another category which may be referred to as "Industries and Services". All these activities may be classified with reference to the nature of the commodity produced or service performed. Under the present scheme, all Industries and Services are classified in 10 divisions; and these divisions are sub divided into 88 sub divisions, as shown in Annexure II. The scope of activities included in each sub-division is indicated by its titles, as well as by the specification of groups which are comprised in them.

Economically active persons engaged in cultivation, or either cultivators or cultivating labourers that is, they are persons of sub-class (i) of Agricultural Classes I to III.

Economically active persons engaged in Industries and Services are classifiable in the divisions and sub-divisions shown in Annexure II. All persons included in each sub-divisions are further divisible into three Sections, viz.—

- (i) Employers
- (ii) Employees, and
- (iii) Independent Workers.

In effecting this classification, no account will be taken of whether the classified person was actually employed or unemployed on the date of enumer-

ation. He should be allocated to that particular description of economic activity from which he has in fact been deriving a regular (that is non causal) income, as his principal means of livelihood.

8. Form and Method of Tabulation:—The replies recorded in Census Slips against census Questions 9, 10 and 11 will be used for classifying every enumerated person within the frame work of economic classification of the people described above. The result will be exhibited in three tables entitled 'The Economic Tables I, II and III'.

9. Comments on Economic Tables:—Economic Table I will show the numbers of 24 livelihood sub-classes grouped under 4 agricultural classes, and 4 non agricultural classes. A complete picture will be presented of Economically active, semi-active and passive persons.

Economic Table No. II—will specify the numbers in each of the 8 classes mentioned above, who possess a secondary means of livelihood; and cross classify them (according to the nature of such means of livelihood) under the same eight classes. [This table is designed to include not only self supporting persons who have more than one means of livelihood, but also earning dependents—who supplement (with their own contribution) the resources provided for their maintenance by the person on whom they are dependent. The contribution made to economic activity by economically semi-active persons (vide para. 6 above will be shown by this Table)].

Economic Table No. III is limited to economically active persons. The number of persons engaged in industries and services as whole, as well as in each division and sub-division thereof will be shown in this table, divided into the three sections "Employers", "Employees" and "Independent Workers".

In all three tables, the number are separated by sex; as well as residence in Urban and Rural areas. The All India Tables will furnish totals by States. The State Tables will furnish total by districts.

10. Comparability:—The principal change involved in the present scheme is the setting up of a comprehensive economic classification of the people, as a whole and not merely of those among them who are engaged in gainful occupation. In the process of sorting of census information, the division of the people into "Livelihood Classes" takes the place of the division of the people into "Communities" at the former censuses.

Consistently with this main purpose, the present scheme of classification is based mainly on the scheme of occupations of former censuses. Comparability with the published census tables of 1931 is secured by the references to the occupational group numbers of the 1931 census which are found under each sub-division in Annexure II.

The United Nations Organization has evolved a Scheme of Classification of all economic activities known as the "International Standard Industrial Classification" Scheme. The scheme of divisions and sub-divisions of industries and services set out in Annexure II has been framed so as to maintain comparability with data arranged in accordance with the I. S. I. C. Scheme. This is explained fully in Annexure II.

Annexure I

Census question 9, 10 and 11 and related instructions

1. The census is concerned with two economic characteristics of every individual—his economic status, and his means of livelihood. The scope and meaning of these expressions will appear from an explanation of three census questions viz. :—

Question No. 9—Economic status

Question „ 10—Principal means of Livelihood ; and

Question „ 11—Secondary means of livelihood.

2. Form of questions :

Question 9—Economic status.

Part one—Dependency—Write 1 for a self-supporting person, 2 for a non-earning dependent, and 3 for an earning dependent. Write the answer in the first compartment.

Part two—Employment—If a self supporting person earns his principal means of livelihood as an employer write 1, as an employee write 2, as an independent worker write 3. Write 0 in other cases. Write the answer in the second compartment.

Question 10.—Principal means of Livelihood—An answer to this question should be recorded on every slip. If the slip relates to a self supporting person record his principal means of livelihood. If the slip relates to a dependent (whether earning or non-earning) record here the principal means of livelihood of the self supporting person on whom he is dependent. The means of livelihood which provides the largest income is the principal means of livelihood for a self supporting person who has more than one means of livelihood. In the case of other self supporting persons it is the only means of livelihood.

Use the following contractions. Write 1 for a person who cultivates land owned by him ; 2 for a person who cultivates land owned by another person ; 3 for a person who is employed as a labourer by another person who cultivates land ; 4 for a person who received rent in cash or kind in respect of land which is cultivated by another person.

For all other means of livelihood write fully and clearly what the person does in order to earn his livelihood and where he does it.

Question 11—Secondary means of livelihood.—For a self supporting person who has more than one means of livelihood write the means of livelihood next in importance to his principal means of livelihood. For an earning dependent write the means of livelihood which provides the earning. Use contractions given in question 10.

For a self supporting person who has only one means of livelihood write O. In the case of non-earning dependent also, write O.

3. Question 9—Economic Status—This question is in two parts. The first part requires the labelling of every person as “a self supporting person,” or “an earning dependent” or “a non earning dependent.” Every single human being must be allotted one of these labels and not more than one of them, and this will be referred to as his Primary Economic Status.

The second part of the question has no application to non earning dependents or to earning dependents. It relates only to self supporting persons; and even among them, these exceptional cases of self supporting persons who support themselves without gainful occupation or economic activity (e.g. rentiers and pensioners) are not covered. All others (that is, all those self supporting persons who are both economically active and gainfully occupied) are to be allotted one or other of the three labels viz., “Employer,” “Employee” or “Independent worker” and this will be referred to as his Secondary Economic Status.

The following extracts from the model instructions to enumerators explain the criteria to be applied and the treatment of border line cases.

“Where a person is in receipt of an income and that income is sufficient at least for his own maintenance then he (or she as the case may be) should be regarded as a “self supporting person” such income may be in cash or kind.

Any one who is not a “self supporting person” in this sense is a “dependent”. A dependent may be either an “earning dependent” or a “non earning dependent”; the test is whether or not he secures a regular income, even though it may be small. Where the income which he secures is not sufficient to support him, that person is an ‘earning dependent’. A person who does not secure any income either in cash or in kind, is a ‘non earning dependent’.

Where two or more members of a family household jointly cultivate land and secure an income therefrom each of them should be regarded as earning a part of the income. None of them is, therefore a none earning dependent. Each of them should be classed as either a self supporting person or an earning dependent according to the share of income attributable to him (or her). The same applies to any other business carried on jointly.

This does not mean that any one who works is necessarily a self supporting person or an earning dependent. Thus for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her economic status is that of a non-earning dependent if she does not also secure an income.

(An) Employer (is) only that person who has necessarily to employ other persons in order to carry on the business from which he secures his

livelihood. A person (who) employs a cook or other person for domestic service should not be recorded as an employer merely for that reason.

Persons employed as Managers, Superintendents agents, etc. (who) control other workers are also employees only, and should not be recorded as employers.

An independent worker means a person who is not employed by anyone else and who does not also employ anybody else in order to earn his livelihood.

4. Question 10—Principal means of Livelihood “Means of Livelihood” of any other individual ordinarily means the gainful occupation which forms the source from which that income which is utilised for his maintenance is normally derived; but it is more comprehensive, in as much as in exceptional case, income may be secured without gainful occupation. “Principal Means of Livelihood” means the same thing as “Means of Livelihood” for every person who has only one means of livelihood. Where a person has more than one that which gives him the greater part of his income is the “Principal Means of Livelihood”. In the sense thus defined, every human being, without an exception, has a Principal Means of Livelihood whether or not he is a self supporting person. Every non-earning dependent is maintained exclusively by the income of some self supporting person on whom he is dependent. Consequently, the Principal Means of Livelihood of the latter is required to be recorded as his Principal Means of Livelihood of the former. The same rule applies to Earning Dependents also (no attempt being made to assess the degree of sufficiency of his own income or the extent of his dependence on others).

Agricultural and non agricultural means of livelihood are distinguished by the manner in which enumerators are required to record the answers to this question. This is important for purposes of subsequent classification of answer. The following extracts from instructions are relevant.

“Four simple contractions have been provided which will cover most cases where the livelihood is dependent on agriculture. Write 1 for a person who cultivates land owned by him; 2 for a person who cultivates land owned by another person; 3 for a person who is employed as a labourer by person who cultivates land; 4 for a person who receives rent in cash or kind in respect of land which is cultivated by another person. If you find that a person falls under two of these categories note that category which provides the largest income against question 10 and second against question 11. No note need be taken of more than two such categories in any case.

In all other cases..... Write fully and clearly what the person does in order to earn his livelihood and where he does it. There are three lines on the slip provided for answering the question Use them fully. Avoid

vague and general terms. Do not write "Service" or "Labour". If you are enumerating a trader, describe the articles in which he is carrying on trade and state clearly whether he is whole sale trader or a retail trader. A retail trader, sells to the public. A whole sale trader does not. If you are enumerating a factory worker give the name of the factory or the product it makes, e.g., Coal mine, Jute Factory, Cotton mill, etc.,

[Note:—The word "owned", used in relation to land, includes every tenure which involves the right of permanent occupancy of land for purposes of cultivation. Such right should be heritable; it may be, but need not necessarily be also transferable].

5. Question 11 Secondary means of livelihood—A self supporting person may or may not have more than one means of livelihood. If he has more than one that which provides the greatest income is recorded under question 10 as the "Principal Means of Livelihood" and the next under question 11 as the "Secondary Means of Livelihood". It has been laid down that no note should be taken of more than two such means of livelihood in any case.

The answer to this question is invariably 'Nil' for non earning dependents. Exhypothesi they secure no income; they are supported by the Principal means of the Livelihood of the person on whom they are dependent which alone is taken to be their only means of livelihood.

In the case of every earning dependent there are two means of livelihood which are combined in order to support him. One is the principle means of livelihood of the person on whom he is dependent. The other is the source wherefrom he secures his own income. The farmer is always to be treated as the "Principal Means of Livelihood" of the "earning dependent" and the later as his "Secondary Means of Livelihood"

6. Further elucidation of the scope and implications of these questions has been provided in supplementary instructions in the form of question and answer.

These are extracted below;—

—Census Question 9 (1)

Question 1. In the Instructions the words are "the test is whether he secures a regular income even though it may be small. Does the use of word 'regular' rule out persons who earn an income by seasonal employment?"

Answer—No. The word 'regular' is used in the sense of 'non casual'. It is not intended to be confined only to income derived from continuous employment. It also includes income derived from seasonal employment. What it does exclude is individual income accruing casually and not constituting a source of income which is regularly depended upon.

Question (2)—The word 'Self supporting' as defined in the instructions means any person whose income is sufficient at least for his own maintenance. Does this mean that an income sufficient for one man is self supporting income? What about his direct dependents—wife, children etc?

Answer—yes. The instructions mean what they say. A person must be deemed to be self supporting if his income (such as it is) is sufficient to support him individually at his present level of living (such as it is). He does not cease to be self supporting merely for the reason that he, his wife and children taken together are not maintained by his own income.

If the wife and children have no income of their own, they are non earning dependents. The instructions provide that their principal means of livelihood should be deemed in every case to be the same as that of the person on whom they are dependent. This would in most cases be the husband or father will also be the head of the household. In those exceptional cases where the husband or father is not the head of the household, and is also not able to support anyone but himself, then, the head of the household in which the non earning dependent is living is the person on whom he (or she) is dependent.

Remember—Every 'family household' is (collectively) self supporting; otherwise it would not exist. The surplus of self supporting persons with in a family household is in every case sufficient to meet the deficit on the earning and non earning dependents in that family household.

Question (3)—In the instructions it is recorded that if two or more members of the family household jointly cultivate land they would be classed as self supporting or earning dependent 'according to the share of income attributable to him or her'. How are these shares to be assigned? What about females who in some cases, take an active part in agricultural operations?

Answer:—The share of the income attributable to a person is what the head of the household (or whoever is the managing member) deems it to be. No attempt should be made to make a detailed calculation of this share. All that has to be ascertained is whether (in the opinion of the head of the household or managing member) the member concerned is entitled to a share which would be sufficient to cover the cost of his own maintenance.

If the answer is 'yes', he is 'self supporting' if the answer is 'no' he is an 'earning dependent'.

The considerations are exactly the same whether the individual is a male or female, an adult or a non adult.

II—Census Question 9 (2).

Question (4)—Are doctors and lawyers, who employ compounders and clerks independent workers or employers?

Answer:—They are employers. A doctor employs a compounder in order to relieve him of part of the work connected with the business on which he is engaged and by which he secures his livelihood. A lawyer employs a clerk for alike purpose.

Question (5) A money lender employs four persons to realise interest. Is he an employer or independent worker?

Answer:—He is an employer. He would be an employer even if he employed only one person provided that person with regularly employed and derived his principal means of livelihood by such employment. Casual employment or part time employment which does not provide the principal means of livelihood of the person employed, should not be taken into account.

Question (6) What is the status of tenants or Zamindars who do not cultivate themselves but employ labourers?

Answer:—If they employ others they are 'employers' provided the purpose of the employer and the nature of the employment are as stated in the answer to the two preceding questions.

Question (7) What is the status of beggars; or orphans in orphanages; convicts in Jail?

Answer:—They fall in none of the three categories. Record O for them.

III-Census Question 10-

Question (8) What is the category of a minor, a blind person or a lady who has land in his or her name but gets it cultivated by labourers.—Category 1 or Category 4?

Answer:—Learn to distinguish between "Cultivation of the land", and "performance of labour-necessary for cultivating the land". There are, of course, millions of persons who perform both functions but the functions are distinguishable and should be distinguished. The man who takes the responsible decisions which constitute the direction of the process of cultivation (e. g. when and where to plough, when and what to sow, where and when to reap and so on) it is this person who should be referred as the cultivator, even though he does not perform any manual labour whatever. The man who ploughs, or sows, or reaps under the directions of someone else is not the cultivator but a cultivating labourer, a different thing altogether.

The cultivator may be the owner of land cultivated. In that case he is category 1, whether or not he also combined in himself of the functions of a cultivating labourer.

Alternatively, the cultivator may be a lessee an agent or manager (paid or unpaid). Even in this case it is immaterial whether this lessee or

(56)

agent or manager also combines in himself, the functions of a cultivating labourer; he (the cultivator) is category 2, and the other person (the owner) is category 4.

Applying these principles, the answer to the question put depends on whether the minor, blind person, or lady does or does not actually direct the process of cultivation. If the person does this, the answer is category 1; otherwise the answer is category 4.

ANNEXURE III

NOTE ON THE RELATIONSHIP BETWEEN THE INDIAN CENSUS ECONOMIC CLASSIFICATION (I. C. E. C.) SCHEME AND THE INTERNATIONAL STANDARD INDUSTRIAL CLASSIFICATION (I. S. I. C.) SCHEME OF THE UNITED NATIONS.

1. Comparison with I. S. I. C. Scheme: The United Nations Organisations has evolved a Scheme of classification of all economic activities known as the "International Standard Industrial Classification" Scheme. The economic and social council of the United Nations has recommended the use of this Scheme by all member Governments "either by adopting this system of classification as a national standard, or rearranging their statistical data in accordance with this system for purposes of international comparability". The present scheme of classification gives effect to the latter of the two alternative forms of this recommendation. There are 10 divisions and 44 major groups of economic activities under the I. S. I. C. Scheme which include Agriculture and, in addition correspond to the 10 Divisions and 88 Sub divisions of Industries and Services under the I. C. E. C. Scheme. The elements of the I. C. E. C. scheme which correspond to each individual Division and each individual Major Group of the I. S. I. C. Scheme are set out in the Annexure-II.

2. Unit of classification: Under the I. S. I. C. Scheme the Unit of classification is the organised "Establishment". The commodity produced or the service performed as a result of the work of the organised establishment is the criterion for classifying the establishment. The classification of the establishment is the classification of every member of the establishment.

Under the present (I. C. E. C.) Scheme the unit of classification is, in every case, the individual. All employers and all Independent workers will be classified with reference to the commodity produced or service performed by them individually this will be same as in the I. S. I. C. Scheme there being no question of an "establishment" distinct from the individual in these cases.

As regards "Employees" all persons engaged in production, commerce or transport (and not being domestic servants) will be classified under the appropriate sub divisions with reference to their own activity, and without reference to that of their employer. Domestic servants will all be classed in one sub division without reference to the nature of their work. All other employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) will be classified with reference to the commodity produced or service rendered by their employers.

Thus, there is a technical distinction regarding the unit of classification adopted in the two schemes. This is unavoidable having regard to the nature of the questions which alone can be put in a general population

census in India. Nevertheless, there will be no difference between the two schemes except as regard the allocation of those "employees" who are individually engaged in activities classifiable as production. Commerce or Transport, and who are employed in "establishment" whose main purpose is classifiable differently from the activity of the individual employee. The proportion of employees of this kind to the total of all active workers in industries and services (as they are organised at present in India) is unlikely to be large enough to make a significant difference to the comparability of data classified under the two schemes.

TABLE B-I

Economic Table B-I

Livelihood Classes and Sub-Classes

This table shows the number of persons deriving their principal means of livelihood from the 8 livelihood classes grouped into the two principal categories of population, namely, agricultural and non-agricultural. Each livelihood class has been divided into three livelihood sub-classes Viz (i) Self supporting (ii) Non-earning dependants and (iii) Earning dependants.

Thus the table presents the picture of the distribution of persons, economically active, inactive and semi-active.

TABLE B-II
Economic Table 11
Secondary Means of Livelihood

This table shows the number of persons in each of the eight livelihood classes who possess a secondary means of livelihood and cross classifies them (according to the nature of such means of livelihood) under the same livelihood classes. It also shows under each livelihood class, the earning dependants who supplement with their own contribution the resources provided for their maintenance by the persons on whom they are dependant. The contribution made to economic activity by economically, semi-active persons is thus shown in the table.

2. All self supporting persons have not secondary means of livelihood. Also a self supporting person whose principal means of livelihood is cultivation of land owned by him, can not derive his secondary means of livelihood from the land owned by him. The same principle applies to other means of livelihood of the agricultural category. The case of earning dependants is otherwise, for the principal and secondary means of livelihood may be the same in their case.

TABLE B-III

Economic Table B-III Employers, Employees and Independent workers in Industries and services by division and Sub-division

This table shows the classification of the self-supporting persons in non-agricultural classes according to their secondary economic status, namely employers, employees and independent workers and their distribution in the various divisions and sub-divisions of Industries and services.

The industries and services are classified, under the present Indian Census Economic classification scheme into 10 divisions which are again sub divided into 88 sub-divisions. The activities (Groups) included in all the sub divisions number 221 which are more comprehensive than 195 adopted in 1931.

TABLE C-I

Household, Size and Composition

This table is prepared from a four percent sample of the households recorded in the National Register of Citizens relating to each village or town ward. The selection of the sample was made as follows :—

The total number of households in the particular National Register for the village or ward was divided by 25 and to the remainder 1 was added. The number thus arrived at was taken as the first sample household and every 25th household was then marked for purposes of selection.

TABLE C-II (Sample)
Livelihood Classes by Age groups

This table has been prepared from the data collected from 10 % sample slips which were taken out from the entire lot of slips when they were initially sorted. This table C-II (Livelihood Classes by age groups) is new. No smoothing formula has been adopted in preparing the table and the figures have been tabulated as actually returned in suitable age groups.

Table C-III

Age and Civil Condition.

This table contains the information with regards to Age and Civil Condition of the general population on the basis of the data collected from the ten percent sample slips, as in the case of the table C-II. It also contains the figures for all the displaced persons in the districts. The figures for the sample population and the displaced persons population are exhibited side by side and not in separate tables to effect economy.

The figures have been tabulated as returned without the use of any smoothing formula as in the case of table C-II.

In this table, the figures for the divorced and widowed persons are shown together.

TABLE C-IV

Age & Literacy

This table was also prepared on the basis of data collected from the ten percent sample strips of general population, as in the case of table C-II. No smoothing formula has been made use of.

In this table figures of illiterate include figures of partially literates, i e. those who can read a simple letter but cannot write one. The details of such persons are given in separate table.

Table C-V

Single year Age returns (Sample) Table

This table was prepared on the basis of data collected from the ten percent sample slips of general population, as in the case of table C-II, and the figures have been calculated as returned without the use of any smoothing formula.

TABLE D II

Religion

This table shows the distribution of population by religions.

The one remarkable thing in this Census is that none of the tribal classes has returned his religion as "tribal". All have been recorded as Hindus.

The proportion of Hindus to the General population is 97·5 percent. After a long interval comes the Muslims who form 2·1 percent of total population V. P. Next to Muslims come Jains who are only 0·33 percent.

It is only the Hindu community who form the bulk of the population.
