## P R E F A C E .

---

The Census of 1951 was taken between the 9th February and the 3rd March, 1951 (inclusive). The first twenty days from 9th February were employed in taking a house to house count of every individual in the State and recording his return on a census slip. The slip was thereafter copied on the National Register of Citizens. The sunrise of the 1st March was the reference date for verification of this enumeration and three days from the 1st to the 3rd March were employed in verifying the record written up to the midnight of the 28th February. Births which were not recorded in the first round were now recorded, deaths which had occurred between the visit on the first round and sunrise of the 1st March were cancelled, and new arrivals between the date of the first round and the reference date were recorded provided it was ascertained that they had not been recorded to their knowledge elsewhere.

Simultaneously, the National Register of Citizens, containing the record of every individual was copied from the pad of slips. This was designed to act as a check to the work done by the enumerator.

The twenty three days period of enumeration, devised primarily to lighten the burden of unpaid enumerators, was also calculated to neutralise, the considerable volume of short-term migration which is a notable feature of the population of the State.

The following is a list of questions put to every individual in the country:—

- (1) Name including father's or husband's name and relationship to the head of the house hold.
- (2) What is your:—
  - (a) Nationality ?
  - (b) Religion ?
  - (c) Social group ?
- (3) Are you unmarried, married, widowed or divorced ?
- (4) What is your age on last birthday ?
- (5) Were you born in this district ? If not, in what district and State ?
- (6) Are you a displaced person from Pakistan ? If so, when did you come to the Indian Union and from which district of Pakistan ?
- (7) What is your mother tongue ?
- (8) What other Indian language do you commonly use ?
- (9) Part I—Are you a self-supporting person, a non-earning dependant, or an earning dependant ?

(9) Part. II—Are you ordinarily:—

- (a) an employer ?
- (b) an employee ?
- (c) an independent worker ?

(10) Principal means of livelihood.

(11) Secondary or subsidiary means of livelihood.

(12) Can you:—

- (a) Read ?
- (b) Write ?
- (c) Read and write ?

( Give the highest form reached or examination passed)

(13) In case of persons afflicted by any of the infirmities, namely, Blindness, Insanity Deaf-mutism, Leprosy, write the name of the infirmity.

(14) Sex (whether male or female).

Answers to certain questions were to be recorded with the use of contractions or abbreviations and full answers to other questions.

Fuller tabulation for answers to question 6 was made than has been presented in this volume. The results will not be published, but kept in the unpublished records of the Census Department.

Question 13 was not an all India question, but devised by the Governments of Rajasthan and Ajmer.

The following is the facsimile of a Census enumeration slip.

For facility of reference the following brief instructions issued to enumerators are reproduced;

Census questions with brief instructions:—

- (1) Name and relationship to head of household—After the name write 1 for the head of the household. For near relations *viz.* wife, husband's son daughter, brother, sister, father, mother, write actual relationship in full. For other distant relatives like cousins, etc. write 2. For unrelated persons like guests or visitors or friends, or menials or domestic servants living in the household write "0".
- (2) Nationality, religion and Social Groups—Part (a) Nationality: Write "I" for all Indian nationals, for others write nationality in full. Part (b) Religion: Write "हिं" for a Hindu, "मु" for a Muslim, "ख्रि" for a Christian, "जे" for a Jain. and "सि" for Sikh. For others, write fully as actually returned. Part (c) Social Groups: Write "ए" for an Anglo Indian, write "0" for any person who says he is not a member of any caste or tribe. Write 1 for any person who is a member of one of the castes mentioned in the list of non-backward castes supplied to you. In all other cases, write the name of the caste or tribe as returned by the person enumerated.
- (3) Civil Condition—Write "कु" for unmarried, "स" for married, "वि" for widowed; if divorced, write "अ".
- (4) Age—Write age last birthday, *i.e.*, the actual number of completed years. Write "0" for infants below one year of age.
- (5) Birth place—Write 1 for every person born in your district. For those, born in other districts of Rajasthan, write the name of the district, and the name of the state or country, where he was born if born outside Rajasthan.
- (6) Displaced person from Pakistan.—Apply the definition of a displaced person a given in the detailed instruction. If the person enumerated is not a displaced person, write "0" in both compartments. If he is a displaced person, write the date of arrival in India in the first compartment, and the district of origin in Pakistan in the second compartment.
- (7) Mother tongue.—Write "हिं" for Hindi, "गु" for Gujrati, "ब" for Bengali, "प" for Panjabi. For any other language write the mother tongue fully.
- (8) Bilingualism—If a person commonly speaks any Indian language other than his mother tongue, record it. For those who do not commonly speak any Indian language other than their own mother tongue, write "0".
- (9) Economic Status.—Part I—Dependency:—Write "क" for a self-supporting person., "नहीं" for a non-earning dependant, and "कुड" for an earning dependant. Write the answer in the first compartment.

Part II—Employment:—If a self-supporting person earns his principal means of livelihood as an employer, write "स"; as an employee write "नो"; as an independent worker, write "व". Write "0" in other cases, that is, in the case of non-earning dependants and earning dependants, or in the case of those who earn their liveli-

hood neither as an employer nor as an employee nor as an independent worker (*i. e.* those who live on the income without any work *e. g.* pensioners *etc.*). Write the answer in the second compartment.

- (10) **Principal Means of Livelihood.** — The answer to this question should be recorded on every slip. If the slip relates to a self-supporting person, record his principal means of livelihood. If the slip relates to a dependant (whether earning or non-earning), record here the principal means of livelihood of the self-supporting person on whom he is dependant. The means of livelihood which provides the largest income is the principal means of livelihood for a self-supporting person who has more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

Use the following contractions:

Write (ज. खु. क.) for a person who cultivates land owned by him; (क. ल.) for a person who cultivates land owned by another person; (म. क.) for a person who is employed as a labourer by another person, who cultivates land; (ज. गे. क.) for a person who receives rent in cash or kind in respect of land which is cultivated by another person.

For all other means of livelihood, write fully and clearly what the person does in order to earn his livelihood and where he does it. Avoid vague and general terms. Do not merely write "Service" or "Labour". If you are enumerating a trader, describe the articles in which he trades and state clearly whether he is a wholesale trader or a retail trader. If you are enumerating a factory worker, give the name of the factory in which he works, or the product he makes or helps in making.

- (11) **Secondary Means of Livelihood.**—For a self-supporting person who has more than one means of livelihood, write the means of livelihood next in importance to his principal means of livelihood. For an earning dependant, write also the means of livelihood which provides the earning. Use abbreviations given in question 10 for the four agricultural classes.

For a self-supporting person who has only one means of livelihood, write "0" in this question. In the case of non-earning dependant also, write "0" in this question, because only the principal means of livelihood of the person on whom he is dependant needs to be recorded in question 10 in his case.

- (12) **Literacy and Education.**—Write "0" for a person who can neither read nor write, write "प." for a person who can read but cannot write; write, "प. लि." for a person who can both read and write. If a person who can read and write, has also passed any examination in which a written test has to be passed, note the highest examination passed in full, instead of writing "प. लि."

- (13) **Leprosy** means corrosive leprosy and should not be confounded with leucoderma. **Blindness** means total blindness of both eyes: **deaf-mute** means one who is both deaf and mute.

- (14) **Sex.**—Write "ग." for a male and "स्त्री" for a female. Eunuchs and hermaphrodites should be treated as males.

The definition of a 'Displaced person' is as follows:—

"A displaced person" means any person who has entered India having left or being compelled to leave his or her home in Western Pakistan on or after the 1st March, 1947 or his/her home in Eastern Pakistan on or after the 15th October, 1946 on account of civil disturbances or the fear of such disturbances or on account of the setting up of two dominions of India and Pakistan. "Children" born to displaced persons after the entry in the Indian Union should not be treated as displaced persons.

It will be seen that Union Tables C. II, C. III, C. IV and C. V have been prepared on a 'Sample population'. The Registrar General for India's instruction for taking the 'Sample' was as follows:—

"Break each pad (of 100 enumeration slips) and stack the slips of the pad, and 'cut' the stack as in a card game. Place the lower portion above the upper portion and then deal the slips into the pigeonholes. You should deal the slips into pigeonholes in the order of 1, 2, 3, 4, 5, S, 6, 7, 8 and 9 successively. All the time, you should watch the slips of "Displaced persons". If you come across any slip of a Displaced person, deal it in the pigeonhole of 'Displaced persons'.

Hence it will be seen that the sample is not a sample of the total population but of the latter excluding the 'Displaced population'.

The Census of 1951 claims several unique features absent in previous Censuses of India. It will be of interest to mention them very briefly:—

- (1) Quite the most unique, and certainly the most stupendous and valuable, feature of this Census was the preparation of an account of every mauza or residential village in India containing its Jurisdiction List number, its authorised name, its area in acres, the number of its occupied houses, its total population and number of literates divided into males and females, and its population divided into eight main livelihood classes, four agricultural and four non-agricultural, each further subdivided into males and females.
- (2) District Handbooks have been the second unique feature of this Census. This Handbook series to some extent brings the old District Gazetteers up-to-date in both parts : (a) general account and (b) statistics. The former part is greatly abridged while the latter part is expanded a great deal for each district and contains much more Census statistics than were ever before presented but it does not contain other departmental statistics.
- (3) The third unique feature of this Census was the preparation of a complete National Register of Citizens purporting to contain a full Census record of every person counted at the Census of 1951. This was prepared for each village and now forms the basis of the Union's Electoral Rolls.
- (4) The fourth unique feature of the Census of 1951 was the classification of the entire population according to its economic status into (a) dependency and (b) employment. Under (a) the population was divided into (1) Self-supporting persons, (2) earning dependants and (3) non-earning dependants, and under (b) into (1) employers, (2) employees and (3) independent workers.

- (5) The fifth new feature of this Census was the preparation of an account of households and families and their composition (Union Table C. I.).
- (6) The sixth new feature was the tabulation by single year ages of a much larger sample population than in previous Censuses (Union Table C. V.).
- (7) The seventh new feature was that no smoothing formulae were applied to the age returns as furnished by the respondent. The actual ages returned have been shown in groups and single years.
- (8) Last but not the least in importance is the Sample verification of the Census Count by Magistrates.

I cannot acknowledge too fully the debt I owe the following gentlemen in the preparation of the Census Publications.

Shri P. N. Kaul, Central Tabulation Officer, New Delhi.

Shri O. B. Mathur, Deputy Census Superintendent, Jodhpur.

Shri Abdul Ghaffar, Deputy Census Superintendent, Udaipur.

Shri Harish Chandra Totuka, Deputy Census Superintendent, Jaipur.

Shri Shyamlal Bhatnagar, Assistant Superintendent of Census Operations.

**SUBSIDIARY TABLE 1.1**  
**Area and population, Actual and Percentage by Tehsil Density.**

This table is prepared from the main table 'E' "Summary figures by districts and tehsils" given in Part II-A of the Census report 1951. The area figures supplied by the District authorities have been made use of, as the Surveyor General of India was unable to supply the area figures down Tehsil level.

The total area and the population of all the tehsils falling under the different density groups, together with the percentage which they bear to the total area and population respectively, are given side by side for each district, Natural Division and the State.

There is not a single tehsil falling under the density group 450 to 600 and 600 to 750. There is only one tehsil Jaipur, in the density group 750 and over. The details are given below :—

<i>Names.</i>	<i>Density 750 and over.</i>			
	<i>Area.</i>	<i>Percent.</i>	<i>Population.</i>	<i>Percent.</i>
(1) Rajasthan State .. .. .	553	0.4	425216	2.8
(2) East Rajasthan Plain Division .. .. .	553	1.9	425216	6.4
(3) Jaipur district .. .. .	553	9	425216	26

The relevant columns 25 to 36 of the table have been omitted from printing in the following pages.

**Variation and Density of General Population**

This table is prepared from the main table A-1 (Area, Houses and Population) and table A-II (Variation in population during 50 years) given in Part II--A of the Census Report 1951. In calculating the density for 1941, 1931 and 1921, the population figures have been adjusted to represent the population of the district as composed on March 1, 1951 and the figures of area for each district supplied by the Surveyor-General of India have been made use of.

## SUBSIDIARY TABLE 1.2 (a)

### Agricultural density compared with General density.

This table has been prepared to give a comparative idea of general density i.e. the number of persons (total population) per square mile of the total surface area, and the agricultural density i.e. the number of persons depending of agricultural occupations per square mile of cultivated land. The figures of cultivated land have been supplied by the Director of Agriculture, Rajasthan who says that they are estimates. The agricultural population has been based on the Economic table I published in Census Report of 1951 Pt. II-B.

Figures in Column (2) have been derived as follows :—

Total Cultivated area in Sq. miles.

Total Agricultural Population.

Column 3 of the table has been based on the Subsidiary Table 1.2 (Variation and density of general population.)

## SUBSIDIARY TABLE 1.3

### Mean Decennial Growth Rates during Three Decades—General Population.

This table is prepared from main table—A-II (Variation in Population during 50 years) given in Part II-A of the Census Report of 1951 and from vital statistics supplied by the district officers for such areas for which these figures could be available.

2. The present Rajasthan consists of a number of former independent states of Rajputana where, in most cases, there was no arrangement for the maintenance of records on vital statistics, and therefore it was not possible to prepare a table to include such of the districts for which vital statistics were not available. Vital statistics for former Bharatpur State and Ajmer Merwara only being available, the same have been included in the table and the rest of the units have not been taken into consideration.

3. Vital Statistics for most of the Units being not available, the respective related columns have been left blank.

4. Columns (2) to (31) of the table were filled in as follows :—

*Columns (2) to (4).*—These are arithmetical mean of the Census general population at the beginning and at the end of the decade in each column.

*Columns (5) to (7).*—These are arithmetical mean of the general population of the area under registration at the beginning and at the end of the decade in each column.

*Columns (8) to (10).*—These are the differences between the Census general population at the end and at the beginning of the decade in each column.

$$\text{Column (11)} = 100 \times \text{Col. (8)} \div \text{Col. (2)}.$$

$$\text{Column (12)} = 100 \times \text{Col. (9)} \div \text{Col. (3)}.$$

$$\text{Column (13)} = 100 \times \text{Col. (10)} \div \text{Col. (4)}.$$

*Columns (14) to (16).*—These are the total number of births in the general population registered during the decade in each column.

$$\text{Column (17)} = 100 \times \text{Col. (14)} \div \text{Col. (5)}.$$

$$\text{Column (18)} = 100 \times \text{Col. (15)} \div \text{Col. (6)}.$$

$$\text{Column (19)} = 100 \times \text{Col. (16)} \div \text{Col. (7)}.$$

*Columns (20) to (22).*—These are the total number of deaths in the general population registered during the decade in each column.

$$\text{Column (23)} = 100 \times \text{Col. (20)} \div \text{Col. (5)}.$$

$$\text{Column (24)} = 100 \times \text{Col. (21)} \div \text{Col. (6)}.$$

$$\text{Column (25)} = 100 \times \text{Col. (22)} \div \text{Col. (7)}.$$

**SUBSIDIARY TABLES 1.4, 1.4 (a), 1.4 (b) and 1.4 (c).**  
**Immigration.**

---

---

These tables have been prepared from the Main Table D-IV Migrants, given in Part II A of the Census Report, 1951. It has four parts :

Subsidiary Table 1.4 shows the total immigrants into each district of Rajasthan from groups of States of India distinguished as adjacent States and other States of India as also from places outside India.

Subsidiary Table 1.4 (a) shows inter stata migration in districts.

Subsidiary Table 1.4 (b) shows comparative percentages of immigrants into each district of Rajasthan from places within India and of those from outside India including Pakistan.

Subsidiary Table 1.4 (c) shows actual figures of immigrants into each district of Rajasthan from each individual State of India together with their occupational classification into agricultural and non-agricultural classes separately. There is a similar separate Table for Ajmer State also.

The following States have been considered to be adjacent States in respect of Rajasthan :

- |                     |                    |                 |

**SUBSIDIARY TABLE 1.5, 1.5(a) and 1.5(b)**  
**Emigration.**

---

---

This table is prepared from the main table D-IV 'Migrants,' given in the Census Report, 1951, Part II-A and from the information supplied by the Superintendents of Census Operations of the other States of India. Information in respect of persons born in Rajasthan and Ajmer States and residing outside India was not available and is, therefore, not included in the table. This will, however, have little effect on the natural population given in the table because the number of such persons would be negligible.

Natural Population means and includes:

- (i) Persons born in these States and also enumerated therein; plus
- (ii) Persons born in these States and enumerated in other places. It excludes person enumerated in these States but born elsewhere.

This table has three parts :

Subsidiary table 1.5 shows only the total figures of emigrants from these states to places in India classified separately as (1) adjacent States and (2) other States.

Subsidiary table 1.5(a) shows detailed figures of emigrants from these States to each of the States treated as adjacent States as well as as other States. There is a similar table from Ajmer State.

Table 1.5(b) shows the strength of emigrants from Rajasthan in each of the districts of each individual State of India where they have been enumerated together with their means of livelihood classification. There is a separate table for Ajmer State.

## SUBSIDIARY TABLE 1.6.

### Migration between the State and other parts of India.

This table gives the Migration between Rajasthan and other parts of India only (excluding Pakistan). The different columns of the statement have been filled in as follows :—

Column (2) = Cols (1) + (14) of Subsidiary Table 1.4.

For column Nos. 3 and 6 the figures for Rajasthan have been taken from Subsidiary Table 3 of Chapter III of the Census of India 1931, Rajputana Agency Volume XXVII (Report and Tables) page 36. (Report). They therefore represent the figures of Rajputana as composed in 1931 without adjustment due to change of area in the decade. Similarly figures for Ajmer State have been taken from Subsidiary Table 3 of Chapter III of the Census of India 1931 Ajmer Merwara Volume XXVI (Report and Tables) Page 17 (Report).

Column (4) = Col. (2) — Col (3).

Column (5) = Col (5) + Col. (8) of Subsidiary Table 1.5

Column (7) = Col. (5) — Col. (6).

Column (8) = Col. (2) — Col (5).

Column (9) = Col. (3) — Col. (6).

## SUBSIDIARY TABLE 1.7.

### Variation in Natural Population.

This table compares the natural population (i.e. the recorded population minus immigrants plus emigrants), in the 1951 Census with that in 1931 and also shows the percentage variation in the net population in each decade.

The columns of the table are filled in as follows :—

Column (2) = Census Population of 1951.

Column (3) = Cols (11) + (14) + (17) + (20) of Subsidiary Table 1.4.

Column (4) = Cols. (5) + (8) of Subsidiary Table 1.5.

Column (6) = Unadjusted Census figures of 1931 (No adjustment is made because corresponding adjustment in the figures of immigrants and emigrants in 1931 from the area transferred during the decade could not be found out).

For Columns (7) & (8) the figures for Rajasthan have been taken from Table 3 of the Census of India 1931 Volume XXVII (Report and Tables) page 36. Similarly figures for Ajmer State have been taken from table 3 of the Census of India 1931 Volume XXVI (Report and Tables) Page 17.

Column (10) =  $\frac{\text{Cols (5) — (9)}}{\text{Col. 9.}} \times 100.$

## SUBSIDIARY TABLE 1-8.

### Livelihood Pattern of General Population.

This table is prepared from main table B-I (Livelihood Classes and Sub-Classes) given in Census Report, 1951 Part II-B.

In column Nos. 2, 3, 4, 5, 6, 7, 8 & 9, figures for each class have been derived from the following formula :—

$$\frac{\text{Population in each of the Class}}{\text{Total Population}} \times 10,000$$

## SUBSIDIARY TABLE 2.2

### Variation and Density of Rural Population.

---

---

This table shows the percentage variation in rural population for each of the last three decades and the number of persons per square mile for 1951.

The adjusted rural population at the previous census is derived as follows: —

The adjusted general population is given in table A-II—Variation in Population during last fifty years—in Part II-A of the Census Report 1951. The adjusted rural population has been obtained by deducting from the adjusted general population the actual urban population determined at each of the previous Censuses presuming as if those areas existed in the present units in the corresponding Censuses.

Area of some of the towns being not available the density of most of the units could not be worked out accurately. The density of districts, where the area of all the units was available has been worked out, while in cases where the area of some only of the total urban units in a district was available and the same was not available for the remaining ones, the area and population of only such of the urban units were taken into consideration, for which such figures were available, in determining the density. In most cases area of one or two towns was not available. The results obtained with regard to the rural density of such districts are therefore approximate but can be fairly relied upon, because the net difference in the result due to above procedure is negligible.

### SUBSIDIARY TABLE 2.3.

#### Mean Decennial Growth Rates during three decades-Rural Population.

---

---

The most important requirements of this table being the availability of figure of vital statistics for the different Units, this table could be prepared for Ajmer State only for which the required figures were available.

In the case of Rajasthan State, figures for vital statistics were not available for any of the rural units and hence only the figures of mean population of the decade for the last three decades have been given against the units concerned and the rest of the Columns have been left blank for want of necessary information.

The mean population of the decade required in columns 2, 3 and 4 was arrived at as follows :—

The adjusted rural population at the beginning and end of the decade was first ascertained by deducting from the total general adjusted population (as given in Main Table A—II-Variation in population during fifty years), the relevant urban population and the mean of the rural population thus obtained at the two Censuses was taken as the mean population for columns 2, 3 and 4. Thus, if at the 1921 Census there were 10 towns in a district and if in the 1931 Census the number differed, for purposes of arriving at the rural population at the beginning and end of the decade 1921-30, the population of the ten places considered as towns at the 1921 Census only was subtracted from the duly adjusted general population as ascertained at the 1921 and 1931 Censuses.

The columns of the table were filled in the same manner as the corresponding columns in the subsidiary table 1.3 as explained in the fly leaf to that table except that the figures in Subsidiary Table 1.3 represent the general population while those in this table represent the rural population.

The figures for columns 14 to 31 were not available for any district of Rajasthan State, therefore the relevant figures for Ajmer State only are shown in the table. /

### Livelihood Pattern of Rural Population.

This table is prepared from the main table B-I—Livelihood Classes and Sub-Classes given in Part II-B of the Census Report of 1951.

Figures in Columns (2) to (9) for each class have been derived from the following formula :—

$$\frac{\text{Rural Population in each class.}}{\text{Total Rural Population.}} \times 10,000.$$

**SUBSIDIARY TABLE 25**

**Immigration into Rural Area. (Actual Returns)**

---

---

This table has been prepared from the District Table D-IV-Migrants—given in District Handbooks of the districts concerned.

It shows the total immigrants into the Rural areas of each district of Rajasthan and Ajmer State, from outside the State, both from other States of India and from beyond India, showing separate figures of (1) adjacent States and (2) other States.

**Livelihood pattern of very large villages.**  
**(Population over 5,000)**

---

There are twelve villages in Rajasthan with a population over 5,000. On the basis of population such villages should have been treated as towns.

This table has been prepared from the Primary Census Abstracts of the districts concerned and shows the distribution of their population in the eight livelihood classes. Out of the twelve villages 7 have a preponderance of Non-agricultural Population.

**SUBSIDIARY TABLE 3.1.**

**Distribution of Population between Towns.**

---

---

This table is prepared with the help of main table A-III (Towns and villages classified by population) and A-V (Towns arranged territorially with population by livelihood classes). It shows, number of persons per town, number per thousand of general population in towns and the distribution of the urban population in the various categories of towns classified on population basis.

The columns of the table are filled in as follows :—

$$\text{Column (2)} = \frac{\text{Urban Population.}}{\text{Total Number of Towns.}}$$

$$\text{Column (3)} = \frac{\text{Urban Population.}}{\text{General Population.}} \times 1,000.$$

$$\text{Columns (4) to (7)} = \frac{\text{Urban population of each population group.}}{\text{Total Urban Population.}} \times 1,000.$$

**SUBSIDIARY TABLE 3.2.**  
**Variation and Density of Urban Population.**

---

This table shows the percentage variation in Urban Population for each of the last three decades and the density of population per square mile for 1951.

This table has been prepared on the basis of main table A-IV (Towns classified by population with variation since 1901). The area figures for individual towns for calculating the density of population, have been used as supplied by the district authorities.

Area figures for many towns have not been made available. In the case of those which have been made available, and in most cases, the area figures represent the municipal limits only or in cases where there is no municipality, such parts as are inhabited; and the land under cultivation etc., attached to the towns has been excluded. But in some cases, the instructions were not carried out to the full and the area figures of the towns, supplied by the district authorities included full Revenue area of the towns as entered in the Revenue Books, including agricultural land attached to them. The Urban population has been obtained by taking population at each census of such areas as were considered urban, in that particular census, and presuming as if those areas existed in the present units in the corresponding Census.

Area of some of the towns being not available, the density of most of the Units could not be worked out accurately. The density of districts, where the area figures of all the Units were available has been worked out, while in cases where the area of some of the total Urban Units in a district was available and the same was not available for the remaining ones, the area and population of only such of the Urban Units were taken into consideration, for which such figures were available in determining the density. In most cases, area of one or two towns was not available. The results obtained with regard to the urban density of such districts are therefore approximate but can be fairly relied upon, because the net difference in the result due to above procedure is negligible.

**SUBSIDIARY TABLE 3.3****Mean Decennial Growth Rates during three decades—(Urban Population).**

---

This table resembles subsidiary tables 1.3 and 2.3 except that those tables represent general and rural population, respectively, while this table gives corresponding information for Urban population. Short-comings in the preparation of this table and the method of its preparation have been explained in the fly leaf of the subsidiary tables 1.3 and 2.3 in sufficient details.

2. Vital statistics for only a few towns being available the required information under various columns could be given only for such of the units for which such information was available. For the rest of the units figures under columns 2, 3 and 4, only, have been shown and the rest of the columns have been left blank.

3. In preparing this table, the following instructions were followed :—

- (i) The mean population of the decade required in columns 2, 3 and 4 was the mean of the population of the places regarded as towns at the beginning of the decade. Thus, if there were ten towns in a particular district at the time of the 1921 Census and if there were twelve towns at the 1931 Census, for the purpose of calculating the mean urban population of the decade 1921-30, the mean of the population of the particular ten places only as ascertained at the 1921 and 1931 Censuses was taken into account for purposes of columns 2 to 4 and the two newly declared towns of 1931 were taken into account for the next decade 1931-40. Similarly, where certain towns were omitted at a particular Census, *e.g.*, at the 1931 Census, but were regarded as towns during the 1921 Census, their population at the 1931 Census was taken into account for the decade 1921-30, but was not taken into account during the decade 1931-40.
- (ii) The registered births during the decade given in columns 14 to 16 and the registered deaths given in columns 20 to 22 relate only to those towns, which were taken into consideration in arriving at the mean population for the area under registration in columns 5 to 7 mentioned above.
- (iii) The remaining columns of the table were filled in the same manner as the corresponding columns in Table 1.3 as explained in the fly-leaf to that table.

## SUBSIDIARY TABLE 3.4

### Towns Classified by Population.

This table is prepared by ascertaining the population in the different classes of towns at the different Censuses from 1921 to 1951 tracing the changes in each class regardless of the towns or cities that make it up. It shows what is happening to the population in terms of its distribution by size of the towns or cities.

2. The columns of the table are filled in as follows :—

Column (2) = The actual number of towns in each class as given in Main Table A-IV of 1951 Census (Towns classified by population with variation since 1901).

Column (3) =  $\frac{\text{Population of the particular class of towns as in 1951}}{\text{Total population of the State in 1951}} \times 100.$

Column (4) =  $\frac{\text{Difference in population between the particular class of towns at the 1951 and 1941 Censuses.}}{\text{The population of the particular class of towns in 1941.}} \times 100.$

Column (5) and (6) are filled in the same manner as Column (4).

## SUBSIDIARY TABLE 3.7.

## Livelihood Pattern of Urban Population.

This table is prepared from main table B-I Livelihood Classes and Sub-Classes given in Part II-B of the Census Report of 1951.

Figures in Columns (2) to (9) for each class have been derived from the following formula :—

$$\frac{\text{Urban Population in each class.}}{\text{Total Urban Population.}} \times 10,000$$

Per 10,000 of urban population belonging to livelihood class.									
Natural Division and District.	1	Cultivators of owned land.	Cultivators of unowned land.	Cultivating labourers.	Non cultivating owners of land.	Persons including dependents who derive their Principal means of livelihood from			
						Production (other than cultivation)	Commerce.	Transport.	Services & other miscellaneous sources.

### SUBSIDIARY TABLE No. 3.9 (a)

Distribution into Agricultural and Non-Agricultural Classes of people living in towns with a population below 5,000 in which the Agricultural population exceeds the Non-Agricultural population.

This table has been prepared from the main table A-V (Towns arranged territorially with Population by livelihood Classes) given in Part II-A of the Report. It has been prepared in two parts:—

Subsidiary Table 3.9 (a) relates to places treated as towns although their population is below 5,000 which have a preponderance of agricultural classes in their population. There are 16 such towns.

Subsidiary Table 3.9 (b) deals with such towns as have a population above 5,000 persons yet have a preponderance of agricultural classes among their population. There are 8 such towns.

The names within brackets in column 2 of each of these tables are those of tehsils in which such towns are situated.

**SUBSIDIARY TABLE 4.1**
**Agricultural Classes per 1,000 Persons of General Population-Number in Each Class and Sub-Class of 10,000 Persons of All-Agricultural Classes; and Comparison with Agricultural Holdings by Size.**

---

---

This table is prepared from the Table B.I(Livelihood Classes and Sub-Classes) given in Part II-B of Census Report, 1951.

The columns of the table are filled in as follows :—

$$\text{Column 2} = \frac{\text{Total Agricultural Classes Population.}}{\text{General Population.}} \times 1,000$$

$$\text{Columns 3 to 5} = \frac{\text{Population of each of the Sub-Classes.}}{\text{Population of Agricultural Classes.}} \times 1,000$$

$$\text{Columns 6 to 9} = \frac{\text{Population of each of the Agricultural Livelihood Classes.}}{\text{Population of the Agricultural Classes.}} \times 10,000$$

The figures for number of holdings by size and their distribution are not available. Column numbers 10 and onward of the Table have, therefore, been omitted.

**SUBSIDIARY TABLES 4.2 To 4.5.**

**Subsidiary Table 4.2 Class I (Cultivators of land wholly or mainly owned and their dependents).**

**Subsidiary Table 4.3 Class II (Cultivators of land wholly or mainly unowned and their dependents).**

**Subsidiary Table 4.4 Class III (Cultivating Labourers and their dependents)**

**Subsidiary Table 4.5 Class IV (Non-Cultivating owners of Land; Agricultural rent receivers and their dependents).**

**Number per 10,000 persons of each Class, in each Sub-Class; Secondary means of livelihood of 10,000 persons in each Class, and comparison with 1931 census**

---

---

The figures in columns 3-4 have been calculated from the Main Table B—I (Livelihood Classes and Sub-Classes) and those in columns 6-20 from the Main Table B—II (Secondary Means of Livelihood) given in Part II—B of the Census Report of 1951.

The columns are filled in as follows :—

Columns 2 to 4 =	Population in each of the Sub-Classes in Livelihood Class I	X10,000
	Total Population of Livelihood Class I	
	Self-supporting Persons of Livelihood Class I, who derive their Secondary means of Livelihood from one of the eight Livelihood Classes.	
Columns 5, 7, 9, 11, 13, 15, 17 and 19 =	Total Population of Livelihood Class I	X10,000
	Earning Dependents of Livelihood Class I who derive their Secondary means of Livelihood from one of the eight Livelihood Classes.	
Columns 6, 8, 10, 12, 14, 16, 18, and 20 =	Total Population of Livelihood Class I.	X10,000

Subsidiary Table 4.3, 4.4 and 4.5 have been prepared in the same way as Subsidiary Table 4.2 and the instructions for filling the various columns of these Tables are similar, except the substitution of the words,

“Livelihood Class II, in Subsidiary Table 4.3,  
 “Livelihood Class III, in Subsidiary Table 4.4 and  
 “Livelihood Class IV, in Subsidiary Table 4.5

instead of Livelihood class I as given in Subsidiary Table 4.2.

Comparison with the 1931 Census figures is not made as the figures cannot be adjusted according to newly formed districts therefore they are omitted in the tables, mentioned above.

## SUBSIDIARY TABLE 4.7

## Progress of cultivation during three decades 1921 to 1951.

This table gives the progress of cultivation during the last three decades for the State and the Natural Divisions only.

Separate figures for the various districts of Rajasthan being not available, have not been given in the Table.

Figures for Rajasthan Hills Division being not available have also not been shown.

The totals shown against Rajasthan State give the totals of the figures shown against the Natural Divisions for which the figures are available and do not include the figures for Rajasthan Hills Division (being not available).

The relevant figures were supplied by Registrar General of India on the basis of statements by prepared by the Central Ministry of Food and Agriculture. Figures are given in units of acres.

## SUBSIDIARY TABLE 4.8

### Components of Cultivated Area per Capita during Three Decades.

For reasons given in the fly leaf Subsidiary Table 4.7 this table also gives statistics for Natural Divisions only excepting Rajasthan Hills Division. Details by districts are not available.

2. In calculations the figures for the different years, the areas and population of the Natural Divisions as composed on March 1, 1951 were taken into consideration.

3. Figures shown against Rajasthan do not contain the figures of area and population of the non-reporting area of Hills Division.

4. Values for (U.S.C.), (U.D.C.), (I.S.C.) and (I.D.C.) were derived from the area figures of Table 4.7-Progress of cultivation during three decades and the Census Population (P.) of the Census year in question (and expressed in cents) according to the formulae.

$$(i) \text{ (U.S.C.)} = \frac{A(1) + A(4) - A(2) - A(3)}{P} \times 100 \text{ cents.}$$

$$(ii) \text{ (U.D.C.)} = \frac{A(2) - A(4)}{P} \times 100 \text{ cents}$$

$$(iii) \text{ (I.S.C.)} = \frac{A(3) - A(4)}{P} \times 100 \text{ cents.}$$

$$(iv) \text{ (I.D.C.)} = \frac{A(4)}{P} \times 100 \text{ cents.}$$

Note :—The above formulae are derived as follows :—

To get unirrigated single cropped area per capita (U.S.C), we first take the average net area sown (A-1), which includes all irrigated area (A-3) as well as the double cropped area (A-2). The double cropped area (A-2) includes the unirrigated double cropped as well as the irrigated double cropped area (A-4). Therefore, to get unirrigated double cropped area, we have to subtract (A-4) from (A-2). In other words, (A-2) minus (A-4) represents the unirrigated double cropped area.

As we have seen, the average net area sown (A-1) includes all irrigated area (A-3), which in itself also includes the double irrigated area (A-4). Therefore, to get unirrigated single cropped area out of (A-1) (the average net area sown), we must subtract from it the entire single irrigated and double irrigated area contained in (A-3) as well as the double cropped unirrigated area contained in (A-2) minus (A-4). In other words :

$$\text{(U.S.C.)} = \frac{A(1) - A(3) - \{A(2) - A(4)\}}{P} \times 100 \text{ cents.}$$

$$\text{(U.S.C.)} = \frac{A(1) - A(3) - A(2) + A(4)}{P} \times 100 \text{ cents.}$$

$$= \frac{A(1) + A(4) - A(2) - A(3)}{P} \times 100 \text{ cents.}$$

We now proceed to the calculation of (U.D.C.) :

As we have seen, (A-2) must contain all double cropped area including double cropped unirrigated as well as irrigated crop. Therefore to get unirrigated double cropped area, we subtract from (A-2) the area (A-4).

$$\text{And, therefore, (U.D.C.)} = \frac{A(2) - A(4)}{P} \times 100 \text{ cents.}$$

Calculation for (I.S.C.) :

As pointed out already, (A-3) must contain all irrigated crop including single cropped area and double cropped irrigated area. Therefore, to get irrigated single cropped area only, you must subtract from (A-3) the area (A-4), which represents double cropped irrigated area.

$$\text{Therefore, (I.S.C.)} = \frac{A(3) - A(4)}{P} \times 100 \text{ cents.}$$

Calculations for (I.D.C.) :

(A-4) represents irrigated double cropped area.

$$\text{Therefore (I.D.C.)} = \frac{A(4)}{P} \times 100 \text{ cents.}$$

## SUBSIDIARY TABLE 4.9

## Land Area per Capita (1951) and trend of Cultivation per Capita during Three Decades.

The total land area per capita in column (2) of the table is calculated on the basis of the total geographical area of the district as supplied by the Surveyor General of India.

2. The cultivated and cultivable area per capita in column 3 is not available as the information regarding fallow lands, current and old, forest and other areas which can be brought under cultivation is not available.

3. As in the case of Subsidiary Table 4.7 the statistics in this table relate to those Natural Divisions only for which figures were available.

4. The columns of this table are filled in as follows :—

$$\text{Column (2).—Total land area per capita} = \frac{\text{Total land area (in acres).}}{\text{Population}} \times 100.$$

$$\text{Column (3).—Cultivated and cultivable area per capita} = \frac{\text{Total cultivated and cultivable area (in acres).}}{\text{Population}} \times 100.$$

Columns (4) to (7).—(Area of cultivation per capita) is the sum of the figures in Table 4.8, i.e., (U.S.C.)+(U.D.C.)+(I.S.C.)+(I.D.C.) in each year.

## SUBSIDIARY TABLE 4.11

## Distribution of Cultivated area and Density on Cultivated land.

This table shows the total cultivated area, along with Acres of cultivated area per capita and the number of persons per square mile of cultivated area.

The cultivated area figures used in this table are supplied by the Agriculture Department, Rajasthan Government, and are approximate. The Districts have been shown in descending order according to the percentage of available cultivated area to the total surface area in each district.

The columns have been filled in as follows :—

$$\text{Column (2)} = \frac{\text{Total Cultivated Area}}{\text{Total Area.}} \times 100$$

$$\text{Column (4)} = \frac{\text{Total Population.}}{\text{Total cultivated Area in Sq. miles.}}$$

$$\text{Column (5)} = \frac{\text{Total cultivated Area in Acres.}}{\text{Total Population.}}$$

Column (3) Shows the actual figures in thousand acres of cultivated area as supplied by the Agriculture Department Rajasthan Government.

1. These tables have been prepared in three parts ; Sub-tables 5.1 relates to General population while 5.1 (a) and 5.1 (b) relate to Rural and Urban population respectively.

2. These tables have been prepared from main table B-I (Livelihood Classes and Sub-Classes) and Table B-III (Employers, Employees and Independent Workers by Industries and Services Divisions and Sub-divisions) given in Part II-B of the Census Report, 1951.

3. The columns of the table are filled in as follows :—

Columns 2, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21, 23 & 25 Actual figures taken from Economic Table III.

Column 4 =  $\frac{\text{Total number of persons in Non-agricultural Classes of General population.}}{\text{Total General population.}} \times 1,000$

Columns 6, 8 & 10 =  $\frac{\text{Total number of persons in each of the Non-agricultural Sub-Classes of the General population.}}{\text{Total number of persons in all Non-agricultural Classes.}} \times 10,000$

Columns 12, 14, 16 & 18 =  $\frac{\text{Total number of persons in each of the Non-agricultural Livelihood Classes of the General population.}}{\text{Total number of persons in all Non-agricultural Classes.}} \times 10,000$

<b>VI Commerce</b>	115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, and 189.
<b>VII Transport</b>	101, 102, 103, 107, 108, 109, 110, 111, and 112.
<b>VIII Other services and miscellaneous Sources</b>	2, 3, 4, 85, 86, 87, 90, 94, 100, 104, 105, 106, 113, 114, 127, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 191, 192, 193, 194, and 195.

The columns of the table are filled in as follows :—

$$\text{Column 3} = \frac{\text{Total number of persons in each Livelihood Class}}{\text{General Population}} \times 10,000.$$

$$\text{Columns 4, 5, 6, 7, 8, \& 9} = \frac{\text{Total number of persons in the each sub-class of each of the Livelihood class in the Census concerned.}}{\text{General population of the Census Concerned.}} \times 10,000$$

Rest of the Columns show the actual returns concerned.

Figures for the 1931, used in this table for Rajasthan and Ajmer States represent the figures of old Rajputana and Ajmer Merwara and have been taken from the Census Report of 1931. These figures have not been adjusted according to present territorial changes.

Separate figures for Non-earning dependents for the Census of 1931, being not available, they could not be made use of in this table. Similarly separate figures for working dependents by Livelihood classes for the Census of 1931 being not available for Agricultural Classes, the corresponding figures in columns 14, 15 & 21 have not been shown, and instead of a single figure representing total Earning dependents of all the Agricultural classes has been shown in each of the columns, against Livelihood classes I to IV.

A significant difference in the figures of cultivating labourers of 1931 Census and those of 1951 Census is due to the different treatment accorded to the working members of the house-holds of owner cultivators (Class I) or cultivators of unowned land (Class II) at the respective censuses. In 1931 they were treated as cultivating labourers; in 1951 they have been treated as belonging to Class I or II as the case may be to which the heads of the households belonged.

**SUBSIDIARY TABLE 5.7**

**Territorial Distribution of 10,000 Self-supporting persons of all Industries  
and Services in the State ( by Divisions ).**

---

---

This table is prepared from the main table B-III (Employers, Employees and Independent workers by Industries and Services Divisions and Sub-divisions).

The figures for the Rural and Urban break-up have also been shown for the State, the Natural Divisions and Districts.

Column (2) shows the actual number of Self-supporting persons engaged in all Industries and Services.

Alternate columns (3) to (21) show the actual number of persons engaged in each of the Division concerned.

Alternate Columns (4) to (22) of the table are filled in by using the formula :—

$$\frac{\text{Total number of persons in each Division of General, Rural or Urban population as the case may be.}}{\text{Total number of persons of all Industries and Services of General, Rural or Urban population as the case may be.}} \times 10,000.$$

**SUBSIDIARY TABLE 5.8 TO 5.17.**
**Territorial distribution of 10,000 Self-supporting persons in the State engaged in various Industrial Divisions.**

---

- Subsidiary Table 5.8 = Primary Industries not elsewhere specified (By Sub-divisions).  
 Subsidiary Table 5.9 = Mining and Quarrying (By Sub-divisions).  
 Subsidiary Table 5.10 = Processing and Manufacture—Foodstuffs, Textiles and Leather and Products thereof (By Sub-divisions).  
 Subsidiary Table 5.11 = Processing and Manufacture—Metals, Chemicals and Products thereof (By Sub-divisions).  
 Subsidiary Table 5.12 = Processing and Manufacture—Not elsewhere specified (By Sub-divisions).  
 Subsidiary Table 5.13 = Construction and Utilities (By Sub-divisions).  
 Subsidiary Table 5.14 = Commerce (By Sub-divisions).  
 Subsidiary Table 5.15 = Transport, Storage and Communications, (By Sub-divisions).  
 Subsidiary Table 5.16 = Health, Education and Public Administration (By Sub-divisions).  
 Subsidiary Table 5.17 = Services not elsewhere specified (By Sub-divisions).

These tables have been prepared from the main Economic Table III (Employers, Employees and Independent workers by Industries and Services Divisions and Sub-divisions).

Figures with Rural & Urban break-up have been given for each of the units used in the tables. In each table column No. 2 gives the total number of Self-supporting persons in each of the Industries and Services Division concerned. Remaining columns represent the actual number of Self-supporting persons engaged in the Sub-divisions of the Division concerned as well as the number per 10,000 of the Self-supporting persons of the Division concerned in alternate columns.

Figures in these columns have been arrived at as follows :—

Total number of persons in each of the Sub-divisions of the Divisions concerned, of the General, Rural, or Urban population as the case may be.

\_\_\_\_\_ × 10,000  
 Total number of persons in the Division concerned of the General, Rural, or Urban population as the case may be.

**SUBSIDIARY TABLE 6.1**

**Persons per 1,000 houses and houses per 100 square miles and comparison with past Censuses.**

---

---

This table is prepared from the main table A-I (Area, Houses and Population) given in Part II-A of Census Report, 1951, and Corresponding tables of the previous Censuses.

Territorial changes in the present constituted units have been considerable since the last Census and it was not possible to adjust the figures of the past Censuses to these changes with respect to number of Houses or Households etc. Some columns against some of the units have therefore been left blank where the relevant figures for past Censuses were not available..

Figures have been shown with Rural/Urban split up wherever possible. Separate area figures for Rural and Urban territories being not available, the figures of "Houses per 100 sq. miles" could not be worked out separately for Rural/Urban areas.

The different columns are filled in as follows :—

Columns 4, 7, 10, 13, 16, 19, 22, 25, 28, 31, 34 & 37 =  $\frac{\text{General, Rural or Urban Population of the respective Census.}}{\text{The number of occupied houses of the General, Rural or Urban areas of the respective Census.}} \times 1,000$

Columns 39 to 42 =  $\frac{\text{Number of houses at the respective Census.}}{\text{Area in square miles at the respective Census.}} \times 100.$

The remaining columns show the actual figures.

**SUBSIDIARY TABLE 6.3.**
**Family Composition of 1,000 Households of the General Population.**

---

This table is prepared from the main table C-I and district table C-I (Households by Size and Composition) given in Part II-A of the Census Report, 1951 and District Hand-Books of Districts, concerned respectively.

The columns of the table are filled in as indicated below :—

Column (4)	$\frac{\text{Column (7) of C-I}}{\text{Column (6) of C-I} \times \text{Column (8) of C-I}} \times 1,000$
Column (6)	$\frac{\text{Column (6) of C-I}}{\text{Column (9) of C-I}} \times 1,000$
Column (8)	$\frac{\text{Column (6) of C-I}}{\text{Column (18) of C-I} \times \text{Column (3) of the Table}} \times 1,000$
Column (10)	$\frac{\text{Column (8) of C-I}}{\text{Column (19) of C-I} \times \text{Column (3) of the Table}}$
Column (12)	$\frac{\text{Column (9) of C-I}}{\text{Column (20) of C-I} \times \text{Column (3) of the Table}}$
Column (14)	$\frac{\text{Column (8) of C-I}}{\text{Column (21) of C-I} \times \text{Column (4) of the Table}}$
Column (16)	$\frac{\text{Column (9) of C-I}}{\text{Column (22) of C-I} \times \text{Column (3) of the Table}}$
Column (18)	$\frac{\text{Column (8) of C-I}}{\text{Column (23) of C-I} \times \text{Column (4) of the Table}}$
Column (20)	$\frac{\text{Column (8) of C-I}}{\text{Column (9) of C-I}}$

Rest of the Columns show actual relevant Figures.

**SUBSIDIARY TABLE 6.5**
**Females per 1,000 Males in Agricultural Classes and Sub-classes.**

---

---

This table is prepared from the main table B-I (Livelihood classes and Sub-classes) given in Part II-B of the Census Report 1951.

The columns of the table are filled in as follows :—

Columns 2, 3, 4 and 5 =  $\frac{\text{Total Females of all Agricultural classes and sub-classes}}{\text{Total Males of all Agricultural classes and sub-classes}} \times 1,000$

Columns 6, 7, 8, 9, 10, 11, 12, 13, 14 =  $\frac{\text{Total Females of individual Livelihood class and the respective sub-classes of the Livelihood class.}}{\text{Total Males of the respective Livelihood class and the respective sub-classes of the Livelihood class.}} \times 1,000$

The figures in columns (2) (6) (10) (14) and (18) show the porportion of Females per 1,000 Males and are not the totals of the sub-classes.

**SUBSIDIARY TABLE 6.6**  
**Females per 1,000 Males in Non-Agricultural Classes and Sub-classes**

---

This table is prepared from the main table B-I (Livelihood Classes and Sub-Classes) given in Part II-B of the Census Report 1951.

The Columns of the table are filled in as follows :—

Columns 2, 3, 4 and 5 =  $\frac{\text{Total females of all Non-agricultural classes and sub-classes}}{\text{Total males of all Non-agricultural classes and sub-classes.}} \times 1,000$

Columns 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, =  $\frac{\text{Total females of individual livelihood class and the respective sub-classes of the livelihood class}}{\text{Total males of the respective livelihood class and the respective sub-classes of the livelihood class.}} \times 1,000$   
16, 17, 18, 19, 20 & 21

The figures in columns (2), (6), (10), (14) and (18) thus show the proportion of females per 1,000 males and are not the totals of the sub classes.

### SUBSIDIARY TABLE 6.7

#### Marital Status of 1,000 of each sex of General Population and comparison with previous Censuses.

This table is prepared from the main sample table C-III (Age and civil condition) given in Part II-A of the Census Report, 1951.

The prescribed table includes comparison of the marital status of the population at the present Census with that at the past Censuses. Due to considerable territorial changes in the present units since the last Censuses, respective figures for the past Censuses could not be worked out. This table could be prepared on the basis of information of 1951 Census only. The corresponding columns for the past decades have therefore been omitted. Figures of marital status for the whole of Rajasthan and Ajmer States for the past Censuses are detailed below :—

#### Marital Status per Thousand.

STATE.	MALES.											
	Unmarried				Married,				Widowed and Divorced.			
	1951	1941	1931	1921	1951	1941	1931	1921	1951	1941	1931	1921

Ajmer State ..	448	470	450	466	485	467	482	441	67	63	68	93
	FEMALES.											
Rajasthan State ..	377	377	348	353	514	491	496	457	109	132	156	190
Ajmer State ..	352	341	317	326	527	521	527	485	121	138	156	189

The above figures for the past Censuses have been calculated on the information contained in Census Reports of Rajputana and Ajmer Merwara of the decades concerned and are based on the population of Rajputana and Ajmer Merwara in the respective years.

The columns of the table are filled in as follows :—

Columns 2, 3 and 4 =  $\frac{\text{Total number of Unmarried, Married, Widowed or Divorced males}}{\text{Total number of males}} \times 1,000$

Columns 5, 6 and 7 =  $\frac{\text{Total number of Unmarried, Married, Widowed or Divorced females}}{\text{Total number of females}} \times 1,000$

### SUBSIDIARY TABLE 6.8

#### Age Distribution of 1,000 Married persons of each sex and Comparisons with 1941 Census).

This table is prepared from main table C-III (Age and Civil Condition given in Part II-A of the Census Report, 1951.

Figures for the year 1941 could not be worked-out due to considerable changes in the territories of the present units. Respective columns giving comparison with 1941 Census have therefore been omitted from the table. Distribution of married males and females for Rajasthan State as a whole and Ajmer State based on the actual figures in the corresponding table of the Census Report of 1941 of Rajputana and Ajmer Merwara are detailed below :—

### SUBSIDIARY TABLE 6.9 to 6.14.

Subsidiary Table 6.9—Infants per 10,000 Persons.

Subsidiary Table 6.10—Young Children (aged 1-4) per 10,000 Persons.

Subsidiary Table 6.11—Boys and Girls (aged 5-14) per 10,000 Persons.

Subsidiary Table 6.12—Young Men and Women (aged 15-34) per 10,000 Persons.

Subsidiary Table 6.13—Middle Aged Persons (aged 35-54) per 10,000 Persons.

Subsidiary Table 6.14—Elderly Persons (aged 55 and over) per 10,000 Persons.

Subsidiary Table 6.9-Infants per 10,000 Persons has been prepared from the main sample table C-II (Livelihood Classes by Age Groups) given in Part II-A of the Census Report 1951.

The Columns are filled in as follows :—

Columns 4, 6, and 8	=	$\frac{\text{Infants—Persons, Males or Females of General Population}}{\text{Total Persons of General Population}} \times 10,000$
Columns 11 and 13	=	$\frac{\text{Infants—Males or Females of Rural Population}}{\text{Total Persons—Rural Population}} \times 10,000$
Columns 16 and 18	=	$\frac{\text{Infants—Males or Females of Urban Population}}{\text{Total Persons—Urban Population}} \times 10,000$
Columns 21 and 23	=	$\frac{\text{Infants—Males or Females of Agricultural Classes in General Population}}{\text{Total Persons of Agricultural Classes in the General Population}} \times 10,000$
Columns 26 and 28	=	$\frac{\text{Infants—Males or Females of Non-Agricultural Classes in the General Population}}{\text{Total Persons of Non-Agricultural Classes-General Population}} \times 10,000$

Subsidiary Table 6.10 to 6.14 have also been prepared in the same manner as Subsidiary Table 6.9 and instructions for filling in the Columns of that table apply to these tables also by substituting the concerning age group in place infants.

Infants per 10,000 persons for the year 1941 for the various districts could not be worked out due to territorial changes since the year 1941. Similarly in Subsidiary Tables 6.10 to 6.14, corresponding figures per 10 000 of the persons in the age group concerned could not be worked out. Such figures for the Rajasthan State as a whole and the Ajmer State have been worked out as detailed below

#### PER TEN THOUSAND PERSONS IN 1941.

	Infants (age 0)	Young children (aged 1—4)	Boys & Girls (aged 5—14)	Young men & Wo- men (aged 15-34)	Middle aged per- sons (aged 35-54)	Elderly persons (aged 55 & over)

**SUBSIDIARY TABLE 7.1**  
**Progress of Literacy.**

---

---

This table is prepared from the Main Table C-IV (Sample), given in Part II-A of the Census Report, 1951. Corresponding figures of 1941 have been taken from the Census Report of that year after making necessary adjustments wherever possible according to territorial changes in the units.

Figures in columns 4, 6, 8, 10, 12, 14, 16 & 18 for the Census of 1941 have been arrived at by adjusting the figures of the former States of Rajputana to the existing units of Rajasthan State. In doing so, it was not possible to adjust the figures of age literacy of 1941, of Mewar State with the concerning existing units. Accordingly figures of literacy as well as population for the various age groups for Bhilwara, Udaipur and Chittorgarh Districts have been excluded in calculating the percentage of literacy for the year 1941 in the Natural Divisions concerned.

To compare the figures of 1941 with those of 1951, the figures of literacy in 1951 given in brackets in columns 3, 5, 7, 9, 11, 13, 15 and 17 have been calculated, excluding the age and literacy returns of the Districts of Bhilwara, Chittorgarh and Udaipur, for the Natural Division concerned.

Rural-Urban break-up for the year 1941, is not available and hence not shown here.

The columns have been filled in as follows :—

$$\text{Columns 2 to 9} = \frac{\text{Number of male literates in the age group of Census concerned.}}{\text{Total number of males in the age group of Census concerned.}} \times 1,000.$$

$$\text{Columns 10 to 17} = \frac{\text{Number of female literates in the age group of the Census concerned.}}{\text{Total number of females in the age group of Census concerned.}} \times 1,000.$$

## SUBSIDIARY TABLE 7.3

## Educational Services and Research

This table has been prepared from the District Index of Non-Agricultural occupations given in the Part I-B of the Census Report, 1951. It shows the actual number of males and females engaged in the Educational services and Research as detailed in columns 1 to 7 and their proportion per lac of the total males or females population.

The columns have been filled in as follows :—

Columns 2 to 7 Showing the actual number of Males and Females under each heading.

Column 8 = Total of columns 2, 4 and 6.

Column 9 = Total of columns 3, 5 and 7.

Columns 10 & 11 =  $\frac{\text{Total number of Males or Females as the case may be returned Under group (8.22)}}{\text{Total number of Males or Females as the case may be.}} \times 100,000.$

Columns 12 & 13 =  $\frac{\text{Total number of Males or Females as the case may be returned under group (8.21)}}{\text{Total number of Males or Females as the case may be.}} \times 100,000.$

## SUBSIDIARY TABLE 8.1

## Number of afflicted by infirmities per lac of persons of each age group in Censuses of 1951 and 1931.

This table is prepared from the main table Local Infirmities, given in Part II-A of the Report. Corresponding figures for the year 1931 have been taken from the Census Report of Rajputana and Ajmer-Merwara, 1931, without making adjustment in the figures due to territorial changes which have taken place since then.

This table shows the number per lac of population in each age group suffering from each of the infirmities namely, Insanity, Deaf-mutism, Blindness and Leprosy, and compares such figures with the corresponding figures for 1931.

## SUBSIDIARY TABLE 8.2

## Number of Females per 1,000 Males afflicted by Infirmities.

This table is prepared from the main table Local Ka—Infirmities given in the Part II-A of the report. It shows the number of females per 1,000 males, suffering from each of the infirmities for each of the Censuses of 1951 and 1931. The figures for 1931 Census has been based on the Census Report, 1931, of Rajputana and Ajmer-Merwara without adjustments, as stated in the fly leaf of Subsidiary Table 8.1.

## SUBSIDIARY TABLE 8.3

## Distribution of the Infirm by age per 10,000 of each sex for the last six Censuses.

This table shows a comparison of Infirm of each sex afflicted by various infirmities under each age group, with the corresponding figures for each of the Censuses of 1891 to 1951. Figures for 1941 being not available as the inquiry about infirmities was not made in the Census of 1941, could not be included.

The figures of the Past Censuses have been taken from the corresponding table of the respective Census Report of Rajputana and Ajmer-Merwara for the year concerned without adjustment due to territorial changes.

807/A	group	6·3 Gota lace shops	12	..
822/A	group	6·4 Wholesale Commission Agents (Adhat-ki-Dukan)	81	..

The total of the Sub-divisions in which these groups fall will tally only when the above figures are added.

### District Index of Non-Agricultural Occupations.

*This Table is prepared from the Sorter's Ticket 2.*

The Sorter's Ticket 2 was prepared in accordance with the instructions to the Sorters reproduced below :—

1. *Preparation.*—You have to prepare Sorter's Ticket 2 only if you have slips relating to any of the livelihood class V, VI, VII or VIII. You are to deal only those slips which relate to self-supporting persons. The slips relating to non-earning dependents or earning dependents would have been separated already and should not be used at this stage.

2. *First operation.*—You have first to deal the slips with reference to the Principal means of livelihood recorded against question 10. Your Supervisor will give you a list of "M/L (Means of livelihood) sub-groups"\* in the order of importance for which you have to sort. Select not more than ten Pigeon-holes and affix labels bearing the names of the "M/L sub-groups" (written out in full) as given to you. The number of M/L sub-groups given to you will generally exceed ten. You should reserve one or two Pigeon-holes for throwing slips which are not covered by the M/L sub-groups shown on the labels. You should then deal the slips with reference to the answer recorded against question 10. In doing so, put together slips containing entries which are written in either identical or very similar terms to each of the labelled "M/L sub groups". If you are in doubt whether an entry, in any case is very similar or not to the labelled M/L sub-groups, consult the Supervisor. Finish the sorting for one set of M/L sub-groups. Then distribute the slips of one set into individual occupations. Now count the number and "enter" the name and number in columns (2) and (3) of Sorter's Ticket 2. Keep the unsorted slips separate. This completes the first stage of the first operation.

3. *First operation (succeeding stages).*—You should then take up the slips that remain to be sorted. You should deal them again for the remaining M/L sub-groups given to you in same manner as in the first operation. The operations should be repeated successively until all the slips are sorted for all the M/L sub-groups given to you. You may find slips where the M/L as recorded in question 10 does not fall under any of the sub-groups given to you. You should deal these slips separately in the manner explained above and enter the name and number in the Sorter's Ticket. This completes the first operation. You should keep separate the bundle for each M/L sub-group.

4. *Special instructions regarding non-productive means of livelihood.*—Livelihood class VIII will contain slips of persons who derive their income otherwise than through Productive activity. They include all self-supporting persons against whom the answer to question 9, Part two, is '0'. They should be treated as a distinct group, not falling under any of the prescribed divisions and sub-divisions; and sorted under the following sub-groups, viz:—

- (i) Persons living principally on income from non-agricultural property.
- (ii) Persons living principally on pensions, remittances, scholarships and funds.
- (iii) Inmates of jails, asylums, alms houses and recipients of doles.
- (iv) Beggars and vagrants.
- (v) All other persons living principally on income derived from non-productive activities.

5. *Second operation.*—For this operation the slips mentioned in Paragraph 4 are excluded. You have to deal the remaining slips with reference to the answer recorded in the second compartment of question 9. Affix labels to three Pigeon-holes, the labels being marked "Employer", "Employee" and "Independent worker". Take the bundle for each M/L sub-group and deal them into the three Pigeon-holes. You will find "म" for "Employer" "न" for "Employee" and "सुद" for "Independent worker" recorded in the second compartment of question 9. If you find that there is no entry you should take the order of your Supervisor. When you have completed the sorting for a M/L sub-group you should count the number in each Pigeon-hole and enter in Columns (4) to (6) of the Sorter's Ticket according as the Pigeon-hole relates to "Employer", "Employee" and "Independent worker" respectively.

---

\*List of M/L sub-groups.—Separate lists of sub-groups should be prepared for use in sorting each of the four different livelihood classes V to VIII. These lists should be compiled on the basis of (a) scrutinizing of entries found to occur frequently in the National Register of Citizens and (b) results of trial sorting by Supervisor and Compiler-checkers.

6. *Second operation (succeeding stages).*—You should take each of the other bundles for M/L sub-groups and deal them in the same manner as in the second operation; you should enter the result in the relevant columns of the Sorter's Ticket.

7. *Conclusion.*—You have now completed all operations necessary for Sorter's Ticket 2. Recombine all the male slips and all the female slips.

If you are sorting sample slips or slips for displaced persons you should proceed to Sorter's Ticket 3.

If you are sorting general slips you should proceed to Sorter's Ticket 6.

After the Sorter completed the ticket and after due check by the Compiler-checker and the Supervisor, the Ticket was handed over to the tabulation clerk to fill in the Group Code numbers in column (1) of the form of Sorter's Ticket 2 given below:—

#### Form of Sorter's Ticket 2.

<i>Group Code Number.</i>	<i>Full name of means of livelihood (sub-groups and occupations).</i>	<i>Total.</i>	<i>Employer.</i>	<i>Employee,</i>	<i>Independent worker.</i>
1	2	3	4	5	6

The group code numbers were adopted from the Indian Census Economic Classification Scheme given in Part II-B of the Report.

#### Accuracy of Figures.

A perusal of this Index shows incredible figures, against certain occupations. This is due to vague entries in the slips regarding the occupations contrary to instructions in some cases and entries with correct details in others. The result was that in the tabulation stage the only slips which contained correct details of occupations were sorted under the correct sub-group and its details, while those with vague entries were placed in the wider groups. Thus we see for example that there are only 11 persons shown as 'Ticket Collectors' who told the enumerators that they are Ticket Collectors, while other Ticket Collectors might have given a vague reply such as "Service in Railway" and they were therefore not totalled as Ticket Collectors. Similarly in the case of 'labour', the slips which contained vague entries like 'labour', 'service', trade, etc. could not be added to the figures of those which contained minute details of labour, service, trade, etc.

Another point to be borne in mind is that not all persons following an occupation have been shown against it in the Index, but those who followed it as a Principal means of livelihood. Thus if a Ticket Collector derived a greater part of his income from rent of agricultural or other land or building and some income only from his service as Ticket Collector, he would not be shown as Ticket Collector.

The third point to be kept in mind is that these figures, represent only self-supporting persons and not those who are partly dependents, thus a young boy who sits at a 'Pan shop' and gets some pay from the shop-keeper which is not sufficient to support him, he has to depend upon his father's income mostly. Such a man would not appear under the occupation "Service on Betel Shop".

The last but most important defect in the figures is due to difference in the terminology prevalent in the different areas of Rajasthan describing an occupation and also partly due to want of exercise of proper care in the tabulation stage that names showing same and similar occupations have been shown as different occupations for example "Halwai's shop" and "sweetmeat selling" have been shown as different occupations. In order therefore to find out the actual strength of self-supporting persons following a particular occupation as their principal means of livelihood, figures against all such occupations should be totalled.

On the whole, this Index removes the defects pointed out in the Census Tables published in the previous Censuses that they do not show actual occupations but their groups only.
