THE BEHAVIOUR AND CONTROL OF RIVERS AND CANALS (WITH THE AID OF MODELS)

CONTENTS

	Page.
SYMBOLS AND DEFINITIONS.	... 1
CHAPTER 1.—Introduction	... 85
CHAPTER 2.—Review of factors controlling flow in alluvial channels	... 85
CHAPTER 3.—Historical note on regime flow in channels in alluvium and divergence from regime.	95
CHAPTER 4.—Meandering of rivers.	... 143
CHAPTER 5.—Behaviour of rivers—as exemplified by the Indus in Sind	... 167
CHAPTER 6.—Exclusion of excess bed material from canals and distributaries	... 217
CHAPTER 7.—Factors affecting flow in alluvial channels—as exemplified by the dimensions of canals in Sind.	283
CHAPTER 8.—Maximum depth of scour at heads of guide banks and groynes, pier noses, and downstream of bridges.	327
CHAPTER 9.—The design of falling aprons	... 355
CHAPTER 10.—Control of rivers by guide banks and groynes.	... 379
CHAPTER 11.—Fluming	... 387
CHAPTER 12.—Points worth considering when designing and remodelling canal and river works.	407
CHAPTER 13.—Methods followed in fixing model scale ratios and overcoming model limitations, based on experience gained at the Indian Waterways Experiment Station, Poona.	427
APPENDIX 1.—List of Bombay P. W. D. Technical Papers and Annual Reports of the I. W. E. S., Poona.	453
APPENDIX 2.—Bed ripples and bed dunes	... 459
APPENDIX 3.—Factors affecting exclusion of bed sand from canals taking off from alluvial rivers.	471
APPENDIX 4.—Equivalent size and specific gravity of stones and blocks in a model.	485
INDEX	

FACTORS AFFECTING FLOW

CHAPTER 7

FACTORS AFFECTING FLOW IN ALLUVIAL CHANNELS—
AS EXEMPLIFIED BY THE DIMENSIONS OF
CANALS IN SIND

	Page.
7.00 Introduction	283
7.01 Discussion of flat gradients of Left Bank Canals and steep gradients of Right Bank Canals at Sukkur.	283
7.02 Effect of Approach Channel on Right Bank Canals	289
7.03 Effect of Approach Channel on North Western Canal	289
7.04 Effect of Approach Channel on bed levels in the Rice Canal	289
7.05 Conclusions regarding improvement of flow conditions in the Right Bank Canals.	290
7.06 Variations of grade of materials exposed on the beds of the Eastern Nara and Rohri Canals (Sind).	290
7.07 The design of canals in Sind—Relation between A and Q	301
7.08 Relation between mean depth and discharge per ft. width	301
7.09 Relation between width and discharge	302
7.10 d : Q relation	309
7.11 S : Q relation	309
7.12 In conclusion	310
