PREFACE.

The 1951 Census Report of Bihar which forms Volume V of the Census Report of India, 1951 is divided into two parts : Part I containing the narrative report and Subsidiary Tables ; and Part II containing the Main Tables. To avoid bulkiness, Part II is being presented in two separate volumes. This volume which is the first has been numbered as Part IIA, and contains A—General Population Tables, C—Household and Age Sample Tables, D—Social and Cultural Tables, and E—Summary Figures for Districts, Subdivisions, Revenue Thanas and Police Stations. The second volume—Part IIB contains the B—Economic Tables.

2. Tables A-I to A-IV are similar to Imperial Tables I to IV of earlier census reports. Table A-V corresponds to Imperial Table V, but the distribution of the population has been shown by Livelihood Classes and not by Religion as previously.

3. All the five Tables in the C-Series (Household and Age) are based on samples. The age figures have not been smoothed and are shown as actually returned. Tables C-III and C-IV are similar to Tables VII and XIII of 1931. Tables C-I—Household Size and Composition, C-II—Livelihood Classes by Age Groups and C-V—Single Year Age Returns have been prepared for the first time at this census.

4. Of the Social and Cultural Tables, D-I—Language, D-II—Religion and D-IV—Migrants correspond more or less to Tables XV, XVI and VI of 1931 ; Tables D-III—Scheduled Castes and Scheduled Tribes, D-V—Displaced Persons, D-VI—Non-Indian Nationals and D-VII—Livelihood Classes by Educational Standards are new.

5. Table E—Summary Figures by Districts, Subdivisions, Revenue Thanas and Police Stations, replaces Provincial Tables I and II of earlier census reports.

RANCHOR PRASAD.

A—GENERAL POPULATION TABLES.

TABLE A-I.

AREA, HOUSES AND POPULATION.

This table shows for each district, the area, the number of towns and villages, the number of occupied houses, and the total urban and rural population, male and female.

2. The Dhanbad and Saharsa Sub-Districts appear as separate units in this table for the first time. In the 1941 and older tables, Dhanbad was included under Manbhum and Saharsa in Bhagalpur. The change in treatment is justified because for almost all administrative purposes including the census, they are now treated on an independent footing. In demographic characteristics also, there are marked differences between Dhanbad and the rest of Manbhum (Purulia), and Saharsa and the rest of Bhagalpur.

3. The area figures have been furnished by the Surveyor-General. Due to the integration of the States of Saraikella and Kharsawan with Singhbhum District, its area has increased by 602 sq. miles. On comparison with table I of 1941, some differences will be noticed in the area of a few other districts also. This is due mainly to more accurate surveys by the Survey of India since 1941.

4. "Villages" in column 3 means revenue villages or mauzas other than those which are wholly absorbed in towns, and uninhabited mauzas.

5. "Houses" in columns 5, 6 and 7 means buildings or homesteads with separate main entrances, and not commensal houses as in table I of 1941.

6. The Urban population is 2,704,731 and the urban rural ratio 1 : 14.

TABLE A-II.

VARIATION IN POPULATION DURING FIFTY YEARS.

This table compares the 1951 population of each district with that of the five previous censuses (1901 to 1941). The figures for previous censuses differ in some cases from those given in the old census reports because adjustments have been made for subsequent changes in area or jurisdiction. These figures thus represent the population enumerated within the boundaries of the units *as now constituted*.

2. Since 1941, the States of Saraikella and Kharsawan have been integrated with the district of Singhbhum. Necessary adjustments have been made in the population figures of this district for previous censuses. As Dhanbad and Saharsa which formed part of Manbhum and Bhagalpur have been treated as separate units on the present occasion, adjustments have been made in the previous census figures of these districts also. Details of the area and population for which previous census figures have been adjusted are given below :—

District.	Area in square miles added (+) and excluded (—).	Population of 1941. (added + and excluded —).		
		Total.	Males.	Females.
1. Bhagalpur ..	—2,092	—1,135,818	—578,867	—556,951.

TABLE A-III.

TOWNS AND VILLAGES CLASSIFIED BY POPULATION.

The basis of classification here is numerical, and not urban or rural. The large village may, thus, appear in the same class as minor towns.

2. Cantonments and suburban areas have not been treated as separate units on the present occasion.

3. The floating population, e.g., the houseless poor, wandering tribes, seasonal immigrants, etc., has been included in the population of the towns and villages where they were enumerated.

4. In this table, as in Table A-I, and throughout this volume, the word "village" is used to denote revenue village or mauza.

5. As compared with the table of 1941, there is an increase of 2,534 in the number of inhabited villages and towns. Of this number, 865 is accounted for by the integration of Seraikella and Kharsawan States with the district of Singhbhum. The net increase is, thus, only 1,669. By far the biggest increase 1,266 has occurred in the Santal Parganas district which contains an abnormally large number of mauzas or survey villages, most of them being very small in size.

TABLE A-IV.

TOWNS CLASSIFIED BY POPULATION WITH VARIATION SINCE 1901.

This table gives a list of all towns in the State classified and arranged according to size of population, and compares the population figures, male and female, of six censuses (1901—1951).

2. Twenty-eight towns shown in italics with an aggregate population of 223,242 appear for the first time in this table and in table V. Columns for previous census figures and variations have been omitted in these cases. In case of towns which came into existence before this census but after 1901, column 5 showing net variation between 1901—1951 has been left blank.

3. No adjustments have been made in previous census figures for changes in areas of towns except where a suburb independently shown in some of the earlier census reports, has been amalgamated with the main town in this table. This has occurred in seven cases namely, Patna, Jamshedpur, Muzaffarpur, Dinapore, Katihar, Dhanbad and Chakradharpur.

TABLE A-V.

TOWNS ARRANGED TERRITORIALLY WITH POPULATION BY LIVELIHOOD CLASSES.

This table shows the territorial distribution of the urban population in the State, and also the distribution of the population of each town by livelihood classes. The towns are arranged in each district in order of their population.

2. The following symbols have been used in column 2 of the table :—

M for Municipality.

N for Notified Area Committee.

There are some towns which possess no municipal administration of any kind. In such cases, no symbols appear against their names.

E—SUMMARY FIGURES BY SUBDIVISIONS, REVENUE THANAS AND POLICE-STATIONS.

This table has taken the place of Provincial Tables I and II of earlier Census Reports. Certain items, e. g., number of towns, villages and occupied houses in each revenue thana, and literacy in each police-station, which found place in the older tables have been omitted. Information regarding these will, however, be available in the District Hand-books. By far the most important change is that the distribution of population has been shown this time by livelihood classes, and not by religious communities. For the first time, information has been given regarding area of police-stations.

2. The area figures shown in this Table are based on the records of the State Survey Department. Where necessary, they have been rounded off to the nearest integer.

In some cases, the Surveyor-General's district area totals (calculated from the map) which are shown in Table A-I differ slightly from those given in this Table.

3. There are two cases of overlapping jurisdiction—

(i) Patna City revenue thana is now partly included in the Patna City Subdivision, and partly in the Sadr Subdivision of Patna. The figures for the two parts have been shown separately as Patna City (a) and Patna City (b). These figures have to be added up for obtaining the total population of the Patna City revenue thana.

(ii) A portion of the Bihta police-station lies in the jurisdiction of Maner revenue thana, while another portion is within Bikram revenue thana. The population of each part has been shown separately in the table as the Bihta police-station (a), and Bihta police-station (b). To get the total figure for Bihta police-station, the two should be added up.

4. Since 1941 there have been numerous changes in the jurisdiction of police-stations and a large number of new police-stations have come into existence. There were also some changes in the jurisdiction of police-stations between 1941 and 1931. As village population figures were not compiled on previous occasions, it is not possible now to furnish the correct population figures of the existing police-stations for 1941 or to calculate either their density in 1941 or the percentage variation in population between 1941—31 and 1951—41. Columns 6 to 8 and 10 have, therefore, remained blank for police-stations. It might be mentioned that in the older Census Tables also such information was furnished only for revenue thanas and higher units and not for police-stations.

5. Appendix 'A' at the end of this volume gives the area and population of the urban units under different Revenue Thanas. Reference should be made to Table A-V for the livelihood class distribution of urban areas.

C—HOUSEHOLD AND AGE (SAMPLE) TABLES.

In this series, there are five tables :

- C-I.—Household (Size and Composition) ;
- C-II.—Livelihood Classes by Age Groups ;
- C-III.—Age and Civil Condition ;
- C-IV.—Age and Literacy ;
- C-V.—Single Year Age Returns.

2. All these tables are based on samples drawn randomly. Table C-I, Household (Size and Composition) is based on sample of 1 in every 1,000 house hold. Tables C-II to C-V. are based on a 10 per cent sample extracted by taking every sixth slip as the first sample and selecting every tenth slip thereafter. The method of extraction of sample for Table C-I, is explained in the fly-leaf of that table.

3. ' Age ' means number of completed years on the 1st March, 1951.

**C-I.—HOUSEHOLD (SIZE AND COMPOSITION).
(SAMPLE TABLE.)**

This Table shows the distribution of sample households by size and their composition with reference to family relationship and age-group (infants, non-adults and adults) in the State and in each Natural Division and District with rural and urban breakup.

2. 'Household' includes all persons living together in the same house and having a common mess.

3. One household in every thousand was taken as a sample. The samples were selected from the National Registers of Citizens. The first sample was obtained by dividing the number of households in each tract by 1,000 and adding 1 to the remainder. Every 1000th household thereafter was taken as sample.

D—SOCIAL AND CULTURAL TABLES.

TABLE D-I—LANGUAGES.

(i) MOTHER TONGUE

This Table corresponds with Part I of Table XV of 1931, and with Table X of 1921. It gives the number of persons males and females, in the State and in each Revenue Division and District, speaking different languages as mother tongue. The different languages returned have been grouped for convenience of study and comparability with past Census data under the following broad heads :—

1. Indo-Aryan ;
2. Munda ;
3. Dravidian ;
4. Other languages of India ;
5. Asiatic languages foreign to India ; and
6. European languages.

Within each group. the languages have been arranged according to the number of speakers.

2. As in the past, figures for Urdu and for Bihari and Hindi dialects have been shown with Hindi in the Table. Separate figures for each are however noted below:—

Note:—The small numbers shown against Maithili, Magahi, Bhojpuri, Kurmali, Nagpuri, Gawari, Kharwari, etc., should not be understood to mean that these dialects or languages have gone out of vogue. In actual fact, the vast majority of the population still use them, but they preferred to return their mother tongue simply as "Hindi".

3. As in 1931, a large number of languages have been returned as mother tongue although the number of speakers of some was small. Languages with small numbers have been clubbed together under relevant classes as shown below:—

TABLE D4—LANGUAGES.

(ii)—BILINGUALISM

This Table corresponds with Part II of Table XV of 1931. It gives the number of persons in the State and in each District, who commonly use another Indian Language in their every-day life in addition to (and sometimes largely in supersession of) their mother-tongue.

2. Column 2 gives the total number of persons who have as their mother-tongue the language mentioned in column 1. Column 3 shows the total number of persons from among those shown in column 2, who use a subsidiary language. The number of persons using different subsidiary languages have been shown in column 4, against each subsidiary language.

3. Figures for subsidiary languages which are used by a few persons only have been clubbed together under "Others". Details of these are given below :—

Mother Tongue.	Names of subsidiary languages included in "Others".	District from where returned and number of persons.

TABLE D-IV.—MIGRANTS.

This Table which corresponds with Table VI of 1931 and Table XI of 1921 shows the birth-places of the population enumerated in the State. The district of birth has been noted for persons born within the State ; for persons born in other States of India, only the name of the State is given ; for persons born outside India the country of birth has been noted.

2. Saharsa formed part of the district of Bhagalpur till recently and the separation is not yet complete. The same applies to Dhanbad which was included in the district of Manbhum. In a large number of cases, it was not clear from the answers recorded in the enumeration slips whether the reference was to the undivided districts or to the new units. In column 1, therefore Saharsa has been shown with Bhagalpur, and Dhanbad, with Purulia.

TABLE D-V (i)—DISPLACED PERSONS BY YEAR OF ARRIVAL.

This table relates to displaced persons from Pakistan enumerated in Bihar. "Displaced person" means any person who entered India having left or been compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the Dominions of India and Pakistan.

2. The table has been divided into two parts. Part (i) shows for the State and for each Revenue Division and District the number of displaced persons from Western and Eastern Pakistan by the year of their arrival in India. The period covered is from 1946 to February, 1951.

TABLE—D-VII.
LIVELIHOOD CLASSES BY EDUCATIONAL STANDARDS.

This Table shows for the State and for each District the number of males and females of different Livelihood Classes who are literates or educated.

2. 'Literates' that is persons who can read and write but have not passed the Middle or any higher examination, have been shown first. The number of persons who have passed the Middle and higher examinations has been shown thereafter separately for each grade or standard.

3. For arriving at totals for different standards, only such persons have been counted as have not passed a higher examination. Thus a person with the degree of Master of Arts or Science has been shown only under that head and not also under B. A. or B. Sc. or lower standards though he has no doubt also passed B. A. or B. Sc. and lower examinations.

4. Persons who have passed examinations, such as Prathama, Madhyama, Sahitya-ratna, Visharad, Alim-Fazil, etc., have been shown under "Others".
